>Say, if a 5 y.o. child can master Morse Code, or a 12 y.o. can enter
>college, how come all you "real" adult, CW hams aren't all
>neurosurgeons, Fortune 500 CEOs, concert caliber musicians, master chess
>players, or renowned engineers. You guys must be sick, lame, lazy, or
>stupid? After all, children can do all this, you guys must have failed.

Your logic escapes me. But, if you're implying that a five year old mastering CW is the exception to the rule, I'll agree. Typically, at age five, we do not have the written language skills necessary to be conversant in CW. Reading, for example, is helpful. But, by adulthood, most of us are at least partially literate, which should be adequate for the purpose of learning and using morse code. Since basic language skills and a desire to learn Morse are all that is necessary, your expectation that we all be "neurosurgeons, Fortune 500 CEOs, concert caliber musicians, master chess players, or renowned engineers" is flawed, since most people of average intelligence have acquired the skills necessary to learn Morse Code at some point prior to adolescence.

So, Oscar, what's your excuse? "Sick, lame, lazy, or stupid?"

1. How many new hams will join the ranks when the
code is abolished?

2. How many new hams are mandated to "SAVE"
amateur radio from oblivion??

3. What happened to all of the new hams licensed since
the VHF no-code license was introduced?

4. What "AWARD" did the amateur service receive from
congress or the FCC in recognition of the influx
of new hams from the new no-code licenses?

5. Does anyone really believe that CW is the real cause
behind the decline of Amateur Radio?

Gary, I agree with 99.9% of anything you ever posted.
HOWEVER, I think toll roads are the stupidest idea
of all time. Gas taxes seem a far more efficient way to
me of paying for roads. Larger vehicles that cause more
road wear even use more gas, so it is basically fair. Plus
the 50% of traffic that does not have a PASS card still has
to slow down to toss coins. AAAUUUUGGGHHHH. I do
however, understand your point that "taxes are not the only
way to pay for a service".

Eric

PS-thanks for all the help on grounding etc last year when I
was installing my station

Jeff ... I suspect that you are using a "home-assembled"
computer. Did you design the circuitry? Did you layout,
etch, and assemble the boards? I'll bet the hard drive
was a real bitch to build :-) Maybe you get my point,
maybe not.

If someone had required you to "build" that computer
the way you build radios, I doubt it would be capable
of adding 2 and 2 :-)

As is usual for you, you grossly overstate your
case in an attempt to make the outcome appear the
way you'd like it to be.

: 5. Does anyone really believe that CW is the real cause
: behind the decline of Amateur Radio?

The decline of Amateur Radio is due to largely the internet making HAM obsolete except for nostalgia sake (though
alot of HAM's who need to feel more important than they are, would argue).
The secondary reason that HAM has declined is due to a alot of old, narrow minded, biggoted farts who think
they are special and OWN the entire 160-80m range.
Fortunately, these people are old, smoke alot and have alot of ailments (probably from years of being exposed
to high wattage RF) so they will all be dead in a few years anyhow.
There are those who carry on the old fart disfunctional attitudes but they are fortunately (and for HAM's sake) outnumbered
by a majority of new free thinkers who not only want change but see the need for change before HAM becomes nothing
but a cute memory, joked about by grandkids while they are playing video games and sufing the net.

It must be the latter three since I didn't make the first cut of the Rhodes or Fulbright scholarships nominations. Maybe I could exploit the sick part and add Agent Orange exposure.

But I'm glad you you agreed with my implicit statement that 5 year olds that know Morse C. are the exception just as child prodigies in any given field are exceptions.

I didn't know that a 13 or 20 wpm CW test was etched in granite. Maybe some of you old timers could give me a history lesson about who chose these magical numbers and why? Is there some reason these numbers couldn't be 12, 10, 5, or 30. Maybe the 12 or 20 wpm are all the code founders could copy!! ;-O

2691. Re: Hollingsworth checks into 3950 Liberty Net !!

Newsgroup: rec.radio.amateur.misc

Mr. Hollingsworth's attention to 3950, which he evidenced by checking in with the legitimate participants (and which, by the way, got him an in-the-face obscene tirade by one of the jammers, Timmy's friend W9ART), is welcome and is something that has been needed for quite some time.

It isn't surprising that several of the jammers faded away rapidly upon hearing him check in. Since self-restraint and other frontal lobe functions aren't exactly their strong point, they'll undoubtedly be back. Let us hope that their malicious interference careers will then be terminated in such a way that they can never be resumed.

By the way, the following article shows that the jamming of the Liberty Net has garnered some media attention -- a federal medium, no less:

(from http://www.trsc.com/cw/cw_981226.html)

It's a transcript of a VOA program called "Communications World." It apparently even included audio excerpts.

---begin article excerpt---

Communications World Script: 26 December 1998
[...]

TAPE: CUT 3 (in full to :05 then fade under to Kim and lose)

KIM: This is the time of year that we look back at the year gone by. The U.S. Federal Communications Commission has been busy visiting and shutting down a total of 260 unlicensed radio broadcast stations, both on FM and on shortwave, during 1998. On December 16th, the FCC announced that it had closed down 19 pirate stations in the Miami, Florida, area. Miami is a hotbed of pirate activity, with an additional 15 unlicensed stations in and near that city shut down earlier in the year.

The FCC has also indicated that it will step up enforcement on the amateur radio bands. Riley Hollingsworth, of the FCC Compliance and Information Bureau, said that a small group of jammers has been interfering with amateur radio communications, especially in the 75 and 20 meter bands -- that's 3.5 and 14 megahertz respectively. The FCC will focus on deliberate interference in the HF, or shortwave, amateur bands, because such interference causes problems throughout the country and even internationally.

An example of the jamming that the FCC seeks to end is aimed against the Liberty Net, which meets evenings on 3950 kilohertz. Participants in the Net generally share conservative political viewpoints and a dislike for President Bill Clinton. Here's a bit of that net, and listen as a white noise jammer comes on the frequency.

TAPE: CUT 4 (in full to :22 then fade under to Kim and lose)

One we damm well do

Two why don't we have to pass 13 wpm and get general if pass
5wpm at some point, becuase the FCC clearly has ruled that Code above
5wpm is not vital for the ARS. All NoCoders are trying to do is get
those ruling more consistantly applied

Mark,

Maybe you've hit upon the answer. If I could only read your stuff
through some static, the text would be spelled perfectly!

Are you accessing the internet via an 80m RTTY link? That thunderstorm
activity must be fearsome with all of those static crashes.

I've gotten ticked in Chicago myself, Mark but not enough to break the
speed limit.

If you received and paid a fine on a ticket issued for doing the legal
posted speed, you are a championship boob.

This is an easy reply: You don't have any idea what you're talking
about. Posted speeds are not simply "pulled out of a hat".

Are you realy unable to read Dave? is that the problem The
ticket said I was a hazard to traffic, that that I was traveling a
legal speed. Two I never mentioned paying fine did I? I did not pay a
fine

2703. Forest Whittaker: World's Dumbest Ham?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-03 00:00:00 UTC
From: jtyburczy@aol.com
Message-ID: <19990503005058.20735.00001432@ng-cd1.aol.com>
Source record: 144135

In the Sunday Night Disney Movie presentation of "Phenomenon" starring John Travolta, sidekick Forest Whittaker plays a not-too-bright ham operator.

He fires up his Yaesu transceiver and calls "CQ Diana Ross", signing his call as "WB6QLF".

Later he calls "CQ Diana Ross" again, then proceeds to blubber details of his personal life to no one in particular.

Still later, he sends straight-key CW in answer to a military RTTY transmission (which switches abruptly to SSTV!) near 30 meters.

I hope Hollingsworth was watching! :)

2704. What RF preamp : Mirage "B-5016 G"?

Mark, connect the antenna to your receiver and tune across the HF bands.
You'll easily hear that about 50% of the QSOs utilize CW.

I don't know who those "73%" are -- maybe they're no-code techs?
No one polled me, so how accurate can that figure be?

>That's not AT ALL comparable...

In your opion it is not. You wether you know it or not are
claiming several things.

One that by right of Morse Skill you have the right to public
specturm that I am denied basicaly because of how I was born. It is
exactly the same as Montergy with but one difference. there are fewer
disabled and they have fewer things in common than blacks did. each of
us

Two that I lack the same rights given in the Constitution to
petion for redress of gievances.

>It'd be more akin to the gays asking for special priveledges (special laws
>to protect them that we wouldn't 'enjoy'), etc... I fully support everyone

Indeed I don't see it that way. to be fair to you I'll mention
the facts that as some people on the NG have made an issue of I am
Bisexaul and a memeber of nochristain religon

>having EQUAL *rights*.. You may not be able to make use of 'em, sure.. Like

Then support ending the preferencail treatment of marired
coupleby the IRS since you favor equal rights or is it the right of
gay marige that you favor, oneor the other is required to be equal
after all?

>me having the right to get a masters at some university and not having the
>smarts to actually accomplish it.. But should I get a special retard-waivor?
>"I think not..."

But you would get help if it would help you. You would not be
denied admision to technical school simply beacuse you you can't walk
to class And you claim to favor equal rights. well why is it then
that you oppose My efforts to invoke the ADA , the law of the land in
the service of my views
>
>Heard some handicapped guy on the radio the other day complaining about how
>the gov cuts back on his handouts if he works for a living at all...
>"Huh?"...

Indeed that is part of the sillines that the disabled do face.
some indeed could work some, but not a lot, if you work at all it is
more than your funding that gets cut often your health care and

theirfore your abilty to live that gets cut. so you dare not try to
work in many cases if you have such benifits. Given the work ethic
driven nature of many americans I have to question both the fiarness
and the sanity (from a production standpoint)

My B3016 did the same thing. An MPS2222 cured the problem. There were actually two of them in the unit, one appeared to be part of the RF sensing circuit, but since I had it open it was easy to replace them both while I was there. You can get these transistors at Radio Shack, they're less than $1.00 apiece.

>You'll easily hear that about 50% of the QSOs utilize CW.

Nope I can't 99 percent of what I hear is voice, but then I
am good at picking voice out of staic I can't even pick out the
seperate QSO when I do hear CW which is rare enough. Indeed all I hear
is AM voice, anywhere in HF

In a ition the HF is not all of Ham radio which was what the
questionin the survey answered.

Adtionaly even if it were true since it is claimed that Code
trough better than voice If 50% of what I heard was CW then far less
than 50 and the total tranmision sent of HF would be Code, since I
well only hear the better voice (and other mode siganals) Therefore
the 50% figure you use does track with the idea that less half of the
QSO made world wide are done with CW
>
>I don't know who those "73%" are -- maybe they're no-code techs?

Hello all,
I have a Dentron Clipperton L forsale. It has new
572b's, new band switch and all of the Capacitors and diodes
have been replaced. I have schmatics too. The amp is wired
for 220 with 100 watts drive 1200 watts out on 80-meters.
The band coverage on this amp is 160-15. I'm asking 500bucs
plus shipping. If you are interested drop me a line. You
can see a picture of the amp as well as my station by clicking
here. http://www.dirtball.com/station.html

Hello All
I have a heathkit SB 104. The rig needs some work. It needs finals (one could use the motarola MRF 455A Its alot cheaper then the heath original final) 10 ohm bias transistor and the control IC for the last digit in the display. Cosmeticly its in good shape. I'm asking 100 bucs for the rig plus shipping. I'm keeping the power supply for my packet operation and I have sold the VFO all I have left is the rig. BTW the receiver in this rig is HOT! If you are interested drop me a email oris@dirtball.com
73 from Oris and thanks for reading

Part of the FCC charter for the ARS is to encourage self-education.
Quite frankly, I don't see CW as such a big hurdle. 5 wpm is slow. It's
easy. If you can't put forth the effort to learn this much, what effort
will you be putting into the hobby? How will relaxing licensing
requirements help achieve the self-education objective?

Are you just looking for equal rights? Or are you looking for someone to
talk to in your digital modes? Outlawing data modes from HF would help
achieve this end by forcing all packets, for example, to 50 MHz and up.
Now we're all equal, and you didn't have to learn a single new thing.

Michael.

The famous Mark Morgan "you simply are either lieing or...". Mark, the
word is "lying" and he's speaking for the bulk of the populace. You
seem to be the exception to the rule. That doesn't mean the man is
lying or that he doesn't know what he's talking about.

> >starting as slow as you'd like them to. The only thing standing between

I am gald you don't see it as a hurdle but I tried for years
to mange it back in the 70's and had no luck with it.

>easy. If you can't put forth the effort to learn this much, what effort

To say You found it easy is one thing. But please (you seem
new around here so you are getting a beter than some of the regular
ProCoders) Don't make claims about how easy it is for others. Frankly
it is insulting for you to claim it is easy for me when I have spent
years on the porhjectand not manged 5wpm. Surely 5 years is enough.

>will you be putting into the hobby? How will relaxing licensing
>requirements help achieve the self-education objective?

How does the current one serve it? Indeed I don't call
learning Morse Code educational anymore than I call learning the Art
of Foil Fencing educational. They both are skills which depend largely
on apttiude rather than entirely on wil or drive. But lets be big and
look at somebody else. A typical person. has fair time learning cw If
he worked a job that left him the same hours everyday. Indeed to use a
friend, with a new tech license. He work 2 jobs He never works the
hours two weeks in a row Yet he manges more on air time than I do. The
Burden involved in learning code clearly increased in today world. The
need for doing as declined. these are simple facts (the debate comes
when you try and say how much)

>
>Are you just looking for equal rights? Or are you looking for someone to

Fine answer and typical of the ProCode positition.

>talk to in your digital modes? Outlawing data modes from HF would help
>achieve this end by forcing all packets, for example, to 50 MHz and up.
>Now we're all equal, and you didn't have to learn a single new thing.

No we are not equal, because you are being allowed to use your
modes on HF and I am not, thereforeyou have been rights beyond those I
have, therefore we don't have equal rights.

BTW while I do think that Morse Coded Cw is as anet thing bad
for the ARS. I don't seek to impose that position on those that

disagree. You as close to a first thought suggest baning other
peopples Modes. Another Common systom of the ProCoders wanting to
control others. You want me to spend my time as you like, but I don't
seek to impose my views on you. I merely ask, nay I demand the same
rights in Public airwaves that you have

2719. Re: Death of Ham Radio

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-03 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <925724757.862.69@news.remarQ.com>
Source record: 144151
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.scanner,rec.radio.shortwave

I dated a girl once who explained her fear of driving. People honk at her, and gesture angrily when they pass her. She honestly believed it was a male chauvinistic thing: woman driver and all that. The short end of that story is that she's a horrible driver. Nobody knew where she was going, or what she would do next. She least of all. Her reaction to the ticket would have been similar to yours: she would overlook what is painfully obvious to everyone else, and claim gender discrimination (or whatever) for her ills.

Mark, from all I've read about and from you, I believe you are a hazard to yourself and everyone around you. Life is passing you by, and you are aware enough of this, even if you notice nothing else. The world will not slow down for you, no matter how loudly you yell for it stop. And you are tired of it.

I sympathize with you, but cannot empathize. You see, I believe that there is no such thing as CANNOT, only WILL NOT. To be sure, in 39 years of trying, there have been times when I had to settle for rationalizing failure. Special recognition in spite of failure, or worse, changing the rules after the fact, acknowledges only abject defeat.

Why are HF privileges so important to you? Seeing as how the rules are what they are, with at least a remote possibility that it's this way for good reason, why don't you find something more suited for yourself? Not all vocations or hobbies are for everyone. As has been pointed out to you elsewhere, the largest part of the amateur allocation is above 50 MHz. Learn a mere 10% of what others need to know, and still have 90% of the pie! How much more fair can things be?

Michael.

You may suggest anything as long as you phrase it in the English
language (or any other recognized tongue). I offer that you have no
idea about what the code requirement is doing.

Your attempts at logic escape me. Nothing is the "BE all and end all"
of ham radio and I've already stated that I don't believe CW is such.
Your reading comprehension seems about as good as your writing.

> >amateur radio but I believe that it is a significant portion of amateur

Yes, in the fine tradition of all engineering.

The safest speed is zero. Your chances of survival diminish from there.
Everything else is a compromise.

Michael.

Dave are you serious? I truely can't tell. I can call anybody
anything I like, wther or not it is to may be to my advantage, or
wether it is subject to somekind of scantion. Like for yelling fire in
a theatre.

Now offering congrats to somebody on not passing code is IMO
simply sick

Pernicous Lies sorry but then how is that you can read Morse
Code if somebody gets a dit and a dah backwards. I am tiold it is not
hard , yet you can not handle the simple leter transposition, One of
the commonest sign of the Dyslexic? You and the ProCoder always refuse
to answer this one. Why is that?

Yeah and suffered through two years doing it. Like Carl I
wonder if he really did pass. He may simply have been passed or if he
was taking MC exams may have gotten lucky and still not known morse
Code. Do you really think he is a better ham and fond of Morse Code
for this treatment?
>
>> Sound s more like hazing than anything else

>aware enough of this, even if you notice nothing else. The world will
>not slow down for you, no matter how loudly you yell for it stop. And
>you are tired of it.

Where the hell do you get off telling me that life is passing
me by. You don't know me you arrogant ass. wake smell the changes you
bview of the ASRS as code tested is dieing around you.
>
>I sympathize with you, but cannot empathize. You see, I believe that

Aagin five years of trying and fial is not good enough for you

>there is no such thing as CANNOT, only WILL NOT. To be sure, in 39 years

Starndard ProCode line. well even if Code were easy , then
does that fact make code testing right? NO

>of trying, there have been times when I had to settle for rationalizing
>failure. Special recognition in spite of failure, or worse, changing the
>rules after the fact, acknowledges only abject defeat.

The how should bad rules be changed? If the people that run
into them do nothing, then the system continues, doing more harm to
more people. I find it appalling that you don't seem to consider that
you might be wrong. I am certianly able to do so. I have done so in
this forum and elsewhere On this Issue frankly I can't see anything
form the ProCode side that gives me anything to worry about even if I

am wrong about how my psotiioons are formed. have you even stopped to consider the possibility of error in your biews on the subject?

>
>Why are HF privileges so important to you? Seeing as how the rules are

How important do you think they are to me? And where do you get off even asking? Indeed that is one of the porblems with the reasons given fro code testing. The SoCalled weeder factor, by what right does the ARS ask that question? By nonthing I can read in Part 97 the constitution of the Us and ITU teraty I question wether or not the government has the right to even inquire

>what they are, with at least a remote possibility that it's this way for

One I don't see even the remote reason you refer to. Indeed I have read the hisory of the requirment and am convinced that it has at best outlived it use in the ARS I am not convinced it was ever all that proper

Two I don't think the rules will stay as they are. I have read stuff from just before the Tech decision and a lot of people were saying nothing like that would happen either

>good reason, why don't you find something more suited for yourself? Not
>all vocations or hobbies are for everyone. As has been pointed out to

Now you want to throw off the bands I do have. gee If I care about the ARS as I am supposed to right and don't express my veiws and fight for then I'm frankly I am bad person but maybe in your eyes a good ham. If I pursue what I belive is right then I am a bad ham but a good person by the standards I live by or I can leave the hoby alltogether.

Gee which of those would reconend?

>you elsewhere, the largest part of the amateur allocation is above 50
>MHz. Learn a mere 10% of what others need to know, and still have 90% of
>the pie! How much more fair can things be?

As the Balcks in the South had have the bus women ahd and so on.

Do you really need to ask how much more fair things can be? I'll answer, by having people like you stopp telling other how to spend their and using the Government to back it up. If you think Morse Code is so then promote your mode. If you feel it is endanger of dying Hell i don't like the mode but I'll support governement grants to help the cuase of not letting it die. What I will not endure quietly is, is to suffer what I feel is wrong. To do so is in my view at least inhuman and un even antiamerican.To ask me to do so is well ..do i need to tell you.

>Your reading comprehension seems about as good as your writing.

Then if it is not that import why is it of more impot than any
other aspect of the ARS. As to my logic escaping you I do realize
that. I wonder wether it is becuase you can't think outside your box
or simply will not think outside the box.

The Very powerful and the very stupid have one thing in comon
they don't alter their views to fit the facts they try and alter the
facts to fit the views. I certainly believe that the problem is that
you are stuck in Morse code Defined box, anything outside must be
rejected. It is possible that am in a different box, but I can't admit
the possiblity. You don't seem to be able to even go that far. Indeed
that diference between i find conforting and disturbing. conforting in
that it means that frankly you hardly met my definifatioon intelgent
life, and so you could be dismissed if I have to. Disturbing in that
you and otthers like you are willing even eager to put your mode ahead
of the ARS of which it is a part

I looked at the site and I'm afraid I'm missing your point completely.
Where's the beef? or should I say, whats the beef? All I see is a
company that sells towers etc. Is this illegal? Why would the fcc be
concerned that this company sells towers? I don't get it.

>were you operating on back then ? Doin' a little bootleggin' are we ?

If you knew anything about HAM radio from back then, you'd remember
that the tech license was essentially a General without the voice. (A
WONDERFUL example of incentive licensing!) It included HF CW
privlidges on 80, 40, 15, and 10 back in 1981. Check the former
call, KA5MJQ.

Personally I operated some 40 but mostly 15. I probably did less
than 10 contacts on 80 in my life, and none on 10 till maybe 1987. In
fact, I don't think I was ever even ON 10 until I bought a RS 10M rig
and ran it SSB first, and jacked around CW a few times, but nothing
serious.

I used a Swan 500CX which I still have. I have the DC chopper
module for it (but only did a little bit of mobile work. Thing drew
40 amps when you tuned!) and the deluxe 117v AC supply with
speaker and a second 117v brick with the rubber mounting feet
for auto use with the chopper bolted to the end in place of the
cable with the Jones connector. I also have the 'semi-break in'
module which is just a VOX module turned to the limit, and the
seconday VFO. And contrary to what know-nothings say, the
Swan 500CX DOESN'T DRIFT! It's just that with a single VFO
if you adjust frequency for tones you end up walking up or down
the band. Once the rig warms up it's pretty darn stabile, and
one HELL of a lot more sensitive than my friends Kenwood
TS-820 was.

Most of my 15M work was loaded to the gutters on my apartment
building. I ran RG-58 though the wall where the cable came through,
then tied the center conductor to a screw I drilled to the down spout.
Then I 'pulled the pin' that held the thing into these 'comb hooks' and
put electrical tape around it, and put it back, effectively insulated.
I
drilled and put a small screw at the juction of the tubes to the roof.
It loaded ok, but incredible RFI.

>who has been paying attention.
>
>Don't bother playing again.

Boy are you a small minded no-nothing!! For YOUR information
the mobile DC-Chopper was a small module that 'chopped' the DC
to apply to the Swan 117CX power supply module so that the
chopped DC would work through the transformer. The Swan power
supplies came in two versions, the 117CX (which was a 117v AC
transformer) and a 220 volt verison (I forget the number). To work
mobile, the 'chopper module' was bolted to the end of the power
supply 'brick'. Normally the AC power cord had a 'jones' plug on
the end. Do you even KNOW what a 'jones plug' is? The chopper
module bolted on and mated to the jones plug, and fed the chopped
12v DC to a low voltage winding on the transformer, allowing the rig
to operate DC, but it did draw just over 40 amps when you put the rig
into tune mode.

YOU don't know squat about HAM radio, or at least about the older
rigs. So take your spouting, Mr Carrol, and YOU go back to CB,

or the appliance operator HAM areas. You'll fit right in at 14.313,
or at 27.185.

BD,

Volunteers will be provided Breakfast, dinner and shower facilities each day, the same as the riders. The ride sets up campsites each night. All volunteers and riders must provide their own camping gear, usually one or two man tents. Equipment will be transported in trucks provided by the ride. Transportation for volunteers will be provided each day. Ham volunteers will ride in sweep vehicles patrolling the ride route, providing point to point communications.

I encourage you to explore the http://www.bigride.com web site. It has answers to the most frequently asked question.

I hope you and your ham friends can join us

Dick / KE7A

But you did have to answer those questions at least not of of
them. It lie to say you did. You could have choosen to skip that stuff
and then pass everything else I think or if not all of that then most
of that list can avoided if wish or if you needed to. You don't have
to score 100% on the written 70 will do even a little les if i recall
how the rounding is done on that

>
>Why was I subjected to this unessesary testing, I have no intentions of
>doing any of those things, It just wasn't fair that I had to answer
>questions on things I'm never going to use. Sheeesh....

The resaon you were asked and really opught to learn a little
about them, Like should enough about CW reconzie it when I hear it is
that you have to share the bands with these modes and knwoing a little
about them is needed to do that. But I don't need to know how to read
a CW to know if I am interfering with it or things about it's
bandwidth etc.

2735. Revive Expired License ?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-03 00:00:00 UTC
From: Bill Rodgers <brodg1@ix.nospam.netcom.com>
Message-ID: <7gk8v0$b39@dfw-ixnews3.ix.netcom.com>
Source record: 144167

I got my tech license about 12(?) years ago. I believe it had to be renewed after 5 years which I did not do. I don't mind re-learning all the information including the code (it was quite a different nut to crack...kind of fun). If I became proficient again and took the relevant tests, could I get my old callsign (N8JJK) back? I now live in Colorado, not Ohio.
Thanks, Bill

2736. FS: FT-736R w/6M and 1.2GHz ++MINT++

Newsgroup: rec.radio.amateur.misc

**** PRICE REDUCED ****
I have a virtually new FT-736R with both 6M and 1.2GHz modules installed.
Orignial owner, purchased about a year ago, one of the last. Absolute mint
condition and perfect operating condition -- used little. Also has FM CTCSS
module installed. To be sold only as complete unit as listed -- the ultimate
in VHF/UHF/satt radios. Serious buyers only please! Asking $1800 FIRM
(original
discounted retail more than $3000) and has both the owner and service
manuals. - dont want to sell, there will never be another VHF/UHF box like
the 736R but cannot keep the investment waiting for Phase 3D.
Expanding shack in other areas. Free 16 element 1.2 GHz yagi (commercial)
with
purchase!! ($100 original cost). Have original 736 box and packing for
shipment!!! --- SHIPMENT COST INCLUDED!!!
Contact Bob / N6MTU / email: magill@ix.netcom.com --- will call and discuss
with serious buyers.

Hi Mark,

Forgive me if you've already tried this route, but it *is* possible for the volunteer examiner team to administer adaptive code tests for people with disabilities. I'm not sure if there are hard and fast guidelines for how "adaptive" the test can be. I believe that the examiners at the Handi-Ham radio camp in Malibu this winter sent the letters one at a time, allowing a certain number of seconds for the examinee to provide a response. (I was on the VE team but didn't take part in the code exams.) If I remember correctly, the time allowed was on the order of ten or fifteen seconds, and the exam was passed successfully with 25 consecutive correct answers; equivalent to one minute of solid copy if the exam had been given at 5 wpm.

We will be providing classroom code instruction and VE testing at the Minnesota Handi-Ham camp this August. If you have a chance to attend, it can be a really great experience. Details are available on the Handi-Ham page at http://www.mtn.org/handiham/

Sorry, that's incorrect. One MUST pass 5wpm to recieve ANY
HF license as the international regulations (the ITU treaty)
now stand. The code 'waivers' only apply to speeds above
5wpm.

David,

Go to FCC webpage..... www.fcc.gov and look up low power broadcasting.
The FCC is proposing a new low power broadcast service. This may be what
you are looking for. Good luck.

It is possible and I have tried to dicuss with the nearer VE's
my doctor has also tried. while a VE here and there is willing to
discus the idea geting a VE recepptive to the all rediculous level of
accomation needed is very hard to manage when you simply don't look
disabled. I can walk through the door and you will not see a thing
wrong with me. It is a proble, a common for those that suffer from
dyslexia, aphasia ADD and other pychomotor skil problems, which rae
some of the least understood disablities. The fact they are treated by
PHD typemostly with the wiaver system based on MD only does not help
matters at all.

>with disabilities. I'm not sure if there are hard and fast guidelines
>for how "adaptive" the test can be. I believe that the examiners at the

indeed the lack of really good guidelines is one of the
problems I expect if I threw enough of a fit I mange to the sort of
accomdation that ADA would mandate, Indeed the ADA mandates would in
my case make a complete farce of the idea of Code testing, since they
rpovide for allowing the full use of the adaptive tech of one's
choice. In my case it could be argued the machine I am using right
now. Indeed were I ever to USE Code it would whople machine based

BD,

Volunteers will be provided Breakfast, dinner and shower facilities each day, the same as the riders. The ride sets up campsites each night. All volunteers and riders must provide their own camping gear, usually one or two man tents. Equipment will be transported in trucks provided by the ride. Transportation for volunteers will be provided each day. Ham volunteers will ride in sweep vehicles patrolling the ride route, providing point to point communications.

I encourage you to explore the http://www.bigride.com web site. It has answers to the most frequently asked question.

I hope you and your ham friends can join us

Exactly.

You'll hear more on an FRG-7 from a RFI-quiet location with a decent
antenna, than you will with a WJ in amongst the powerlines, TV's and
computers of a city.

FS Kenwood TS-440S-AT "MINT CONDITION" +Filters +PowerSupply +Speaker

Kenwood TS-440S-AT
+PowerSupply
+Speaker
+ 2 Filters

~ Mint Condition
~ Single Owner
~ Low Use

Package includes the following:

TS-440S-AT - With Built-In Antenna Tuner
PS-50 - Kenwood Power Supply
SP-430 - Kenwood Matching Speaker
YK-88SN - Kenwood 1.8KHZ SSB Filter
YK-88C - Kenwood 500 HRZ CW Filter
SM-TS-440S - Kenwood Service Manual
OM-TS-440S - Kenwood Operating Manual
Receipts - All HRO original purchase receipts encluded.

This rig is in factory new condition. It
is complete as listed above and includes
all original Kenwood equipment boxes.
Soon after the purchase of the above rig,
It was replaced with a Kenwood TS-950D
resulting in very low usage.

If you are seriously interested in purchasing
a top quality rig, this is it. $850 + shipping

I'm looking for an HF transceiver to use as a beacon transmitter.

A Kenwood TS-120V would be ideal, but I don't want to spend
much. It needs to operate on 20m and 10W out would be fine.

Make me an offer I can't refuse! I am in New Zealand.

Mail me at as149@detroit.freenet.org

Personally, I have never had a problem with people wanting to
use code because they like it or because of certain advantages in
some situations. What is a complete turnoff, in my opinion,
is the all too prevelant attitude that CW operators are better than
non-CW operators, even when working voice,
and that some folks feel they "deserve" extra priviliges because
they have a skill that is largely irrelevant to ability to use
HF frequencies and serve the public interest well.

2757. Operation Barbarossa "Donkeyboy"

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-04 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990504175658.03557.00002302@ng123.aol.com>
Source record: 143827

The reason why "Donkeyboy" Nate refers to criticim as something used by a "Trotskyite Jew" is because, being an anti-Semite and a 3.950 lover, he's mad as hell over the way the Soviet armed forces kicked German ass as a result of Hitler's ordered invasion on 6/22/41. Do you realize that 8 out of every 10 German soldiers killed in W.W2 were done in by Russian forces. I mean who can deny that many communists were Jews but then again, after living under the brutal anti-Semitic Russian Kings, Queens and Czars, who could blame them for looking for a way out of repression.? Lenin promised but after a while reneged and they met with the same treatment under the nasty commies as they did previously. However let's remember that the USA fully supported the Soviet Union during Hitler's era and with our weaponry and Soviet determination and love of Motherland,the Nazis were slaughtered like the pigs they were. Maybe "Donkeyboy's" a German who lost a ":brave" uncle fighting on the Eastern Front? Or maybe he lost family in the maelstrom of conventional and incendiary bombings over Germany. Lots of Germans were destroyed in those fires but then again, why not?. Germany loved fires, especially in the crematoria of their extermination camps which Ernst Zundl and other liars deny. Okay "Donkeyboy," if making anti-Semitic slurs gratifies you, go right ahead but don't expect Jesus to forgive you. Being a Jew, maybe in your case, he's got a score to settle? >What you have described was motivated by economics more than politics.
>Oil wasn't miraculously discovered but the cartel controlling fell to

Sarcasm is remarkably hard to convey via keyboard. I should have put miraculously in quotes.

>But if it is illegal to drive at 70 mph, you'd still do that because the
>road was engineered for that speed?

Oh, absolutely. And, that's why I made sure I got a car with cruise control. That's exactly my point. If the natural speed of a road is higher than the artificial speed limit, one must make a concerted effort to stay within the limit. If I am driving locally, keeping to the limit is relatively easy, but if I drive long distances, part of me goes into automatic and I drive to what feels comfortable on that particular road. Fortunately, most of the highways I travel have reinstated a limit closer to the natural speed, so the cruise control is mostly to give my ankle a rest.

>Why was a third party study needed? There certainly were studies
>indicating that 55 mph was safer than 70 mph. Common sense would
>indicate it even without a study. Safety was a selling point. The real
>issue was conserving oil.

Because a study needs to be done by someone who has no vested interest in the speed limit in either way. Because I have read studies that show no real increase in accidents (except immediately after a changeover when people were getting used to the speed change). Because statistics can be manipulated by anyone to convey whatever their particular point of view wants.

>Now there is a cheap oil glut. People find arriving sooner at their
>destination more important than conserving fuel or being safe. The
>people and the politicians have short memories. We're burning oil like
>there's no tomorrow.

Here, I'll agree with you. We have deliberately not gotten my husband a new car because his current one (a Pontiac Lemans with 250,000 miles on it) gets 40 miles to the gallon and he commutes 100 miles a day. We used to have a Sprint which got 50 miles per gallon. Overall, I think that cars are getting higher mileage than they used to which is a help. But, until the government decides to work on a really good transit alternative, there's not a lot that people can do about gas usage.

Trent made quite a few good points.

I hear quite a few ham operators talking about the hobby dying. I was recently at an ARRL meeting where this was dicussed then in the next breath it was commented on what *type* of people would be allowed in if the code requirement was lowered. This is the kind of attitude that is driving people away.

I have no doubt that I could pass all the technical test and I am now working on my code. The thing is I have no real desire to do code but I am doing so simply to upgrade my license for the other priviledges.

I've hesitated to get into this, but...

I got my novice when I was eleven, extra at 14 (25 years ago, which I guess makes me one of the "old farts" :). The code wasn't a big deal for me, but that's me - people have different skills, not necessarily better, just different.

I don't have any problem with eliminating the code requirement from a "we had to go through it so you do too" elitist attitude. For me it's more basic; one of the reasons ham radio exists is for emergency preparedness. I believe in an emergency situation I could hack together some sort of CW transmitter out of practically any electronic components that were on hand; tubes, transistors, TTL logic gates, whatever; it doesn't take much just to produce a carrier. I probably couldn't hack together an FM or SSB transmitter, even AM might be a stretch depending on what parts were available. I'd *like* to think that there'd be someone out there who would be able to decipher my transmission.

(In fact, that sounds like kind of a fun contest - give each contestant a random assortment of parts or some random piece of consumer gear, say a boombox, and see who can get a readable signal out of it.)

I'm not a Y2K survivalist, I don't get uptight over nuclear proliferation any more than anyone else does, I'm not expecting the world to end any time soon. Just seems to me that we're better off for having this skill in the community.

He's not my friend either, Nate.
But your actions are undercutting your own case.

If he's done these terrible things, just post the facts
and trust people to draw the right conclusions from them.

When you stoop to cursing and throwing racial slurs at him,
you do damage to yourself and your credibility among the
very people you're trying to reach.

Sure there are real differences between people who are genetically
diverse. But even if you could prove jewishness is somehow "bad"
(which I doubt), using that as a club to beat Doc is self-defeating;
You can't fight society's acceptance of
Politically Correct attitudes and hope to win.
Your readers just write you off as a "hate monger."

Like I said-- If he's treated you badly, just post the facts,
without all the name calling and jew-baiting.
Trust people to judge the matter and treat him accordingly.
You might be surprised at how much farther you get.

I've said enough on this.
Regards,
Dave Stinson

Does anyone out here have any info on manufacturers of rf proof telephones? I live near a commercial broadcast station and have had the phone company come out and put filters on the lines but nothing works. Not that I object to Nat King Cole...but I can't hear incoming calls. One phone is a 46mhz cordless which is useless. I did expect that.. but the other is a line phone. The broadcast station is about 1000 feet away and broadcasts AM and FM, 24 hours a day. I am not sure of their output pwr yet. Any help that can be provided would be helpful. Thanks. Greg.

Nobody is advocating a license for no effort, but advocting a
license where the effort makes sense, but CW IS obsolete (thorugh it's
deathn is only being predicted by ProCoders) so is SSB, and FM. Indded
all ham are pretty much obsolete in hobby that once lead in technical
areas, that is not a good sign. and no ending the testing of CW will
not change that overnight if at all, but ending the stranglehold of
the most obsolete of our modes has to aid us in moving forward

>

I ment the above as a joke. I must have forgotten a smiley face.
If we used the original posters numbers of 13/5 for 5 WPM and
35/13 for 13 WPM, it would make the 20 WPM test run at 52/20. A
little more than I want to even think about right now.

But, you are correct, and I should have mentioned, that the 20 WPM
test is given at a 20 WPM character speed. No Farnsworth to lean
on here.

You are also correct that, W1AW is a good way to practice code and
since I operate 90% CW, on the air QSOs are not a problem.

As I see it, it comes down to this...

While it is true that there are a few (and I mean a FEW) who would like Ham Radio dumbed down into just another version of CB. But this is, by far, nothing less than a tiny minority of the people on the no-code side of the debate. Likewise, now every pro-coder is an old Fuddy Duddy who is stuck in the 50's.

The real problem, that only a few are addressing (like the editors of PopComm), is how this plays to the people who are looking to get into Ham Radio.

First of all, anyone who has a problem with the code, or would rather skip it, is simply pelted with insults. I, for one, was called "lazy" because I was for skipping code altogether. I guess having dyslexia makes me lazy. In order to get a waiver from the code, I would have to spend big money doing to doctors for the paperwork.

Or, I could go no-code. While I am not interested in VHF, I am also uninterested in hearing about how I would not be a "RealHam (TM)" because I am a no-code tech.

Gee, with all of this going on, you wonder why more kids are not getting into Ham Radio ? Unless you fit into some kind of cookie-cutter definition of "RealHam (TM)", you get dumped on coming or going.

SWLing looks a lot better as an alternative all the time. It's rewards, while at times a bit more modest, tends to come at a much more reasonable price.

There was a time when SWL's where the best group for Hams to recruit out of, but that time has come and gone. Ham radio now needs to ask why so many SWL's are voting with their feet.

The civil war in Ham Radio is only acting to turn many people away. I for one do not look for strife, insults, abuse, judgment and childish behavior in a hobby, I look for fun. Myself and others are willing to put forth the effort. But there is a distinct difference between meeting requirements and running a gauntlet of frat-house like initiations.

Yeah, I could pass every technical part of the tests, I could easily learn the proper operating rules. But is it worth it to enter a hobby where anyone who dares disagree with "RealHams (TM)" is lazy, a crybaby, a spoiled cyberkid, etc. ?

Ham Radio has only one place to look for the source of it's
problems. It's called a mirror. People are voting with their feet, my
friends. I am the last person in the world that wants to see Ham Radio die,
but the choice is not mine-

It's all up to the hobby.

When AM came along, many where opposed.

When SuperHet. receivers came along, many where opposed.

When SSB came along, many fought it.

Change is always coming, why fight it ?

The issue is bigger than CW. The real issue is what kind of hobby
Ham Radio has become, or rather, what it has degenerated into. While SWLing
has it's share of silly moments, it has not degenerated into the sort of
malicious, snotty behavior that now appears (from the outside at least) to
be slowly permeating Ham radio.

Perhaps it's because SWL's listen ?

It's safer to go with the flow of traffic than to drive 15 miles
slower. Here, following a rule just for the sake of following rules is not
as safe as breaking it.

In a previous article, commquart@erols.com (CommQuart) says:

>
>1. How many new hams will join the ranks when the
>code is abolished?

Hard to say. The hole that has been dug is awful deep. A lot of
people where turned off some time ago, but I think a good number (in the
long term) is possible.

>
>2. How many new hams are mandated to "SAVE"
>amateur radio from oblivion??

Good question. I will have to think about that one.

>
>3. What happened to all of the new hams licensed since
>the VHF no-code license was introduced?

Perhaps they got dumped on for being second class no-code techs by
the "RealHams (TM)" ? I think the deepening of the war going on now acted
to chocke out some of the possible growth.

>
>4. What "AWARD" did the amateur service receive from
>congress or the FCC in recognition of the influx
>of new hams from the new no-code licenses?

I think it bought time for Ham Radio. Without that influx, I think
MORE bands would have been lost.

>
>5. Does anyone really believe that CW is the real cause
>behind the decline of Amateur Radio?
>
CW alone ? No, not at all. The attitudes reflected by the CW debate
? Yes !

Trent, It sounds like you are very happy as a SWL. Why do you want to become
a HAM if it is:
1. Impossable for you to learn code.
2. Too expensive to get a CW waver.
3. Too much greif and insults from other hams.
4. Full of other people who are Fuddy Duddy's.

Man.... why dont you stay a SWL and forget Ham radio?
Or do you think it would all change if someone would just GIVE you a
license.

Greetings Trent

You get an A+ for reasoned, well-thought out replies in my
book.

Personally, I have never had a problem with the no-code
license, or the elimination of the CW requirements from the
ham exams. What is a complete turnoff, in my opinion,
is the all-to-prevelant attitude that CW is dead and obsolete,
and that some folks feel they "deserve" an amateur license
with no effort on their part.

Regards

Peter, K1ZJH

Greetings Trent

3. Most of the no-coders in this area got disgusted enough
with repeater operation to go and upgrade on there own.
A rather surprising observation.

4. Would like to believe this, but I am not convinced that
strength lies just in numbers.

5. A lot of the problem is brought on the attitudes of those
positioning for the elimination of the code--arguments such
claiming that "code is obsolete, or not used" is only going
to alienate CW operators only further. Some have been some
reasoned points made (such as yours), but others seem to
reflect a lot of hostility towards hams just because they use
CW in this modern age.

> Like I said, NO ONE IN REAL WORLD AMERICA 1999 GIVES A DAMN ABOUT HAM RADIO AS
> MOST HAMS THINK THEY DO. Code, no code, no radio, WHATEVER !

That is exactly true. Most people do not care to know anything about Ham Radio. Even if they did it would seem obsolete compared to cellular phones and the Internet. People are being sold utility phone services, Internet Providers and PCs by marketers that have much more advertising bucks than the ARRL will ever have. So...It is as I have always said ...Ham Radio is a speciallized hobby. For the next century it must become even more specialized. Ham Radio is not for everyone and everyone is not for Ham Radio. The ARRL must resolve itself to understanding that Hams are specialists and do all it can to attract that kind of specialist...If it does not attract that small group of specialists it will attract noone and cease to exist. IMHO it will be a good sign for the survival of Ham Radio if the number of Hams goes down to one tenth of what it is now BUT if the remaining Hams are Technical Specialists or Social Ham Traditionalists. Anyone who wants to be a Ham just to communicate is so ignorant of modern technology that he or she won't be much of a Ham for very long anyway! A bird watching society can not attract people who are not interested in watching birds. Mensa can not attract people with low IQs. AND the ARRL can no longer attract people who just want to communicate. THe remaining attraction to Ham Radio is that it can be an educational TECHNICAL HOBBY and/or it can be a TRADITIONAL social HOBBY but it is no longer the only kid on the block when it comes to communication, PICON, or kiddy fun. Insisting that Ham Radio is what it was even 25 years ago is maddness and will only result in turning people off. Noone cares what Hams did 25 years ago but old Hams like myself and the ones who fall asleap at QCWA meetings.

> Not so much as an audience pan shot of LIMARC ! No name badges, no banner, no
> belt shacks, and no propeller topped beanies.

Hams can not expect to get much attention from being on the Letterman Show. My suggestion is that some No-Code and some Pro-Code Hams get themselves invited to the Jerry Springer Show. Jerry is sure to instigate a fist fight and the public might take some interest in the CW exam debate if the Hams involved tear each others clothing off! Even this might go unnoticed unless the Hams wear colorful underwear and have ARRL tattoos on their butts!

> Just another example that ARRL staffers think the world revolves around them,
> their contests and repeater directory.

Nah...I don't think that ARRL staffers think that the world revolves around them anymore. Many of them have read my posts...AND I certainly don't believe that the world revolves around me just because I am an ARRL member and a Ham.

If we want the world to appreciate the ARRL we should set up a new international time system. We shouldn't use GMT that starts in Greenwich, England. We shouldn't use Internet Beat Time that starts in Biel, Switzerland. We should use NUT time that starts in Newington, CT (ARRL Hq.) and it would be NEWINGTON UNIVERSAL TIME for all Hams who want to believe that the world revolution starts at W1AW! Then we could all get lots of international publicity by being recognized as up-to-date RADIO NUTs instead of old timers!

PLEASE keep thinking,
Hams need more classes,
I never met a Ham I didn't like,
Bob Wex w2ilp (Ignoring LIMARC Publicity?)

>an axe to grind to take his place. 73s

You may call yourself a "lowly CBer," but it looks
like you have more sense then a lot of hams these days.

Radio loonies have been around since spark and
will be around as long as mankind warms the ether.
The names and frequencies change but one thing
forever remains the same:
They are only as big a problem as we make them.

The vast, vast majority of QSOs on the ham
bands are "straight," normal conversations.
Did you ever see a thirty-post long
thread on those good operators?
No- but Rich and Doc
get more press then Kosovo, for God's sake!

By focusing attention on the few nut cases,
we make a minor annoyance into a major problem
and give them the infamy and attention they crave.
Stop making them the "stars" of ham radio
and they will dry up and blow away.

Go listen to a good technical conversation on 3768 KC.
Talk with someone about weak signal work on 189 KC or 432 MC.
Do ANYTHING but sit on 14.313
wringing your hands over Rich and Doc.
In the big picture, they're less then nothing.
Stop wasting the precious, irreplaceable minutes
of your life worrying about them.

73 DE Dave Stinson AB5S
arc5@ix.netcom.com

And I still say we are going to rue the day
we demanded the Feds step in
and wipe our snotty noses for us.

AF2Y writes: good show Dave. You don't like me or Rich? That's fine. You have
every right to express your dislike and you're a MAN because you have
the guts to sign your name to your thoughts. Will I ask that your letter be
taken down like these crybabies who post and then bitch. NO WAY. Write what you
want Dave and more power to you and God bless America and our freedoms.

>about. Posted speeds are not simply "pulled out of a hat".

Well, actually, no, they are not "pulled out of a hat", however they were (and are) to some extent politically motivated. The speed limit was originally dropped to 55 back in the 70s in response to the oil/gas crisis of the time. Eventually more oil was miraculously discovered, but neither the speed limit nor the gas prices ever recovered (and wasn't I thrilled to have this all happen just when I got my driver's license).

The problem is is that roads were engineered for optimization to specific speeds and it was/is almost natural to drive at those speeds (if you have a road engineered to be comfortable at 45, you tend to drive around that limit, if it was engineered to 70, you tend to drive closer to that. Wow, miracle of miracles...revenue!!! Now, I'm not saying it was solely the ticket money that prompted the reamining at 55, they tried to claim it was safer (despite not having any valid third-party studies to back it up). Eventually, the politicians have given way to the people on this one, so the limits are starting to come back up.

I second that. A well thought out statement on the code-no code issue. I operate almost 100% CW on the HF bands and on sattelites but I am more that a little disappointed with all the name calling and foul language used by both sides of this issue.

On another note, PLEASE don't cross post this discussion to the rec.radio.amateur.space group.

Cross-posted to: rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.misc

YOU were the one who said no code. That's the point, and that's why I classified your comment as an asshole comment. He may have known or heard about J-Poles, but maybe wanted to be clued in on something he heard as 'new'. His message could also be troll bait.

Driver's license tests and stop signs, huh? A better ARS analogy would be passing his Tech license, and then asking why he can't transmit on say police frequencies. That would be evidence of a failure in the testing system. But I hear many different terms for things, and if this newbie was unfamiliar with a vague term like 'wire antenna' or God forbid he was asking for clarification of what he thought does not prove any level of stupidity to me.

I saw some very helpful replies to his question, but not yours. Give a newbie some slack. I thought that's what the Novice and Tech classes were in the ARS to do...LEARN. Hopefully with help from those more in the know. Questions are never stupid. Actions without knowledge or bothering to ask ARE.

Anybody can be an asshole. Myself included. I did not call you an asshole, but I said your statement was an asshole comment. Because it was. If someone claims the same about my statement(s), I am at least man enough to examine them further.

You are right. Email is easy to hide behind. But that is not my motivation here. And yes, face to face, I would challenge you on this comment. If I make a similar one, and someone else says "Hey, that's an assholish thing to say." or "Why am I being such a dick?" Sure, I'd be offended. But once I got over the 8th-grade emotion of it, there might be some validity to their reaction.

BTW, show me a ham that knows the answer to every possible question about Ham radio. Hmmmm....guess we're ALL "Stupid Assholes"....

Another BTW....my ISP can't seem to fix their mail server. For weeks! Therefore, I am on DejaNews till they fix it.

Til then, I am incognito.... :) I am on the QRZ CD-ROM. With a little smarts, you could figure out which Ham I am, Dr. Seuss...

Heck if you think you need to have guns...You should have some in every room of you home; ready and waiting for the intruders. You should especially have lots of them in your bathrooms because you might not be wearing your usual holsters there. I figure that the odds of me needing a gun and being able to protect myself or anyone else or my property with the gun is almost as farfetched as it would be to have a microwave dish ready for ET Saturday night comedy broadcasts. Keep your ammo dry. Lock up your guns so the intruders or kids can't get them...better yet lock them up so good that even you can't get them without an uncommon password. Be ready for anyrthing...Who knows?...Perhaps the British, the Indians, the Mexicans or the Yankees may rise again...Or is it some other group that you fear? No offense meant... You wouldn't shoot this unarmed balding old guy with eyeglasses...or would you? Please keep thinking, I never shot a man I didn't like, Hams need more classes but not more guns, Bob Wex w2ilp (Infatuated Loaded Pistols?) -- .- -..- .. --

I wasted my time learning CW and getting a general lisense. HF is
overwhelming used by fuddy-duddies who use it to talked about health
problems. Or re-re-re-hash tales of WWII. What a bore.

The fellow is smart to stay away till the CW requirement is dropped.
Yes, things will change when HF priviledges are GIVEN away, thank god.

Howdy..I'm "Mike not Mic"!

This radio is in great shape...just had service from Kenwood to include new lithum battery. It's 2m/70cm and you can add another band and make it a tribander.

What I want is: two mobiles 2m/2m or 2m/6m
if you are offering two 2m it must be a combo or one of the following models.

Kenwood 261
Alinco 150
Icom 2100
Yaesu 2200, 2500
Azden (what ever the 50 watt 2m models are)
Or if you have a 6m IE: Azden 7500 or Alinco DR M06th instead of one of the 2m mobiles that will work too.-

All request and replies must come via my e-mail.
Don't get me wrong offers are fine but, don't bother to talk cash!

Howdy..I'm "Mike not Mic"!

Quit hiding behind the flag. It won't hide the lies coming from your miserable Trotskyite jew mind. That's why you are known as Dr. Hate. Nobody in their right mind would give their name to a vengeful hate filled jew like you. Is everyone supposed to believe that you have quit writing hateful letters to employers, churches, community leaders and fraternal lodges? Are we supposed to believe you don't write to other hateful jews and give them the names on your hit list? When did you turn over a new leaf? When did you decide to stop being a jew? You must think everyone is as crazy as you are. The is only one reason you have your call and name plastered all over the newsgroup. It isn't because you are brave or have anything worthwhile to take credit for. It's because you are a demented little jew who wants the whole world to see how much he has suffered. Pity the poor jew who is a defrocked dentist! You want everyone to think you are another suffering jew who has been singled out for retribution. Wrong! But never fear. You'll find a few recruits in here. There are always a few bleeding hearts ready to believe your lies. If you are looking for pity then you'll get none from me. I can't wait for the day when you stand before a man like Kevin Strom. I want to hear him pass sentence on a jew like you. How sweet it would be to hear the words when he sends you where you belong. I can't wait for the day when I can look down in my inkwell and think about you. I already think of you every time I take a shit. You can't take anything like a man. First you would have to be a man. I have historical evidence that you are not a man. You are a beast that preys upon the gullible and weak. You don't fool anyone who knows who you are and what you are. You're not fooling anyone when you pretend to be an American. Americans don't use your jew tactics. Thanks for bringing your jew shit to amateur radio. We used to have well behaved jews in ham radio who knew their place. They kept to themselves and tried not to be offensive. Nobody even knew they were jews. Most hams were willing to accept them as long as they didn't act up. Then you and your band of criminal misfits had to come along. Herb was right about you people all along. No wonder you jews are obsessed with crucifying Herb. That's always the jewish answer. Anyone who shines a bright light on your evil jew methods needs to be crucified. That's the jew way. That's not the American way.

Nate
AF2Y replies thusly. Okay, now I know why the "donkmeister" hates me. Based on this reply, he's nothing more than an anti-Semite. I should have known it but didn't. What therefore can I expect from a Hitlerite bastard aside from vile contemptible slander? I don't believe I ever attacked old "donkeyboy"on religious grounds. I gather he's a Christian but then again is he? Read St.Thomas Aquinas's description of Christianity. Love, charity, brotherhood, forgiveness etc. "Donkeyboy," you're a disgrace to your faith and so is your idol Strom and everyone associated with your 3.950 thug net. And oddly enough while attacking Judaism you undoubtedly pray to a man who was born a Jew, lived as one and died as one. Huh? "Donk", you're a flaming schmuck. 73, "Doc" AF2Y

: What is a complete turnoff, in my opinion, is the all-to-prevelant attitude that CW is dead and obsolete,
: and that some folks feel they "deserve" an amateur license with no effort on their part.

There is no honor and glory of being a HAM anymore, it is just now a hobby for nostalgia sake.
Therefore we all deserve to be HAMS as there is nothing to gain from using HAM anymore and there
is nothing special about HAM's anymore except inheriting a bunch of narrow minded old farts for new friends/enemies.

>to for the 20 WPM test!!

The ARRL 13 is sent at 18 with probably 13 for spacing. I know, I took my
General tests April 27th and passed the written but failed the code because of
that very reason. I don't agree with that way of doing the code test. If I'm
copying fine at true 13 at home and then go and hear it coming out at 18, well
it sure screwed ME up. I'll bet it screws most people up as well. Another guy
at the same session said the same thing I did, "That was NO 13wpm".
I should have passed that test if it was sent at 13wpm. But it was not.

>But in reality the Farnsworth speed, for the 5 and 13 WPM test,
>I believe is 18. I can't say for sure about the 5 WPM test, because

>of an edge. There is always a nerviousness factor when you sit
>down for the test and this gives you a little bit of an advantage.

I agree, anyone who is about to go for the General code test better be
copying at at least 18wpm or forget it. I believe it's wrong to do it that
way. It's a 13 wpm test, not 18. I don't care HOW far the spacing is.
Now I'm practicing my ass off to get my speed up to at least 17wpm. Shouldn't
have to though.

>I was never very good at CW, until I started studying with the

> have this all happen just when I got my driver's license).

What you have described was motivated by economics more than politics.
Oil wasn't miraculously discovered but the cartel controlling fell to
internal squabbling. Both the speed limits and the gasoline prices have
recovered. Adjusted for inflation, according to Newsweek, gas prices
are now lower than at any time since 1972.

> The problem is is that roads were engineered for optimization to specific
> speeds and it was/is almost natural to drive at those speeds (if you have a
> road engineered to be comfortable at 45, you tend to drive around that
> limit, if it was engineered to 70, you tend to drive closer to that.

But if it is illegal to drive at 70 mph, you'd still do that because the
road was engineered for that speed?

> Wow,
> miracle of miracles...revenue!!! Now, I'm not saying it was solely the
> ticket money that prompted the reamining at 55, they tried to claim it was
> safer (despite not having any valid third-party studies to back it up).
> Eventually, the politicians have given way to the people on this one, so the
> limits are starting to come back up.

Why was a third party study needed? There certainly were studies
indicating that 55 mph was safer than 70 mph. Common sense would
indicate it even without a study. Safety was a selling point. The real
issue was conserving oil.

Now there is a cheap oil glut. People find arriving sooner at their destination more important than conserving fuel or being safe. The people and the politicians have short memories. We're burning oil like there's no tomorrow.

We could certainly use more sharp fellows like you, Charles. What do
you like to discuss--computer games? music videos? navel piercings?
How do you propose we limit the content of conversations? You must have
several proposals for accomplishing that.

> The fellow is smart to stay away till the CW requirement is dropped.
> Yes, things will change when HF priviledges are GIVEN away, thank god.

By the way, you'll have to suffer a few decades of my crowd re-hashing
Vietnam War tales and we've only begun our future of health problems.
Hope you can hang on for the fun to begin.

>amateur radio from oblivion??

>3. What happened to all of the new hams licensed since
>the VHF no-code license was introduced?

They came in by the boat loads. Just look at which class has the most hams.
Look at the class that brings in the most new hams.

>4. What "AWARD" did the amateur service receive from
>congress or the FCC in recognition of the influx
>of new hams from the new no-code licenses?

Lots of hams donating time and resources to emergency communications.

>5. Does anyone really believe that CW is the real cause
>behind the decline of Amateur Radio?

I think it's the biggest cause *today*. Testing for CW isn't needed today
IMHO. I'd rather that people have to learn more theory instead.
Those who WANT to use CW on HF should have to take a CW test maybe.

Note that Gary prefaced his comment with "hams." That pretty much limits
the wavelengths he's referring to, Brian.

If you look on the "slide rule" dial of any older ham-band receiver,
you'll see the 160 meter band scale above all the other bands. Thus, on
any of those receivers, 160 was the top band. The lingo remains even
to this day.

I had a oppurtunity to show off the Power of the TinyTenna!

I was a another Ham's place this last weekend, we were out side playing with my Sangean ATS 909 and the TinyTenna. We thought we would see if the TinyTenna would "overload". We put the aligator clip on a 80ft guy wire holding up one of the guy's towers. What we saw then, we could not believe it! There WAS NO OVERLOAD to the Radio! Remember, this is connected to a system of Guy wires!

I have witnesses to this.

If there was any question as to the effectiveness of Riley Hollingsworth's recent campaign to clean up the Amateur Radio Service, one has to look no further than the recent activity on this Internet newsgroup. Most of the "top troublemakers" of 20 and 75 meters have surfaced here, many within the last several days. I need not mention any names or callsigns; it's plainly obvious as to whom I'm making reference to.

Look around. The prime violators, many of whom have been specific targets of recent FCC investigation and/or enforcement efforts, are now carrying on their personal vendettas via the Internet. Coincidence? Hardly. Expect more of these familiar "problem children" of the airwaves to surface here in the coming weeks as Mr. Hollingsworth's noose tightens around their collective necks and puts a long-overdue end to their illegal activities on amateur radio.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

I'm not spamming, Jeff. Spamming is a deliberate act. I lose 20% of my
already small display if I turn on the "Display Full Headers" option.
The spamming is being done by whoever started the thread. Looks like
I'm going to have to sacrifice 20% of my display to avoid the jerks.

So, ARRL with your big announcements, guess you can spoon feed Riley Hollingsworthless hams to wrist slap but it just doesn't work with Westinghouse, hmm ?

Like I said, NO ONE IN REAL WORLD AMERICA 1999 GIVES A DAMN ABOUT HAM RADIO AS MOST HAMS THINK THEY DO. Code, no code, no radio, WHATEVER !

Not so much as an audience pan shot of LIMARC ! No name badges, no banner, no belt shacks, and no propeller topped beanies.

Just another example that ARRL staffers think the world revolves around them, their contests and repeater directory.

The internet makes amateur radio obsolete for _____ (what?) amusement, entertainment, communication, education, international good will? It never had a purpose except as a vehicle for normal people -- you and I, our grandparents, and our grandchildren -- to explore RF communications. At what point does this become obsolete? Code or no code, why would you wish for that?

Let's see if we can't boil down the rest of your message. On the one hand, there are the "old, narrow-minded, bigoted farts" upholding the logic that keeps the sniveling, whiny little give-it-to-me-now turds off HF. I can see their point of view quite easily. I also believe I see your point of view, and it looks very badly for you. There is no grand vision behind your sniveling. All you want is access to the portion of the bands that stipulates a (somewhat low) standard of knowledge to operate in.

If there's more to your whining than that, your incompletely formed language skills weren't able to express it. After thousands of messages, all I hear is BungHole, Spot, Duslexic, and the hundreds before you, yammering to change the rules for their personal sake. "Let me IN! I can save HAM radio!" It doesn't need saving, except maybe from the likes of you.

Michael.

BungHole <bung@hole.org> wrote in message news:A7F66CFEECEF15B3.BE39DE8F475EF3CA.A396DC733AB0A5C5@library-proxy.airnews.net...
: 5. Does anyone really believe that CW is the real cause
: behind the decline of Amateur Radio?

The decline of Amateur Radio is due to largely the internet making HAM obsolete except for nostalgia sake (though
alot of HAM's who need to feel more important than they are, would argue).
The secondary reason that HAM has declined is due to a alot of old, narrow minded, biggoted farts who think
they are special and OWN the entire 160-80m range.
Fortunately, these people are old, smoke alot and have alot of ailments (probably from years of being exposed
to high wattage RF) so they will all be dead in a few years anyhow.
There are those who carry on the old fart disfunctional attitudes but they are fortunately (and for HAM's sake) outnumbered
by a majority of new free thinkers who not only want change but see the need for change before HAM becomes nothing

but a cute memory, joked about by grandkids while they are playing video games and sufing the net.

Mark, you simply must stop calling people liars. What kind of lie is
the prenious type? Congrats on never manging.
You clearly gave me congrat on never maning to pass a code tes or
upon further reflection you could have playing tease the disabled, if

you think you got a case go for it
>

IYO maybe, but then I don't what goes through your mind, if
anything, after you believe that Morse Code is more important than
anything else in Ham radio How can I judge the rest of your mind

2858. Re: NuMorse @ >13wpm?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-04 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <925811804.748.45@news.remarQ.com>
Source record: 144000

hi hi. Its 18/5 and 18/13. That's one of the major points of Farnsworth,
I think.

I've been using Morse Academy, although NuMorse sounds much better than
the AdLib squeaks MA puts out. I have yet to hear a clean dit come out
of my radio, though, so maybe it's best this way.

Michael.

You dsipute that Code is less nessary today than when it was
the on;ly mode in extence? Gee I admit I thank that was pretty plain
do really disute it. You also deny that world operates at a different
and fastre pace leaving most people less therefore Morse Code is more
of a burden, Gee are you sure you get out at all?

>
>> No we are not equal, because you are being allowed to use your

To you of course it does. but then you refuse to admit you ursurp thmy
rights to that airspace IT is mine by right, and rescrition made on my
access must by be needed, Th at burdern is on you to prove that Morse
Code is needed, not on me to prove it is not. I may look silly to you,
but your claim that you have right to have your mode exaglted ablive
all others makes you look like well a thief, a bigot, and indeed to me
down right unamerican even antiamerican. It is all a mater of point of
view

A little further up the list you will find a new ham who just got his no
code license.
He wants to know what a wire antenna is.

First comes the NO CODE license quickly followed by the NO BRAIN license.

I wonder if "lack of intelligence" can be used to get a medical waver for
the CW test.

Not an OT but asI understand the the Mater the ARRL suggested
12.5 at one point long ago the FCC rounded that 13 to be easier. The
20 rate was twice the 10 wpm rate which was felt at the time to be the
minium rate at which somebody could be called skilled (the 12.5 rate
idea to insure that in off air test that you could 10 on Air) The
whole as I understand is in the ARRL on 160 meters, but that is the
reads digest abridged version, ala morgan

From what I understand the "magic number of 13" was chosen because it is the
aproximate speed that one must actually "know" the code to be able copy.

As you progress you will notice a "plateau" of about 7 and 12, 18, etc.
When you pass these levels you will notice your speed will jump faster and
faster until you reach the next plateau. Beleive it or not, if you keep at
it, 20 will seem slow to you.

Dan/W4NTI

Before leaving on vacation to Florida on Apr.24th, I saw my urologist for my regular prostate checkup and if you fellows over 50 don't also go, uou're nuts. Well anyway, before giving me a digital rectal and taking blood for a PSA analysis, he asked me how strong was my
"STROM." I replied, "KEVIN." to whch he replied,"It's too weak."

Since you posted this in response to my comment as well as sending
it directly to my e-mail box I assume it is personally directed.

I am not a participant on 3.950 but rather a ham that finds the
jamming behavior abhorent. Morons shouting "Faggot" and suggesting
deviant sexual acts are not what anateur radio is supposed to be
all about.

First of all who do you think you are to speak for Mr.
Hollingsworth and his motivations and intentions? His
presence did prevent several of the worst hecklers from doing
their usual. Secondly I have heard a lot of accusations about
what the organized net says but I have never heard this sort
of thing. To be fair it is possible I just am unable to hear
what they have to say living only 60 air miles from Sid the
Lid Mahan and his rousing rendition of Anchors Aweigh and
the Faggot song.

I take no particular side in the political argument I am
just opposed to the jamming. I know that may be just too
simple for you to understand but please try.

> for 13wpm? Sounds sorta impossible to me.. ;)

Well, if that were true, there probably be fewer people passing
the 13 WPM code test. And just think what that would figure out
to for the 20 WPM test!!

But in reality the Farnsworth speed, for the 5 and 13 WPM test,
I believe is 18. I can't say for sure about the 5 WPM test, because
I never took it, but I did take the 13 WPM test in the beginning
of March and it was 18/13. I would recommend that you actually
get proficient at 18/15, however. This gives you a little bit
of an edge. There is always a nerviousness factor when you sit
down for the test and this gives you a little bit of an advantage.

I was never very good at CW, until I started studying with the
Farnsworth method. After only 2 months of practice, I found the
13 WPM test a breeze. I am now working for the 20 WPM test. I'll
give it a try in June.

I have been mainly using Morse Academy and have found out that the
sample CW tests, that it generates, are very close to what you
will hear on the actual test. When I tested, I felt like I was
just sitting at home in from of my PC.

I vaguely remember trying NuMorse, but I don't remember why I
chose Morse Academy over it.

>an axe to grind to take his place. 73s

You may call yourself a "lowly CBer," but it looks
like you have more sense then a lot of hams these days.

Radio loonies have been around since spark and
will be around as long as mankind warms the ether.
The names and frequencies change but one thing
forever remains the same:
They are only as big a problem as we make them.

The vast, vast majority of QSOs on the ham
bands are "straight," normal conversations.
Did you ever see a thirty-post long
thread on those good operators?
No- but Rich and Doc
get more press then Kosovo, for God's sake!

By focusing attention on the few nut cases,
we make a minor annoyance into a major problem
and give them the infamy and attention they crave.
Stop making them the "stars" of ham radio
and they will dry up and blow away.

Go listen to a good technical conversation on 3768 KC.
Talk with someone about weak signal work on 189 KC or 432 MC.
Do ANYTHING but sit on 14.313
wringing your hands over Rich and Doc.
In the big picture, they're less then nothing.
Stop wasting the precious, irreplaceable minutes
of your life worrying about them.

73 DE Dave Stinson AB5S
arc5@ix.netcom.com

And I still say we are going to rue the day
we demanded the Feds step in

If I remember correctly the 20 WPM test is sent at 20 WPM character speed, so it is not as daunting as it sounds. If I may throw my 2 cents worth in, the W1AW code broadcasts and on-the-air QSOs are also great preparation for the tests. Good luck!

In article <372E6AF4.9F9778AE@innocent.com> Kevin Alfred Strom <kevin.strom@innocent.com> writes:

>Mr. Hollingsworth's attention to 3950, which he evidenced by
>checking in with the legitimate participants (and which, by the way,
>got him an in-the-face obscene tirade by one of the jammers, Timmy's
>friend W9ART), is welcome and is something that has been needed for
>quite some time.

It appears that his observations and conclusions are probably similar to mine:
As long as a small group of malcontents such as your "Liberty Net" operates
with the primary intent of pissing people off and using amateur radio
frequencies for a broadcast soap box of political opinion, there
will *always* be catcalls, comments and jammers. Kooks attract other kooks.
The might bust a loonie, who's likely to be replaced by another, ad nauseum.
You certainly wouldn't want our taxpayer money wasted like that, would you?

>By the way, the following article shows that the jamming of the
>Liberty Net has garnered some media attention -- a federal medium,
>no less:

The appropriate medium should be the Jerry Springer show.
Perhaps they also have a ham on staff who could bring a potential story to
their producers.

Anyone else ever notice that in spite of attention to the 3950 kooks, it's the
same old miniscule crowd that appears to participate? On the other hand,
dozens of hams came out of the woodwork to assist emergency traffic handling
for the tornado-stricken towns in Oklahoma last night on 3900, with no
publicity and needing no expenditure of government resources.
And their efforts made the broadcast and printed media, but instead putting our resource in an entirely different light than the Liberty Net creeps and their jammers do.
I spent several hours last night there just reading the mail in case someone
needed health and welfare traffic posted into my area. What were the members of the
Liberty Net doing, besides jerking off at a picture of Ayn Rand?

Dn't overstate your own importance. Your self-serving boneheads aren't a pimple on most anyone's ass, even the Commission's.

CommQuart wrote:

> 1. How many new hams will join the ranks when the
> code is abolished?

Probably not too many. The Internet has more of an attraction.
You can communicate any where world wide, on a whim.
No Technical experience required... sad to say.

> 2. How many new hams are mandated to "SAVE"
> amateur radio from oblivion??

No number of people will save it. From the looks of things, IMHO,
The bands above 2M will probably be sold off to the highest bidder.
It's a matter of $$$ and demand. We don't put any $$$ into the
Gov'ts coffers.

> 3. What happened to all of the new hams licensed since
> the VHF no-code license was introduced?

They got licenced, got snubbed by the HF snobs and went to the
internet. No license needed there and you can communicate in
any form to anyone, with virtually no restrictions.

> 4. What "AWARD" did the amateur service receive from
> congress or the FCC in recognition of the influx
> of new hams from the new no-code licenses?

AWARD??? We are a service, not really to be classifiied as
as hobby. There are services we are actually supposed to provide
to keep the FREE frequencies we use. We don't get awards.

> 5. Does anyone really believe that CW is the real cause
> behind the decline of Amateur Radio?

It's part of the cause. The primary reason is the Internet. Again,
free communication to anyone worldwide with no restrictions and no
technical requirements needed.

Think about this, if all the rules would allow such a senerio......
You can probably get your DXCC in about an hour with AOL Instant
Messenger.
Send your QSL cards to each other via Email and Email them
to the ARRL. Have them checked and back to you all in the same day with
your Certificate.
No expensive Equipment, no putting up antennas, no tests,
state-of-the-art graphics with

sound..... hey I can even talk to and see the other person in realtime video. Can't so that
with SSTV. Certainly faster the 1200 baud packet, on a keyboard to keyboard QSO.

I did some thing similiar to this in the 80's with packet. I accumulated enough replies to a
World-Wide message, that it amounted to a DXCC. Took about a week.

Tell me where is the attraction, to people with limited technical knowledge or
no interest in radio communications?

Just my opinion.

I just don't think that CW should be the decisive factor in issuing
a ticket. Which is more important, 13+ WPM CW or knowing more theory and
practice ? I lean towards getting rid of CW tests, but I could see a 5 WPM
across the board CW test.

But the worst danger is when a young person checks out Ham Radio,
perhaps has an opinion, and gets slandered and insulted. This is what is
turning the kids off.

IMPORTANT CORRECTION !!!!

I wrote "..now every pro-code...is a Fuddy Duddy...".

I meant "..NOT every pro-code...is a Fuddy Duddy...".

This, of corse, the spell checker did not catch. Sorry for the typo
=-)

If I remember to, I use a spell checker. But also, it was a LOT of
work to learn how to type, write or even tie my shoes when I was a kid.

Imagine, "Use your right hand to...Your Left hand to..." when
"Left" and "Right" are almost alien concepts ! As a kid, it took a lot of
work.

Oh well, guess a minor (there are so many people with so much
bigger problems) CNS flaw makes me lazy =-)

My dad (WB8ETH, silent key) could go over 20 WPM. While I thought
it was cool, I just am not able. These things happen. I think CW has a
place, just not the same place it did 30 years ago.

I see your point quite well.

There is an article in an old issue of Ham Radio Horizons that I
read. It was about a group of top flight Hams who hid a secret. Turns out
they where trying to out do each other in working the world bands on one
tube gennys =-). I wonder how many hams might be closet SWL's (ie: Wayne
Green types who might swing their VFO over to 25 Metres once in a while,
but too afraid to admit it) are out there.

Ham radio still has the distinction of being the best way to get
comms going in case of natural disasters and other emergencies. No question
about it. The military is the only group of people who can beat them, but
the hams are a much mroe practical tool for the job.

Lloyd Davies wrote an excellent and eloquent piece about Herbie Schoenbohm, KV4FZ. I read it from A to Z. Lloyd forgot to mention that FZ is a liar,thief and convicted felon. Oh perhaps he skirts the issue, but I'm pinpointing the man's lack of attributes. FZ concocted the entire rationale for attacking Intercon; that net's been on since 1960 and has done a great job saving lives. In the meantime, Herbie and his halfwits tried to prevent a rescue operation to the vessel TIKI and medical assistance to a dying child in El Salvador. Schoenbohm and his rats have done everything to disrupt amateur radio and one of their most sinistere methods has been to state that Intercon was run by Jews in order to steal money from phone companies. Then FZ goes out and steals access numbers from the Caribbean Automated Long Lines System in order to make long distance calls while having others pay for them. That's fraud which brought in the Secret Service and the rest is history. The man's a convicted felon who has always refused to take any of the responsibility for his own deceitful actions and by lying to Administrative Law Judge Edward Luton, he sealed his fate in amateur radio. The clock is ticking and it's just a metter of time before the Appellate Court in D.C. upholds the FCC's decision to not renew and it's goodbye Hoibie. Either Rich or I will be holding a farewell barbeque for the s.o.b. and Mr. Davies is invited, AF2Y Doc

On Tue, 04 May 1999 23:20:38 GMT , G. G. spewed forth to rec.radio.amateur.misc:
:G G H>Hi all,
:G G H> Looking for a computer program that will allow me to inpute a tone
:G G H>frequency, say 700 Hz , and a duration for up to three tones and play it
:G G H>back.....be useful in making up some custom courtesy tones for my
:G G H>repeater.....if someone can point me in the right direction or has such a
:G G H>program....please let me know....thx.....73

If you can find a copy of QBasic (It came on pretty much all the
old DOS machines, and in some Windows Versions have it on the CD)

That will have a command that will let you generate a tone for
a certain period of time through the computer speaker. I believe
it was something like:

sound 1000,2000

which would put out a 1000Hz tone for 2000ms. I'm not sure, but
the help file should be just peachy in pointing out the syntax
for the command.

Yes boy's and girl's....here are the BARF/Stumpers totally ignoring the
content of the post. All they are interested in doing is attacking Rich.
Never mind that it has NOTHING TO DO WITH THE POST AT ALL. But then we
have all come to expect this sort of thing.

For what it's worth, yes indeed Al, K4OKA was running DSB and a rather
high level of carrier. Would you believe....double sideband Amplitude
Modulation?. And he was indeed splattering. Why did he do this? Simple,
the group on 98 had the audacity to move to 97, so they could NOT BOTHER
the on-going traffic on 3900. This happened long before Al showed up on
94.5. So why did he go to AM? Do we really need a answer? I dont think
it takes a rocket scientist to figure what he had in mind.

73 boys and girls.

Hey Greg,

Gess ur just gonna have to move..hi. I have had good success with a older
Radio Shack phone. (RS 43591). Looks like the old princess and costed about
20 bucks each. Also if you can get a older ATT cradle phone and stick a
.01 cap across the MICROPHONE element, that may do the trick. These new
phones are crap and your right, forget the cordless unless you go to the
900mhz jobbers.

Good Luck

Dan/W4NTI

HA HA HA HA They have now made it illeagal for PORKBUT to use his wide signal on 3.901 HAHAHAHA! HAHAHAAHA! HAAHAHAAHAHA! poorpoor PORKBUTT! Where is going to operate now. He isn't welcome anywhere! HAHAHAHAHA! AHAHAHAHAHAHAHA! HAHAAHAHAHAAHA! poorpoor PORKBUT! I bet it ain't Al I bet its a mad PORKBUT! I bet the FCC picked 3.900 MHZ just because of PORKBUT HAHAHAAHAHAHAHAAHA! He is so important! poorpoor PORKBUT!

> failed the code because of that very reason.

I'm sorry you didn't pass the test, but that does bring up
a few things that should probably be mentioned, for others that
may be following this thread.

First, not all testing sites are the same. You need to get in
touch with someone, at the site you are going to be testing,
before you go there. They will tell you exactly how the test
is administered. Probably, the advantage I had was, knowing in
advance exactly how the test was going to be given and that's
what I studied to. I have no doubt that, now that you are armed
with this information, you will have no trouble with the test,
the next time.

The ARRL web site, "http://www.arrl.org", has a information page
where you can find a listing of all testing stations in your
area.

Another thing to know about the CW test is that, after you are
done with copying the code, you will have to answer a 10 question
test. Get seven questions correct, and you passed. There are two
kinds of tests. "Multiple choice" and "fill in the blank". With
the "multiple choice" test, you can miss a lot of characters and
still figure out the right answer. By far, the easier of the two.
With the "fill in the blank" test you need to concentrate when

call signs, names, and other information is being sent.

But there is also no secret about the content of the test. Knowing this in advance also helps out. For example, after the initial group of "v"s, there are going to be 2 call signs sent. Copy these as best possible, but know that these very same call signs are going to be sent again, at the end of the test. If you miss a letter or two, the first time, you can pick them up the second time. There are lots of things that you know are comming. The senders name, the receivers name, the RST, the weather report, type of rig, etc.. There are a couple of key word to listen for, like the the word "my". Every time you hear it, you know there is something important comming, such as "my name is..", "my qth is..", or "my rig is..".

One thing people worry about is the puncuation, the comma, period, and slash. The period is an easy one, but the comma and slash may give you pause. Well, probably you will only hear each one of them once, and you know where there going to happen. The comma is only going to happen when the QTH is being sent, to seperate the city and the state. The slash is most likely only going to happen in the call signs, and you have two chances at them.

Knowing what to expect is half the battle. Other than the word speed, the only difference between the 5, 13, and 20 WPM test is the amount of information. The test is only going to last 5 minutes so there's not a lot of time to fit in much.

Last, but not least, only go for the test when you are fully awake. In my area, there were two testing stations, about the same distance from my home. One gave the tests starting at 7:30 in the evening and the other gave the tests as 8:30 in the morning. I'm a morning person, so I chose the place that gave the early morning test. It makes a big difference.

> I don't agree with
> that way of doing the code test. If I'm copying fine at true 13
> at home and then go and hear it coming out at 18, well
> it sure screwed ME up. I'll bet it screws most people up
> as well. Another guy at the same session said the same thing
> I did, "That was NO 13wpm". I should have passed that test if
> it was sent at 13wpm. But it was not.

You are welcome to you opinion, but for me it was a god send. The character speed of 18 WPM forced me to stop decoding each character and to listen to the sound of it. The extra space between the characters gave me that little bit of extra time, I needed, to process the sound.

> >But in reality the Farnsworth speed, for the 5 and 13 WPM test,

> care HOW far the spacing is. Now I'm practicing my ass off to
> get my speed up to at least 17wpm. Shouldn't have to though.
>

It's still a 13 WPM test, it's just not sent at a 13 WPM character
rate. I found that being able to comfortably copy 15 WPM, at a
18 WPM character rate, was sufficient for me. Others may need a
little more, due to nerves

> >I was never very good at CW, until I started studying with the

> least at 25wpm though.
>

Thank!

I do my studying at 23 WPM, currently, and can always jot down
all the pertinent information. I have found out though, I can't
write that fast. So the solid copy option is probably out for me.

> >I have been mainly using Morse Academy and have found out that the

OOPS! a typeo ------------^^^^

Should have been "front".

> Supermorse is another great program. Generates code tests as well.
>

You are correct, Supermorse is another good program. One of the things
I liked, about Supermorse, is that I can be built on a Unix machine,
as well as a PC. It works just great, on my Ross Hyperstation 20.

Well, talk to you later. Must go practice my CW.

Martin

The FCC didn't pick 3900 just because of "Porkbut." 3900 has been used by
Oklahoma hams for emergencies for years. Why are you so obsessed with Porkbutt
anyway?

2913. Some Thoughts about Sporadic E

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-05 00:00:00 UTC
From: wb5agz@dc.cis.okstate.edu
Message-ID: <7gq3hjglf1@lotus.onenet.net>
Source record: 143755

One of the popular theories about what causes Sporadic E is that wind sheer and thunderstorm activity ionize the E layer which accounts for the routine Sporadic E openings this time of year.

I have heard this theory from people who know far more about atmospheric physics than I ever will and it makes sense, but the weather we had on Monday May 3 does not seem to have generated any Sporadic E at all. Has anybody else who may live on the coasts or in Canada or Mexico noticed a tremendous opening this week?

I live about 80 miles North of the devastated part of South Oklahoma City and its suburbs and, on a routine evening, it is possible to weakly hear emergency service signals plus several 2-meter repeaters in the Northern part of OKC. Last Monday evening, the only thing that was unusual from a radio standpoint was a lot of fading in and out of the signals from Oklahoma City. This is fairly normal for unsettled atmospheric conditions, so one would not have known anything was wrong if not for the frantic nature of many of the transmissions being heard at the time.

According to National Weather Service personnel, this storm system had cloud tops well above 60,000 feet and was a monster by every possible measure. I think that if any storm system could generate Sporadic E or any other odd propagation, this one should have.

I think that there is still at least one more ingredient to the generation of Sporadic E that we haven't nailed down yet. We should be thankful that we do not get to have such a giant meteorological laboratory set up for us any more often than it happens, but such terrible things do push the limits and the fact that we seem to have had no E(s) tells me that either some factor is missing that would help generate a charged layer or there is some factor that acts to spoil or discharge the atmosphere.

From: Jesper Kristiansen <jkristia@yahoo.com>
Message-ID: <37309148.B2FB42F3@yahoo.com>
Source record: 143756

Where I took the test the different speed is
5WPM = character 13PWM with looooooooong space between
13WPM = character at 18WPM and the space timed so the overall speed is 13.
20WPM = 20WPM.
I practiced 20wpm / 18wpm space 1 week before I went for the 13WPM test, and passed, and then I gave
it a shot for 20WPM, and passed.
One thing I missed was the callsign because of the slant bar. It was a VE3XXX/W6, and that "/"
confused me both times. Another miss was the
temp. I read it as 23, and on of the answers was 23 and another 33, so watch out for the numbers. (I
stille have problems with 2,3 and 7,8).

Not that this is of much consequence to hams... I believe the munitions, cruise missiles more precisely, use onboard inertia guidance systems. I get this from watching TDC, possibly from reading Clancy also, so its far from authoritative.

Michael.

Don't get me wrong-I'm not disparaging anyone but why is it that hams I know in the Hyannis area are constantly seeing Lloyd Montcalm buying bananas? Does someone in his family have a potassium deficiency or is it somehow a staple? Also if someone has back issues of QST, I'm positive that you'll find where the Jolly Green Nazi got hit with a $1,000 fine for intentional jamming. I believe it was in the very late '80s or early '90s when he was hot to trot for his master KV4FZ's plan to disrupt and destroy Intercon. If anyone can come up with that QST piece, I'd be willing to pay big bucks for a reprint., like fifty cents if demanded. Thanks for your attention. If you're a friend I say God bless. If you're not, then I say "gay cockin afinyamin." AF2Y Doc radiosigs@aol.com

Mark, In order for me to comprehend it, you have to write it. You
didn't write what you are now saying. You tacked it on later.

> I wioll not bother with the rest of the drivel of a bigot that thinks
> the spanish speakers should bann from the ARS in america

Again you've managed to say something which I never stated. Reading and
writing are going to be far bigger challenges to you than morse testing
since you'll likely need those skills daily.

You seem to think I dislike a certain group of people. That's not the
case. It is YOU I don't care for. You're THE classic whiner looking

for a hand out. You aren't looking for equality of opportunity. You're looking for a special case to be made for you.

Dan Jeswald is absolutely right. The FCC never should have allowed that drunken crazy sonovabitch Abernethy to ever get on ham radio again because his sole reason for holding a ticket is to intentionally jam. He lost his license once and here's hoping it happens again....FOR KEEPS!

Are you so wrapped up in yourself that you worry what your CW speed says about you? For heaven's sake, grow a skin, learn the code, pass the test, and get on with your life! You're not going to change "the attitude" with whining. I might dare a guess that it's the whining that's objectionable, not so much the actual thought of changing the CW requirements.

To tell the truth, I'm pleased to find a lid bigger than I. I feel I might be able to help him, as others have helped me.

So, who's preconceived notion is stopping you from getting your ticket?

Michael.

>either lieing or don't know what you are talking about

Judging from this and other hints, I gather that you must be at least 30 years old.

> Do you know why I read this dreck Dave. let me tell you. the
>fact you ProCoders can only respond by attacking my duslexia and not

Granted, dyslexia was probably not recognized as you were growing up. However, since then great strides have been made in treatment and training. My niece (who is 10) has an extremely bad case of dyslexia, yet she handles it better than you do.

Since you are aware of your problem and do not choose to use a spell-checker or any effort to make your messages clear, you are showing a) disrespect for yourself, b) disrespect for your correspondents; and c) giving the distinct impression that you are hiding behind the dyslexia as a shield.

>call signs, names, and other information is being sent.

Hi Martin,
This much I know already. The local team uses the ARRL tests, with fill in the blanks. That doesn't bother me actually. It's a better test to see how well you DO copy.

>But there is also no secret about the content of the test. Knowing
>this in advance also helps out. For example, after the initial
>group of "v"s, there are going to be 2 call signs sent. Copy these
>as best possible, but know that these very same call signs are
>going to be sent again, at the end of the test. If you miss a letter
>or two, the first time, you can pick them up the second time.
>There are lots of things that you know are comming. The senders
>name, the receivers name, the RST, the weather report, type of rig,
>etc.. There are a couple of key word to listen for, like the
>the word "my". Every time you hear it, you know there is something
>important comming, such as "my name is..", "my qth is..", or
>"my rig is..".

I noticed that the calsigns were sent right away. This through me off bit.
I expected a couple of CQ's first. The rest I knew about.

>One thing people worry about is the puncuation, the comma, period,
>and slash. The period is an easy one, but the comma and slash
>may give you pause. Well, probably you will only hear each one
>of them once, and you know where there going to happen. The comma
>is only going to happen when the QTH is being sent, to seperate
>the city and the state. The slash is most likely only going to
>happen in the call signs, and you have two chances at them.

>Knowing what to expect is half the battle. Other than the
>word speed, the only difference between the 5, 13, and 20 WPM
>test is the amount of information. The test is only going to last
>5 minutes so there's not a lot of time to fit in much.
>
>Last, but not least, only go for the test when you are fully
>awake. In my area, there were two testing stations, about the
>same distance from my home. One gave the tests starting at
>7:30 in the evening and the other gave the tests as 8:30 in
>the morning. I'm a morning person, so I chose the place that gave
>the early morning test. It makes a big difference.

I did mine at about 10:00am, I was wide awake. Good point.
Next try I will tune up a bit just before the test as well. A few minutes of practice. I know they give you a minute of practice prior though.

>> I don't agree with
>> that way of doing the code test. If I'm copying fine at true 13

>> at home and then go and hear it coming out at 18, well
>> it sure screwed ME up. I'll bet it screws most people up
>> as well. Another guy at the same session said the same thing
>> I did, "That was NO 13wpm". I should have passed that test if
>> it was sent at 13wpm. But it was not.
>
>You are welcome to you opinion, but for me it was a god send.
>The character speed of 18 WPM forced me to stop decoding each
>character and to listen to the sound of it. The extra space
>between the characters gave me that little bit of extra time,
>I needed, to process the sound.

I see your point.

>> >But in reality the Farnsworth speed, for the 5 and 13 WPM test,
>> >I believe is 18. I can't say for sure about the 5 WPM test, because
>> >I never took it, but I did take the 13 WPM test in the beginning

A roller skate has some of the aspects of a car, but that doesn't mean that a roller skate is a car. Languages have both vocabulary and grammar, Morse has neither. It isn't a language, it is a code. Hence the term "Morse code", as opposed to "Morse Language".

> have to mentally translate to the English "two."

So apparently we have the makings of a universal translator device here.

Suppose we have a block of Russian that we need to be translated into English. All we do is have a computer send the Russian in CW and let Mr. Herman receive it. Out will come -- must come -- a perfect English translation.

Even more dramatic: an archaeologist unearths a tablet of some ancient language. Rather than waste years of effort and careful analysis, this archaeologist keys up his radio and sends the text to Mr. Herman. A moment later, the history and life of this long lost culture is revealed!

Yet that pales in comparison to this feat: the NSA is intercepting some CW communication from a terrorist ring leader to his cohorts around the world. They can receive the message and set their super computers to work on the problem for the next 50 years. Or DIRNSA can call Mr. Herman and (politely) ask him to tune in and provide the plaintext. In real time.

CW is, after all, a language. And Mr. Herman claims he can understand this language.

Probably one of the FUNNIEST bits I've read in this NG in awhile.
All the more relavant as SWL'ing these frequencies adds to the color.
Thanks whoever wroth this bit! It should be etched in bronze and
displayed under glass at ham swap meets like Dayton Ohio.

A sure bet. Although I am an SWL, and have NO desire to go for
a ham licence as long as stooo-pid code is required for HF, I have
been to several ham radio swap meets and I've never seen more
fat-assed, chain-smokin porkies waddling about like bloated ducks in any one
place bar none! What is good about this is most of these Fatso's
will probably be dead of heart failure in short time and I'll be able to
pick up their radio gear for HF SWL use on the cheap from their
wives who will no doubt be glad to get all that %@^(+! junk out of the house.
Case in point I paid a visit to a recently ex-pired ham's place and picked
up about 3 Grand worth of HF/VHF gear from his ex who let me have the
whole lot for $400.00 (including a new-in-the-box Yeasu FT-100)

Just keep a-droppin like flies all U fatso with portables on your stretched belts!

2945. Amateur Radio Jammers Become USENET Spammers

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-05 00:00:00 UTC
From: rfenforcer@aol.com

If there was any question as to the effectiveness of Riley Hollingsworth's recent campaign to clean up the Amateur Radio Service, one has to look no further than the recent activity on this Internet newsgroup. Most of the "top troublemakers" of 20 and 75 meters have surfaced here, many within the last several days. I need not mention any names or callsigns; it's plainly obvious as to whom I'm making reference to.

Look around. The prime violators, many of whom have been specific targets of recent FCC investigation and/or enforcement efforts, are now carrying on their personal vendettas via the Internet. Coincidence? Hardly. Expect more of these familiar "problem children" of the airwaves to surface here in the coming weeks as Mr. Hollingsworth's noose tightens around their collective necks and puts a long-overdue end to their illegal activities on amateur radio.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

Now that's about the best dialog I've read on this subject! My close friend was a tech writer then salesman for WJ and he has told me that that receiver is mediocre, at best. He said one Fed agency got fed up and bought Icom R72's (?). Look very hard at the construction, then look at the "competition". It's dramatic! Maintenance is a nightmare as is the cost of replacement parts. He has one but its sits there, covered with dust!!

OK
I did this with Jerre Ferguson, W2YRQ who was an Engineer who worked for
GE.
GE built the Tektite habitat. Tektite II was an undersea experiment
where people lived on the bottom (50') for weeks in nitrogen saturation.
This was Summer 1970 on St. John, US Virgin Islands. Doing ham radio
during a break between missions was Jerre's idea. I got to operate too,
increasing the possible number of contacts. The rig was a KWM2 and
SB220. We hauled the gear down in paint pots and ran the coax out the
hatch and up to a support barge on the surface. On the Barge was a Hy
Gain 14AVQ trap vertical. we also dropped some unwrapped wire cable in
the salt water to help the "ground". So we have this vertical sitting on
a steel barge in the Caribbean. As I recall it worked quite well, but
decompression limits kept operation to an hour a day apiece.

Don't be so quick to congratulate yourself, Doc.
I've had some talks with him in private email,
asking him to knock-off the hate speech.
He's decided to take a breather and cool down
so he can present his facts without the inappropriate rancor.
Maybe he'll chill and maybe he won't.
But he's trying to cool his anger enough to talk sense.

His anger at you, personally, stems from several instances
of jamming he alleges you've done. More important is his deep
anger against all jewish people. He has been the target of
extreme abuse and physical attack by gangs of jewish
youths while attending a school dominated by jewish,
hispanic and black kids. They assaulted and nearly
blinded him-- because he was a white european.
Because he's "goyim"- which your sacred texts teach
is lower then a worm and without rights of person or property.

Well... It's not your fault that Hebrew religious texts
have some garbage in them; I'd hate to be held to
some of the junk in the Christian scriptures.
But some people- Jew, Christian, Muslim, whatever-
will use the junk as an excuse to vent their sadistic urges.
His anger may be improperly aimed at all jewish people,
but it's very understandable.

So not so fast, Doc.
The guy is just trying to clean up his act before
giving you another salvo.

That's ok we can argue all we want about keeping the code test, but something needs to be done to bring people into amateur radio not keep them out. Soon enough all the brass pounders will be gone and then the FCC can sell of the rest of the ham spectrum. How soon we have forgotten about 220 MHz.

This would seem to be the best option, a crystral controlled transmitter will be cheaper, and likely consume less power, if optimised for the purpose. Also, less complexity means less things to break while it's stuck on its site. :-)

THIS eruption of pure hate has spewed forth from a
supposedly "poor, innocent, persecuted, self-chosen Jew"?

Innocent and persecuted my ass! Let us never forget this
pus bag's Khazar Bolshevik ancestors who gave us close
to a century of murderous, evil, satanic COMMUNISM,
which, by the way, has resulted in the murder of so many
White Christians that it makes the so-called Holocaust (tm)
look like a tea party!

Is it any wonder the Nazis hated the Jews? Can't say I blame
them, either.

AF2Y, take your hate-filled, anti-Christian Talmud and shove it up your ass! (Assuming your boyfriend has vacated said orifice for the time being).

Hey "Donkeyboy," don't you have a good Jewish delicatessen in Atlanta? If so, go in and get a bowl of matzoh ball soup, a hot pastrami sandwich and a bottle of Dr.Brown's celery tonic; sit back, eat hearty, grepz a few times and forget about your so called "Jewish menace." Regadring Waldheim, he's a footnote to history; a shamed disgraced guy who had to step down from public office in Austria. That's your hero? Remember that for every Jew murdered in extermination camps, a German civilian lost his or her life in either allied bombing raids or by artillery fire. Look it up-6,000,000 Deutschen bit the dust. And you recall the old days in Madrid? Don't make me laugh. You weren't around in 1936. In fact, you're missing now! Go to church "Donkey" and pray for forgiveness. I'm sure that one cleric out there must think you're worthwhile enough to save. I don't. And I know where you live...what's your call, coward?

Misek at the Mic

A Ballad of the Republic, Sung in the Year 1999

The outlook wasn't brilliant for the Hudson nine that day; The score stood four to two with but one inning more to play. And then when Whiten died at first, and Doc Hate did the same, A sickly silence fell upon the patrons of the game.

A straggling few got up to go in deep despair. The rest Clung to that hope which springs eternal in the human breast; They thought if only Mad Misek could but get a whack at that-- We'd put up even money now with Misek at the bat.

But Whiten preceded Misek, as did also good Doc Hate, And the former was a lulu and the latter was a cake; So upon that stricken multitude grim melancholy sat, For there seemed but little chance of Misek's getting to the bat.

But Sid let drive a single, to the wonderment of all, And "Them Faggots", the much despis-ed, tore the cover off the ball; And when the dust had lifted, and the men saw what had occured, There was Whiten safe at second and Doc Hate hailing the Third.

Then from 5,000 throats and more there rose a lusty yell; It rumbled through the valley, it rattled in the dell; It knocked Misek, mighty Misek, was advancing to bat.

There was ease in Misek's manner as he stepped into his place; There was a fix on Misek's bearing and a smile on Misek's face. And when, responding to the cheers, he lightly doffed his hat, No stranger in the crowd could doubt 'twas Misek at the mic.

Ten thousand eyes were on him as he rubbed his hands with dirt; Five thousand tongues applauded when he wiped them on his shirt. Then while the writhing Riley ground his fists into his desk, Defiance gleamed in Misek's eye, a sneer curled Misek's lip.

And now the chrome-covered mic came hurtling
through the air, And Misek stood a-watching it in
haughty grandeur there. Close by the sturdy batsman
the ball unheeded sped-- "That ain't my style," said
Misek. "Strike one," the umpire said.

From the benches black with people, there went up a
muffled roar, Like the beating of the storm-waves on a
stern and distant shore. "Kill him! Kill the umpire!"
shouted some one on the stand; And it's likely they'd
have killed him had not Misek raised his hand.

With a smile of Christian charity great Vic's visage
shone; He stilled the rising tumult; he bade the game
go on; He signaled to the pitcher, and once more the
spheroid flew; But Misek still ignored it, and the
umpire said, "Strike two."

"Fraud!" cried the libertarians, and echo answered
fraud; But one scornful look from Misek and the
audience was awed. They saw his face grow stern and
cold, they saw his muscles strain, And they knew that
Misek wouldn't let that mic go by again.

The sneer is gone from Victor's lip, his teeth are
clenched in hate; He pounds with cruel violence his
fist upon his plate. And now the fed holds the balls,
and now he lets it go, And now the air is shattered by
the force of Misek's blow.

Oh, somewhere in this favored land the sun is shining
bright; The band is playing somewhere, and
somewhere hearts are light, And somewhere men are
laughing, and somewhere children shout; But there is
no joy in Hudson-- Mad Misek has struck out.

Sure I have...but it is not my job to gun them down. It is the job of paid and trained law enforcers. I am not a vigilante or a gardian angel myself.

>Ever been mugged? Ever had your
> home violated?

To tell the truth no on mugging...I was not exactly mugged myself. A drunken Army "buddy" put a loaded .45 to my head but I don't consider that to be a mugging. He was not exactly a criminal and I won't give you the details about what he wanted. My father was a NYC taxi driver and he was mugged many times. He preferred to surrender his money and not carry a gun. IMHO it is better to give free-lance desperate robbers money than to donate it to organized charities or pay doctor bills. It can also be a tax deduction if promptly reported to the police. My oldest son was mugged when he went to see a hockey game in NYC. He was a minor at the time [16 years old] and I wouldn't have let him carry a gun, even if he wasn't. If you can get mugged without getting hurt or hurting anyone IMHO you have shown that you know how to take care of yourself. We call that being "street-smart". Some bad local middle class suburban kids used to paint my home with eggs and spray paint every halloween, Easter, Christmas and also on other recognized holidays. Once they boke the windows on my garage door. They broke antennas and wind-shield wipers off my cars. They eventually grew up to be respectible citizens. I replaced the windows with wood panels and installed automatic lighting and an alarm system. I'm glad I never shot any of the "bad" kids. I now live in peace with their families and the kids, who now have their own children, tell their younguns to respect my property. An old aunt of mine was mugged years ago and fought the mugger. She would not let go of her pocketbook until she received a big gash across her stomach. When I visited her in the hospital she said she was sorry that she didn't let go sooner...but not sorry that she didn't have a gun. She didn't trust herself with a gun...ever since she tried to clean out an AC receptical with a hair pin she figured that anything as complicated as a gun might be as electrifying as that hair pin was in her hands.

And nobody is advocating that you not be allowed to do just that, Richard.
Nobody is talking about eliminating CW - just about eliminating Morse
code testing. Do you think that CW is such an undesirable mode that nobody
would continue to use it after the requirement is dropped?

> snip

There are thousands of citizens every year who prevent and/or deter a
violent crime against themselves or another. They are able to do this
because criminals are scarred as hell of a citizen with a gun because they
know that the citizen will use it. The criminals laugh at the cops because
they know if a cop shoots them, then they, or their family, just hit the
civil lottery...

The bottom line is that if you are the one out of four persons who is the
victim of a criminal attack each year, and you do not posses the will and/or
the means to stop the attack, then you will suffer the results. The police
cannot prevent an attack, but they are pretty good at figuring out who
killed you.

As the saying goes, the difference between a liberal and a conservative is
that the liberal hasn't been mugged yet...

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

.....

>From the Editor's Desk:

Just as the Newsletter was going to press Monday night, we received word that tornadoes had touched down in several parts of Kansas and Oklahoma, causing a trmendous amount of destruction. To keep abreast of the situation, see the FEMA link under the 'What's New on the Web' section.

We have had some problems recently with the harthaven.com server (an equipment failure on the part of the telephone company -- no fault to Listmaster Mark Hartman...) If, for some reason you don't receive your copy of the Newsletter, go to the ACS Website at http://acs.oes.ca.gov and click on the 'EMCOMM Bulletin button'. Our current editions of the Newsletter and EMCOMM Bulletin, as well as archived editions dating back as far as 1985.

Stay safe, everybody -- see you next week ! Dave Larton, Editor

I am the EC for Ozaukee County, WI. Our QZARES group is 54 members strong. We meet the 4th Thursday of each month in the Emergency Management office space.
My past experience is with CAP and USCG-Auxiliary

El Kingston - KC6WVP <kingston@mscomm.com>
Victorville, CA
Assistant Radio Officer for City of Victorville R.A.C.E.S.
Our group works closely with the Victorville Fire Dept, particulary during local emergencies, such as flooding. We use events such as the March of Dimes WalkAmerica, and the Victorville annual Christmas Parade as supplemental exercises, to keep us involved in the community. Last year we provided radio communications for the Air Show at the former George Air Base.

Sean Inggs ZR5BBL <sean.i@webmail.co.za>
Pinetown, KZN, South Africa
Hi there, my name is Sean Inggs and am an official of an amateur radio emergency communications organisation in South Africa. The name is HAMNET incase anyone reading this has heard of it. HAMNET works closely with the Disaster Management Centre in the co untry but also in any national/state disaster any government agency vested with similar aims in times of emergency we are at the disposal of them. HAMNET also has a caravan which can be mobilised virtually anywhere by road equiped with HF, VHF, UHF, compu ters, government radios if needed to communicate with disaster management etc. and more. Some of our members also have the latest radio's, GPS's and visual electronic comms, which help alot for certain operations. We have a website http://welcome.to/hamnetkzn if you are interested in our operations and how we go about them & visit our guestbook. Thank-you kindly.

Cheers and keep well
Sean ZR5BBL
HAMNET Official - Online Media Manager HAMNET-KZN

From: "Ed Ryan - N7VEX" <wvdisast@crossnet.org>

Dave, My heart goes out to the folks at the Jefferson County Comm Center. I had some tough events during my 30 years in the business, but nothing like those that have occured during the past eight years. Thanks for the info on the Cal Aggies (UCD)

Vet School support of Yolo County Emergency Management. Our county's Division of Emergency Management has been working with the Humane Society and County Animal Control to handle household pets; but exotic pets and those of a larger size still pose problems. The bulletin pointed out how to construct an emergency kit for your pet. but pets ARE NOT allowed in Red Cross Shelters. We here are trying to arrange co-located people and pet shelter areas. When people are advised of an emergency evacuation order, they usually only think of the "Four P's". Do you know the four "P's" of Evacuation?

Pets, Pictures, Pills ,P.C.'s

(Courtesy of LTC Dave Loehr, Operations Officer, AZ Army National Guard)

In addition to the information posted in EMC 181, the Red Cross brochure "Pets and Disasters: get Prepared", stock # 321355 should be available at your local Chapter house. s/ Ed Ryan - N7VEX Disaster Specialist, Central AZ Chapter

.....

Current Events:

Washington May 4, 1999 - Eleven Oklahoma counties ripped by a swarm of deadly tornadoes have been designated for federal aid by the head of the Federal Emergency Management Agency (FEMA) under a major disaster declaration issued for the state today by President Clinton.

FEMA Director James Lee Witt said the President authorized the assistance immediately following a review of the agency's analysis of the state's expedited request submitted this morning for federal relief. The declaration covers damage from severe storms and tornadoes that hit the state May 3-4.

"The President is deeply concerned about the tragic loss of life and destruction caused by these devastating storms," Witt said. "He has acted quickly in committing all necessary federal resources, and we will work as fast as humanly possible in aiding all those in need."

Witt, who arrived in Oklahoma City today, reported that two advanced teams of FEMA disaster specialists and seven Civil Air Patrol ground assessment units were deployed to assist state and local emergency operations. U.S. military aircraft, as well as federal public works and health and medical resources, also have been activated to support immediate response efforts.

The 11 counties designated by Witt for federal aid to tornado-stricken residents and business owners include Caddo, Cleveland, Creek, Grady, McClain, Oklahoma, Kingfisher, Lincoln, Logan, Pottawatomie and Tulsa.

The assistance, to be coordinated by FEMA, can include grants to help pay for temporary housing, minor home repairs and other serious disaster-related expenses. Low-interest loans from the U.S. Small Business Administration also will be available to cover residential and business losses not fully compensated by insurance.

Additionally, Witt said federal funds will be provided for the state and affected local governments in the 11 designated counties to pay 75 percent of the eligible cost for debris removal and emergency services related to the disaster. The declaration also makes cost-shared funding available to the state for approved projects that reduce future disaster risks.

Witt indicated that more counties and additional forms of assistance for state and local government agencies may be designated later based on the results of further damage assessments. He named Robert Hendrix of FEMA's regional office in Denton, Texas, to coordinate the federal relief effort.

Hendrix said residents and business owners who sustained losses in the designated counties can begin the disaster application process by calling 1-800-462-9029, or 1-800-462-7585 (TDD) for the hearing and speech impaired. The toll-free telephone numbers will be available starting Wednesday, May 5, from 8 a.m. to 6 p.m. (CT) seven days a week until further notice.

ACS PERSONNEL SUPPORT DISASTER REGISTRY FIELD EXERCISE

The San Francisco Disaster Registry Program (DRP) for Seniors and Persons with Disabilities passed a milestone on Saturday, April 17th, when the field response component of the program went through its first field exercise. The exercise included volunteers from the American Red Cross, the Auxiliary Communications Service, San Francisco Neighborhood Emergency Response Teams (NERT), and the Volunteer Center of San Francisco. In an unprecedented collaboration between these volunteer agencies, the Dept. of Public Health, and the Mayor's office of Emergency Services, the exercise was conducted to simulate the actual response activities that would be needed in the event of a major disaster affecting Disaster Registry enrollees.

This was the first-ever use of ACS volunteers to provide communications support of a field exercise for the Disaster Registry. The Registry program is specifically designed for San Francisco resident seniors, aged 60 and over, and persons with disabilities who've enrolled to be checked on after a major disaster. Experience from the Loma Prieta earthquake and similar events has shown us the the need to include ACS volunteers in an organized response effort. The April 17th exercise clearly demonstrated the value of ACS as a part of a disaster communications system with redundancy, and therefore, disaster resiliency.

In continued collaboration with local ACS personnel, the DRP coordinates a number of activities that seek to minimize disaster vulnerability, while at the same time maximizing the ability to effectively respond to the targeted populations. Some of these activities include: Expansion of Disaster Registry exercise plans to include all 46 San Francisco NERT's and, hopefully, all the ACS volunteers needed to support such a grand undertaking. Broadened collaboration in response planning among regional ACS resources that could conceivable become involved in disaster response to San Francisco seniors and persons with disabilities.

For further information:

If you would like to more information about the Disaster Registry program, contact Ron Lopez at 415-554-9732.

A San Francisco Bay area American Red Cross worker is headed to Oklahoma today to assist victims of a series of tornadoes and funnel clouds that hit the region Monday killing several dozen people. Gregory Smith, disaster director for the Bay Area Chapter, will work with other relief workers to provide shelter, food, solace and health care to victims' families and emergency workers. Over the next few days, 15 to 20 other workers from the Bay area will be deployed to the region.

Thirteen shelters were set up by the Red Cross Monday night in Oklahoma and Kansas to care for more than 2,000 people who were left homeless.

``Because tornadoes are an unfortunate fact of life in this part of the country, the Red Cross has a plan in place to respond to exactly this type of tragedy,'' Smith said. ``We will be there until everyone's emergency needs are met.''

Bay area residents who have been unable to contact friends and family in Oklahoma and Kansas can contact the Bay Area Chapter at (415) 427-8000 for help.
CONTACT:Chris Thomas, Bay Area Chapter (415) 427-8181

Ham radio operators have had a role in the aftermath of two recent incidents of random violence--the Columbine High School killings in Littleton, Colorado, and the shootings in a Salt Lake City, Utah, library where three people died a few days earlier.

Since the mayhem that left 15 people dead April 20 at Columbine High School, Amateur Radio operators have supported Salvation Army canteens set up for law enforcement, the media, and the thousands of other visitors. East Slope Emergency Coordinator Larry Cerney, K0ANI, said Amateur operators provided communication between facilities around Columbine High School, adjacent Clement Park, and the site of a makeshift memorial for the victims. Other operators supported the American Red Cross.

Cerney says he felt a personal involvement in the tragedy. He lives two miles from Columbine High, and many of his fellow workers have children that attend there. "It's still hard to look back over the last week or so," Cerney said. "This tragedy really has broken the hearts of this enlarged community."

Cerney said the support continued throughout last weekend's memorial services attended by Vice President Gore and other VIPs. "It seems that the local hams just had to help," he said. He said 25 to 30 operators worked three six-hour shifts from 6 AM until midnight, providing what Cerney described as mostly routine, logistical communication.

"I know all disasters are devastating to those involved," he said. Hurricanes and tornadoes may kill people and destroy homes and property, but the killing of kids by kids is something that I just cannot comprehend, no matter how far away or close to home."

Colorado Section Manager Tim Armagost, WB0TUB, expressed similar sentiments. "We Amateur Radio communicators like to believe we are prepared, but no one could be prepared for the tragic events at Columbine High School on April 20," Armagost said. "The Colorado Section Amateur Radio operators join the community in expressing our shock, sorrow, and sympathy for those affected by this tragedy."

In Salt Lake City on April 15, a gunman walked into the Family History Library and started shooting, killing two and wounding five before police shot and killed the gunman. Two building employees and hams--Utah Amateur Radio Club member Spencer Wood, KB7KGE, and Davis County resident Dave Oswald, KD7DHO--put ham radio to use to help evacuate the building.

Wood, the assistant emergency coordinator for the library says he and Oswald--a floor emergency captain--spread the call to clear the building and used an amateur simplex channel to exchange information on the evacuation. After Wood had to leave

the building, Wood relayed to police what he was hearing from Oswald inside the building. Wood credits ham radio with helping ensure an orderly evacuation. (The ARRL Letter)

This week's EMCOMM Bulletin:

EMC182 Disaster Worker Stress 1/2
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC182 Disaster Worker Stress 1/2 For release 5/3/99

Articles in the Huntington Beach CERT newsletter has been quoted several times in the bulletins. Again we find their November 1995 Newsletter gave an outstanding view of a sensitive aspect.

"Disaster work can be a unique, rewarding, and demanding experience. Under disaster conditions people get to know one another more quickly than under usual social circumstances. In disasters, workers often becomes like a family--working, eating, and literally living together. A strong sense of adventure and excitement exists, as well as a sense of meaning and purpose. Stress is inherent in disaster work. A certain amount of stress is present in your everyday life, but can become more intense during disaster work. Experiencing stress is normal and expected

in these types of situations. You may find answers to the following questions helpful.

How am I affected by stress during a disaster operation?

- You may experience physical symptoms associated with stress such as headaches, upset stomach, diarrhea, or have poor concentration, and feelings of irritability and restlessness.

- You may become tired of the disaster and prefer not to talk about it, think about it, or even associate with co-workers in your time off. You may become tired of continual interaction with victims and may want to isolate yourself in your time off. You may be feeling frustrated or guilty because you miss your family, but are unavailable to them both physically and emotionally due to your psychological involvement in the disaster, fatigue, and so forth.

- Phone calls home can be both frustrating and rewarding. You may feel your families and friends simply cannot understand the disaster experience. If they become irritated, it can compound the problem, and temporary isolation and estrangement can occur.

Part two, bulletin EMC183, continues next week.

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- For training assistance contact the ACS Training Officer at the web site or send an email to larton@garlic.com
- Submit suggestions, topics or comments on the bulletins to cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and a FTP Archive: ftp.ucsd.edu/hamradio/packet/tcpip/incoming for some bulletins. For earlier ones: ftp.ucsd.edu/hamradio/races

.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

2977. KV4FZ - American Hero

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-05 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990504232939.07592.00000996@ngol06.aol.com>
Source record: 143875

KV4FZ has been an active amateur radio operator since 1954 when he was first licensed in the Midwest as W0VXO. While working his way through college (1960-64), he spent summers teaching at several camps for the physically handicapped. He was highly successful in teaching seriously disabled campers about the potential of amateur radio. Many of these campers went on to fully qualify for their amateur radio licenses.

His father, W.B. Schoenbohm, was the founder of Courage Center in Minneapolis. Herb was a major force in pushing for the initiation of the Handi-Ham program, which is now widely recognized as the premier service organization for disabled radio amateurs. After college, Herb worked as a international sales representative for Gates Radio, Harris Corp, and Collins Radio. He sold and distributed broadcast equipment to the international market, primarily Latin America. In 1968, he moved to the U.S. Virgin Islands with the intent of better serving his customers. His wife Monika was, at that time. a service representative for Pan AmericanAirways. KV4FZ was very active in DX work and, as a frequent traveler, put many new countries on 160 meters. He was instrumental in getting Stew Perry, W1BB, the necessary countries to be the first ham ever to get DXCC on 160 meters. He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for the first ever DXCC via satellite (Oscar 7).

During the 1970's, KV4FZ was able to set CQ World Wide records 160-10 in almost ever category except 40 meters. He was also very active in supporting the IARU Intruder Watch after encountering frequent yachts in the area that had acquired licenses of convenience for a fee. At that time, FCC Commissioner Margita White appointed KV4FZ as the Virgin Islands SECC. The SECC has responsibility to plan and manage the operation of radio communications resources during island emergencies. Herb fulfilled that role magnificently and was named a Virgin Island "Hero" after Hurricane Hugo destroyed most of St. Croix in 1989. Herb received this award for keeping vital communications circuits open during the crisis.) Herb also took a detailed interest in how most of these "pirates" has a close association with the so-called "service nets" on the top end of 20 meters. He joined the net and attended several of the hamfest functions. Only then did he learn how deliberate and sordid was the manner in which net members misused the amateur spectrum as a means to provide an international telephone toll by-pass service. One of the most flagrant of all these operations was the "INTERCON" network operating, for the most part, on 14.313 MHz. Herb began detailed monitoring of their operation and intercepted many communications that were appalling to say the least. In 1979, KV4FZ listening to what appeared to be a "business connection" between WB6MID/8R1 in Jonestown, Guyana and WB6MID in Ukia, California.
Herb broke in and informed the net personnel that this type of operation on an amateur frequency was illegal. Furthermore, Herb stated that their

communication constituted international business communications related to funds transfers and the procurement of equipment and supplies. The net hierarchy reacted by excoriating him for his "embarrassing comments" and ignoring the violations. The net bluntly told him that the Jonestown Operation was a missionary group and that they had special permission from the Carter administration to use ham radio to further their "worthy cause". Herb persisted with his concern and was quickly declared 'PERSONNA NON GRATA" by Robert Sternberg, AA4EE, a tax attorney who claimed to be the nets legal advisor. Herb expressed his concerns to other net operators participating in the companion "Maritime Mobile Net" such as Dick Eastman, N5FX and Mike Galego, KA4MUJ. Several Maritime Net members agreed that some of the more criminal practices, such as one ringers and "maintenance charges" for providing long distance toll free connections practically anywhere in the world, must be curtailed.

Some of the net cabal hierarchy rebuffed all attempts to institute reform and a nasty power struggle ensued. Eastman and Galego were "ex-communicated" by Ruth Hoffman N4LMC, Eddie Ricca K4PT and Art Candell N4PCK. The latter began a propaganda campaign, replete with false stories and personal attacks, that promised to destroy any net opposition that sought reform. The net members objected to the lively participation of KV4FZ, KA4MUJ, and N5FX (a former net director) who frequently brought to the attention of net participants certain stations whose conduct violated the FCC and International Rules.

During the 1980's, net members began a campaign of coordinated complaints to the FCC claiming that the aforementioned three were causing willful and malicious interference to the net. N5FX and KV4FZ both received prefabricated FCC citations at the behest of the net command. Both were able to get the FCC to nullify their actions based on the fact that their constructive comments did not constitute "malicious interference" and that certain members of the net themselves were engaged in a premeditated campaign of harassment and interference.

Several members of the net were subsequently caught interfering with the communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY. AA5LY later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and accurate accounting of the plot by disgruntled net members to "settle the score". That plan included a vigorous campaign of letter writing to politicians in Washington in an attempt to pressure them into punishing the net detractors.

N4PCK had his own reason to get even. He had known Herb while he was operating in Haiti as HH2A and was very active on the INTERCON net. Herb had learned, through his contacts in Haiti, that Candell had a serious problem. He would solicit young pre-teen boys and pay them a quarter to perform sex acts on him. A prominent Haitian administrator was told, by his son, that the young boy had been abused and sodomized by Candell. There was no arrest or trial. But the arrival of the outraged local citizenry at Candell's hillside villa dictated that Candell receive an armed escort to the airport. Candell then appeared in the Orlando, Fl area, illegally using the call HH2A/W4 and actively engaging in net activities. The net

watchdogs, now known as the B.A.R.F. (The Better Amateur Radio Federation), pointed out that Candell was not eligible to use a Haitian call sign in the United States unless he was a Haitian citizen and had been granted a proper permit from the FCC.

Again the net members supported Candell and sought to silence Herb. However, the FCC ruled that Candell could no longer operate from Florida unless he obtained a valid U.S. amateur radio license. Candell later paid off a VEC in Silver Springs, Fl to fraudulently give him a passing grade on a General Class license examination. The VEC was later sanctioned but Candell was neither removed from the air nor required to be re-examined. In 1989 Candell was finally arrested and convicted of multiple incidents of child molestation. He was given a suspended sentence that was partially based upon INTERCON's assertion that he had been rehabilitated by amateur radio service in their net. (Candell was arrested and convicted again in 1994 for carnal assault on several boys between 8 and 10 years of age whom he had invited into home under the pretense of showing them his ham station. He has been institutionalized for several years but his ham license was, nonetheless, renewed in 1996 for another ten years.)
In 1990, Candell continued with his plot to destroy and discredit KV4FZ in retaliation for Herb's alleged "interference" with the net's "business". Candell actively leagued with other enemies of KV4FZ such as Pat Miller, KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied Whiten the so-called "proof" of a crime by playing a recorded tape on both 20 and 75 meters. Miller introduced Candell to the operator of a long distance resale service that KV4FZ briefly subscribed to in 1987. Some of the users of the CALLS (Caribbean Automated Long Line Service) system (a six digit access code system on which half the possible combinations of digits gained the caller access to a WATTS line) had been illegally abusing the CALLS scheme. Malcolm Ford had claimed losses to the tune of $200,000 and needed a scapegoat. Thereupon, it was decided that a criminal case should be manufactured against Herb, KV4FZ.

Ford needed this falsification to support his ludicrous claim that the impending bankruptcy of CALLS was not due to his inept management. Instead, it proffered that somehow Herb had caused his business to fail. This was vital to Ford because he was still salaried as the GM of CALLS even though they were in receivership. Ford's efforts failed and he was physically removed from the operation after the Federal Bankruptcy judge found him raiding the treasury and assets of CALLS.

However, all during this time, Ford was fabricating evidence in an attempt to establish a connection between CALLS financial failure and KV4FZ. Yet the Department of Justice continually refused to prosecute Herb. This resulted in even more acrimonious letters to officials and politicians in a further attempt to implicate Herb as the culprit.

Malcolm Ford, the previous owner of CALLS, was then under investigation for bankruptcy fraud. In an attempt to escape indictment, Ford hired John Ackley, KP2A, to fabricate various reports that would designate Vitelco(a local phone service), STSJ Long Lines, ITT and Herb as coconspirators who

were attempting run him out of business. While this was going on, Ackley was attempting to buy the nearly defunct company for ten cents on the dollar. (Ackley failed but STSJ was able to get the company back on its feet.) Miller, Hoffman, Candell and others intensified their letter writing campaign to hundreds of politicians in Washington urging them to investigate. They even began writing letters to newspapers, claiming that politicians were shielding KV4FZ from prosecution. In these hate letters to public officials, Herb was equated with organized crime, drug trafficking, and high level political corruption. In 1991, KV4FZ was writing a hard-hitting column for the St. Croix Avis newspaper. Herb frequently attacked political corruption so it stood to reason that he might have some enemies in government. Herb had articles published about the check kiting and House Banking fraud perpetrated by the Virgin Island Delegate to Congress, Ron Delugo. Outraged and distraught, Delugo (who had designs upon becoming the next governor of the Virgin Islands) assigned a full time staff attorney (Sylvester Julian) to explore methods of pressuring the FCC, the Secret Service, and the Department of Justice into investigating Herb and "putting a 'severe hurting' on him".

However an obstacle remained in the path of their plan to annihilate KV4FZ. Some at the FCC supported Herbs activities on behalf of the amateur radio service. Additionally he was elected as Vice Chairman of the Virgin Islands Republican Committee, which made him a frequent delegate to the GOP Conventions. Furthermore, Herb was personally acquainted with President Bush. Herb's father had served on the President's Commission for the Handicapped.

Initially, each and every involved agency claimed there was not enough evidence to support a charge against Herb. Subsequent to this, John Ackley, KP2A, manufactured a list of 660 telephone calls that were prearranged to add up to $1,047 in value. This was exactly forty-seven dollars over the amount needed to achieve the threshold of prosecution. Delugo wrote threatening letters to various government agencies threatening that he would see to it that their funding was severely curtailed if he did not receive figuratively receive Herb's head on a silver platter. Ruth Hoffman constantly badgered the acting U.S. Attorney for the Virgin Islands, Terri Halpern. This continued to the point that Hoffman was finally ordered to stop harassing Halpern. However, as a Congressman to the VI, Delugo was in a position convince colleagues not to block Halpern's confirmation. Delugo reportedly told Halpirn that, unless she prosecuted Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was fired in 1992 by the DOJ for ethical lapses after the Office of Professional Responsibility investigated the severe criticism, from the 3rd Circuit Court of Appeals, that Halpern received for the "knowing use of false evidence" to secure a conviction. Nevertheless, the trial prosecutor was cleared by OPR because they were unable to prove that the prosecutor actually knew the evidence used was false.)

Herb's trial took place in April 1991 (four months past the five-year statute of limitations). Both Ackley and Miller testified, under oath, as to the veracity and accuracy of the incriminating evidence they had assisted in concocting. (Miller offered his so-called "caught in the act" tape of Herb dialing "illegal access codes". Ackley presented his list of random numbers that he verified, as a government expert witness, were all

telephone numbers dialed by defendant Schoenbohm.

The puzzled and confused jury convicted Herb on all three counts of Title 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit card statute. This statute has been used infrequently to curb the illegal use of cloned cellular telephones. After trial, Schoenbohm with the help of Bob Sheron, W4ASX, closely scrutinized the evidence and began tracking down the parties that Ackley had claimed, under oath, that Herb had illegally called. A most amazing discovery unfolded: most of the persons contacted did not know Herb Schoenbohm or had never had a telephone conversation with him. Amazingly, they had already given statements confirming this fact to the Secret Service investigators. Most had even identified persons, other than Schoenbohm, whom had called them from the Virgin Islands during the timeframe in question (1987). Interestingly, the court refused to allow Schoenbohm to verify the numbers before trial.

The court incredibly claimed that it needed to protect the potential witnesses from pre-trial disclosure! After trial, armed with affidavits from the persons alleged to have received Herb's "illegal" calls, Herb moved for a Judgment of Acquittal not withstanding the jury verdict. The court granted the motion on all counts but one (Possession or Use of a Counterfeit Access Device). The court maintained that the Miller tape proved that something was amiss and the jury could correctly deduce from this that the law had been broken. This court decision differs from the previous decision in that the device is similar to, but not exactly the same as, a valid device and does not require the threshold of over $1000 in use. (The irony in this entire matter is that Herb freely admitted to using the service briefly in 1987. He was a bona fide customer and the total actual use amounted to $106. CALLS finally was required by the court to produce Herb's check for $104 that they had received in1987. They admitted that they did not cash the check but, instead, held it as an aid in the plot to entrap KV4FZ.) When the court vacated the judgment requiring two months prison time, Herb's detractors were enraged and, once again, began the political letter writing campaign. Now the claim was that Herb had used amateur radio in the commission of a crime and should be taken off the air. They sent the highly doctored Miller Tapes to the FCC in an attempt to prove their incredible theory. Their letters were full of outrage over the fact that Herb had once more cheated Madam Guillotine and he still on the air making waves. Some were furious due to the fact that they had given financial support to certain political candidates and nothing permanent had been done to rid the airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to officials at the FCC in attempt to bribe public servants. One such official, William Cross, was investigated for leaking internal information to Ruth Hoffman in the KV4FZ matter. Hoffman then disseminated this information for use in the hate campaign against Herb.)

KV4FZ then was subsequently forced to embark upon a long and costly struggle for justice. He has had to fight the refusal to renew his amateur license by demanding a hearing before the FCC. (The refusal to renew is rarely used as a procedure and has been given the title: "The FCC Death Penalty" because the entire burden of proof is placed upon the licensee.)

At the first FCC hearing, Administrative Law Judge Luton ruled against KV4FZ. However, upon higher review, the FCC General Counsel refused to accept Judge Luton's findings and remanded the matter for reconsideration. The principle issue is whether or not KV4FZ had used amateur radio in the furtherance of the commission of a crime. This time the ALJ ruled that there was nothing in the evidence (The Miller Tape) that was illegal in any way. The concluded that Schoenbohm actually was dialing ordinary and valid Virgin Islands telephone numbers. He was not entering illicit access codes to make long distance calls.

The ALJ did, however, agree with the Wireless Telecommunications Bureau (WTB) assertion that, by giving out the telephone number, in 1994, of Herb's future boss, Congressman Frazer (whom, incidentally ran Delugo out of office), Herb was violating a solicitation restriction of ex-parte rules. This was despite the fact that WTB had conceded that no actual ex-parte violation had taken place. The ALJ ruled that, by attempting to explain his conviction as a De Minimus violation rather than a crime of major impact, he was trying to mislead the trial of fact. (In administrative law, the assertion of innocence is a crime even if the accused is actually innocent! It is akin to Hobson's Choice or the Salem witch trials whereupon, if the tied woman is thrown into the pond, and she does not drown, then she must surely be a witch and, thus, must be burned to death.

Herb had been fighting the remaining count through the Federal Courts and has even succeeded in convincing the courts to severely criticize the DOJ for their handling of the case. Nevertheless, they refused to reverse the remaining conviction because of the nearly impossible to define "standard of harmless error". The appellate court ruled that the motion for Judgment of Acquittal had been filed too late even though the trial judge had granted an extension based on the emergence of irrefutable proof that the prosecution had used false evidence. As a result they were barred from considering the sufficiency of evidence matter at this late date under the rigorous standards of Habeas Corpus review. However, a positive revelation in the latest FCC decision is that it clearly vindicates Herb on the original charge of using ham radio in the commission of a crime. It also conclusively proves that his detractors engaged in perjury before a Federal Grand Jury and Petit Jury trial.

Many on the local scene recognized the truth. The Trial Judge, The Honorable Ann Thompson, wrote a letter of support and praise on Herb's behalf. The Governor of the Virgin Islands did not simply restore Herb's government career. He elevated Herb to a position of higher authority with more responsibility to the island and a significantly higher salary. He was also employed, as a part-time field representative, on the congressional staff of newly elected Congressman Frazer.

The FCC WTB attorneys characterized these as "political jobs", unworthy of consideration as a mitigating factor in Herb's "rehabilitation"!) Although Herb had a Congressional Floor Pass, granting him direct access to the ears of the politicians, there is no evidence that he ever abused his position to lobby House members against the FCC. This is in spite of the fact that the bureaucrats inside the FCC are very much afraid that Herb might just whisper in

the ear of someone who controls their finances. Because of this, Herb is not allowed to take his case to the very people who would be horrified to learn the truth about how he has been treated. These are the people who could finally put a stop to this travesty of justice. Yet, Herb's detractors are on the phone daily, pushing those in power to get him off the air, one way or another. When will the voice of reason and justice be heard?

Some of us do not like the odds and are willing to help end this fiasco. Herb's legal bills are soaring but he continues the fight. His attorney, Larry Colby (a licensed ham), has stated that when this issue gets into the proper arena, Herb will be totally vindicated. But this can only happen if Herb is allowed to fight on and get his case into the proper arena. Right now, it is still in a forum where all the rules are stacked against the licensee. When the matter gets out of the FCC, and into the D.C. Circuit Court, then the playing field is closer to being balanced. There, the Feds don't have the automatic upper hand that allows them to do what their political puppet-masters demand.

A small donation of $25, $50 or $100 will go a long way in continuing the fight for justice. There is an underlying principle that must be preserved. It is not keeping Herb on the air that drives his supporters. It is the realization that if they can deprive KV4FZ of justice then they can deprive any of us of justice. Today they are persecuting KV4FZ. Tomorrow it could be you. You could be railroaded just because somebody doesn't agree with your position on the nets, phone patching, or apple pie. Herb is working vigorously to get the funds together for his appeal. His attorney Larry Colby is attempting to get an extension of time to file exceptions. If you can help in anyway, please contact John Dillenger, K4GFM, who is the custodian of the Defense Fund.

I can't help but wonder what hams debated about 50 years ago? The internet
has allowed us to exchange ideas and thoughts in an almost instananeous
manner, sometimes I also wonder if this is good or bad :-/

Sounds like someone hit a nerve in ol' donkeyboy!

>It's pretty damned funny reading your conjecture about what might be in the
>mind of Riley Holingsworth.

The same applies to the "conjecture" put out by the libertynet gang.

> When did you ever meet him? How often do you
>talk to him? How would have any idea what he thinks.

he has expressed some thoughts to me in writing but we'll leave that rest. I
WILL say that for the most part radiosigs is correct.

>You'll have a yarn spun that
>makes Riley out to be another counterfeit jew like Porkbutt.

You libertynetters have been SPINNING one like he's a libertynetter. What a
Laugh! Ha Ha

>You have no
>idea what Riley will put up with or won't put up with.

Try some more nazi propaganda and lets see. OK?

>How many people from the Liberty Net got
>letters like you and your jew thugs received?

Five and one of them is suspended for 6 long months.

>The FCC uses your response on their internal joke line.

You should here the one about the licka-crotchy net! Have you heard that one?

>You are the king of back stabbing and gossiping.

Good netter description.

Why the mark of the beast in your internet name DonkeyBoy. Does 666 mean
something to you?

> As I see it, it comes down to this...

You can't lean the code. How about your phone number, have you learned that? Do you know your address? Do you keep a check book, or a J.O.B.??

> In order to get a waiver from the code, I would have to
>spend big money doing to doctors for the paperwork.

Well, at least you have considered the alternative. Is it expensive because you'd have to find a doctor you could bribe? And, how do you explain all the college educated folks out there who also have dyslexia? This is not a condition that it is impossible to overcome.

> Or, I could go no-code. While I am not interested in VHF, I am also
>uninterested in hearing about how I would not be a "RealHam (TM)" because I
>am a no-code tech.

You don't hear so much of this discussion amoungst the non-coded hams. My guess is that even you know, deep down, that you would be "lacking."

> SWLing looks a lot better as an alternative all the time

>Myself and others are willing to put
>forth the effort. But there is a distinct difference between meeting
>requirements and running a gauntlet of frat-house like initiations.

How tough can it really be, if nearly every ham before the no code Tech did it? This is the easiest "gauntlet" I've ever seen. I think you're just afraid of failure, so you'd rather not try.

>Yeah, I could pass every technical part of the tests, I could
>easily learn the proper operating rules. But is it worth it

Excuse me if I have just a touch of disbelief.

Lets just summarise. Ham radio is dying because a group of technically competant, code-loving fuddyduddies are keeping the "good people" out by criticising the abilities of the potential ham who objects to being held to the same standards as the hams that came before. The "civil war" you see in ham radio isn't really so much between hams as it is between the hams, and the wannabes, like you.

I guess you're right. The best thing we can do for the future of ham radio is to put a new RCI rig, an Antler 99 vertical, a free ham license, and a block of that gubmint free cheese into every new mobile home sold!

Oh, but wait, wouldn't that just be more FREEBANDERS? Hey, who's got the MODS??

I'm not a vigilante either, Bob. I have been trained and licensed to carry
concealed handguns by two states because trained law enforcers and guardian
angels are not dependable enough for me. Your mileage may vary.

A sensible take on things I'd say.

I've made the suggestion before, and I'll repeat it again -- for those concerned that removing the CW requirement will turn ham radio into another CB circus, the solution is to retain the CW tests at each code speed, but offer a corresponding optional written test that can be taken instead. The questions on this test should focus on good operating practices, technical knowledge from the next licence grade, emergency and net operating procedures instead of just FCC rules and regulations. I know the FCC doesn't regulate some of these areas, so perhaps HAMS would write these tests with an eye to what they want all hams to know. :)

>am a no-code tech.

I suspect that even if the code requirement were abolished tomorrow,
this attitude would persist for many years to come.

CW is almost an aesthetic pleasure for some, who can't imagine that
there might be those who would not thrill to this rather amazing form
of communication. And of course, hard-core DXers and QRP'ers will
remain around forever. CW may never die, regardless of technology.

You could say that any language is an encoding scheme for English.
While in first year Vietnamese, upon hearing the word "hai" I would
have to mentally translate to the English "two." Similarly, hearing
"..---" the novice has to go through the same translation process.
During the second year of VNese and Morse, no such translation is
necessary; one begins to think in his new language without having
to carry out any inter-language word association. Those who disagree
are still in the "hai = two" Morse stage. Come back when you're past
25 WPM, then I might listen to what you have to say concerning this
subject.

Why don't you cease cross-posting this to the .scanner, .shortwave,
and .dx NGs?

Two possible reason why such hams didn't have to pass anything
greater than a 5 WPM code exam:
1. Our government is altruistic, or
2. A lawsuit was filed and a judgement against the government was made.

Hello all,
I have a Dentron Clipperton L forsale. It has new
572b's, new band switch and all of the Capacitors and diodes
have been replaced. I have schmatics too. The amp is wired
for 220 with 100 watts drive 1200 watts out on 80-meters.
The band coverage on this amp is 160-15. I'm asking 500bucs
plus shipping. If you are interested drop me a line. You
can see a picture of the amp as well as my station by clicking
here. http://www.dirtball.com/station.html

Again, Mark, you lack reading comprehension. I made no claim regarding morse testing when CW was the only mode. Morse testing was required when I was first licensed in '63 and it was required when I passed the Extra exam in '77. You've asked if I deny that the world operates at a faster pace than it did years ago. Yes, I deny that times passes any more quickly than it did eons ago. My perception of it might be different. Your days are as full or as empty as you wish them to be. Asking a guy who travels the globe for a living if he gets out at all is pea-brained.

It's a mother of a point of view, alright. You seem to claim rights not addressed by the Constitution. You have no birthright to an amateur license at all. No one does. You have no HF access because you haven't passed the exam. I have them because I passed the exam. At various points in time during my nearly 36 years on the air I've held only partial HF access when I held Novice, General and Advanced Class tickets. Now, as an Extra, I have all the FCC permits. Did I know somebody or bribe somebody? Nope. I passed the exams.

You are right about your looking silly to me. Yes, I refuse to admit usurping "your" airspace. Your ridiculous claims that I'm a thief or bigot or calling into question my patriotism make you look more pea-brained than the "do you get out at all?" query.

That's the big question, IF you can get mugged WITHOUT being hurt or killed. However, national statistics show that if you offer an attacker no resistance, you will have a 3.7 in 5 chance of being hurt or killed. However, those who do offer armed resistance reduce their odds to less than 1 in 5. (source - 1997 FBI Uniform Crime Statistics Report)

If you care to gamble with you or your loved one's lives then you wouldn't be concerned with your poor odds. Myself, I place a high value on my life and the lives of my family members. Your dad was fortunate enough to beat the odds, I wish you the best of luck also...

I look at it much like home or car insurance. I pay a lot of money to buy it and pray that I never need to use it. But if my car is ever stolen, or my house burns down, I'll be damned glad that I spent the money. It's funny how many people will insure themselves against monetary loss, but will trust their own safety to fate.

Bullshit. I suspect that lives were saved by Ham radio within
the last 48 hours here in the US but it was not based on Code skill. I
know that hams were ready to do the same here in Illinois

What has happened with code is a reflection of todays society instant gratification culture mixed with a dumbed down educational system. I agree that in commercial communications code may be obsolete but one of the most important duties of a ham radio operator is to help and sometimes be the only emergency communications means. Under heavy interference by other services or even in low power, code still remains an effective means of communications. I cannot see the problem in learning code except that of a little extra effort. Maybe 13 WPM should be the maximun requirement for the upper licenses. It is true that hams are no more in the forefront of technological developments in radio communications but we still remain as a viable reserve of trained radio operators with knowledge in the radio communications field well beyond that of the laymen.Nonetheless, if the requisites for licensure continue to be dumbed down to a ridiculous level, we will just as well merge with the already chaotic 11 meter band which is our best example of what happens when some controls are not present. Some insist that ham radio has always been elitist because of its requirements.In reality ham radio has been blessed with people from all walks of life and all the socioeconomic levels. The common factor has been a real interest in learning the minimun technical and communication skills and putting up that little extra effort to just do it.

Come on, guys! I rember how
Carl and Jerry used CW when
their car went into the ole
ravine, and the following
month when they lost their
prop, they sent spark-plug
CW off'n the Evinrude, and
the following month they
used a reflective belt-
buckle... and...and... don't
youse 'member? Sheesh!

I am looking at a kenwood r1000 rcvr. The guy wants $200. I think this
is a bit high. What is going price for these. Thanks.
Back in late 70s or 80, I had an analog kenwood receiver. Just your basic
short wave and am band receiver. I can't remember the model, but amybody
got something like this for sale.
THanks.

>
>You don't hear so much of this discussion amoungst the non-coded hams. My guess
>is that even you know, deep down, that you would be "lacking."

Hear this: I hold an Extra Class Amateur Radio License. I was first
licensed in 1975. I know the code. I still use the code. I can copy
W1AW bulletins at 18 WPM and typically run speeds of 30 WPM in
contests. I think that requiring morse code proficiency as an entrance
requirement to HF is ridiculous.

This very discussion IS taking place among the "coded" hams precisely
because we are concerned with the future of this hobby. Ossified
requirements such as morse code proficiency should have been removed a
long time ago. Others should replace them. I wish one of them could
be civility, but that would eliminate you and we need all the folks we
can get.

>> SWLing looks a lot better as an alternative all the time

>>Myself and others are willing to put
>>forth the effort. But there is a distinct difference between meeting
>>requirements and running a gauntlet of frat-house like initiations.
>
>How tough can it really be, if nearly every ham before the no code Tech did it?
>This is the easiest "gauntlet" I've ever seen. I think you're just afraid of

>failure, so you'd rather not try.

Some folks have a perfect sense of pitch. Others are tone deaf. Why
is it so difficult for you to understand that some have more
difficulty with morse than others. If morse code proficiency were
relevant, I could see keeping the requirement. As things stand today,
Ham Radio is one of the last radio services to use morse code. Morse
code has been replace by better technology. Get over it.

>>Yeah, I could pass every technical part of the tests, I could
>>easily learn the proper operating rules. But is it worth it
>

>that gubmint free cheese into every new mobile home sold!
>
>Oh, but wait, wouldn't that just be more FREEBANDERS? Hey, who's got the MODS??

Get real. This hobby is losing people. The reason people can find
the technical knowhow to put together a Freebander station and use it
is mostly because they're turned off by the ridiculous morse code
requirement. You should see what some of these folks can do.

Tell me: Since you're so pro-code, could you pass your code test for
your license tomorrow?

Why NOT?

You saved me from responding directly!

This is ridiculous.

Both sides are spouting bullshit now, and trying to get the issue to
black
and white, on and off, left and right. Neither side seems to grasp the
truth of the other side, and that 99% of the people are not at the
extremes.

CW is useful.

CW is neat.

CW is fun.

CW is NOT a lid filter.

CW should NOT be a gating factor.

CW should NOT be required.

It's not as easy as it would first appear. GPS is a military system
and it was designed from the start to be difficult to jam.

However, there are places where jamming experiments have been tried.
Just ask any pilot whether the RAIM light on their GPS has been lit
while flying over New York State. The folks doing the research over
there have a nasty habit of not notifying the FAA in time to issue a
NOTAM.

Exactly!!

But how much CW was useful or used?

This arguement is 100% for the elimination of CW as a requirement. If
it's strictly a question of providing trained operators for emergencies
(a VERY valid arguement) then CW should GO IMMEDIATELY. Numbers
of properly trained operators is NOT provided by blocking out otherwise
desirable people with an artificial gating factor.

And I know, CW skills teach proper traffic handling techiques. That I
will agree with. CW operators DO know how to 'share' a spot in the
spectrum, and CW traffic handlers SHOULD have the techniques
and operator awareness to operate in a congested traffic situation.
But that's BULLSHIT to apply it to traffic handlers today. Not when
packet is much more efficient in an emergency. Or voice when
used properly. The days of a CW operator holed up being a link to
the outside world disappeared a long time ago. (Unless the Russian
and Chinese missles all fire on Jan 1, 2000.)

And (I'm ready for another flame war here!) todays traffic operators
are a farce. OK, 99.999% of the operations are a farce. I hear ZERO,
ZILCH, NADA traffic handling on simplex. They squat on repeaters
to run their traffic nets, and have little or no training in simplex
where
they need to develope skills and most importantly operational attitudes.
If an emergency really hit, and the pool of local repeaters was reduced,
(heck, even it they didn't loose a single repeater) those that 'stayed
up'
would probably be immediatly restricted to emergency service. So
what are the traffic people going to do with their flood of non-critical
health and welfare messages? Panic and break down, that's what!
They're spoiled by the low turnouts and light load on their repeater
traffic nets, and the discipline would crumble in a heavy traffic load
on simplex.

Now wait a minute, tubes can be justified. Much more easily than CW.
(Can you tell I own an old Swan?) Tubes are still the only practical
way
to get into the mega-power arena easily. Solid state amps over 100W
are just too fragile....

I'm not saying everyone should know how to design tube projects, but
they should at least have a basic understanding of tube theory. Then if
they need to do anyting with a tube, they look it up in a book. (I may
get flamed for that, but hey, I still look EVERYTHING up when I design
something. My old TI TTL Data Book is falling apart from use!)

Nah, just update the tests to reflect current technology instead of
forcing us to learn
useless stuff like CW and vacuum tubes.

: I've made the suggestion before, and I'll repeat it again -- for those
: concerned that removing the CW requirement will turn ham radio into
: another CB circus, the solution is to retain the CW tests at each code
: speed, but offer a corresponding optional written test that can be
: taken instead.

>with no effort on their part.

I do not think CW is without it's applications. It is obsolete in
the sense that it is not nearly as important as it once was, it is by far
not the only mode on the block. But it is not nearly so obsolete as to be
without a number of applications where it does the job just fine.

I would even go so far as to say that there should be at least
some bands reserved for CW !

Where I differ is where I see CW's place.

For example, to get a higher liscence, your code has to be faster.
Code speed is just not important enough anymore to be a deciding factor in
giving a higher level of liscence.

Thanks for taking a moment to remove the personalism that is the
biggest threat to Ham Radio today.

>Man.... why dont you stay a SWL and forget Ham radio?

Forget it ? Who was it that brought this deabte into the SWL
newsgroup anyways ?

>Or do you think it would all change if someone would just GIVE you a
>license.

This is a personal argument. When a person cannot debate the issue
at hand, or rather, is unable to, they start to sling mud.

I know more than enough about electronics, I studied on my own.
Noone gave me what I know, I had to go out there and learn it. I guess if I
don't see things the same way, I am lazy.

A late friend of mine told me that when the other side of a debate
slings mud, you have won.

Thanks =-)

They are also legal in Taiwan. But since the FRS use a little
different frequency in Taiwan, only 8~12 channel will be
legal to use. BTW, under Taiwanese regulation, the output
is up to 1000 mw.

FRS Channel frequency in Taiwan:

Main pcb has two surface mount ("transistors"?) broken off one corner.
(it's a long story) There isn't enough left to test for identification.
Can anyone help? A JPG attachment shows the manufacturer's
identification markings. A schematic or board "call out" number would be
cool, but I haven't either. My wild guess is a transistor, but nothing
says it can't be a FET, dual diode, Please help! Thanks in advance!
Lynn, W7LTQ since 1947

Marv OM,

I agree with you. I don't see ham radio 'dying' at all. I operate in excess of 12 hours a week on the air, basically all CW. Over half of that is mobile CW. The CW bands have plenty of ragchewing going on all the time. I know, I am one of them. And I spend almost all my time on only one band: 40M. A while ago I worked a 16 year old in Phoenix who was running homebrew TUBE-TYPE gear he had made himself, from old handbook articles. Said he just wanted to play around with tubes is all. Have worked several newer hams, some in their teens, who started with codeless techs, then discovered (some to their total amazement) that CW is an excellent ragchewing mode, and works very well. Some are excellent CW ops, know procedure, know how to listen, with less than 2 years experience in ham radio. They try to spread their enthusiasm to some of their non-CW friends, often with no luck. So they go their own ways.
The message here? You are either interested or you are not. Nothing new going on here. CW will continue to be used by the many who find it enjoyable, that is, can attain reasonable skill at it. Apparently many non-cw ops think we are all WORKING to use it, writing stuff down, using straight keys, egad! Hey, it is just another language guys, if you are proficient, and is effortless to use. If you're not wired for it, there are many other modes to use. That is one of the beauties of ham radio.

73,
Don, W6JL

I'd agree with you except that the Clinton administration has hijacked the Federal Highway Trust Fund by impounding funds to "balance" the budget, by diverting Highway Trust Fund money for other purposes (mass transit), and by using the Highway Trust Fund to blackmail states into passing laws that the federal goverment legally can't. We're forced to pay the money to the feds in the form of taxes, but they dispense it at their whim.

Currently, the feds are blackmailing the state of Georgia by refusing to release Highway Trust Fund money for road construction in the Atlanta area. We're paying hundreds of millions of dollars in federal fuel taxes, but we can't get a penny of it back for roads. Since the states collect the tax for the feds, if our state officials had any guts they'd tell the feds to whistle for their money.

The fares from a toll road go only toward retiring the construction bonds for that road, and paying for its maintenance, nothing else. No one pays unless they actually use the road. That tends to cause the toll authority to make sure the roads it constructs and maintains are actually useful, and desirable to use, so it will generate enough revenue to pay for itself. The feds never get their sticky fingers on the money.

Believe it or not, Radio Shack sells some of the most RF resistant phones
on the market. But it's not likely that any phone will be totally RF immune.
Even the great old Western Electric phones could have RFI problems,
and they didn't have any sensitive electronics in them. But the first step
here is to find the most RFI resistant phones you can, then add filtering
to make them better. As I said, Radio Shack has some of the most RFI
resistant wired phones on the market, and K-com makes filters to help
clean up remaining problems. Even that may not be enough. You may
find that you have to open up the phone and add more bypassing and
filtering to cure really stubborn cases.

For wireless phones, the best are 900 MHz spread spectrum. Even
these can have problems with overload and direct pickup by internal
circuitry. But they're miles ahead of other wireless phones.

The ARRL has a book on RFI. It has a good number of tips, and also
lists some suppliers of equipment and filters which can help.

3035. Denied Aircraft bording with HT - was this legal?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-06 00:00:00 UTC
From: "William G. Graves" <bgraves@ix.netcom.com>
Message-ID: <7gspjl$2v@dfw-ixnews6.ix.netcom.com>
Source record: 143629

I was NOT allowed to carry my ICOM HT in a backback. This was even after assuring them it was off and removing the battery so it could not be turned on. The supervisor at the Xray station said they will not allow any "walkie-talkies" (!!) on board period.

Now I have gone back with dejanews and checked and many of you have carried radios on-board with the understanding that you can't turn them on. There are laws limiting operation aboard aircraft.

I figure the xray supervisor was being capricious but maybe I'm wrong.

Can they just say NO to anything? Anyone know what their legal limitations are?

I know this is trivial but I figure I was inconvenienced for no good reason. I had to check the radio, loose in a backback - thank goodness it was not broken. Is there a defense against unreasonable denials?

thanks
bill

What airport was this? There are specific items (check FAA) that are prohibited, but I wonder if you shouldn't have a chat with this person's supervisor. I carry my aircraft handheld as well as a ham band hand held when I fly myself on one leg and commercial on another. Never had a problem.

I'm sorry, but this is REALLY getting lame. If the pro-coders depend on arguements like this, then HAM radio is not only going to go no-cw, but we'll loose the CW subbands as well.

Hi William,

I fly often with work and just about always have a HT in my briefcase along with a cell phone. I have never had any problems. Where was this? What airline? It certainly does not violate any federal regulation that I know of unless you were to operate the unit while in flight.

I would contact the airline and the airport if I were you. A potential problem here is if you put the HT in you luggage you are likely going to get it ripped off before it gets loaded on the plane. The airlines advise travelers NOT to put anything of value in checked luggage.

That is the point. There are many modes that don't use CW. Many that are interesting and satisfying that don't need knowledge of CW to use. The hobby is diverse and growing more so all the time. Yet there is truly only one test for suitability to belong to the club: knowledge of code.

I have the skill to pass the practical test (and have with the training software) through Advanced, yet I hold only a Tech ticket because of the code. I am still trying but I haven't found my method for learning code yet. I memorized the tapes, and have tried a couple of different computer tutor programs, but so far I have not been able to master CW. I will get it eventually, but it is not coming easy. I resent comments from other hams about being an "appliance user" or the comments on this list about code being a "moron filter." We all have assets in different areas. Learning the code is just plain a bitch for me, and is for others.

I see Techs filling key spots in many clubs, taking on important jobs in weather nets, coordinating public service activities and the like. Some of these folks will upgrade, and some will not. The code will be an obstacle for some, the practical test will be an obstacle for some, and some are content with what they can do with their current ticket. None deserve to be looked down upon because of lack of code speed.

Mike,

I must agree with you, although I don't agree with your predicted outcome. I don't know why CW is required. It just is. I think I understand why CW has its own sub-bands. It doesn't matter, though; it just IS. We think we know the why of band allocations, and power restrictions. It doesn't matter; they just ARE.

I don't know if learning CW makes you a better ham. I don't know if the rationale for the rule is simply to make sure you can read and follow a rule. I don't care; it just is.

Learn the code; don't learn the code. I don't care. It's not my rule, and I'm not the enforcer. Even if there is no other reason: you read the rule; you complied with the rule; you passed the test. See how simple?

Turn a new leaf; make life easy for yourself. Fat, dumb, and happy are the watch words for today.

Michael.

Learn the sounds. 'A' is not dih-dah; it is 'A'. Listen for the forest,
not the trees. There must be at least a few letters that you don't
parse, but just know by their sound. Copying becomes easy when you know
them all this well.

> None deserve to be looked down upon because of lack of code speed.

Who's doing this? The only harsh comments I saw were aimed at the
whining.

Michael.

The phone number given appears to be invalid (calls to it are cut off and dumped back to dialtone within 3 rings).

Perhaps a typo?

>filter as well

I think that set has fixed band filters for each of the 6 bands 160 through
10 Meters. I believe the WWV received is using the 15MHz signal through the
20 meter band filter. I don't think even the installation of the proper
crystal in an "AUX" band crystal position can give you TX on 10 MHz.

Airport security usually is managed and run by the dominant carrier at the particular gate you are using. I too travel a lot for business and have not been hassled no matter how much electronic gizmos and binoculars (I hike) I've had on hand.

Were I you, I'd complain to the carrier's customer service department--you might get a free trip or at least a 1st class upgrade :-)

If eliminating a Morse Code requirement would turn Ham radio into
another version of CB radio, it would have already happened on all bands
6 meters and above. The truth is, the parts of the Ham bands that sound
like CB are in the code required HF sections. CB is in the HF bands.
HF and AM radio attracts a certain kind of person, Morse Code has
nothing to do with it.

Actually Ham radio has always assisted in giving communications to
national disaster areas such as Earthquake, Flood, or Tornado disasters.
However, Morse Code is never used in these instances, mostly voice on
the 2 meter band.

No, I don't think I said that at all. I said that my mind does not have the
trick of learning morse code. Never could get it as a kid...although I've
been having a little more luck lately what with the advent of really patient
computer software. The test was the impetus for attempting to learn it
because at that point in my life, there were no options...you had to know
code to be a ham and I desperately wanted to be a ham.

I need an HF rig for 20m, capable of SSB, to use as
a beacon transmitter. It needs to be cheap, and
preferably in New Zealand. The beacon will be used
for PSK31 and Hellschreiber modes.

I would be interested in

Kenwood TS-120V
Yaesu FT-7
Other low power amateur sets
Commercial 25W crystal controlled SSB sets

The receiver need not be working. Any supply voltage
considered - AC or DC.

Any offers or suggestions to as149@detroit.freenet.org

>A roller skate has some of the aspects of a car, but that doesn't mean that a
>roller skate is a car. Languages have both vocabulary and grammar, Morse has
>neither. It isn't a language, it is a code. Hence the term "Morse code", as
>opposed to "Morse Language".

As a point of fact it is not a code in the sense the military
uses the word code it is a cypher, cyhpers are system in their
simplest form involving system like where e is a patern of dit and dah
or is alawys j, of course keyed cypher scheme are more complex, like
the Pruple and Ulta code of the axis the cterm code was at one time
and stil sometimes is used to include cyphers. In momore modern use a
is a meaning based transforamation such Blackjack meaing adm Halsey (
as I understand was the code at Leyte)

I am looking for a used Yaesu FT-847 transceiver. Anyone have any comments of where this item might be found.
==========

Well, there is always E-Bay (www.ebay.com). There may not be one RIGHT NOW, but check in there every few days, you never know.

I found a TS-830s that way. I sold the MC -35 mic that came with it, and bought a Bencher BY-2 paddle (also on E-Bay).

If you are a little *leary* (sp) about buying like that, you can read *FEEDBACK* from people who have bought from the same person, before you place your bid. (Remember, if you are the winning bid, and don't complete the transaction, the seller can write *negative* feedback about you).

Source record: 143684

Well not much seems to have changed. I noticed this thread is also being posted to policy... I don't see what it has to do with policy, or misc, for that matter, but I chopped the newsgroups: header for my reply.

Police do not prevent crime. Police investigate crimes that have already occurred. Armed, law-abiding citizens prevent crime, especially when the criminal does not know who might or might not be armed, as is the case in Texas where I can carry a pistol, and do, but I may not allow it to show or be seen. This casts an umbrella of protection over even those who foolishly believe they can simply ignore unpleasantness and it will never happen, or that the nice officer who takes the report will kiss where it hurts and make it all better.

As for having a gun in the bathroom, as a matter of fact, I spend a lot of time relaxing in the tub, and my stainless Colt Defender 45ACP is within reach when I am doing so. My P-10 45 is within reach when I am at my desk or workbench. One is to one side and one to the other side of the bed when I am asleep. One or the other, usually the defender in hot sweaty weather, is always in my Galco Yaqui Slide in cross-draw carry when I am in public unless I intend to go drinking, in which case I downgrade to my pepper spray and Columbia River Knife and Tool 5" folder in order to comply with a very sensible law regarding guns in bars. I might be a victim some day, but the sumbitch will have to earn everything he takes from me, and my chances of surviving the encounter are FAR greater than his.

Every time some hoodlum who lives by the sword, metaphorically speaking, dies by the sword, I guarantee you somewhere there is somebody who decides he really doesn't feel like taking HIS chances and going out there to look for a victim to rob, rape, maim, or kill. It's partly about deterrence. It's partly about getting the other guy before he gets you. It's partly about my right to keep and BEAR arms not being infringed. It's partly just good common sense. It's partly a proud and noble tradition.

Every time I hear somebody piss and moan about 82 hexadecitrillion kids being slaughtered each year by guns, I think about two things... how many innocent lives are saved by guns each year, and how many kids drown in swimming pools or die rollerblading, snowboarding, skiing, swimming, rock climbing, whatever. Swimming pools? When is tha last time you heard of a man saving his or a family members' life with his swimming pool? How many lives have been saved by swimming pools? By the reasoning of the wussy little reactionaries who want to take my guns away from me for a crime somebody else committed, I ask myself what sort of convoluted logic allows dangerous contrivances like swimming pools to exist while the best, safest, most versatile and effective personal defense ever invented, are castigated so. Okay... fill in all the swimming pools, ban automobiles, cover all rivers

and creeks with smooth. safe cememt, level all places to fall from or to fall into, ban all contact sports, pass prohibition again, confiscate all power tools and sharp objects, and what the hell... fair is fair... I'll hand over my guns... that is, as soon as the criminals are disarmed, too.

Check my site for more common sense. url in the sig. Now... the reason I came here... does anybody know what a RCI-2025 is? Saw one in a hock shop for $149 labeled "CB Radio" and almost didn't even pay attention until I noticed it had a key jack in the back.

Some VECs use straight timing. ARRL does not, but that is just the ARRL
VEC's decision and is not a rule or regulation. I seem to recall that the
Gordon West code tapes used straight timing while the ARRL tapes used
Farnsworth.

I believe it is 18WPM character speed at 13WPM word speed for the standard
ARRL VEC Morse exams.

Best way to learn the code is to go ahead and learn it at 20. Serious. Skip
all the "translating" and train yourself to hear the content, not the bleeps
and blaps.

Joseph, you will find that this newsgroup is a lot like the fone bands. You will find about half decent folks here and half assholes. If you want to really meet nice guys who are also hams, and ask technical questions that won't get flamed, get some good ragchews going on 15 meters or maybe 40. CW or RTTY. CW ops on the air are the nicest (except those pesky contesters! HI HI) bunch of people you ever met. I have NEVER heard a word of profanity on CW. I have NEVER heard a personal insult on CW. The only thing I could call rude at all is the paper chasers trying to butt in on a ragchew to get my card when I operate /MM. Hey I can deal with that.

I have participated in quite a few technical discussions on AMTOR too, though I guess Pactor, PSK, etc have supplanted that mode now. One of my first transmitters was built from a schematic sent via HF Fax, and my first SSTV transmission was the same design sent to a brand new General ticket.

By all means, post your questions here. If you get a snotty reply, add the author to your killfile immediately. eventually you will weed out the worst of them. But if you just can't stand the offensive and rude style of the worse half here, get on the air. And toss your mic in a far, dark corner of your closet. I guarantee you will have a better on-air experience, and get at least as much technical help once you become conversational in CW.

For the benefit of the prospective examinees, my personal strategy involved a microcasette recorder and Supermorse by WD5CID. I made my own code tapes, mixed ham stuf, simulated QSO's like the exam format, and random groups. I carried this thing around with me and listended every spare moment. I even took it with me to the test site, and listened a couple of minutes of fast code while everybody was arriving.

Take the 20WPM test even if you are not ready. It will really loosen you up for the 13, and make 13 WPM sound SLOOOOOOOOOOOWWWWWWWW. And who knows... with multiple choice 20 question format, you could get lucky and pass. Anyway, it will make the 13 easier. Usually they give the 20 first, then the 13, then the 5 so if you don't pass one, you take the next one.

If I had to do it all over again, I would definitely start with 20WPM farnsworthed down, and get right in there at extra speed, where the code sounds like its CONTENT and not its separate beeps and boops in series. Practicing at speeds where it is not possible to count and decode strings of diferent length tones is definitely the way to go. About half my learning was listening to commercial traffic on 8 and 12 megs. When I realized the station I was getting the odd character and then the occasional word from (WLO WX broadcasts) was actually sending at 31 WPM, that really built my confidence, too. Funny, but they never sounded like 31 WPM to me. Always sounded slower until th RO told me what I was trying to copy.

I used to really like Hamcomm but newer computers seem to work better with the soundblaster programs than the old serial port comparator circuit setups. The better soundboard input programs make good use of the DSP capabilities of the soundcard and do a really amazing job, sometimes copying what the human operator can barely get, if the sent code is well timed, or better yet computer generated.

I did once have a 50 WPM QSO with my old 486DX Tosh notebook and Hamcomm, teh other guy running pakratt II and a PK-232 with a 286. That was pretty neat. Nearly solid copy too.

Your best bet, really, is to learn the code, use the hardware that nature gave you. If it was all that hard I wouldn't have been able to do it.

I am one of the ones who has way lots of trouble catching on to Morse Code and as a result may never progress beyond Tech No-Code. However, I don't want to see the CW requirement go away, because

a) It will still always be a goal for me. I've always wanted to know a secret language shared by only a few people. Too many books and movies in my wasted youth, I guess; and

b) I don't see how Ham Radio will benefit having an influx of people with your attitude and manners (not, mind you, that there aren't a number of the Code people who can use a refresher course in manners).

Jack,

Brass pounders will always be around, and in large numbers too. As for new blood in Amateur Radio, there is plenty of that too. Where did the notion that Amateur Radio is dying come from? At my extra class exam (recent) there were about 5 youngsters aged about 10 taking the 5 WPM code test. Come to think of it, there were kids testing at every one of the test sessions I attended.

I think we need to worry more about the F layer falling.

That is sad that you and so many others need a test to give
you goals ieithe rin life or is it just in the the ARS.

Why can't you still have learning code as a gaol without the
prod of being tested for it?

>
>b) I don't see how Ham Radio will benefit having an influx of people with

The ARS will benift for any influx of people at all, but it is
not one of the gaols of ending code testing to gain numbers of hams
over all. Iand others feels that it will help some, but it is a minor
possible benifit of ending the requirement

Here's something else to be considered. Repeater stations, both amateur and commercial, identify themselves in Morse Code. How can you know you're using the right repeater, if you can't identify it because you can't read the repeater's slow Morse ID?

For that matter, on HF, how can you tell which CW station is interfering with you, if you can't read its call?

Is it possible that there are other legitimate NEEDS for Morse Code yet to be found?

Chicken Little is an old tale. No one learns. Seems folks are always the same.
Thank you for an independent observation.
I suspect the same small fraction of 13 year olds are still learning code. Like many things that require a little work up front, CW is worth it.

What you hear and what is going on in the hobby are two different
things.

Most of the folks you hear are retired. They have time on their
hands. They have a radio. They're gonna talk. So what?

Have you listened to the non-CW activity on the lower edges of the
bands? Have you listened to the SSB activity from six meters and up?

Have you been to some of the homebrew radio forums at Dayton?

Have you seen the efforts made in class rooms across the country?

Snap judgements like this aren't going to give you much credibility in
this or any other news group...

Perhaps the *most* legitimate reason to know Morse code is that it is required to get access to the HF bands. And despite the bitching and moaning of people like BungHole [sic], most hams do just that. Of approximately 716,000 hams in the U.S. only 179,000 are no-code Techs. Three quarters of all hams had no trouble or problem with learning the code.

As I noted in a response in another thread, when I tested for my Extra recently there were about 5 youngsters aged about 10 taking the 5 WPM code test. I heard no sour grapes moaning either, just the excitement and interest of the curious learning something new. Ham radio is alive and quite healthy from everything I've seen.

If we were all like BungHole [sic], we'd still be living in caves and have sooty faces from communicating with smoke signals. And were that the case he would no doubt be a charter member of No-Smoke International.

Hello all, I'm in need of some help, I'm new to the scene of radios, and I just purchased a Radio Shack HTX-200 for use in my Civil Air Patrol Unit. I want to get it working with my local repeater which has an offset of -4.25 MHz. The only offsets available on the radio goes from 0-2 in .1 increments and then jumps to 8 MHz, does anyone know how I can get the 4.25 MHz offset in there so I can use it? Thanks a ton!

Greetings. I just acquired a used Motorola P 110 ht. The radio did not come with an instruction manual. I have one nagging problem with it. There is a small round button above the PTT button that doesn't seem to do much of anything once pressed. On my other radios, this is a monitor button. On this radio, when I press this button, a yellow light comes on for 4 seconds in front of the volume control. Can anyone offer any insight as to what this is for? I wrote Motorola about it but got the cold shoulder I guess because I bought it used. I dunno. Any help is appreciated

At work I've seen the Yaesu VX-5R and it is REALLY nice.

Of the many features people say they would love to see in a radio (especially handheld), the one I NEVER see mentioned, which I would REALLY love, is a frequency counter. Having one would negate the need to either guess or know the frequency of a service transmitting nearby. And, the HT could then possibly store captured frequencies into memory automatically.

I know Optoelectronics has a handheld frequency counter with built-in speaker, but at $800, with limited features compared to an HT, I'm ready to pick it up.

Any manufacturers willing to do this? To me, it seems to be one of the few features missing from the 5R. Maybe the next HT from Yaesu can do it?

Nope... the Gordon West tapes use the Farnsworth method also (17 or 18 WPM character rate, with long delays between letters and words to bring the overall word speed down).

<< effectiveness of Riley Hollingsworth's
recent campaign to clean up the Amateur Radio Service, one has to look no further than the recent activity on this Internet newsgroup. Most of the "top troublemakers" of 20 and 75 meters have surfaced here, many within the last several days. I need not mention any names or callsigns; it's plainly obvious as to whom I'm making reference to.

Look around. The prime violators, many of whom have been specific targets of recent FCC investigation and/or enforcement efforts, are now carrying on their personal vendettas via the Internet. Coincidence? Hardly. Expect more of these familiar "problem children" of the airwaves to surface here in the coming weeks as Mr. Hollingsworth's noose tightens around their collective necks and puts a long-overdue end to their illegal activities on amateur radio.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

The $200 is what The Boneyard Radio Price Guide gives and it is usually a little behind the times. Certainly not unreasonable if in good shape. The R-1000 is a resonably good little radio, not great but good.

Let me understand this: radiosigs@aol.com AKA "Doktor" Hate AF2Y is writing
About that "guru's talented AF2Y individual the decimator of morons, Wait one
Moment this Character "Doktor" Hate is writing about himself, praising
himself.

I am beginning to see a pattern Emerging; this character is beginning to show
Some of The same symptoms of that genetic split personality disorder that we
All Witnessed in the Antenna news group from that Chip character.

I wonder is this delusional problem genetic? Dork get a holds of yourself are
you suffering from split personality problems Like your "lundsman" Chip? Did
you have yourself tested for "memory" lapses if not please do so as soon as
Possible, we do not want to louse such a wonderful and talented medical
Individual like Herr Doktor "Hate" that wonderful Americanishe Patriot. Or
better still just start to like that other white meat, you know the good
stuff. Make a circle, Make a box, Put some Bagels on some LOX.

Cheers
The "Real" Nate

Tim, What do you do when you see the same thing on TV?
I usually switch channels until I find something more suited to my liking.

So why did you listen to it for 5 minutes when you could have tuned around
and found a better conversation somewhere else on the dial.

I agree with you that there is no place for that on the Amateur bands, but
the fact is that it does happen.
It is also a fact that ..... I am NOT required to listen to it.
And another fact that ... I am NOT required to respond to it on the air.

> Hi Cec, Shot any rattlers lately. What's your score to date ?

I felt bad when I roto-tilled a ground rattler the other day in my garden. He wasn't bothering me at all and I accidently chewed him/her up into little pieces.

I'm not a hunter. I only use my guns for self defense. If a rattler was determined to bite me, I would blow it away. Otherwise, I relocate them to an uninhabited place. I have a Hindu-like reverence for life. I take spiders out of the house instead of killing them.

There are 20 or so mud-wasps that spend the night behind the down-drain pipe on my front porch. I don't know why since there's no nest anywhere around. But as long as they don't sting me, they are welcome to roost there. Mud-wasps are polite and mild-mannered compared to hornets and yellow-jackets.

But useless in giving you gaols which was the point fo the orignal
poster and something that you removed. handy sure, tbut the ARRl can
give tests and proof of passing to those that wish it. Indeed It is my
understanding that The ARRl does that Now with speeds other than the
license tested one (is just for higher speeds than 20 or do they do
for nontested speeds like say 10wpm? I not sure of the details)
>>
>> Why can't you still have learning code as a gaol without the

>
>For the same reason we can't have learning theory as a goal without the
>prod of being tested for it.

there we differ I say you can learn without the prod both
theory and Code can be so learned, in addition The ARRL could test for
and give theory porroves for passing more than is needed to know in
operate and meet the reasonable requirements of the FCC
>>

>
>I'm just curious, what is the goal of ending code testing? Since you say
>it is not to attact more new amateurs, what is the reason? Being as a

I listed a number of goals and the goals differe a bit which the
NoCoder. I'll answer what my goal is plain and simple, Improve the
ARS, take us back to our radios to work the bands not to study cold

text. Indeed Code testing end is but part of what I would like to see

>ham that passes the same written but does not learn the code will be
>less trained than one who would have taken the code test, is it to
>reduce the level of overall level of knowledge in the ARS? If the

I do not consdier Morse Code as tested in the ARS to be knowledge
therefore there would be no change in the knowledge level as a result
of the ending of code testing or if it happened the rates increased.

>written tests remain the same , and they drop the code that is the only
>observation I could make. Future no-code hams will be less capable in
>the overall big picture than code tested. Myself, I'm against any
>reduction in skill needed. period. It should only get harder if

You slip form Knowledge to skill they are not synonyms in my book. I
take no postition on wether the should be required to more or less
skilled than the past or the future the tests should show that they
are skilled enough to fulfill the misision of the ARS, whatever level
that is is fien with me. IF it were shown that this were less than say
1950 fine by me, if it is harder fine by me.

>anything. Why? So we can be better trained overall compared to no code
>countries, thats why. I like being a leg up. And anyway being as they
>have to change treaty to drop code , all your wishing and wanting is a

Maybe maybe not extending the logci of the ARRL's 24oct proposal or
taking other action by the FCC the FCC can end code testing today if
it chooses

>waste of energy. You had best get used to the idea of at least 5 wpm
>code for HF for any forseeable time in the future. Any excess energy you
>would burn in no-code endeaver would be better spent hounding the ITU.

If you have a helpful about hounding the ITU please make it and I'll
thank you for the effort Forseeable gee 202 is within what I call the
forseeabel future indeed after the 24 Oct surpirse of the ARRL I hjave
some hope they will go to a NoCode General, that Is I resapet some
hope that they will do so. I will not be shocked if they do not.

OTH even the 5wpm seemd impossible to many of the ProCoders only
18months ago too

The ARRL Foundation Scholarship Committee has announced recipients for
1999 academic scholarship awards.

Congratulations to these scholarship winners!

The ARRL Scholarship to Honor Barry Goldwater--
(2 awards) $5000:
Meghan G. Radtke, KC7MOC
Nicholas P. Radtke, KC7MOD
Phoenix, AZ

The Mary Lou Brown Scholarship--$2500:
John R. Loflin, KC7CGK
McMinnville, OR

The Earl I. Anderson Scholarship--$1250 each:
Jonathan L. Jackson, N9YMD, Naperville, IL
Scott E. Brock, KB9SZW, Rushville, IN
Gregory R. Doppke, N8TYP, Casco, MI

The Paul and Helen L. Grauer Scholarship--$1000:
Brian D. Ziegler, KC0EWD
Manchester, MO

The You've Got A Friend In Pennsylvania
Scholarship--$1000:
April D. Rodgers, N3PPU
Butler, PA

The L. Phil and Alice J. Wicker Scholarship--$1000:
Brian L. Hill, KF4CAM
Columbia, SC

The Charles N. Fisher Memorial Scholarship--$1000:
Derrill Dabkoski, AC6UY
San Francisco, CA

The K2TEO Martin J. Green Sr. Memorial
Scholarship--$1000:
Benjamin T. Siracusa, N2UIT
Williamsville, NY

The General Fund Scholarships--$1000 each:
James D. Arbaugh, KE4NRC, Stuarts Draft, VA
Richard S. Garrett, AA0CR, Florissant, MO
DeLynn A. Bettencourt, KE6FWU, Crows Landing, CA

The Irving W. Cook , WA0CGS Scholarship--$1000:
John C. Blessing, N0YRL
Hutchinson, KS

The PHD ARA Scholarship--$1000:
Christopher M. Gray, KB0JSN
Donnellson, IA

The F. Charles Ruling, N6FR Memorial
Scholarship--$1000:
Kyle E. Britain, KB5VBE
Grand Prairie, TX

The Charles Clarke Cordle Memorial
Scholarship--$1000:
Michelle H. Swann, KE4EZI
Warner Robins, GA

The Tom and Judith Comstock Scholarship--$1000:
Jennifer D. Shane, N5WFP
Houston, TX

The Henry Primm Broughton, K2EA Memorial
Scholarship--$1000:
David C. Sansone, KB2WEV
Webster, NY

The New England FEMARA Scholarships--$600 each:
Harry E. White, N1QVE, Colebrook, CT
Swaminathan Kumaresan,KD1QV, Wakefield, RI
Jennifer M. Watt, N1TGF, Stratford, CT
Amanda J. Stachelek, N1KYO, Dudley, MA
Kathryn R. Vogel, KB1BVY, Lexington, MA
Lisa M. Nelson, N1JOF, Wilbraham, MA
Robert K. Hammond, N1YZO, Manchester, NH
Samantha A. Fisher, KA1VBQ, South Dennis, MA

The Edmond A. Metzger Scholarship--$500:
Jaroslaw Stopczyk, KB9IIZ
Wheeling, IL

The Dr. James L. Lawson Memorial Scholarship--$500:
Elisha J. Kobre, KB2RWO
Flushing, NY

The Mississippi Scholarship--$500:
Joseph E. Lee, Jr., KD5DKY
Pascagoula, MS

The Fred R. McDaniel Memorial Scholarship--$500:
Daniel A. Quist, KC5KGB
Socorro, NM

The Six Meter Club of Chicago Scholarship--$500:
Beth M. Denk, N9QDY

Romeoville, IL

The Chicago FM Club Scholarship--$500:
Kathryn A. Warner, KB9GSG
La Porte, IN

The Albuquerque ARC Scholarship--$500:
Kathryn A. Galway, KC5KCK
Albuquerque, NM

The IDEA Scholarship--$500:
John P. Morahn, N9YES
Carbon, IN

To apply for Year 2000 scholarships, download our application on the ARRL Web page, http://www.arrl.org/arrlf, or write The ARRL Foundation Inc, 225 Main St, Newington, CT 06111. Deadline for applications and transcripts is February 1.

Darwin had much to say about similarly ill equipped species. It was
either an act of exceedingly poor judgement, or he was stone deaf and
didn't notice or recognize the imminent onslaught. In either case, rest
easy knowing you did evolution a favor.

Michael.

There are *laws* and there are *rules*. This sounds like a "rule" of
this particular carrier. While I understand you feel inconvenienced,
this carrier gets a hearty "thank you" from me for taking precautions
to ensure their flights are safe. In your case the de-batteried HT is
benign and harmless, but the same item in the hands of a bad guy might
not be.

Just my $.02 worth.

Hans, K0HB

But evolution cannot possibly keep up with man's technology. Pity the
poor deer who have never before looked up and seen anything dangerous
coming at them at 80mph.

SB QST @ ARL $ARLB030
ARLB030 Operators still needed in Oklahoma tornado recovery

ZCZC AG30
QST de W1AW
ARRL Bulletin 30 ARLB030
>From ARRL Headquarters
Newington CT May 6, 1999
To all radio amateurs

SB QST ARL ARLB030
ARLB030 Operators still needed in Oklahoma tornado recovery

The Salvation Army and the American Red Cross have put out calls for
additional Amateur Radio assistance in the wake of Monday's
devastating tornadoes in Oklahoma. Oklahoma Section Emergency
Coordinator Bennett Basore, W5ZTN, has been running emergency nets
and radio amateurs have been handling ''tons of health and welfare
traffic.''

Oklahoma Section Manager Charlie Calhoun, K5TTT, reports the
Salvation Army has requested amateur operators starting May 7 and
probably for the rest of the week. ''They need hams to act as
shadows and transport units in addition to manning the canteens,''
Calhoun said. ''They are expecting to send out 40 canteens into the
field tomorrow.''

Calhoun said much of the activity is going through the Edmond, Oklahoma, 147.135 MHz repeater, which can be difficult to access with hand-held transceivers. He said mobile transceivers and external antennas and power sources would be a better choice.

He said volunteers should plan to stay at least four hours in the field. No vehicles are allowed in the field, and officials are shuttling hams in and out. Calhoun said it appeared that Amateur Radio communication would be required at least through Saturday. Volunteers should check in with the net control on the 147.135 repeater upon arriving in Oklahoma City.

Hams from the Tulsa area are planning to leave today for the Oklahoma City area to assist.

Ken Runyon, KC5PNO, reports that The Red Cross is requesting at least 50 amateur operators to be available all day Friday, May 7, to begin damage assessment. ''Hams will start working with damage assessment teams at 7:30 AM and will be moving from home to home through the disaster area,'' he said. Operators will need good footwear, a two-meter radio, and batteries to last at least 10 hours. Volunteers should contact the Red Cross, 405 232-7121.

OK Public Information Coordinator Thomas Webb, WA9AFM, reports he's monitored health-and-welfare traffic on both 2 meters and 75 meters coordinating Salvation Army canteen support.

''Based on the excellent warning, most of the victims appear to have left the disaster area prior to the strike and were in contact with friends or family or were in shelters with adequate communications,'' he said.

For more tornado information and photos, visit http://www.hamsnet.net/kc5trr/oklahomadisaster.htm

In the Wichita, Kansas, area, Kansas Section Manager Orlan Cook, W0OYH, reports emergency net operations continue on HF. WB0OFS is a net control for the Central States Traffic Net. The town of Haysville was hardest hit during the Monday storms, which left five people dead in Kansas.

With January's unusual tornadoes still fresh in their minds, Amateur Radio operators in Tennessee were ready to respond promptly when severe weather hit the Volunteer State May 5. Some counties activated emergency nets just in case. Hams in Montgomery County were asked to have mobile units ready to go to specific areas to check on flooding. In addition, the Red Cross asked hams there to stand by to assist. One operator was deployed to the local emergency operations center and another to the Red Cross.

Hi Keith OM,

Thanks for the thoughtful response.
In WWII, the military taught Morse code to literally thousands of people from all kinds
of backgrounds and abilities. Many of them were not doing it voluntarily, either!
I myself cannot see where using "tapes" and "computers" is an effective learning method
for learning to use the code conversationally, as we do in ham radio. First of all, it
is boring, listening to basically boring content being sent. As you said, you eventually
memorized the tapes. That should be a clue that that is not the way to learn the
code. Why not listen to something interesting instead?
To become comfortable with CW, you have to 'USE IT' for some purpose. Listening to real-live
conversations on the air is what made CW take off quickly for me. Fortunately, in those days
there was no distracting temptation to somehow 'use a computer' (a distinct advantage, from
what I can see). Second of all, it does nothing to teach you how to listen to REAL
WORLD signals off the air, while at the same time, you are internalizing what is being said.
This is what worked for me. It has been music to my ears ever since, and is definitely my
preferred mode for ragchewing on the air, compared to using voice. When you are otherwise
just wasting time (ex: while driving), sound out everything you see

written: street signs,
license plates, etc etc. Make the sounds of CW very familiar to
yourself, so that
you associate those sounds immediately with the letters and numbers and
punctuation.
This all requires zero investment in $$, and can be done anywhere,
anytime. Lastly,
listen ON THE AIR to real CW QSO's, as much as you can, to all kinds of
fists, in various
conditions of in the clear to buried in the QRN/QRM. Watch out! You
might suddenly
become hooked; that is a risk you take. If that happens, you will
suddenly see yourself
on the other side of the perennial code argument, and can't for the life
of you figure
out what all the fuss is about; it has happened to many others, HI.
Lastly, like anything else, CW is not fun for EVERYONE. Some people
just do not take to it.
But that is a very small group indeed, I think. Especially at the
moderate speeds required.
After all, 5 WPM you can practically look up real time. 13 WPM actually
requires that you
know and can respond almost immediately to the characters. This does
not seem to much
to ask, for a large number of us. I believe it is an essential part of
one's education
to become a ham and to use HF (the 'real' ham radio to me).
You can do it.

73 and GL,
Don, W6JL

3174. Re: Top Band Isn't

Just think. If we ever get that allocation at 160 KHZ for a
true ham band, then 160 won't be the top band any more.

> Keith Lodahl
> Mayville, Wisconsin

Keith,

I forgot one other important point in my post. DON'T WRITE STUFF DOWN. Copy it in your head; that is how you will be using it for ham radio ragchewing. Writing it down is an (unnecessary and limiting) habit that you don't want to get into if you can avoid it. I sometimes run into ops on the air who ask me (as I am working mobile CW) "how do you write it down?". Egad.

73,
Don, W6JL

Well, well, well, looks like the good old FCC has its share of jerks like ham radio. Ironic that they are telling hams THEY can't speak their minds on the air, when they are using government computers and work time for this. Daily Digest recipients received this today.....

Wonder what ARRL thinks ?

Granted, there's no excuse for the nastyness on that freq,.

but after all the discussion here and elsewhere,
why in God's name did you tune the radio to 3950
for him to hear in the first place???

By my estimation, there are about a zillion other
freqs on which you could have parked your radio.
Doesn't make sense.

When I was in the military they used to pound 5-letter code groups into your head 8 hours a day, 5 days a week for months on end. At that rate, you could copy in your sleep. After passing a military test at 35 wpm I nearly flunked 13 WPM in front of the FCC. The FCC wouldn't send 5 letter groups, they wouldn't let me use headphones, and they made me write it down with a pen and paper, no mill (typewriter). Took some on the air time to normal conversation.

So maybe we need a Ham Radio Boot Camp to force people to learn the code. Lets see.... we also need a typing test in case the new ham wants to use a keyboard. Two actually, one for the computer keyboard and one for teletype machines (you never know when one of those mechanical monsters will be only communications available). Almost forgot, a speech test in case he wants to work SSB or FM. :-)

Or.. how about we just give a written test on basic theory, regulations, and accepted operating practice?

3180. GP Antenna problemm TSB 3305N

Newsgroup: rec.radio.amateur.misc

Hallo on you i have bought an GP antenna typ TSB 3305N 5/8 (TawaineeSereene)
.
And i had it few month's.Recently i have found a problem with the antenna
the SWR meter is moving up end down in variable vinds condition.I have
almost exactly same antenna product from Diamond and this is gong very well
.But the TSB modell is not so good or are all the GP 5/8 antennas has this
little problem with the SWR on wind blowing on them.I have two 6 element
Yagi 's and these are much better performance if the wind is to strong for
the GP's.

I have read in this news group that some hams has this problem to.With
theres GP antenna 's
So it perhaps nothing wrong with my Antenna.

We have a mom-and-pop hardware store near my house and the owner (now in his 80s) was a Morse operator in WWII. He told me when they were trained they were put in a room with recorded combat sounds being played - guns, exploding shells, you name it - and made to practice until they could copy 25 WPM. Dunno if its true or he was just weaving a good yarn, but it would certainly make for an interesting way to learn the code.

I see that you're here too, George. Get a letter from Riley? Decide to
take your little obsession somewhere besides the airwaves? Probably a
wise move, since now the potential exists for FCC repercussions to your
behavior over the radio. It must pain you to find that your heroic
battle can no longer be waged without risk.

Why did you think you had the right to re-post that message in any other forum? What was your point in re-posting it?

The only thing it proves is that the FCC either hasn't developed or maybe hasn't made all its employees peruse their email policies.

But I question your motives by re-posting it here. It means absolutely nothing about any FCC department or division.

CW wrote: Public school has obviously taken a toll on your mind if you think the whole point of learning is to take a test.
> CW

Learning comes *after* taking the entrance test. The entire medical school & law school curricula focus is to pass a national board exam; contractor & real estate licensure, and ham radio guidebooks are geared to passing a test. If you want to learn a subject, well..., that comes afterward with further reading and experience. Them's the facts, that's human nature.

BTW, for all of you who pine about the "good old days" and things aren't like they were X years ago. What was your input? Where were you, on the moon? Did you just standby and let things happen? Oh well....

Evolution isn't really the slow changing of a species we were taught. It is more accurately described as a pruning of the unfit. Back to your rattler, an animal that lacks whatever gene to retreat from loud, vibrating machinery, tearing up the earth while approaching at a ponderous pace, possibly puts too much stock in its defense mechanism. Or maybe it was stone deaf, or was already dead from other causes. (From fright, perhaps? That, too, could have been a required pruning.) A more likely scenario was that she was protecting a freshly populated nest. Even then, it need not be a personal tragedy for you. The greater tragedy would be your family starving from the lack of greens left unrealized from the gardens you dared not till.

Also, I do feel pity for the poor deer, but remorse is still not appropriate here. I wonder if you feel similar pity for the unsuspecting driver? Both stumbled simultaneously on the mutually unfamiliar situation. Injury, or property damage, was not intentional on either part.

Sh*t, as with CW testing, need not be right or wrong. It just is.

Michael.

Some software (e.g., Morse Tutor Gold) is pretty effective, in that it sends typical, but random, QSOs. Of course that may be boring (many qsos are!), but it is better than the old 5 element groups.

Phil

I am one of the ones who has way lots of trouble catching on to Morse Code and as a result may never progress beyond Tech No-Code. However, I don't want to see the CW requirement go away, because

a) It will still always be a goal for me. I've always wanted to know a secret language shared by only a few people. Too many books and movies in my wasted youth, I guess; and

Jason,
The small button above the PTT on your P110 is programmed for
"silent monitor" mode. Despite the complex name, all this does is take the
PL off of your radio so you can hear all of the traffic on channels you are
on. If you notice, once the light has gone off, if you change the channel
or key up, the light comes on again. This is supposed to remind you that
you are in silent monitor mode with the PL off.

Paul Krzewinski, KC2DLA

3221. Need Lowfer Help

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-07 00:00:00 UTC
From: mf_luder@my-dejanews.com
Message-ID: <7gtsnr$d34$1@nnrp1.deja.com>
Source record: 143594

Lately, with the use of narrower digits and slower speeds, I have been able to squeeze into the narrow width provided for the lowfers.

However, when I eat too much salty food, my feet become swollen and I am unable to put my best foot forward. It's like I'm walking on air the rest of the time. Any idea whether a horn would help this low, or would sneakers be better ?

3222. Re: KV4FZ - American Hero

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-07 00:00:00 UTC
From: zz4@webtv.net
Message-ID: <29865-37326AA1-44@newsd-134.iap.bryant.webtv.net>
Source record: 143595

I smelled there was more behind it !!!! Does not everybody make mistakes ? Ever forgive ? As to the 'convicted felon' comments it just shows the sad status of amateur radio and the intelligence of the diminishing numbers that survive. Once a felon was a murderer,rapist,robbed 47 banks,bombed UN building,etc. In 1999 a felony can mean 2 littering citations...or a good one....with-holding ALL AND COMPLETE EVIDENCE to a law enforcement officer asking questions...i.e. what time did you go to bathroom last night ?? Few realize that everything the usa was founded on...constitution..bill of rights ARE TOTALLY NON-EXISTANT IN 1999. Don't get inflamed over my opinion just be EDUCATED..RESEARCH !!! Otherwise I know not the kv4fz case except something has always smelled fishy. If the guy did make errors in judgement was it to be nobody is ever to be forgiven ? ps..I might add 1999 usa a good part of law enforcement and justice system are operating un-convicted felons. WHY ? NEVER HEAR OF CODE OF CONDUCT ? NO LAW ENFORCEMENT EVER ARRESTS OR PROSECUTES THE 'LIKE SPECIES'...../////

3223. Rogue Cancellation Summary for rec.radio.amateur.misc - 5/6/99

Rogue Cancellation Summary for rec.radio.amateur.misc - 5/6/99

The following is a summary of Rogue Cancellations of Usenet posts in
the rec.radio.amateur.misc newsgroup for 05/06/99.

All of the Rogue Cancels are originating from Bellsouth Internet
Services. If one of your articles was Cancelled by this Rogue
Canceller, then I suggest you send a complaint to the Abuse Dept at
Bellsouth at abuse@bellsouth.net along with the headers to one of
the Rogue Cancels listed below.

This is the break down of the articles that were cancelled:

radiosigs@aol.com 16 Articles Cancelled
richwhiten@aol.com 6 Articles Cancelled

Of course, that won't work. You have to send your command message to the command address (same one you used when you subscribed to the e-list info-hams@ucsd.edu). The complete unsub instructions are contained in the Welcome message you received when you sub'd. If you deleted that important message, good luck getting off the list!

If 13 five-letter words are sent in one minute, then it's 13 WPM, even if
the character speed is 18 (which would mean the space between characters
would be on the order of about 10 WPM -- I'll do the calculations to give
you the exact spacing speed, if you'd like).

Hello!

After some time working on other things, I have returned to radio related activities... This time, a recently received IC-228H is the patient in my workbench. I bought it knowing that it was stuck in transmit. I got the original box, manual, microphone and, of course, the transceiver (which also has the UT-40 optional tone module :-)). I just missed the power cord (any available, at least the connector?) and the screews which hold the rig in the mounting bracket (which I have).

Well, looking at the schematic I suspected of the transistor which is activated by the PTT switch. I got the 2SC2712 SMD transistor out of the PCB, along with a 100k resistor in the bias circuit and then powering the rig I got it in RX mode. Wow!!!. I am a genius ;-)!. So I located a replacement transistor (it was not hard, as at my work we use lots of them and this was a common PNP transistor) and replaced it... To find that the rig started again in TX mode. Hmmmmmm.... Not a genius at all ;-)!. Then I decided to check the SMD bias resistors around that transistor and... voila!. I found a 220 Ohm resistor which had drifted to about 60k Ohm!. Replacing it temporarily with a conventional 220 Ohm resistor, I got again RX on startup. Nice!!!. So I hooked the microphone, pressed the PTT and... nothing happened!!!. RX mode with or without PTT pressed. Well, don't panic!. Sometimes things are that way... Manually shorting pin 5 (PTT) to GND, I could get the rig on TX mode. So the switching transistor was working fine. Faulty PTT switch?. Opening the microphone I found that the PTT switch was fine so... Wiring!!!. I opened the mic connector to find that the soldering was modified!. A fast check to the manual and schematics revealed no less than three wires uncorrectly wired (including, of course, the PTT). Once I fixed it, I got PTT, UP and DOWN functions as usual. Yahooo!!!

But, wait a moment. The RX audio is looooow... And the squelch doesn't work (the RX LED is always on). Checking with my trusty walky at 25mW (Extremely Low power), I could get maximum S-meter 'deflection', but very low audio, hard to hear. And that's all for now!. I am stuck at this point: low RX audio and non working squelch. Could somebody help me with this?. Perhaps is a common failure with this rig...

Thanks a lot and best regards.

JOSE

No, it's not just the ARS. It's many things other than ARS. Tests are
handy to gauge know how in a subject.
>
> Why can't you still have learning code as a gaol without the

For the same reason we can't have learning theory as a goal without the
prod of being tested for it.

I'm just curious, what is the goal of ending code testing? Since you say
it is not to attact more new amateurs, what is the reason? Being as a
ham that passes the same written but does not learn the code will be
less trained than one who would have taken the code test, is it to
reduce the level of overall level of knowledge in the ARS? If the
written tests remain the same , and they drop the code that is the only
observation I could make. Future no-code hams will be less capable in
the overall big picture than code tested. Myself, I'm against any
reduction in skill needed. period. It should only get harder if
anything. Why? So we can be better trained overall compared to no code
countries, thats why. I like being a leg up. And anyway being as they
have to change treaty to drop code , all your wishing and wanting is a
waste of energy. You had best get used to the idea of at least 5 wpm
code for HF for any forseeable time in the future. Any excess energy you
would burn in no-code endeaver would be better spent hounding the ITU.

KV4FZ is a self-centred egomaniac who was caught breaking the law (and convicted) and should be in prison. I know him personally and have known about him for more than 25 years. The more time he gets in prison, the better. He should not be on the air as he is a convicted felon. Furthermore, he is a WANKER.

IMHO he has taken you all in to fight his loser's cause.

My father is 75 years old and since my mother passed a way he is looking for new hobbies.
He knows I am a ham and asked to see my station when he came over to play with his grandchildren. We heard Racist and Foul Language for about 5 minutes on 3.950 (approx). My father was disgusted and shut the radio off and said : " why would I spend my time and $ on a hobby that would allow such Filth, Racist etc". I felt ashamed.

I just finished giving my seven year old his code lesson. He's learning the code to earn a award in his Tiger Cub Scout group. He is a seven year old that came to me to learn the code, and has no interest in radio, I would think that anyone who is interested in radio should stop crying about it and donate the 15 minutes a night for 2 weeks, and learn it.

No one complains about having to learn how to use windows before they can surf the net....

Subit a 610 application form to the Gettysburg, PA address. If you want, you should be able to download a 610 form from the FCC and maybe from the ARRL web page.

About 10 years ago I had the same problem at Montreal or Toronto. After a talk with several people I found it was (allegeldlly) a well known regulation in Canada. They made an excellent point. You could claim you have a bomb in the cargo and this is the trigger. I was required to check the radio through.

Of course these days with Cell phones, it would be tough to argue against a Ham transmitter.

>Who says you have to put a callsign in the Newsgroup????

It adds credibility to your comments, and it keeps you out of kill-files.
Just as the PL decoder helps to eliminate repeater jammers, the KF helps
to eliminate newsgroup jammers.

Without a callsign here, you're just white noise, begging to be squelched
out with the KF.

>frequencies and never use Morse Code. There are a lot of us like that
>that are licensed hams now.

It's doubtful that you're licensed, for you'd know better than to be cross-posting this thread to rra.space. Regardless, when one operates on HF, he's operating on a CW frequency, for CW is the only mode permitted anywhere on any frequency. Thus, it only makes sense that one should have the capability to copy code to be on HF. (Not necessary for V/UHF operation, for unlike HF, 50% of the QSOs up there are not conducted via CW.) // Jeff KH6O

Oh My.....!!!!!

3258. W4AMP's gone bonkers!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-08 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990508152548.08237.00000964@ng-fe1.aol.com>
Source record: 143431

Good Lord,does anyone have a Valium or a Librium for Jimmy O'Brien.W4AMP?. I just got the most violent threatening E-mail from the guy and he's up in arms over my posting asking if anyone could prove that it's he who's nuking my letters as well as being that scumbag "DonkeyBoy666." You'd think I was his landlord who just dispossessed him! What a temper...cool down Jimmy. Once again I'm asking anyone who can prove that it IS or IS NOT W4AMP to step forward. If it's NOT, then I'll have to continue my hunt. If it is, W4AMP's in trouble, I think. The nuker's on BellSouth and Jim's E arrived by way of arrl.net which is a bit confusing to a newcomer like I. I'm not too hep on how many servers one can have. And don't think I'm being too rough on Jimmy. It's true we do have an on-the-air pact going but before that...well he threatened my life and the FBI stepped in and also uttered the most profane anti-Semitic remarks ever heard on amateur radio. And so I thought that just perhaps, for no other reason than my loathing Schoenbohm,Jimmy once again has gone on a hate and terror campaign. But I could be wrong. At the times of nuking, just perhaps Jimmy was studying since he's in college. Oh well,the truth will come out in the long run. In the meantime I find it ridiculous that his furious letter to me should have also been sent to Riley Hollingsworth as indicated. That's the silliest thing imaginable. Riley's concerned with who nuked what? Or than again, since Riley did demand a letter from Jim who did impress the former with his sincerity and honesty, perhaps Jim is now trying to build brownie points at MY expense, which by the way, I DON'T LIKE. I hope that sets the issue straight and once again, if anyone can prove that W4AMP is indeed the creep who's been illegally nuking my stuff as well as being the Hitlerite creep "Donkerboy," let me know. I'm sitting on pins and needles! Doc AF2Y radiosigs@aol.com

This of course is true in the US. Amateurs in all the other administrations have no such restictions... all frequencies are for all modes.

> Thus, it only makes sense that
> one should have the capability to copy code to be on HF. (Not necessary
> for V/UHF operation, for unlike HF, 50% of the QSOs up there are not
> conducted via CW.) // Jeff KH6O

Let's examine this bit of twisted logic by Herman. On the one hand, he claims the since Morse code is permitted on all the HF bands , it makes sense that there is CW testing. Yet, is this not the case for permissable usage of Morse code in the VHF and UHF bands? (The irony is that the only pieces of the amateur spectrum in the US that are devoted only to CW is in bands above 30 MHz!) Not according to Herman, it isn't. According to Herman, Morse code testing is not required for those bands because "it isn't popular". Not unsurprisingly, Herman is once again demonstrated his penchant for being inconsistent. Would he be kind enough to explain which is the appropriate criteria for justifying Morse code testing - is it due to widespread permitted use, or its popularity? Since the use of SSB and digital modes far surpass the use of Morse code (I don't know where Herman gets his statistics from, but he really should get someone else to do his surveys for him in order to obtain a truer picture of the usage of the amateur HF spectrum), it can hardly be argued that popularity is hardly an arguement to continue Morse code testing; while Morse code's permitted use is hardly supportative either. We can only conclude that Herman uses only those statistics that satisfy his and that of his fellow Pro-Code Agenda advocates while ignoring those which contradict their beliefs.

73 and live better digitally

The FBI Uniform Crime Statistics report is a compilation gathered from all
law enforcement agencies throughout the United States and it's possessions.
It is not just crimes reported directly to the FBI. If there are persons who
did not report their attack to any law enforcement agency, then how do the
anti-gun folks come up with their "evidence" ? Word of mouth ?

>

In L.A., it is standard practice for the gang members to kill their victims during the assault. Their thinking is that no witness helps them get away with the crime. They are mostly correct. Many victims never get a chance to run.

>He who runs for his gun ...

That's part of the problem, the gun laws make a lawful person have to "run for his gun", because only criminals are carrying them

>...may not be the first to shoot.

True, but he who is properly trained will usually get the first hit. Look at all of the L.A. gang drive-by shootings where they expend dozens of rounds and often hit only one person, if they hit anything at all.

>> I look at it much like home or car insurance. I pay a lot of money to buy

that
>car or driver insurance was required in every state that I ever registered
my
>cars in. Why don't states or the federal government require that the owners
>of all registered guns have gun insurance?

Simply because driving a car is a privlidge granted by the state, therefore they can legally regulate it. Private ownership of firearms is the right of a free man. The Constitution does not grant this right, it only acknowledges that it is an existing, inalienable (God given) right.

>The insurance companies will then
>have the funds to independently track guns in private computer data bases;
>independent of governments, and to have the motivation and funds to
>investigate gun related crimes and gun thefts and "accidents" objectively.

Sure, we all know how trustworthy, unbiased, and honest the insurance industry is.

>That is not a "pinko" idea because it would place some of the
responsibility
>of nationally tracking gun sales, trades and thefts into the private hands
of
>the insurance companies. It could also pay the victims of gun "accidents"
or
>their estates in the same manner as many car accident victims are now paid

insure
>the guns of minors or convicted criminals (and prevent registration)
because
>they are of very high risk financially, perhaps the insurance companies
will
>be more careful than the dealers at gun shows are.
>

This might work for the honest man who obtains the required insurance, but just like automobiles, the bulk of the drivers causing the problems are also the bulk of those who are uninsured.

I would have no problem in carrying liability insurance for my actions if in return I am given a permit to carry. Remember, you are not required to have a license or insurance to own a car, you need them only to drive it on a public street.

>
>I've been called a "wimp assed pansy" elsewhere in this thread. If so that
>gives me the personality to say that although I do not agree with you Dan,
I

I would not think of you, or any other anti-gun person in these terms. I do believe that there has been a long time PR campain by both politicians and the media to create this mindset, and many people have been affected by it one way or another, and may not even realize it.

3262. Phone Patch HELP!!!!!!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-08 00:00:00 UTC
From: Brian Romine <brianromine@hotmail.com>
Message-ID: <7h26kvqqk1@news.campuscwix.net>
Source record: 143435

Hello,

My name is Brian Romine and I have recently aquired a SYT Corporation TELE-CONNECT 850 Automatic Interconnect Terminal. I have made an initial search on the internet for such a corporation and for the name tele-connect 850 (no matches). So now I turn to the Ham-Radio community for help. I need a manual, or a copy of a manual for this unit, or at least need to know what the different jumpers are for in the boards.

Thank you for taking the time to read this and if you have knowledge of someone that also has this type of unit, or information on this type of unit I would appreciate an email with this information.

kc5cay@hop-uky.campuscwix.net
or
brianromine@hotmail.com

thanks again.

3263. The W8MMQ/RSCM Wire-5/05/99

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-08 00:00:00 UTC
From: "Daniel Hicks, Jr." <w8mmq@voyager.net>
Message-ID: <7h26f6$7me@news.voyager.net>
Source record: 143436

Sign up for the free W8MMQ Wire!
Just email w8mmq@voyager.net, and ask to be placed on our mailing list. The newsletter is sent out weekly, usually on Wednesday evening.

May 5, 1999
Target: rec.radio.amateur.misc

Welcome to the W8MMQ Wire for May 5, 1999! This newsletter is distributed weekly by W8MMQ and the Radio Society of Central Michigan, and is available free to all radio amateurs.

If you would like to receive this newsletter via email, or would like to be removed from our mailing list, contact Dan, W8MMQ, at w8mmq@voyager.net. Your email will be answered as soon as possible.

Stories in this week's newsletter:
o The FCC Drops Enforcement Line;
o Dayton Hamvention News;
o Florida Hams Warned After Cuban Complaints;
o Upcoming Amateur Radio Contests;
o And much more!

THE FCC DROPS ENFORCEMENT LINE
The FCC has dropped its amateur radio enforcement telephone line, which was never intended to be a permanent service. The Commission will still accepts complaints via email, or conventional postal mail.

All complaints sent through email should go to fccham@fcc.gov. Complaints sent through the mail should go to the Compliance and Information Bureau, Attn: Amateur Radio Complaints, 1270 Fairfield Rd, Gettysburg, PA 17325.

As of last week, all complaints filed through the telephone number will be acted on.

--- W8MMQ/KC8KFZ

DAYTON HAMVENTION NEWS
The Dayton Hamvention is just a couple of weeks away! The Hamvention will be held on May 14, 15, and 16 this year, and, as usual, will be at the Dayton Hara Arena.

Each year, the Hamvention draws thousands of amateur radio operators from around the world, where they buy, sell, and trade their amateur radio and computer "goods." There are also interesting forums and lectures given on a variety of topics, from various groups and organizations.

Special entertainment this year will be provided by musician Joe Walsh, WB6ACU. Walsh is probably best known for his work with the group, The

Eagles.

For more information on the Hamvention, including directions to the arena, area hotels and restaurants, and much more, visit http://www.hamvention.org/.

--- W8MMQ/KC8KFZ

FLORIDA HAMS WARNED AFTER CUBAN COMPLAINTS
The FCC has followed up on malicious interference complaints from Cuban amateurs by sending Warning Notices to two Florida hams. The FCC letters, sent April 23 by Legal Advisor Riley Hollingsworth, K4ZDH, refer to monitoring information indicating the US hams deliberately attempted to jam 40-meter SSB net operations in Cuba.

The Federacion de Radioaficionados de Cuba (FRC), the national amateur organization in Cuba, first complained nearly two years ago to the International Amateur Radio Union, Region 2, about ongoing intentional interference by South Florida hams to Cuban nets and emergency operations. When the complaint was forwarded to the ARRL, Executive Vice President David Sumner, K1ZZ, responded with an expression of regret and a request that the FRC share any information that would help identify the perpetrators. Earlier this month, FRC General Secretary Oscar Morales, CO2OJ, was able to supply information that assisted in tentatively identifying two individuals believed to be involved in causing the interference.

Morales said that the Cuban nets have even tried moving to get away from the QRM, but the interfering stations have followed, at one point even jamming two frequencies at the same time.

Hollingsworth said he believes the interference has been on SSB by Spanish-speaking stations. The Cuban nets in question operate on frequencies that fall within the US Novice band, meaning that any US operation using more than 200 W PEP or operating SSB would be illegal. The US SSB subband begins at 7150 for Advanced and Extra class operators.

Hollingsworth has requested the two stations to respond to his letter within 20 days.

--- Taken from the ARRL Letter, April 30, 1999

HAMS TO BE ON DAVID LETTERMAN SHOW
The ARRL is reporting that a group of hams from the Long Island Mobile Amateur Radio Club plans to be in the audience of the David Letterman show on Monday, May 3.

The group will have club and ARRL literature on hand, and will also raise the club banner. Members of the club who are planning on attending were told to wear their club name badges.

There is no word on whether or not Letterman has any of his "famous" canned hams ready for the group ... we will just have to watch and see.

Late Night with David Letterman is aired nationwide, usually following evening news broadcasts (for those in the Central Michigan area, it is aired on WLNS TV-6, at 11:30 PM).

--- W8MMQ/KC8KFZ

FREE WEATHER INFORMATION!
There is a new service online that offers free weather information and imagery! The service, WX4U ("Weather For You"), is online at http://www.wx4u.com/.

Users must first register, which is free. Once registered, you can select what weather "products" you want emailed to you, as they are issued by the National Weather Service. There are a variety of products available, such as severe thunderstorm warning information, tornado warnings, flash flood warnings, and much more.

There are also weather images available, which you can put on your web site for free! These images include current conditions and information, weather forecasts, and more.

The site is definately worth checking out. I am using it, and find it very useful and accurate, and very easy to use.

UPCOMING CONTESTS AND EVENTS
For the latest amateur radio contest information, visit the ARRL's Contest Calendar, at http://www.arrl.org/contests/. Also, for the latest information on upcoming events and hamfests, visit the ARRL's Hamfest Calendar, at http://www.arrl.org/hamfests.html.

The Fists CW Club Spring Sprint, sponsored by Fists International, will be held from 1700 to 2100-Z on May 8. Operate CW only, and work stations once per band. Operate 80, 40, 20, 15, and 10 meters. For more information, visit http://www.fists.org/.

And, from Chuck, W8VOM ... The MDXA (Michigan DX Association) will be putting "Beaver Island" On The Air September 10 through the 17th. Beaver Island is IOTA #MI032L and we will be using an 8-man team with the call KC8MHX, Michigan Ham Xpedition. We will use standard IOTA freqs as well as other frequencies. For a QSL card, please contact W8VOM at the following address: MDXA-BEAVER, O-947 Lake Michigan DR, Grand Rapids, MI 49544.

Editor's note: We will list the Beaver Island DXpedition information periodically through September. Good luck to Chuck, and all the guys on the team!

DX REPORT
From Tuvalu, T22JY, T22KJ, T22TK and T22VE will be active from the 2nd to the 9th of May, using both CW and SSB. This counts as OC-015 for the RSGB Islands on the Air Awards Programme.

From Ghana, 9G5DX will be active until April 2000, while working there.

From Nepal, 9N7ZA will be on the air from a 24,000 feet location, using SSB on 7234, 14158 and 14175-kHz.

And from Belau, T88LJ and T88YH will be on the air until the 6th of May, using CW and SSB on 6 to 80 metres. This counts as OC-009 for IOTA.

Information contained in the weekly DX Report is taken from the Radio Society of Great Britain. Visit the RSGB web site, http://www.rsgb.org/, for more information.

AND ... IN CLOSING
Thank you for reading this issue of the W8MMQ Wire. We hope that you have enjoyed it, and please, feel free to pass it along to others.

To read the W8MMQ Wire online, visit http://my.voyager.net/w8mmq/. An archive of past newsletters is available from the web site.

Also, visit the W8MMQ/KC8KFZ Antique Radio Page, at http://my.voyager.net/kc8kfz/. You will find a nice collection of links to antique radio organizations and radio galleries.

Information from the following sources was used in the production of this newsletter: Amateur Radio Newsline, the ARRL Letter, the RSGB web site, and other published reports.

I would like to buy some HT-1000's and MT-2000's
They must be native 450-520 UHF, in good condition..

1) Model/Model #
2) Condition (on scale 1-10)... Please note any major defects...
3) Are the following included?
a) Universal connector seal
b) Antenna
c) Speaker Mic (model #)
d) Charger (model #)
e) Batteries (model #/date code/condition)
f) Carrying Case (model # or type)
g) Battery Belt Clip
h) Programming Cable
i) RIB box
j) RSS Software (version #)
4) Is the ID label on the back of the radio
5) Price you are requesting (Please give the lowest possible, I do not
like to haggle...)
6) Approximate S/H cost to zip code 11576
7) Your prefered method of payment...

Thank you VERY much... I look forward to doing business with you....
Marc

Please respond directly to waffull@skibuff.com...

This goofball tells everyone who will listen to him that he invented this antenna. For his information , this antenna is in the book "The Radio Amateur Antenna Handbook". It is on page 152-153. This book was copyrighted 1978. Yet this lame brain takes credit for the design. The book was written by W6SAI and W2LX Bill Orr, and Stuart D. Cowan . Dr Hate, you did not invent this antenna. Quit trying to reap rewards that you have not sown. The Antenna has been around for years.

Jim Cummings wrote:
> I don't know where Herman gets his statistics from, ...

Jeff gets his statistics from what he can hear, NOT from what is being transmitted. To get a fair comparison count of stations, he would have to count ALL the SSB stations that he hears and count ONLY CW stations with a signal strength above S-3 because of the 12-18 dB advantage of CW over SSB.

New N.Y.P.D. Radio Plan & Frequencies
By David M Torres, New York City

the following is updated radio frequencie information for the
new york city police dept. they are in the process of re organizeing their
complet radio network which is now in phase 2 of a 4 part phase they
expect it to be completted within 2 years
phase 1 was the re organization of all city wide and special units
phase 2 is the re organization of all division radios
phase 3 will be the frequency expansion and narrowing the band
phase 4 with be the purches of new radios and fadeing out the
motorola saber's the new radio i have bin told is water
prof, bullet prof, weather prof and shock prof from droping
the parts are cheper than motorola
as for the new york city fire department E.M.S. units they are also
re organizeing their radio system from 800 trunk back to a conventional system
they will be useing motorola ASTRO saber's with both EMS & Police frequencies

if anyone knows of any new frequencies such as tac channels from A to E
or what new Tac channels the NYPD division radio have do leet me know i am
completly lost on this subject

i would also like to point ot the phase 2 is not fully completed yet its
a very slow process and it dose take time but it is on its way so the changes
can take place at a blink of your eye

as always happy listening and keep your ears on.....

OK I started the thread, here goes.....
First SCUBA '58
WA5IGW '63 QCWA lifer
Private pilot '67
Since added Commercial, Multi and Instrument. I drive a P Baron.
LOTS of fresh water diving in the '60s. Ever dive a golf water hazard in the hope of finding enough balls to pay for the air charge?
NASDS open water '70 (Tektite II Summer '70) ruined me for golf gourse diving
TDI NITROX from Jim Bowden '98
Dove the Tektite II site this Spring Break; Sixteen pounds of lobster.
NRA, been target shooting since 6 yo, army brat, hand loader, gonna get the CHL when I have a spare Saturday.
But today I combined ham radio and flying. I went to Winchester TN to have lunch with my son and pick up a bunch of his stuff from his dorm (school's out). He's at Sewanee. On the return, just South of Memphis, 14,500 feet, just a little CQ on 146.52 (standard calling frequency for you non-hams). Sorry I didn't write down all the calls. What fun. Trying to keep hams and ATC separate. KG7NM and WA6UCT did get written down and there were a couple from Miss. These were contacts over hundreds of miles with a two watt VHF hand held radio. Have fun while you can.

Tim Volz Continues to break the law on a weekly basis.
Hear KK7HO jam the liberty net at the web page:

http://members.xoom.com/_XOOM/kevin_strom/kk7ho_jamming_19990313.wav

Volz has also been recorded threatening the lives of fellow amateur radio operators. Responsible amateur radio operators need to continue to alert authorities to Volz's dangerous behavior.

Thanks for helping clean up our hobby. We are winning!

I encourage all those who are fed up with Tim and the criminal element to contact the FCC and encourage them to step up enforcement. The sooner pond scum like KK7HO and K5BLB are off the air the better. Make tapes,send email do anything you can to get rid of these vermin.You shouldn't have to be embarassed to let non hams listen to the amateur bands. We have an opportunity to clean up 75M lets use it.

The person to contact is William R. Hollingsworth (K4ZDH) aka, Rilley Hollingsworth at:

rholling@fcc.gov

Thanks for helping clean up our hobby. We are winning!

When I read Lloyd Davies's glowing tribute to "humanitarian" Herbie Schoenbohm and contemplate that stuff about how he helped handicapped hams and all that stuff, this comes to mind.WB3HGW, Tom McMillen, is a paraplegic.One leg and one hip amputated and paralysis in the other, I heard the benevolent humanitarian KV4FZ, Schoenbohm, tell him, "Why don't you be a man and stand on your own two feet?" Yet, the St.Croix bastard knew he was confined to a wheelchair.So Lloyd, save your crappy propaganda for a comic book instead of trying to convince hamdom what a peachy fellow Herbie is. You must think we're all either stupid or gullible.Oh yes,you Herbie lovers...put this in yopur pipes and smoke it. WB3HGW obtained his General through a waver. The drugs he was taking for epilepsy prevented him from copying 13 w.p.m. However "Dr.Schoenbohm" didn't buy it. Day after day, week after week, month after month and year after year, the evil one kept humiliating Tom. Discouraged the guy because of the waiver. I ask you Lloyd; does that signify a HUMANITARIAN? Woudl you want a man like KV4FZ loose in Camp Courage in Minnesota. I would in just one instance...if he had the job of cleaning latrines up there.Good heavens Lloyd, can't you see through all the subterfuge? You've been taken in but good. You have a perfect right to like whomever you want but I have a right to show up Schoenbohm for what he is..a first class hateful scumbag who should have been taken off the air 25 years ago. MFJ sells a switch box, also cables with the RJ-45 on one end and various TNC
connectors on the other.

I bought a short CAT5 ethernet cable ($5), cut it near the connectors and
spliced into a cable I already had to go to the TNC.

Hello. I have a few questions that I've been wondering about the Swan Mark 1 HF amp. If you can answer any or all of these question please e-mail me. Thanks a lot in advance and any help is appreciated. The questions go as follows:

1. What are the dimensions of the amp?
2. Does it really cover 10m-80m including the WARC or W/O WARC?
3. I've heard that it does 2000w PEP and 1000 CW w/good tubes. True?
4. About how much would a used one in good condition cost today?
5. Does it require anything extra to operate (ie power supply)? And if so about how much would those accessories cost today?
6. And does anyone have a good suggestion of a place where I might be able to find one?
7. And does anyone happen to know of a picture of one on line?

Anything notable about the amp or something else you might happen to know about it I would also love to hear. Thanks for reading!

Mark,

You didn't read that from me and obviously you don't remember what I
write because you still have it wrong. It is also obvious that you
didn't bother to go back and read your own question or my response. I
suppose that's more trouble than using a spell checker.

I'd be interested in how one goes about determining if the rattler is really serious in its determination to bite you. Your hindu-like reverence for life seems to go hand-in-hand with your Dali-like views on things like seat belt and helmet use. Here, green mambas are approached with great reverence for life and big, sharp machete. I usually get my guards to round up all the little snake pieces so that a determination can be made later as to whether the snake intended to bite me.

3293. FS Saber 1 uhf 12ch (was$240)w/2batt REDUCED!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-08 00:00:00 UTC
From: xeon <xeon@ultinet.net>
Message-ID: <3733C002.D116198F@ultinet.net>
Source record: 143485

This is what i have

Saber 1 uhf 12ch
6D core, H/pwr, non secure
Model # H44SAN7139CN
comes w/ 1 batt.motorola used (not so good)
plus 1 brand-new batt motorola (7.2v @ 1800 ma)
& ant. the shape of the radio is in
good shape I'll give it a 8.

Note*

Asking $240. $225 + you paid for S+H
* Prepaid (Postal) Money Order*

****Need to read radio for band spread?****
Don't konw band spread!

I'm not going to paid someone $40 or $30 so i can read
the radio. If I'm not going to kept it.

Then i used my scanner to see what were the
CH. And this is what i found.

Ch. 1 447.285
Ch. 2 449.925
Ch. 3 460.000
Ch. 4 460.500
Ch. 5 449.125
Ch. 6 447.125
Ch. 7 --- Blank
Ch. 8 --- Blank
Ch. 9 --- Blank
Ch. 10 --- Blank
Ch. 11 --- Blank
Ch. 12 --- Blank

Save $40 or $30.

And this is why I'm selling it!
1) I got it with a trade!
2) It cost to much for me to keep this radio.
I would need a charger , software , cable,
rib box and get this a 386 computer. Ha

You can e-mail me

>avoid it. I sometimes run into ops on the air who ask me
>(as I am working mobile CW) "how do you write it down?". Egad.

Hi Don!

Hmmm... I've heard this admonishment before, and I really don't understand it. I've been operating almost exclusively CW for over 30 years, and I've always written it down. It feels natural to me. It goes in my ears, it comes out my hand. It's not particularly legible above 30 wpm, mind you, but I can refer back to my notes in a ragchew and remind myself of what was said. (I can't recall a 10 minute monologue, but I can if it's written in front of me). Later on (2 or 3 qsos late), I can jot down a note or two in the log if I want. My wife can look over my shoulder if she wants. When visitors come over, they can see that the process actually works... morse in, words out. Above 35 wpm or so, I'll put the pencil down and copy entirely in my head, but if somebody throws a long unfamiliar and non-phonetic word out there at 45 wpm, I'll probably miss it, and I've found that's usually the case for people that "only copy in their head", even at slower speeds. And speaking of slower speeds, people that copy only in their heads have difficulty with copying 10 wpm qsos... I think you forget what was sent at the beginning of the word at that speed... hi.

Besides the practicalities, I think it's easier and faster to learn code while writing it down. As you decipher a letter aurally, you write it down, see it with your eyes, and it connects you with the part of your brain that already knows how to read and write.

Hey, different strokes for different folks, but I think it's a lot easier and more practical to learn code while writing it down, and make the transition to head-only copy later on if you need or want to. Am I the only one in hamdom that thinks so?

Not just the FCC is in this nasty little smut ring!
Check out the distribution list in the headers.

Let's see...We've got:
The Health Care Financing Administration...(must be sex therapy?)
The U.S. Senate (no surprise there...)
Johns Hopkins University (for shame... people of such education!)
The Greater Baltimore Medical Center.. (more sex therapy)
Clack Sound Studios of New York (knew the media would be in on it..)
Physicians Online (some of these folks are going to need a doctor)
and Radixnet ISP (they'll claim they're innocent... suuuuure!)

HO HO HAR HAR HAR..... I must say.... (wiping tears from my eyes),
I do love it so when the "elite" people
find that their bare asses have been shining in public....
It's one of life's great joys. HA HA HA HEE HEE!!

Ain't Life Grand,
Dave AB5S

Aye. I don't think Morse works at slow speeds. That's perhaps the best
reason to not relax test requirements.

Michael.

The medium *is* the message in code practice. If you're bored, you're
not going fast enough. Do you remember your first reading primer? Dick
and Jane held my attention fast for a long time, but I don't remember a
word of it. I'll bet you could care less about their antics these days,
too.

Crank up the speed.

Michael.

Who's talking about Morse code? (Monty didn't get many thoughtful replies, now, did he?) Some talk about their inability to learn the code. The rest play devil's advocate, and discuss inadequate potty training.

Michael.

I use a homebrewed Cloudwarmer on 20 meters and actually it's a two element fixed wire Yagi that beams straight up to saturate the ionsophere with RF. It has enormous gain over any conventional dipole or vertical. If anyone's interested, I have an instruction sheet printed up. You simply can't believe how well this antenna works. For a copy of the sheet, send NO MONEY but just a self-addressed STAMPED size ten envelope and I'll send it. SEND NO MONEY! If you've ever heard about the NVIS antennas on which the military is experimenting, the Cloudwarmer is an example of it.

If you have dyslexia--many adults do, it is no shame, and a clearly defined sensory-cognitive disorder, it doesn't mean you aren't intelligent or are diminished in capacity in any other way--if you suffer from dyslexia, then it should be a very simple matter to obtain a legitimate waiver from a physician. But that shouldn't be an issue, as dyslexia is a visual--cognitive disorder, the sense of hearing and rhythm isn't affected by the dyslexic condition itself.

Maybe the problem you've been having is that in attempting to learn the code at 5 WPM you are visually transliterating what you hear into . and -, and then into letters of the alphabet, instead of the better and more proper method of doing it all 'by ear,' no charts, visuallization involved.

You forgot to post the very last post they sent out. Hopefully one they will themselves, abide by. That the person responsible would be dealt with.

It's a shame someone may have lost a good job for doing something so stupid. But they have only themselves to blame.

Not many jobs require a Psychological exam prior to getting it given to the applicant. One never knows when an employee may pull such a stupid stunt to embarass the whole agency/company at large.

"IF" they DON'T do something to correct this, THEN we have plenty of room to question their judgement. Until then, let's see what happens. We may never know, but let's wait and see!

Just "my" opinion.

3313. Re: who's the rogue at BellSouth?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-08 00:00:00 UTC
From: Joe Schlatter <w4hh@3wave.com>
Message-ID: <lhXY2.1575$O3.23084@news12.ispnews.com>
Source record: 143505

Of course, if the "rogue" either does not exist, or is not the individual named in the original post, then the individual named may have grounds for legal action against the person who publicly posted his name as possibly being a "rogue."

The original post should simply have asked for information as to how to contact Bell South to report possible abuse of their accounts.

On the other hand, if the intent of the original post was to continue the childish and stupid flaming that plagues this NG, then all the good sense in the world will not deter a fool.

I'm not a vigilante either, Bob. I have been trained and licensed to carry concealed handguns by two states because trained law enforcers and guardian angels are not dependable enough for me. Your mileage may vary.
> 73, Cecil, W6RCA

I see the weapons thread is making the rounds on this newsgroup; my .02 cents:
Cecil, hopefully you train with your weapons every week and practice shoot/don/t shoot situations because that's the only way to maintain currency. What if one of your rounds goes out your window and kills a bystander? Nothing more tragic than one family member killing another thinking it was an "intruder." Or the older sib shooting the younger accidentally while playing cops and robbers. Or the 4 yo daughter who made her policeman father quadriplegic who was sleeping, took the gun from his holster and pulled the trigger.
I suppose you can put locks on the trigger guard or lock them up in a safe but that defeats the purpose of having a weapon ready for deterrence.
The above are personal situations I've been involved with so I chose to lock up my guns. I doubt I could convince you otherwise about weapons, nor do I want to, but being an adult, you will of course accept the consequences.

>cents:
>Cecil, hopefully you train with your weapons every week and practice
>shoot/don/t shoot situations because that's the only way to maintain
>currency.

The most important thing is developing the proper mental attitude. Once properly trained, it becomes a reflex action to take the proper steps when appropriate. Target-like marksmanship is not nearly as critical as proper mental conditioning because the typical shooting occurs at a distance of less than 10 feet, with a total of 3 rounds or less exchanged.

>What if one of your rounds goes out your window and kills a
>bystander? Nothing more tragic than one family member killing another
>thinking it was an "intruder."

Again, proper training. Before taking the shot, you have already evaulated your surroundings. In many situations the proper course of action is to seek cover and hold fire due to the tactical situation. As far as killing a family member, this does not happen when properly trained because you do not fire unless 1) you have positively identified the target, and 2) the threat of iminent danger is confirmed.

> Or the older sib shooting the younger accidentally while playing cops and robbers.

Again a training issue. In these situations the fault lies squarely with the parents for failing to properly educate their children concerning firearms. Children have a natural curiosity about things that are kept secret from them. Rather than shield the child from the gun, it is by far better to expose them to it and teach them proper handling and safety techniques. They can learn this at a very early age, and once they are familiar with the gun, the curiousity factor is eliminated, and the situations which breed accidents have been neutralized.

>Or the 4 yo daughter who made her policeman father quadriplegic who was
>sleeping, took the gun from his holster and pulled the trigger.

See the previous paragraph.

>I suppose you can put locks on the trigger guard or lock them up in a
>safe but that defeats the purpose of having a weapon ready for
>deterrence.

The bulk of any collection should be maintained in a safe primarily in case of burglary. However, a gun at the ready does not present a threat if those in the house have been properly trained. There are 3 children in my house, and all were familiarized with guns by the age of 4. By the age of 5 or 6, they had been out with me and allowed to shoot on several occasions, where they learned not only how to shoot and handle a gun, but also the reality of what happens when you pull a trigger. They saw that the rabbit does not get up and run away - like on television. This is a hard reality, but it drives home the respect for a firearm and what it can do.

>The above are personal situations I've been involved with so I chose to
>lock up my guns. I doubt I could convince you otherwise about weapons,
>nor do I want to, but being an adult, you will of course accept the
>consequences.

I also keep the bulk of my collection in a safe, but I do keep a gun at the ready. There has never been even as much as a minor incident in my household. I do accept the consequences, which in my case have been all positive because I took the time to make sure that all in the house were properly educated about, and familiar with firearms.

However I do understand your position. It is sad, but with the climate of fear and evil which the liberals and the media associate with guns and gun owners, it inevitable that more tragic situations will occur in the future - however this is not the fault of the gun anymore than forest fires are the fault of matches. These tragedies are a direct result of ignorance and lack of training, this is not unique to firearms alone. In reality, the number of firearm related accidents is miniscule when compared to such things as poisonings, drownings, fires, auto accidents, etc.

Until such time as fear and ignorance are replaced with education and respect, the population at large will continue to follow the media's self fulfilling (and self serving)firearms prophecies.

You are using statistics that in all probability do not include thousands of
cases of mugging where no one was hurt and the FBI was not informed. This is
a typical NRA tactic and has been technically refuted by the anti-gun people
who have taken the time to gather just the opposite evidence.

All life and death matters are matters of life and death and are risky
gambles..IMHO Armed conflict can never be a lower risk situation than cool
headed unarmed measures. He who runs away...lives to run another day.
He who runs for his gun may not be the first to shoot.

> many people will insure themselves against monetary loss, but will trust
> their own safety to fate.

Hey.....That is a point I brought up here. Cars have some possibility of
being stolen or involved in accidents. I think that most states now require
that we have automobile insurance in order to register our cars. I know that
car or driver insurance was required in every state that I ever registered my

cars in. Why don't states or the federal government require that the owners of all registered guns have gun insurance? The insurance companies will then have the funds to independently track guns in private computer data bases; independent of governments, and to have the motivation and funds to investigate gun related crimes and gun thefts and "accidents" objectively. That is not a "pinko" idea because it would place some of the responsibility of nationally tracking gun sales, trades and thefts into the private hands of the insurance companies. It could also pay the victims of gun "accidents" or their estates in the same manner as many car accident victims are now paid money as a result of auto accidents. If insurance companies refuse to insure the guns of minors or convicted criminals (and prevent registration) because they are of very high risk financially, perhaps the insurance companies will be more careful than the dealers at gun shows are.

>
> 73 de KF6KNB
>

I've been called a "wimp assed pansy" elsewhere in this thread. If so that gives me the personality to say that although I do not agree with you Dan, I do think that I can understand the points that you make and I do agree that many other responsible citizens do see things your way. There are also those who agree with me and manage to survive in this world. We may all have somewhat different conditions to consider. A city taxi driver who gets shot in the back of his head while driving or turns to shoot a bandit while in motion, could cause an auto accident that could kill innocent people who are not involved in his robbery...There is that to consider as well. I never met a Ham I didn't like, Hams need more license classes, Bob Wex w2ilp (Insure Legal Pistols)

Dear oms,

Everybody's talking about electronic commerce.
But did you know that a lot of hamradio related equipments can also be purchased on the web?

The site www.geocities.com/SiliconValley/Park/9501 provides links to RX, TX, books about hamradio, computer stuff and more, that can be bought on the web. It also provides powerful search engines.

This site is NOT a commercial site! It's just a hamradio related site at Geocities, whose purpose is to help you to find what you're looking for on the world wide web.

Have fun es vy 73!

Hello all,
I have a Dentron Clipperton L forsale. It has new
572b's, new band switch and all of the Capacitors and diodes
have been replaced. I have schmatics too. The amp is wired
for 220 with 100 watts drive 1200 watts out on 80-meters.
The band coverage on this amp is 160-15. I'm asking 500bucs
plus shipping. If you are interested drop me a line. You
can see a picture of the amp as well as my station by clicking
here. http://www.dirtball.com/station.html
73 and thanks for reading

Going to direct video feed will likely offer a substantial improvement in
picture quality. You don't need to buy a new TV to get that, however. It
is a relatively easy modification to "jeep" a TV to accept direct video
input.

What you need to do is add a switch in the line between the demodulator
of your TV and the first video amplifier. This lets you select either demod
video or a direct video feed you add with a jack in the back. This is basically
how TVs with a direct video input work.

Note that there is a potential hazard to doing this if your TV is a transformerless
model. The chassis can be "hot", and connecting the external video cable shield
to it could present a shock hazard. But if your TV uses a transformer power supply,
even a switcher, it should work fine. If you know what you're doing, you can jeep
a hot chassis set successfully using isolated ground technique, but there is some
risk involved.

By "Nuisance Delete", do you mean CTCSS tones? Just wondering, because one
of the radios we use at work is a P110, and that button turns tone squelch
on and off.

> Matt, N4GSV

For all licenses you need to see Miriam Shtesel 4x6kt at the ministry of communications. (Misrad Hateckshoret). Her office is in the Shalom Tower (Migdal HaShalom) in Tel Aviv.

You go to the main entrance, get checked by the guard at the escalator for guns and bombs (same as all public buildings in Israel) and go up to the first floor. Take an elevator to the ninth floor and walk all the way back unitl you see a fire tower. Take the stairs up to the 10th floor and turn left past the empty reception desk. Turn left again and her office is the last one on the right.

She is there from 9am to 1pm SUNDAY-THURSDAY, execept for holidays, strikes, vacation, etc. Call first to make sure she is there. Her number is (03) 519-8230. (from the U.S. 972-3-519-8239)

Reciprocal permits are paid for in cash. You get the form from Miriam and go down to the post office on the ground floor to pay them. After paying for them, you come back up and get the permit.

Permanet licenses are paid for by mail, you get the bill in the mail and pay at a post office. They forward the forms. It takes 1-2 months to get the bill and 6-8 months to get the license.

You may operate as soon as you have permit, or in case of a permanent license as soon as you have a callsign assigned (Miriam does it on the spot).

She's a very nice person and like most Israeli's speaks english if you speak slowly and clearly (but do not "speak down to her").

First question, are you jewish? For purposes of imigration, you need to have proof that any grandparent was a jew. If this is the case, 90 days after you imigrate you become a citizen automaticly. At that time you go get a tehudat zehut (literaly "state certificate", an id card). You then take your id card, passport (showing entry as an imigrent), tehudat olem, (immegrant's certificate) and your US ham license.

Miriam will have you fill out forms and issue you a callsign. You MUST declare what equipment you have, it goes on your license. You will NOT be able to import a transmitter without a license and permit.

One family member must be present. If there are 3 hams in your family, only one must show up, bring photocopies of their passports, licenses and id cards.

If you are not jewish, or are not imegrating on this trip, you will want a reciprocal operating permit.

Reciprocal permits are similar, you bring your U.S. license, passport with tourist visa (issued at the airport when you arrive) or work permit in it and about $25 in cash. Reciprocal permits are good for one year.

The Israel Amateur radio club will obtain a permit for you. See www.iarc.org. They charge a extra to pay for postage, but a volunteer takes the forms to her and goes to the post office for you. Allow at least a month in advance.

Israel signed the CEPT, you can use a license from any CEPT country for 90 days instead.

Israel has 4 license classes A-Extra, B-General, C (also G no letter C in Hebrew) -Novice and D- codeless tech.

There is no tech plus in Israel. If you have a tech+ license you can operate as a codless tech or a novice with a permit. If you get a permanet upgrade, you will want to get both as a novice only has 2 meters on vhf, and a tech has to upgrade to novice to get to general.

Note that the code tests are SENDING and RECEIVING, and are more difficult than the US. (no written, just copy). The best thing to do is to upgrade to US General or Advanced before you come permanetly.

U.S. VE's do NOT give tests in Israel. If you want to upgrade your U.S. license you will have to leave the country.

An Israeli general is limited to 150 watts on HF and 25 watts on VHF. 6m is SSB/CW only, 2m is 144-146, there is no 220, and 70cm is 430-440.

Feel free to contact me if you have any more questions.

If you are planing to imegrate, sign up for the mailing list, tachlis, one www.onelist.org.

Geoff.

3351. Interesting Observations about 14.313

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-09 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990509091636.09676.00001034@ng-da1.aol.com>
Source record: 143343

Read this:

The "case" is far from closed. The "case" will never be closed until the nets and their supporters cease to use dirty, underhanded tactics in their attempts to silence the B.A.R.F. It was the nets who brought in a goon squad whose very purpose was to personally attack and destroy the lives of targeted B.A.R.F. members. It was the nets who supported jammers and bootleggers in their attempts to disrupt the legal operations of the B.A.R.F. One need look no further than the well-documented FCC case against net lackey (and bootlegger) Peter Scuggins. Operating from the vessel Baltija, with the bootleg call KD4VQ, Scuggins spent hundreds of hours harassing the B.A.R.F. He openly announced that his operations were being sponsored and supported by the nets. Predictably, the nets disavowed any connection with Scuggins after the FCC apprehended him.

Perhaps the most famous case of net sponsored jamming was that of the infamous William Irwin, K3CQR. He operated for years as an unidentified jammer using the pseudonym "Rain Coat Charlie". Night after night, he could be heard on 14315.5 kHz spewing forth vulgarity and profanity that was directed at B.A.R.F. members. It mattered not to him that a lovely and kind XYL, Judy (KA1SKV), was on frequency. In fact, much of his sexually oriented filth was directed at Judy. Once more, this vile creature, "Rain Coat Charlie", continually assured the world that his activities were on behalf of the nets. He even asserted that he was, in fact, fighting anti-Semitism. That's right. He actually claimed that his jamming was motivated by the need to fight the make-believe anti-Semites.

The net's sponsorship of these jammers went far beyond merely giving them "moral support". It was the nets who provided Doug Case (WD4PZT) with a linear amplifier and a three-element beam. He was given orders to use their "gifts" against KV4FZ and the B.A.R.F. And use them he did. However, when Doug realized how the nets had used him, he "spilled the beans" on them. WD4PZT told a story that the amateur radio world should never forget. He revealed the secret workings of a net that would stop at nothing to silence the truth.

Did the B.A.R.F. have a right to challenge the practices of the nets? Were there illegal practices on the nets that needed to be questioned? All radio amateurs have both the right, and the obligation, to dispute questionable practices, whenever and wherever, they occur. These telephone bypass nets are not above the law. They are not a higher authority unto themselves. They are not just answerable to the B.A.R.F. They must be able to answer the criticisms of every radio amateur, and even the FCC, if need be. They are obligated to maintain a legal operation that is not dedicated to the dubious practice of soliciting overseas telephone patches.

How did the nets react when Herb Schoenbaum (KV4FZ) shined his search light upon the net practices? Did they willingly examine and investigate the matters that Herb brought to their attention? No, they most certainly did not. Instead they began a purge of their membership. They booted out anyone and everyone who even slightly agreed with KV4FZ. They removed longtime members like Dick Eastman, N5FX, from office. They made it clear that he was no longer welcome in their circle. The net chose to wage war over the airwaves rather than address the concerns raised by KV4FZ and the B.A.R.F.

1999 is here and the net's position has changed very little. They are still employing thugs to attack, and to attempt to discredit, B.A.R.F. members. KV4FZ is still a target. The nets still have no reservations about attacking Herb's wife, children and friends. They have used the foulest hate tactics against Herb. They have raised scores of non-issues in an attempt to cloud the real issues. The entire matter pertaining to the presence of alleged anti-Semitism is one of these non-issues.

What does anti-Semitism have to do with the net's shady procedures? It has nothing at all to do with the questions that Herb raised about the net operations. The net has used this red herring as a means of sidetracking a discussion of the real problems. The B.A.R.F. has never been concerned with a person's faith or how a person chooses to express it. The B.A.R.F. is only concerned when net members, and their lackeys, choose to use their supposed faith as a barrier to protect them from legitimate criticism.

All of the nonsensical false parallels being spewed forth about Neville Chamberlain and 1936 are nothing more than a propaganda tactic known as "demonization". Demonization is the process of making a group or a person appear to be so evil that there is no purpose in addressing the legitimate concerns that are raised. These are examples of the demonization process:

a) "right wing screwballs"
b) "breaking bread with Satan"
c) "paper signed by Hitler"

It should be clear that the use of this propaganda technique is aimed at doing one thing. It provides an excuse for the nets to continue to use their hate tactics against B.A.R.F. members instead of having open and honest debate on the real issues. Do the net's hired thugs really care about what is good for amateur radio? Or are they more interested in chasing down imaginary Nazi's and invented anti-Semites?

Take a good look at their statements. Examine their motives. You will find the ranting of hate-filled vexation writers who, lacking any real life, have decided to project their psychoses into a dispute that really does not interest them. They don't care about the phone patching issue or any of the other real issues surrounding the nets. These hate zealots are much more concerned with tracking down pretend "radio Nazi's" and holding court over them. That is why they refuse to sit down, discuss these matters and work out an appropriate solution. The truth is that the nets fear the B.A.R.F. because they know their practices will not stand up to close scrutiny.

The nets are running from the B.A.R.F. because they don't dare risk the chance that the truth will become common knowledge. The nets know that the B.A.R.F. has the facts that will make free, open and robust debate a dangerous proposition for them. Their ridiculous attempts to patronize a commission official will most certainly backfire upon them. So they choose to keep sniping and running. Unfortunately for them, they can run but they cannot hide. Their dirty deeds follow them wherever they go.

What kind of answer do you expect from a goof ball like AF2Y, he thinks a Hitler is lurking behind every bush and tree, every one is suspect. The paper boy is anti semetic you hate me, every one is against me etc and on and on. Sounds kind of paranoid. Of course he seems to be in that condition. Real sad.

The saying is "flee a knife, charge a gun". You can't outrun a bullet. Your only viable defense against a gun is usually to either attempt the very risky and usually unsuccessful tactic of disarming the armed assailant, or to shoot his ass and shoot him good before he shoots you. Running from a man with a club, knife, whatever, is almost always a viable option if you can run. If you can't, again, you better be able to shoot him. or THEM.

Your handing over your money to a robber is not only just as risky as an effective counterattack, but it is WRONG. it ENCOURAGES and REWARDS criminal behavior and ensures that the miscreant will make robbery his career if it is not already. Where robbers are routinely shot, there are not nearly as many robbers. It is first of all an example of effective deterrence, and second, a matter of simple arithmetic... let's call it SUBTRACTION. Somebody robs me, if I stand a reasonable chance of surviving, I am gonna SUBTRACT his ass. And I won't miss. Unlike the criminal, the law abiding citizen who chooses to be armed on a regular basis PRACTICES things like basic static marksmanship, as well as dynamic excercises involving moving targets, crisis scenarios, weapon retention, etc. Criminals don't do this. Nor do they think before pulling a trigger, nor do they have an innate sense of fair play that demands they release, unharmed, their victims if they cooperate. If I can get shot in a gunfight, or get shot meekly complying, I think I would rather get shot fighting.

On Sun, 25 Apr 1999 00:57:53 -0500, "Michael Young" <nobody@all.org> wrote:
>Outdated crap? Handguns obviated hand-to-hand martial arts. Or did they?

Well, it isn't considered very smart to only bring a knife, stick, or bare hand to a gunfight. It doesn't matter what sort of martial arts training someone has when you can drop them at 50 yards with a well placed shot. Unless you're Bruce Lee, you aren't going to take on a gang with just martial arts either. Guns have been called an equalizer that can allow you to be as strong as the strongest, and as fast as the fastest, regardless of your actual physical endowments. They can permit an 80 year old woman to stand up to a 19 year old punk on an equal footing.

>Ox-drawn plows have been replaced by heavy machinery. Except on small
>farms, and in underdeveloped areas.

Indeed, and it is the areas using machinery which export the food that keeps those countries using ox drawn plows from starvation. There's a lesson to be learned there. The lesson is to intelligently use machinery to magnify your capabilities. Only 2% of the people in the US grow the food that feeds not only the entire US population, but also a good part of the rest of the world.

It wasn't always so. 50 years ago, over 10% of the US population had to farm to feed the rest. 150 years ago, before mechanization, 90% of US citizens had to be farmers. The use of machinery is a capability multiplier. That multiplier has freed 98% of the US population to pursue other productive activities. It is no fluke that the industrialized nations dominate the world economy. The power of technology has enabled them to do so. It pays to work smarter rather than harder.

>I painted my living room with a
>roller and paint tray. It might have been easier with a power roller,
>but I'm not planning on painting much else anytime soon.

That's an economic argument for the once every few years painter, but someone who paints every day would use the tools which made him most productive. It pays to work smarter rather than harder.

>I watched my
>neighbor struggle to put in deck posts using a hand auger. I wonder if
>he knows about other tools he might have used. I watched another
>neighbor dig his post holes with a power auger, with a very large friend
>helping. The bit grabbed every few seconds in the clayey soil, and would
>torque the two men off their feet. (Neither way looked like fun, so I
>have stone pavers instead of a deck. That wasn't much fun, either.)

Someone who set posts every day would use a vehicle mounted auger,
or a pneumatic drill, or the artful application of explosives. Or they'd
hire a manual laborer to do it for them at minimum wage. Manual labor
isn't a productive use of most people's time. It pays to work smarter
rather than harder.

>Everything has their time and place. I especially liked Jeffrey's
>explanation about CW on HF. I realize it's not for everyone. For them,
>there's FM on VHF.

Or very soon, SSB on HF, or digital on HF. Either can be faster than
CW, and digital can also work when CW won't. Both use technology to
multiply the capabilities of the user. No arcane manual skills or natural
endowments are required. Unlike the once a year painter or the once in
a lifetime post hole digger, amateurs use their communications capabilities
every day. And like any other group which uses their capabilities every day,
they can benefit from the multiplier effect that modern technology can offer
them. It is an equalizer that negates the advantages of those few endowed
with exceptional physical prowess in some manual art. It allows them to
work smarter rather than harder to accomplish their desired ends.

The dumbing down of amateur radio by the requirement to manually
emulate a modem will soon end. When it does, amateur radio will be
the better for the smartening up that represents. Freed from manual
drudgery, amateurs will be able to direct their energies toward more
productive objectives, like coming up with something intelligent to
say to their contacts rather than just exchanging a few stylized
prosigns and abbreviated banalities with them.

Did you build the receiver that's attached to your headphones too?
I've done both, as well as building and programming the equipment
that encodes and decodes the text of messages exchanged. That
equipment operates faster, with fewer errors, and almost certainly
with weaker signals than the method you employ too.

I'm sure that some people enjoy CW, and I don't necessarily think
that they're screwed up to do so. The SCA types enjoy jousting,
and other medieval mock battle skills, and that doesn't make them
deranged. Only if they thought that skill at jousting was necessary
to fire a rifle in modern combat would they be deranged. Unfortunately,
the latter is what some people are in effect doing when they defend
Morse testing.

It is really quite sad that you feel the need for the federal government
to supply a method to boost your ego. Aren't you capable of privately
acknowledging your own accomplishments? Must your self-worth only
be validated by federal mandate? If you do feel the need for external
validation, wouldn't a certificate from the ARRL suffice? Why must
your self-aggrandizement be at the cost of others? Don't you have
your own internal yardstick to measure your self-worth?

Read this:

The "case" is far from closed. The "case" will never be closed until the nets and their supporters cease to use dirty, underhanded tactics in their attempts to silence the B.A.R.F. It was the nets who brought in a goon squad whose very purpose was to personally attack and destroy the lives of targeted B.A.R.F. members. It was the nets who supported jammers and bootleggers in their attempts to disrupt the legal operations of the B.A.R.F. One need look no further than the well-documented FCC case against net lackey (and bootlegger) Peter Scuggins. Operating from the vessel Baltija, with the bootleg call KD4VQ, Scuggins spent hundreds of hours harassing the B.A.R.F. He openly announced that his operations were being sponsored and supported by the nets. Predictably, the nets disavowed any connection with Scuggins after the FCC apprehended him.

Perhaps the most famous case of net sponsored jamming was that of the infamous William Irwin, K3CQR. He operated for years as an unidentified jammer using the pseudonym "Rain Coat Charlie". Night after night, he could be heard on 14315.5 kHz spewing forth vulgarity and profanity that was directed at B.A.R.F. members. It mattered not to him that a lovely and kind XYL, Judy (KA1SKV), was on frequency. In fact, much of his sexually oriented filth was directed at Judy. Once more, this vile creature, "Rain Coat Charlie", continually assured the world that his activities were on behalf of the nets. He even asserted that he was, in fact, fighting anti-Semitism. That's right. He actually claimed that his jamming was motivated by the need to fight the make-believe anti-Semites.

The net's sponsorship of these jammers went far beyond merely giving them "moral support". It was the nets who provided Doug Case (WD4PZT) with a linear amplifier and a three-element beam. He was given orders to use their "gifts" against KV4FZ and the B.A.R.F. And use them he did. However, when Doug realized how the nets had used him, he "spilled the beans" on them. WD4PZT told a story that the amateur radio world should never forget. He revealed the secret workings of a net that would stop at nothing to silence the truth.

Did the B.A.R.F. have a right to challenge the practices of the nets? Were there illegal practices on the nets that needed to be questioned? All radio amateurs have both the right, and the obligation, to dispute questionable practices, whenever and wherever, they occur. These telephone bypass nets are not above the law. They are not a higher authority unto themselves.

They are not just answerable to the B.A.R.F. They must be able to answer the criticisms of every radio amateur, and even the FCC, if need be. They are obligated to maintain a legal operation that is not dedicated to the dubious practice of soliciting overseas telephone patches.

How did the nets react when Herb Schoenbaum (KV4FZ) shined his search light upon the net practices? Did they willingly examine and investigate the matters that Herb brought to their attention? No, they most certainly did not. Instead they began a purge of their membership. They booted out anyone and everyone who even slightly agreed with KV4FZ. They removed longtime members like Dick Eastman, N5FX, from office. They made it clear that he was no longer welcome in their circle. The net chose to wage war over the airwaves rather than address the concerns raised by KV4FZ and the B.A.R.F.

1999 is here and the net's position has changed very little. They are still employing thugs to attack, and to attempt to discredit, B.A.R.F. members. KV4FZ is still a target. The nets still have no reservations about attacking Herb's wife, children and friends. They have used the foulest hate tactics against Herb. They have raised scores of non-issues in an attempt to cloud the real issues. The entire matter pertaining to the presence of alleged anti-Semitism is one of these non-issues.

What does anti-Semitism have to do with the net's shady procedures? It has nothing at all to do with the questions that Herb raised about the net operations. The net has used this red herring as a means of sidetracking a discussion of the real problems. The B.A.R.F. has never been concerned with a person's faith or how a person chooses to express it. The B.A.R.F. is only concerned when net members, and their lackeys, choose to use their supposed faith as a barrier to protect them from legitimate criticism.

All of the nonsensical false parallels being spewed forth about Neville Chamberlain and 1936 are nothing more than a propaganda tactic known as "demonization". Demonization is the process of making a group or a person appear to be so evil that there is no purpose in addressing the legitimate concerns that are raised. These are examples of the demonization process:

a) "right wing screwballs"
b) "breaking bread with Satan"
c) "paper signed by Hitler"

It should be clear that the use of this propaganda technique is aimed at doing one thing. It provides an excuse for the nets to continue to use their hate tactics against B.A.R.F. members instead of having open and honest debate on the real issues. Do the net's hired thugs really care about what is good for amateur radio? Or are they more interested in chasing down imaginary Nazi's and invented anti-Semites?

Take a good look at their statements. Examine their motives. You will find the ranting of hate-filled vexation writers who, lacking any real life, have decided to project their psychoses into a dispute that really does not interest them. They don't care about the phone patching issue or any of the other real issues surrounding the nets. These hate zealots are much more

concerned with tracking down pretend "radio Nazi's" and holding court over them. That is why they refuse to sit down, discuss these matters and work out an appropriate solution. The truth is that the nets fear the B.A.R.F. because they know their practices will not stand up to close scrutiny.

The nets are running from the B.A.R.F. because they don't dare risk the chance that the truth will become common knowledge. The nets know that the B.A.R.F. has the facts that will make free, open and robust debate a dangerous proposition for them. Their ridiculous attempts to patronize a commission official will most certainly backfire upon them. So they choose to keep sniping and running. Unfortunately for them, they can run but they cannot hide. Their dirty deeds follow them wherever they go.

Of course I still hear the individual letters. I see individual letters when I
read too, and hear individual phonemes when I listen to speech. That
doesn't affect the speed with which I read English text (over 3,000 WPM)
or the speed with which I can understand spoken English (about 200 WPM).
It does allow me to notice misspellings, and notice when words are
mispronounced. If you can't do those things, then I suppose you really
don't see the letters or hear the phonemes when you read or listen to
speech. That seems a peculiar sort of selective blindness/deafness to
me.

>For example,
>when I was first learning Vietnamese, to understand the phrase:
>"Toi di nha " my mind would have to translate word by word: toi = I,
>di = go, nha = home. Later, after immersion in the language, no such
>translation was necessary. I could understand a sentence, not having to
>consider each individual word.

Fascinating. You can understand a sentence without hearing the words,
or the phonemes that make up the spoken words. I don't know how you
do that. Must be ESP. When I hear speech in German or Russian,
I understand it because the words I hear are part of my German or
Russian vocabulary. I don't hear it in English, because it *isn't* English.
It is actually another language with its own words, syntax, grammar,
and meaning.

That's not the case for English text represented in various forms. It is all
still English language text whether it is represented in an ASCII, Baudot,
or Morse encoding of the Roman alphabet. The words are English, the
syntax is English, the grammar is English, and the meaning is English.
It isn't Morsish.

>Don't give up, Gary.

I never have, and I never will until Morse testing is banished from amateur radio licensing.

>P.S. R.r.a.equipment dropped from any fol-ups; why didn't you do that?

I followed up William Lee's post in rec.radio.amateur.equipment, and so my reply went to the groups to which he posted. The only way to ensure that a reply is read by a poster (or by anyone else who read the original message) is to follow up to all the groups in which the original message appeared. If you don't want to see a reply in a particular group, don't post to that group.

You posted the message to which I'm replying in both equipment and misc, so I am replying in both equipment and misc. If you'd wanted a reply only in misc, you should have posted only in misc. I consider your use of the follow up line an abusive attempt to get the last word before a particular audience. I won't tolerate that. If you want to restrict discussion, restrict your own postings first. I will follow up only to the groups in which they appear, but I will follow up to every group in which they appear.

On 5 May 1999 04:54:05 GMT, jeffreyh@Hawaii.Edu (Jeffrey Herman) wrote:
>You could say that any language is an encoding scheme for English.

You could say that, but you'd be wrong. There are many examples
of idiom which simply aren't translatable from one language to another.
The Eskimo has a hundred words for snow that don't translate into any
English equivalent. The Navaho similarly has words that don't have
an English equivalent. This is true for virtually any language. If the
concepts behind some of these words or phrases are even graspable
by someone whose culture is that of an English speaking people,
it takes paragraph upon paragraph of English explanation to even
begin to convey what has been expressed in the other language.

The same cuts the other way, of course. Try to translate the English
word "fence" into Navaho. You can't, there's no concept in the language
for fence. When the phrase "the spirit is willing, but the flesh is weak"
was translated into Russian and then back into English, the result was
"the vodka is strong, but the meat is bad". The original meaning had been
entirely lost. Languages aren't simply encodings of each other. They
are literally different ways to conceptualize ideas about the world.

That's not true for Morse. It simply encodes alphabet. Whatever words
are spelled by that alphabet are words of some common natural language
shared by the two people communicating. It isn't Morsish.

Yeah, but I hope we don't. The present occupants are using it productively, and I'd hate to see that spoiled by a bunch of high power ham signals. I'd hate it even more if the present users were kicked off the band in order to give it to hams. That would be grossly unfair. Now 136 kHz and 73 kHz are a somewhat different matter. I wouldn't mind seeing those bands opened to amateurs.

Is that how you feel about your children? Or more mundanely, do you value your driving license for the effort you expended once, perhaps a long time ago, or do you value it for what it enables you to do, today and tomorrow? I'd suggest it is the latter. An amateur license is no different. It isn't a trophy on the shelf comemorating some long ago triumph. It is a working tool, and its value is in what it enables you to do, today and tomorrow. If it had come in a box of Cracker Jacks, you'd value it no less, because if it were taken away you would no longer be allowed to do all the things an amateur can do.

There seems to be an issue of equity here. When we recently remodeled our plant, we were required to install ramps for the handicapped. But there was no requirement that we restrict the use of the ramps to only the handicapped and require our able bodied employees to continue to use the stairs. We were required to remodel our restrooms, with lower urinals and wider stalls, but our able bodied employees weren't required not to use them. To do so would be inequitable. The able bodied should have equal access to facilities too. It seems to me that this should apply to amateur licensing. What's good for the goose should also be good for the gander. If anyone can be accomodated, then everyone should be permitted to use the same accomodation. To do otherwise would be unequal treatment under law.

The Harmonic Research converter can be wired for sync on green, or separate composite synch (i.e. horizontal and vertical synch on a wire with no video), or separate horizontal and vertical synch wires. I used mine with a Conrac computer monitor with selectable synch rates using the RGB + composite synch setup. The Conrac synch settings were essentially CGA to make all this work.

Normal Gary I agree with just every word you post, wish you'd post a
bit more, but I must correct here. there do indeed seem to be hams to
whom the licnese is that old trphy on the self and not valued for it's
utillity. You and I value it so, but not everybody does. Indeed That
seems to be part of the problem some value and see our licenses very
differently than others. That is one problem that ending Code testing
when it happens (be to tomarrow or in few years) will not solve. I
wish I had a solution for that but I don't, OTH I am convinced that
there are people that really don't care what they can do with their
licnese just how they got it

>are just too fragile....

Too expensive maybe, but not too fragile. Practically every broadcaster
is converting to solid state transmitters (if they haven't already). We're
talking 50 kW+ here. One of the main reasons for converting from tubes
to solid state is increased reliability and uptime. Properly designed solid
state transmitters are *tough*, and are designed to soft fail if there is a
problem. Of course proper design costs money, but over the life cycle
of the equipment it is a no brainer to choose solid state over tubes for
high power transmitters and amplifiers.

While solid state costs more up front, the life cycle costs are much lower.
There is no requirement for routine tube replacement, there is no filament
power requirement, the blower requirement is much less, maintenence
costs are sharply reduced, etc. They're just flat out cheaper to run, and
they run longer without attention.

Ridiculous. You've intentionally interfered with the Liberty Net and
other conversations on 3950 dozens if not hundreds of times. The
latest was last night, and tape was rolling as usual.

I will forward the recordings to the Commission, whose
enforcement expert was checked in and listening to the frequency
only eight days ago, at which time you and most of your confrï¿½res
vanished like alley cats when a Doberman arrives. I'll also post
them to the amateur radio section of my web page (url below) in the
next few days.

In fact, in another message you posted this morning, you admitted
your jamming.

It was in message <19990509113735.21071.00001247@ng-ca1.aol.com>.
Perhaps this quote from it

> More frickin Lies coming from an unidentified
> complainer. whew, what a nut! i did jam once you lying sob.
> Later
[...]

will refresh your memory.

> He has
> put out a .wav of me calling the libertynet a bunch of NIT Wits, they are. The
> date on the file is incorrect it was in 1998 NOT 1999.

That particular file was sent to me by a correspondent with a high
degree of credibility, and I notice that while you offer a
correction on the date, you do not dispute the truth that the
recording accurately depicts your on-air activities. Thank you.

> It seems to pretty far reaching for you to call that jamming you liar. A one
> time transmition done inbetween comments is not jamming.

The recording is quite a long one, and your multiple catcalls,
insults, and chants on top of others' transmissions hardly
constitute, as you call it, a "one time transmition done inbetween
comments." [sic]

> Hell if it were all
> hams would be guilty of it every night.
[...]

Your view that "all hams" are guilty of malicious, unwanted transmissions "every night" is a bizarre one, but tells us something about how you see the service. Thanks for the insight.

By the way, if you must send your dreck to more than one newsgroup, it's considered better Netiquette to cross-post (one message sent simultaneously to multiple groups) than to multiple post (separately post the same or almost the same message to multiple groups), because many newsreader programs are forced to read your message several times if the latter method is used.

I will grant that you have accomplished one thing in this newsgroup. You have caused AF2Y to call you "one of the finest hams to ever hold a ticket." (A pink ticket, one can always hope.)

That's not only the funniest thing I've heard in days, but, considering the source, it says more about you in one sentence than I or any of the other commentators who follow your sordid career have said in the two years or so we have been blessed with your presence.

With all good wishes,

Kevin, WB4AIO.

I would be for the fcc getting rid of kk7ho just as soon as they get
rid of the lawbreakers on liberty. Both are a cancer on Ham radio and
those who break the laws of Amateur radio should be put into the
Federal prison. Get rid of all of the scum, not just one!

Kevin Alfred Strom..you are dreck. A Nazi nitwit at best. You and your filthy subversive bastards deserve to be run off American ham radio but unfortunately or fortunately(it's purely topically political) the Constitution guarantees your right to attack the Constitution. Why don't you take your Nazi ass to another country...go look for a dictatorship some place. You are PROFESSIONAL instigators, worthless "dreckmeisters" who care nothing for your fellow man,the rights of others and respect for others. You and your lot live in a dark sinister Gestapo-run world in which you think it's chic to insult and demean based on race,religion and nationality. You and your lot add nothing to ham radio but detract much and anyone who defies you, insults you and brings to attention the kind of garbage you really are, is MY FRIEND!

Hmmmm, cloning copyrighted EEPROMS's (and SELLING them too ?!?!),
what a dumbass ! (say hello to that twit posting received MDT
traffic on his website for us, and the Cheeks to !).....

I suspect the Moto IPP division will be notifying the US Marshalls,
USSS, and they're going to be busting your door down pretty soon...
And for what ? A lousy $150 ? IDIOT !!

Hmm, unless you're just selling a bunch of "genuine" Moto upgrade
kits ? Well, too late now...your now a big red blip on Motorola's
copyright protection/intellectual property protection radar....
and at the very least, they're going to be looking into this to
see if your legit.

Testes, testes, Hansel.

It lowers FCC's moral standing to harass Whiten, if these sorts of things are
done right there at FCC. Ed W1RFI seems pretty clear on ARRL's e-mail policy.
Why is the FCC and Senator Dodd's office staff not ?

What right do they have to waste taxpayers' money on this crap ?

And no, I never use ours for private e-mail. I'm not so cheap or stupid that I
don't spent money on a home account.

(ALL SNIPPED)
That was my point--training. It happens to police officers, it can
happen to anyone. Most recent incident Riverside, California.
And the training has to be ongoing not some class that was taken 1 month
or 1 year ago.
The sad fact is that the majority of gun owners do not do the extensive
training you did.
The statistics about drownings, accidents, etc. become meaningless when
your loved one is the victim.

I have read and understood several books on logic. also rhetoric. You
posted rhetoric not logic. Your simple statment that something is not
logical proof that is or is not true, neither did I post logic. You
simply advanced a claim one that hapens to be both false and
insulting.

It is a simple that most people with disabilities tend to
devlope other abilities, often to level far beyond those of "normal"
people. Why? Because we have to. just to survive in many cases. this
does not compensate in any manner just allows us to survive sometimes
it does give one or more of us a niche in the world

You simply don't know what is like to suffer form any
disaility, for that you can be thankful, but without it you can no
more understand my world than I can understand what you see in code,
to pick an example

> SNIP...
>The statistics about drownings, accidents, etc. become meaningless...

These statistics are very meaningful, they are just ignored by the anti-gun crowd because they dissolve their main argument for gun control - "if we can only save one life it will be worth it".

If this was truly their motivation, then obviously they would be focused on those things which take the vast majority of lives. But since "saving lives" is just a political smokescreen for selling the disarming of the American public, they will never stray from their true agenda.

> ...when your loved one is the victim.

Are you saying that if your loved one dies from a drunk driver or a drowning rather than from being shot, then it is meaningless ?

It is obvious why the anti-gun folks place so much value on a life taken with a gun, and simply discount or ignore all others. I however, do not place a lesser value on anybody's life based on how they were killed.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, KH2/N2NL, KF2TI, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, N6RT, K8YSE, DJ5AV & DX News Letter, DF6VI, DL3APO, F6AJA & Les Nouvelles DX, G4BUE & DX News Sheet, G0REP, HJ3PXA, LA9VDA, LU4AAV, ON5FP, OZ1PIF, RW1QM/1, UN5PR, UT1HT, VK4NM, VK1TX, YO3FWC and ZS5BBO for the following DX information.

FEW NOTES FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I cannot guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please, continue to send your information (you never know!).
Just a reminder! The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

2S, SCOTLAND. Chris, GM3WOJ, reports that to celebrate the opening of the new Scottish parliament, the first in 300 years, the North of Scotland Contest Group GM2MP/GM7V will be using the special prefix "2S" and will be signing 2S2MP during the period of May 6th through July 31st. The group will be active from several different QTHs on different bands to give everyone the maximum opportunity to work this rare prefix. Their activity started this past weekend on 15 meters. QSL cards for ALL QSOs will be sent out VIA THE BUREAU only later in 1999. 2S2MP does not collect QSL cards, so PLEASE DO NOT SEND a QSL card. You will receive a 2S2MP QSL card if you make a QSO.

5N, NIGERIA (Update). OPDX received a message this week from Stan, OK1JR, currently active from here, stating, "Greetings from Nigeria and I want to say hello to OPDX readers. We just finished with 5N99 prefix. I hope I made happy all HAMs looking for 5N as a new one." Stan goes on saying he

made 10,000 QSOs which includes activity on 40/80 meters. He states that he also made 1000 RTTY QSOs using the BTL software along with his multi-media sound blaster and notebook computer. Stan will be active until the end of the May, but using the callsign 5N0MSV. Look for him between 1500-0100z on 80-10 meters CW/SSB/RTTY. QSL via home callsign OK1JR: Stan Matejicek, Moskevska 1464, 101 00 Praha 10, Czech Republic

9M2, WEST MALAYSIA. The "DX News Sheet" reports that Johnny, G3LIV, will not be active May 4-24th as 9M2/G3LIV from Pulau Penang as announced. The reason given was a change in the licensing authority by the Commission as of April 1st, which means he has been unable to obtain a license.

AX3, AUSTRALIA. "The 59(9) DXReport" states to look for AX3ITU May 17th from Melbourne during World Telecommunications Day. QSL via VK3DYL. Actually, look for each call area to be active during Australia's ITU Day. Look for AX1ITU, AX2ITU.... etc.

DAYTON DXERS/CONTESTERS EVENT.....
The 59(9) DX Report, Western New York DX Association and Rochester DX Association will host Hospitality Suite 325 at the Crowne Plaza Hotel during the Dayton Hamvention next weekend. Stop by for an eyeball and a cool one Friday and Saturday evenings from 8 PM onwards. Meet your fellow DXers and have an eyeball with some of the DX gang you worked lately. You never know who will show up. It is always a good time and enjoyable for both the Big Guns and Little Pistols. All are welcome.

FO, MARQUESAE ISLANDS (Change of plans!) The "Les Nouvelles DX" reports that some planning changes have taken place by Alain, F2HE. Alain will leave from France on May 19th and he will be in Marquesas on May 26th. He is also supposed to go to the Australes Islands. Please refer to OPDX.406.

FR/G, GLORIOSO ISLAND. Several are reporting that Henri, FR5ZQ, will be active again from here sometime in May/June as FR5ZQ/G. However, Bernie, W3UR, editior of "The Daily DX" reports that he received information from Flavio, IK2IQD, stating Henri, will arrive on the island of Glorioso May 8th. He will be active on 80-10 meters CW and SSB for 4 weeks. He will be working on the island and will be on the air in his spare time. The following suggested frequencies were given: CW - 28023, 21023, 14023 and 7003 kHz --- SSB - 28480, 21230, 14180, 7050 and 3770 kHz. No WARC frequenices were given, but he will be on the WARC bands. Also, in the report it was mentioned that Henri will show up on 14180 at 1500z. It is not known if this is a list operation or not. QSL direct to FR5ZQ CBA.

HB0, LIECHTENSTEIN. A group of Germans will be active from here June 19-25th. They report that their QTH there will be 2000 mt ASL. Their callsigs will be HB0/DF6VI, HB0/DL1FDH and HB0/DL4OCM. They will be active with 3 stations on simultaneously, each with about 800 watts output into several antennas on 160-6 meters on CW/SSB/RTTY. QSL via their home callsigns.

JW, SVALBARD. Look for DF6VI and DL4OCM to be active from Spitzbergen, August 9-15th. Their callsigns will be JW/DF6VI and JW/DL4OCM. They will be active on 160-10 meters on CW/SSB/RTTY. QSL via their home callsigns.

HC8, GALAPAGOS ISLANDS. Look for Trey/N5KO, Ken/K1EA, Steve/K6AW, Jon/ N0JK, Ralph/K9ZO, David/KM3T and Robert/N6TV to be active May 26th through June 2nd from San Cristobal Island. Their activity will include the CQ WPX CW Contest. Callsigns were not given. Look for N0JK to be active on 6 meters with 100 watts and a Yagi. A beacon will be on 50.110 Also, look for him on the satellitea outside of the contest.

IOTA NEWS.....
EU-032. From July 21st through August 4th, look for Marc/ON5FP and Kristof/ON6NN to be island hopping (inclusive IOTA contest) in the French EU-032 group using the callsign TM1OTA. Their aim is to activate the islands of: Re, Aix, Madame, Fort Enet, Fort Louvois and Oleron (which will be their home base). QSL to ON4ADN either direct (Geert Decru, St Laurentiusstraat 18 8710 Wielsbeke, Belgium) or via the UBA bureau.

EU-128. Mario, DJ2MX, will be active from Fehmarn Island, May 16-19th. He promised to pay special attention to VK/ZL and Pacific areas. The Fehmarn Island is also valid for DID as O-01. QSL via bureau.

EU-156. Hubert/F6HKA, Didier/F6ELE and Mauricette/F8BPN will be active as homecall/P from Tombelaine on May 30th from 0500-1500z.

NA-046. Henry, KE1AC, will be operating from Nantucket Island, (Nantucket County, Massachusetts, MA-007S) on May 12-13th. Look for him on the SSB IOTA frequencies. Henry will use a Kachina 505DSP w/100 Watts and a Force 12 C3SS antenna. QSL via home call.

NA-134. Michel, OX3LG, will be active on Asiaat Island, Greenland, from May 10-20th. He will be active on 6/10/15/20 meters, work schedule and propagation permitting. QSL via OZ1PIF: Peter Frenning, Ternevej 23, DK-4130 Viby Sj., Denmark

NA-151. Michel, OX3LG, will be active June 15-30th from Angmasalik Island, Greenland. Activity will be the same bands and limitations as his NA-134 operation. This visit should also see the new 6m beacon activated. QSL via OZ1PIF.

L2, ARGENTINA. Horacio, LU4AAV, is another station that will active as L24AAV between May 16th (0000z) and May 23rd (0000z), CW/SSB on all bands. This will be during the celebration of 75th Aniversary of the World Record of Distance in 1924 (please refer to OPDX.404). QSL via the bureau or direct to LU4AAV: Horacio Cilmi "Hoc", Navarro 5078, 1419 Buenos Aires, Argentina (w/ SASE). For questions send E-mail to: luaav@mixmail.com Also, look for LU1DK, LU2JCW, LU5FCI and LU8EEM during the celebration as L21DK, L22JCW, L25FCI and L28EEM, from May 16-23rd, on all band (SSB). QSL via F6FNU.

P3, CYPRUS (Update). Harry, UN7FZ/UP6F, informs OPDX that the P3A Team (RA9JX, RZ3TX, UA9MA, UA3DPX, UA3AB, I2VXJ, RW3QC, UT7QF, RX4HW, RU3DX, UA9CDV, UN7FZ) will be active during the 1999 CQ WPX CW Contest as a Multi/Multi category. QSL route is via W3HNK. QSLs for operations before and after the contest for contacts with teams signing 5B4/homecall, must go to home callsigns.

QSL INFO AND NEWS.....
E44DX QSL Cards at Dayton! "The Daily DX" reports that the QSL cards for E44DX, the first DXpedition to the new Palestine, will be available thanks to the assistence of the Northern California DX Foundation (NCDXF). At the Crown Plaza Hotel, a table will be set up on Friday night just outside of the DX Dinner Banquet. Bernie, W3UR, Editor of "The Daily DX", reports that the labels have all been printed and the group will have only the U.S. labels and QSL cards. To see a sample of the QSL card, check the Web page:
http://www.dailydx.com/graphics/e44dx.htm
For those who are unable to attend, and VEs and DXers from other countries, the QSLs will start to go out around June 1, 1999.

E44/HA1AG QSLs are going out! Zoli, HA1AG, reports that the first 2500 direct QSLs have been mailed. Early next week another 7100 will follow. The logs for this expedition are available at the Web site:
http://www.okdxc.cz/e44
Also on this page, you can also catch a glimps of the QSL to appear in your mailbox soon.

The latest edition of "The 59(9) Report" states that effective April 5, 1999, the U.S. Postal Service has suspended delivery to the following countries: YA, 9U, 9Q, J5, EL, P2 (Bougainville only), 9L, T5, and YU.

OOOPPPSS!! The dates for the FO0XUU operations in last week's bulletin were listed wrong. Please change the date for the Marquesas operation to January, 1999 and the Australs to Februbary, 1999.

Tez, VK1TX, reports that the QSL Manager for Tom's (VK0TS) Antarctica operation is VK1PJ (Phil) NOT VK1AUS. Also, please send QSL cards for Tom's operation from Macquarie Island to the Inwards QSL Manager for VK1 Bureau, to VK1TX c/o VK1 QSL Bureau as of now. Address is:
WIA VK1 Bureau, Box 600 GPO, Canberra City A.C.T. 2601, Australia

The special event station EN125H that is active between May 6-9th, CW/SSB/RTTY on all bands, was on in celebration of 125 years of the "Kriukov Railway Car Building Works". QSL via UT1HT, P.O. Box 87, Kremenchug-21, Ukraine, 315321 or via bureau.

HK3DDD ADDRESS CHANGE. Rob, HJ3PXA, reports to "Please take note that well known all time Malpelo QSL Manager, HK3DDD, BETO , has changed his address". The new address is: Edilberto Rojas Mosquera, POB 170151, Bogota, COLOMBIA.

SAVE YOUR MONEY. The station active as YA1R several months back who gave the QSL route as RW3LO is a pirate. According to RA3LZ: "Callsign RW3LO has never existed".

Doug, N6RT, reports, "The final S79FAG, S79YL, and S79ZG logs are now online at: http://dx.qsl.net/logs
Several hundred QSOs were missing from the logs before the final update. If you think you should be in the log and you were not, check again."

UP54P was a special event station to celebrate the 54th anniversary of victory in WWII. QSL via UN5PR direct: Romeo Y. Loparev, P.O.Box 73, Temirtau, 472300, Rep. of Kazakhstan.

NOT A QSL MANAGER! W3CU is the club station callsign for the Maryland Mobileers Amateur Radio Club. Russ, N3GT, Trustee for W3CU, states, "We are not QSL managers for anyone. It is possible that the previous callsign owner was."

YO99JP was a special event station (isssued by the Romanian Amateur Radio Federation) and was active in celebration of the Pope's first visit in Romania. Pope John Paul II was present in Bucharest May 7-9th. QSL to YO3KPA via bureau. More information on the Romanian Amateur Radio Federation can be found on the Web site:
http://www.qsl.net/yo3kaa

SV9, CRETE. The "DX News Sheet" reports that Drew, GM3YOR, will be active May 15-28th as SV9/GM3YOR while on holiday. He will operate CW mainly on the WARC bands, but also 160 and 80 meters (13kHz up) if conditions allow. QSL via home callsign.

TM, FRANCE. F5JBR will be active as TM0AI from May 23rd to June 6th. This will include CQ WPX CW Contest.

V3, BELIZE. Bill, W2WC, will be here May 11-14th, and plans to be active from V31GM's QTH in Punta Gorda. No callsign was given, but there was some mention of him possibly working the digital modes. QSL via home callsign.

WH2, GUAM. Dave, KH2/N2NL, informs OPDX that he will be active as WH2/N2NL in the CQ WPX CW Contest as a Single Op/All Band entry. QSL via W2YC, direct or via the bureau is OK. Cards sent directly to his Guam address will be answered, but the turn around will be much longer than via his QSL Manager W2YC.

YM0, TURKEY (Attend Prefix Hunters). The "DX News Letter" reports that DL6DB, DA2KT, DJ2JH, DL4DN, DL6BK and DG1NPM should be active as YM0S from Bozcaada Island (AS-099) now until May 14th.

YO, ROMANIA. Jean Michel, F6AJA, will be active as YO/F6AJA from May 17-22nd from YO8FZ's QTH during his free time. Jean states, "It's NOT a DXpedition of course."

> I just finished giving my seven year old his code lesson. He's learning the
> code to earn a award in his Tiger Cub Scout group. He is a seven year old
> that came to me to learn the code, and has no interest in radio,

Well why not FORCE him to learn about radio before he can use morse
code? It is ok for him to want to learn Morse Code and not anything
about radio, but not the other way around?!

I would
> think that anyone who is interested in radio should stop crying about it and
> donate the 15 minutes a night for 2 weeks, and learn it.

If your son doesn't have to learn or like radio to enjoy Morse Code,
then people who want to use or like radio do not have to learn Morse
Code.

> No one complains about having to learn how to use windows before they can
> surf the net....

Of course not, no one complains about having to learn how to use a ham
radio before surfing the repeaters either, but what if you made them
learn Russian before they were allowed to use the internet? Then you
would get the same complaints.

Mark,

I don't float so well, but managed to pass my scuba tests. OW certification requires a 10 minute survival float. I get the sense you're perhaps familiar with the frustration of struggling, while others lounge around on their portly seat pads, idly chit-chatting. Imagine doing this where life and safety is easily compromised, as opposed to just struggling with uncooperative ears. I wonder if you know what it's like to be at the limit of physical endurance, with the pool edge -- and safety -- far, far out of reach. At the end of the ten minutes, I was exhausted to where I needed help getting out of the pool. I passed the test, but only proved that I would perish in fresh water without a flotation device. I found out later I am a mere six pounds negatively buoyant. That's quite a lot, though, and according to my OW instructor, I am about as dense as they come. Most people are positively buoyant in fresh water.

What does this mean when I mostly dive in calm tropical seas, always with at least a shorty on for flotation? Why should I need to demonstrate that I can survive in fresh water, alone, without help, for a mere ten minutes? Why should a not-so-sprightly-anymore, middle-age man need to demonstrate a skill of dubious use? Why did my perfect written test scores not exempt me from this portion of the test?

Conversely, what expectation should I have of being exempt from any one of the requirements, useful in my mind or not?

Michael.

The best analogy would be having to learn Morse Code in order to use the internet, as Morse Code has as much to do with knowing how to operate and work the internet as it does with knowing how to operate and work a Ham radio.

My daughter apparently applied for this from Austria. She was in the ARRL book, "Now You're Talking" and has appeared in several area newspapers punlisizing ham radio in years past. Her GPA is 3.99 and SAY 1430, she is now in Austria and applied from there and is going to Brandeis. She will use the award productively.

If it would have been anyone else in any other FCC Bureau or Office it would have blown over. But it came from the Office of Public Affairs to the distribution list of the FCC Daily Digest which is directed e-mail subscribed to and read by regulatory professionals world-wide, and it carried the name of the person who is most associated with said distribution.

Much too public, and as far back as I can remember to the advent of the Commission;s e-mail system in 1995, the rule was "keep your personal stuff off the net". We had numerous instances of folks posting "for sale" items agency-wide and it took some disciplinary action to get that to stop.

It's bad enough when it's only inside the firewall, but when it gets out to the Wide World .... YaZowieee......

I have great news for you! You CAN become a ham without learning Morse code. Looking at FCC Part 97, you can qualify for a Technician's license with only a written procedure and absolutely minimal theory test. No Morse code test!

It seems your wish has been granted, and quite some time ago at that. Run on over to your nearest VEC testing facility. There's no need to stop to thank me.

Michael.

Radiosigs:

Sir, here is a quote clipped from your earlier post entitled something like "Who's the rogue at BellSouth."

QUOTE

Anyone know FOR SURE the I.D. of the BellSouth rogue who's been unlawfully nuking my postings? I've been told it's W4AMP, . James O'Brien and also he's supposedly the filthy-mouthed Jew baiter called DONKBOY666.

END QUOTE.

May I suggest that what you should have said done was to contact BellSouth's abuse folks and talk with them. Instead, you came up in public and pointed a finger at W4AMP, whom I do not know from Adam's housecat. If I were W4AMP, I would be pissed off also. Of course, maybe what you wanted to do was start a flame war.

True enough; however, it has everything to do with the es-prit de corps of ham radio. Knowing that one has gone through, and survived, the identical trials and tribulations of his or her counterparts, builds a unique bond of dedication and purpose. The instant gratification crowd of today has no appreciation for that bond.

Now that sounds like a plan, a Morse code test to get on the internet
would keep some of you no-code peckerwoods out of the DX newsgroup
and about a half dozen other ones this 'discussion' doesn't belong in.

Is it REALLY necessary to post this crap to every ham newsgroup there
is ? Some of us have already learned Morse code, we aren't looking for
any good reasons not to....

>From your responce you sugest that the Harmony converter will not work with
>CGA, Vga nor EGA

For different reasons, yes. A cheap CGA monitor doesn't have Analog RGB
inputs. VGA and EGA have different scan rates and won't properly display
at NTSC scan rates. Either the monitor won't run, or will burn out, or it
will display a side by side doubled picture.

>I am taking this to mean that the output is a composite
>signal and only if I have one of those cga monitors that also has a composite
>input could I use it?

The output of the Harmonic Research convertor is Analog RGB. If you
have a CGA monitor with a composite input, you don't need the converter.
Some monitors of that era did have both composite and RGB, and some
didn't. For example, the Zenith monitors for the Z-100 color machines
did, but (I think) the NEC Multisync didn't.

>I am using an anolog C Band dish and am currently
>feeding the composite output to my VCR and then to the TV antenae as the tv
>lacks a composite inputand wanted to know if the improvement in picture
>quality would be worth buying a new tv with composite inputs.

I'd suggest a short term rental of a newer TV and see what it looks like.
Most cheap TV's don't do much better than a VHS recording, so you won't
seen any real improvement until you spend some $$$.

Cecil, you still need to lock up your weapons. Some Crack Mom might be
driving by and abandon her 3 year old Crack Baby on your doorstep. The Crack
Baby might play with the handguns and shoot one of your dogs. And it would
be all yopur fault cause you don't care about Crack Moms and Crack Babies.
See the logic?

Brian

This it for PorkButt and Doc Hate to answer for us....

Question: "Why don't all the parties to this disagreement just sit down at the bargaining table and hash out this mess? Isn't this whole affair giving Ham Radio a 'black eye'?"

Answer: The B.A.R.F. has offered, on many occasions, to meet with the leadership of the opposition, the FCC, and the ARRL, in an attempt to reach some measure of accord. The so-called "service" nets refuse to discuss the matter. They would rather continue their hate campaign as a method of silencing the B.A.R.F. On 75 meters, every offer of discussion with the opposing faction has been met with comments like, "We don't talk to trashï¿½ we burn it!" Ask yourselfï¿½ what does a comment like that do to the possibility of peacefully negotiating a settlement? At some point, it becomes very difficult to discuss matters with a group that finds such joy in character assassination and personal attacks. Regardless, the B.A.R.F. remains open to any and all suggestions on how best to end the conflict. The B.A.R.F. seeks a just peace and an end to the daily insanity on 14.313 and 75 meters. Can the same be said of the nets and their followers? If so, let them propose a meeting time and place, with mutually agreed upon referees (such as the ARRL might provide), where discussions may begin. The B.A.R.F. will be thereï¿½ ready to talk and present our case. But the continued attempts to destroy the personal lives of our leadership must stop. The vendetta against KV4FZ must end. The B.A.R.F. agrees that this whole situation is, indeed, giving Ham Radio a "black eye". We are willing to explore any avenue that might resolve the conflict.

I'd think a guy who manages to work over 150 countries at once, 24 hrs a day would think more clearly than this....(but think of the ratings bonanza !!)

Ted Turner: Nuclear War in Future

Saturday, May 8, 1999; 9:05 p.m. EDT

ATHENS, Ga. (AP) -- Ted Turner told University of Georgia graduates today to keep thinking and learning, then rained on their parade by suggesting that NATO bombing in Yugoslavia could lead to nuclear war.

``Here's the class of '99, and y'all are just starting out. Wouldn't it be terrible to have nuclear war in the next week or two and mess up y'alls careers before they have gotten started?'' Turner said in a commencement address to 5,000 graduates.

Turner, who founded CNN, said that as a child during the Cold War he worried that he wouldn't live to see the end of the millennium. At age 60, he said he has the same worries.

(I'd be worrying I'd die and Jane would donate my money to Save the Wallabee)

Referring to the NATO bombing of China's Embassy in Belgrade, Turner said: ``If we drop a bomb on the Russian Embassy, we could be at war with Russia and China tomorrow, and they both got lots of nuclear weapons. We might not even get to see the millennium.''

(Hey Ted, get NATO to bomb MSNBC, they're annoying !)

>>Because one can't do business with right wing screwballs led by a lying, cheating felonious bastard who created all this crap to begin with, invented horror stories about nice folks on a fine net,preached anti-Semitism as a way of stopping phone patches and on and on and on.If you Lloyd think that breaking bread with Satan can bring about peace, you're nuts. The only way for this stuff to end is to have KV4FZ permanently removed from ham radio and have his clones stop creating trouble by jamming,slandering,harassing etc. And if his nutcases don't stop, then the FCC will bring about their end too. Neville Chamberlain in 1938 came back to England waving a piece of paper signed by Hitler. "Peace in our time" he proclaimed. A year later we had W.W.2 because of

appeasement. Good people don't appease BARF or the STUMPJUMPERS. Good people stand up to them and drive THEM goofier than they already are. Case closed.

Please don't forget the Atlanta ham fest on June 5 and 6. It will be held at Miller Park, in Marietta, Ga. There will be room for seven thousand cars. There will be an active flee market. We have 180 commercial tables and many of them are already gone. If you are interested in commercial tables at $20.00 each then contact Ben Dasher, ke4yzx at bdasher@mindspring.com and if you are interested in flee market spaces at $10.00 each, contact Gars, P. O. box 88 Lilburn, Ga. 30048-0088. For other information, contact John Fearon w4wkp at john@negia.net. We hope that this ham fest will prove to be one of the best and most enjoyable fest we have had in recent years. By the way, the admission will be $5.00 each. There will be food on site. Come one come all. 73 John Fearon, w4wkp

Don't think that's a option. There are a few things like you
mention that are left out of Alinco's DJ-S11 and S41 firmware,
but it's still a good buy @ $88.00.

More disinformation. Check his original post, George. He said that he
"homebrewed" the antenna, not that he invented it.
Your attempted obfuscation may work on the air, but becomes
impotent in this medium. You see, spoken words, unless recorded (As
your friends like to do) are subject to the limitations of the
listener's memory, so you might be able to get away with twisting
peoples words and claiming this or that was said when it wasn't. One
fantastic thing about the written word is that it, by virtue of it's
nature, creates a tangible history. This allows it to be recalled,
allowing it to be used to refute claims such as yours.
Now here's the fun part: Jeff has quoted and pointed out each
instance of false information in your post, and included the text from
AF2Y's original message as supporting evidence. By doing so, he has
exposed you to anyone capable of thinking beyond the brain stem for the
misleading and deceitful person that you are.
Have a nice day!

Michael Young wrote in message <926314830.032.100@news.remarQ.com>...

" ... I thought it odd that I can easily sidestroke a half hour without rest, but come close to full exhaustion treading water for ten minutes. I also didn't understand the breast stroke until I tried it in salt water. It's as easy as they say it is, if you carry enough body fat. As I said, a 2mm shorty supplies what nature gave the rest of us.

For the group's info:

What you said makes perfect sense. The breast and sidestoke are "survival" swimming strokes. The stroke itself contains at least a fifty percent rest at the glide. This is what enables the swimmer to travel very long distances without tiring. The idea with these strokes is to generate as much glide as possible. Treading, OTOH, is a one hundred percent work stroke. I'll take the former over the later any day. (:-]

My understanding of why we still have morse code as a requirement is simply because of international agreements. In order to work DX, the ITU still requires a code proficiency. What speed varies with the country issuing the license, so the FCC could easily reduce the speed, but there would still be the minimum requirement.

I consider myself an "appliance operator" and haven't used code for a long time. I am one of those that would like to see it dropped as well. We are not preserving a tradition, trying to keep anyone out, or making ourselves an exclusive group. Amateur radio should advance the radio art, have a trained pool of operators for emergencies, and improve international relations. These can be done without CW, but until the ITU changes its policy, the FCC has no choice.

Never have I had a problem with my Radio Shack HTX-202, I also travel regularly, and often have the rig in my carry on, along with my laptop. I have been given grief about my leatherman and lighter (one of those pyro types <g>) but those go in my bag instead of on my person, and I've had no problems. Many of these rules do vary from airport to airport, but I would suggest that you should have asked to speak to a supervisor, shown your license (you carry it don't you?) and that should (not always) have taken care of that. Your are a licensed operator by the FEDERAL govt. and that has helped me in the past...

I'm not so sure about that eval. I've had mine for a few years now,
used it with/without amps, external (read roof or home) antennas,
external microphones/speakers, packet, batteries (both nicad and
alkaline) and I've had nothing but good results. Saved me from a
night in my car way up north in New England....

It's not common, I'll admit, but I have used 2m SSB from
fire camps in deep canyons where there were dead spots in
the local repeater's coverage area. The extra performance
enabled simplex contact, using knife-edge diffraction where
FM contact was impossible.

>From: henry@wolfenet.com (Henry Knouse)

>I would be for the fcc getting rid of kk7ho just as soon as they get
>rid of the lawbreakers on liberty. Both are a cancer on Ham radio

I have not jammed this "So Called" NET. Tell ya what Henry, if I thought it would clean up 3950 and that Libertynet gang - I'd give up my license! I don't need it. I thought ham radio was something until I ran into this gang on 3950. Kevin Strom (wb4aio) a member of the National Alliance. AA8DP Stephen Anderson a KKK ranking official. Along with various others that are either Western Imperative Netwerk members, Ernst Zundel followers, or admirers of Hitler. Condoning the bombing of abortion clinics, calling for race wars, the dragging of the black behind a pick-up etc. etc. They do have a right to say what they want. So does everyone else. Ham radio isn't the proper forum for it though, at least I don't think so.
The whole issue is not "jamming" as they call it. Although they do get jammed. The inflammatory remarks they make incite the jamming. The" issue" which they are hiding very well in the guise of being jammed is the use of 3950 by them, EXCLUSIVLY. That's what it's about.
They want it (3950) every night, in order to get it, they harass, jam, heckle and lie. This has been the sole underlying issue. The reason for their chanting jammer, jammer, jammer, when all one (anyone) tried to do was get in and make a comment. Whether it's myself or someone else it does not matter, if the comments are not INLINE with theirs - you are "automatically called" a jammer. It's their programmed response for everything. They have it in their minds that even though the "So Called" net is only on on Sat evenings they should have 3950 every night and have done massive amounts of their own jamming and "Moving in to Take-over" the frequency when it was occupied by others.
I like talking with some that operate 3950. There are many good hams on there. When the liberty gang is not in there causing chaos the frequency is like any other and the QSO's are enjoyable. The minute they arrive, they "instigate" and start talking about people, peoples family members, their wives, just heckling, thowing out snide offensive comments all to disrupt the civil QSO's that go on on 3950. They are "fanatical" about that frequency. I guess some others are too but the "So Called" net is only on on Sat. evening.
The "So Called" net, in the last couple of years have done the same (harassed) to other amateurs that wished to use 3950 for normal amateur operations They have harrassed, offended, walked on, jammed, etc. and that's where their jamming is coming from. I don't jam them, but I would give up my license voluntarily if would do ANY good, I don't need this, it won't do any good though if some of them continue to get away with their activities. I have been on 3950 for three years now, before that I listened on and off for 3 more. Even with that I am still new compared to "some" that have been there for years and years. Even at that, I know who is doing what and why.
Taking jabs at me for "Speaking Out" is all that they are doing. Harassing me

for expessing my op[inions and observations. They don't like the fact that I am bringing this to light. I AM telling the truth about this but they certainly will have another "take" (spin) on it. Bottom line is take all the licenses of those that this gang complains about and let them have 3950 as their "Private Shortwave Broadcast Frequency" or see thru their lies and spin, watch their activity when "someone else" is on 3950 and you'll get to the heart of the problem. Hell the "So Called" net control- w1wcr has said many times that he was going to run Sid and the others off of 3950 and that it IS the "So Called" libertynet's frequency. I know, after that last statement they'll go to complaining about Sid, the language etc. etc. Oh well, he's not like that until they start HARASSING him.
Like last night they provoked him into anger by talking about his wife (who's very ill) in a most offensive manner, Then him(Sid), then his son(george). All of this the day before mothers day and All to "instigate" him into losing his cool so they can get another "SOUND BYTE" to send in and lie about. Ham Radio isn't _ Self Policing_ it is
_Self Destructive.
I have not "jammed" them - period. The silly little .wav file is about the extent they can come up with to call jamming. I did call them the NIT WIT NET in between transmitions. I notice that they never play THEIR conversation before such instances, hell no they won't, that would give you the WHOLE picture.. Other than that if I have something to say, I key up, in between, and, say it, give my call. All becuse they don't allow "freedom of speech" on that "So Called" net. ONLY if you follow they "beliefs" can you get acknowledged to make a comment. Other than that just be quick with the key and you can get it in. Oh, I know, now that I said that they'll say that they don't let me in because I'm a jammer. Not True. But who really gives a damn. They'll continue and it's everyone else's fault. I have but one question. What the hell does a "So Called" net have to do to get LISTED IN A HATE DIRECTORY Created a College Profesor and used by Law Enforcement agencies all over the country??

Your students deserve better than you showed them. I thought it odd that I can easily sidestroke a half hour without rest, but come close to full exhaustion treading water for ten minutes. I also didn't understand the breast stroke until I tried it in salt water. It's as easy as they say it is, if you carry enough body fat. As I said, a 2mm shorty supplies what nature gave the rest of us.

I think a swimming instructor -- you are the instructor, right? -- who won't teach that much perhaps shouldn't be teaching. Which agency issued your credentials?

I passed the "float" test by treading water for the full period; that's not fun for an old fart. I also dive recreationally in the tropics only, wearing at least a shorty. I've since learned that half-full lungs are enough for neutral buoyancy in salt water; the shorty is a safety measure. Near home, for training dives, 3mm full suits are required even in the hottest part of summer. As I said, Dingleberry, I am 6 lbs negative in fresh water. A 3mm full suit makes me 12 lbs too positive.

Don't worry about being my partner. You pack far more baggage than I. And, yes, I passed the test legitimately, without special consideration.

Michael.

> The ARS will benift for any influx of people at all, but it is

That's not true. HF consists of 3.75 MHz, with only about half of that spectrum useful at any one time. There is really no frequency reuse possible as with V/UHF. Where the growth is needed is already code-free. If you were really altruistic with regard to the health of the ARS, you'd be spending your time exploring V/UHF rather than posting here. // Jeff KH6O

But Don did say he was operating mobile CW; best *not* write it down,
methinks!

I'm a bit in between; write down name, qth, rst, etc. -- but usually
head-copy the rest.

Not up to those speeds, alas; above 35 wpm or so I tune in a slower
station.

> but if somebody throws a long unfamiliar and non-phonetic word
> out there at 45 wpm, I'll probably miss it, and I've found that's

Agree!

> And speaking of slower speeds, people that copy only
> in their heads have difficulty with copying 10 wpm qsos.

And with that: Too slow and you cannot copy words, only letters; then I
must write it all down.

I imagine the x-rayer was just following instructions. For one thing, he
probably didn't have the time or skills to determine that it wasn't say
a bomb. Also the pilots frown on radios in the cabin. It could possibly
cause interferance to radios or nav instruments.
It may have been a pain in the rear, but I don't think it's anything
outragous. When you have a 10 million dollar "or whatever" jet boring
holes in the sky at 35,000 ft, you don't want to have to worry about
gadgets in the cabin causing problems. MK

It was a very human mistake.... one any of us might make
given the typical 12-16 hour work days in those positions.
I wrote letters to every commissioner, the FCC public
affairs office and their personnel office asking
that they show a little mercy-- I encourage others to do so.
It's easy to sit on our butts and scream "I'm offended!'
when we aren't the one facing a ruined career.
There but for the grace of God....
Disipline, yes; There are lots of measures that will
bring about some real contrition.
But nothing is served by severing the head
of someone who has otherwise done well.

Hi all,
Does anyone know how to set the Scan Resume function.
On the DJ-S11 & DJ-S41T. Mini HT's.

I would like. The Scan to stop when finding a signal and
resume scanning after the signal disappears.

It now stops scanning when a signal is found, then resumes
scanning in 5 sec.

Thank You,
Boyd W6DSB boyd@humboldt1.com

In article <7h2fos$8u7$1@1cust.83.tnt6.memphis.tn.da.uu.net>
<realdeal@my-dejanews.com>, posting from uu.net, wrote:

>This goofball tells everyone who will listen to him that he invented this
>antenna.

He said he "homebrewed" it -- nowhere did he say he "invented" it. I
homebrew radios from plans others have drawn up.

>For his information , this antenna is in the book "The Radio Amateur
>Antenna Handbook". It is on page 152-153. This book was copyrighted 1978.

All my homebrewed radios have come from such publications, too.

>Yet
>this lame brain takes credit for the design.

No where did he say that. The word "design" does not appear in his
comments.

>The book was written by W6SAI and W2LX Bill Orr, and Stuart D. Cowan .

I've built gear from Orr's designs. Those items are called "homebrew"
as opposed to commercially built.

>Dr Hate, you did not invent this antenna.

He did not mention the word "invent."

>Quit trying to reap rewards that you have not sown. The Antenna has
>been around for years.

Doug Demaw's QRP designs have been around for years. Yet if I send
someone info on how to build one, you'd be hard pressed to accuse me
of trying to reap the late Mr. Demaw's designs.

Comparing your comments to Doc's, I'd say you're the one filled with
hate.

>> radiosigs@aol.com Doc

Hey Doc, NVIS is playing a big role in emergency communications, too. Utilizing NVIS on HF allows for solid regional comms; good to have in case the V/UHF repeaters fail.

Sir: I don't get it! This message was passed over secure lines, being read by people, just plain people like yourself. They didn't transmit it over the airwaves that can be picked up not only by amateurs and lowely little CBers like myself. But by the YLs and children in the vicinity of ones shack. Tell me where you are going with this. You have the right to speak your mind even over the airwaves. But, in a civilized manner, that is what you would expect of your children, right!!!! Cry over something like the children killing other children just because they are atheletes and give the rest of us a break.

Well, I would like to let you know that I have a handycap. I never got any free rides from anyone. I got my license in the 1950's when people had to draw diagrams and know the answers to the questions and send and recieve code. I couldn't draw diagrams, so I had to explain what they looked like. Noone gave me anything and that is the way I prefere it. That way, I don't have to pay anything back later. John Fearon w4wkp, Loganville, Ga.

Esteemed gentlemen of this forum...I just inserted a brand new Best Data 56K modem in line and my other one, a mint Best Data 33.6 modem is in a box being stored. I have all the wires and connectors. I'll try to find the poop sheet on it too. If anyone's interested in buying it,I'll ship but will not discuss business on these postings. Methinks that's illegal. So if you're interested, write to me at P.O Box 1347, Clifton,NJ 07015 and we'll take it from there.

By now you all know about PSK31 for sound card by Peter G3PLX. You may also know about BTL for RTTY with a sound card, by Rob ZL2AKM.

But do you know about Hellschreiber? Have you tried it? It has a fast growing and dedicated following -

All you need is a Win95/98 PC with a sound card, like PSK31 and BTL, and the performance is very good. Hell is particularly good at rejecting noise, because it is "human readable", so the eye sees patterns and rejects noise. In addition, it is barely affected by ionospheric doppler, and it therefore works fine at times when PSK31 is not usable. It is also is far better performer than RTTY, and occupies similar bandwidth.

There are some 100 or more Hell operators in nearly 40 countries at present. For more information see my web site:

http://www.qsl.net/zl1bpu

For the absolutely AWESOME Hell software by Nino IZ8BLY, see my site or Nino's which is at:

http://www.freeweb.org/varie/ninopo/radio/Hell/index.htm

Encourage your friends to try Hell, which is a neat mode that has a fascinating history and offers both high performance and simplicity to rival CW. If you have any questions, don't hesitate to send me a note.

Gentlemen, I submit the following for your approval. The 3.950 nest is fond of Germany, especially that from 1933-1945. You know...all the screaming,Sieg Heiling,bunting,swastika flags(in German they're Hakenkreuzfahnen), the shiny black jackboots, the Aryan philosophy based on manure etc.
Therefore, based on all that ugly jazz plus a very excellent and famous novel penned about 20 years ago regarding Hitlers being cloned,I feel it's fitting to now refer to the 3.950 assembly as:
THE BOYS FROM BRAZIL. Anyone second the motion?

I don't know if you should have been passed.
I've asked people to leave swimming classes because
they could not float at all. Their bodies just
sunk. Upon showing them how to do a basic float with
sculling, they went under every time. on back and on
stomach and on side.

If they don't pass the float test they cannot go on.
The extreme non-bouyancy of their bodies impossible
to overcome in the water. Like dead weights.

I remember in Scuba classes one woman who could not
stay afloat...just sunk every time
she was told the rules state she has to FLOAT. or
seek another sport to learn.

or move to a salt-water environment to help.

maybe.

hard decisions, but if no able to float, then
it's hard to teach. One guy over in rec.
sport.swimming says that he cannot float and
learned how to swim. Can be done. But he
also gets tired out more.

you are pulling dead weight...that's why.

your weight is working against you.

If i was asked to be your Scuba partner, I'd
defer. I'd be afraid of your problem underneath

overcoming you and taking me down with you when you see me and grab me from behind and will not let go...i'd get out of it, but at what cost. to me or you.

i'd think that swimming would be your non-participating sport in more than 3 feet of water. Or high salt content.

bill conduit
etc.

3526. Look who's back CBFAGBO AKA Drew Durigan

Drew Durigan, the fatboy who gave us a good cry when the heart wrenching message of his not coming back was posted here a few months ago, is back as Radio-Rambo@hotmail.com his NNTP posting host comes back as (DNS lookup of IP address '152.171.230.83' resolves to server:

98ABE653.ipt.aol.com). CBRambo is back. They lying scumbag who swore he wouldn't be back is back. I knew it was too good to be true. Look at the below message from the scumbag himself:

Subject: An Open Letter, Apology, and Final Message from CB Rambo
Date: 1999/03/16
Author: CBRambo <cbrambo@aol.com>

Over the past few days, I have spent a great deal of time in reflection of my past behavior on the radio newsgroups. My conclusion is that I have wasted a great deal of time and effort engaging in pointless arguments and petty bickering with other participants here. This is time and effort that would have been much better spent on other, more meaningful pursuits. I have also come to the realization that I have offended some of you with my comments, as some have inadvertently taken my remarks in a personal manner. This was never my intention...and for this, I am truly sorry.

Contrary to popular belief, I am not a "bad guy". If you were to know me in person, you would probably say that I am kind-hearted, free-spirited, fun to be around, and generally easy to get along with. But, like all of us, I also have my character flaws and shortcomings. Specifically, I tend to be particularily stubborn at times (especially when provoked) and I am also prone to "carrying things too far" upon occasion. I like to play games, tease, and joke around...and sometimes, I don't know when to stop. This has always been a weakness of mine, and I am now working very dilligently to control it.

As I read some of my past newsgroup postings, I must admit that I am rather embarrassed and upset with myself for engaging in some of this nonsense. I have made off-topic comments here which have had the effect of causing chaos and disrupting the flow of information for which this forum was designed. I am certainly not the only one who has done this, but that doesn't justify my behavior. Lack of maturity, insecurity, poor judgement, the "thrill" of being safe behind a keyboard, and an occasional feeling of boredom in my life right now...all of these were contributing factors. Again, that does not justify my behavior, but I can see now how these feelings and character flaws caused me to behave as I did.

I also tend to get a little "touchy" when someone accuses me or implies that I engage in illegal radio operations. This is simply not true. Never has been, never will be. I am a law-abiding citizen who does not have even as much as a traffic ticket on his police record. I don't mention this as an attempt to justify my behavior, but only so that you might understand why I occasionally acted the way that I did.

In an effort to restore order and tranquility to this newsgroup, I will immediately and forever cease from posting here. I will be available via e-mail for the next 24 hours, and would appreciate hearing from those of you who have thoughts on this matter and do not wish to post them publicly on the newsgroup. When the 24 hours has expired, I will permanently delete the "CB Rambo" screenname from my America Online account and I will not appear online again. I'm sure many of you are skeptical here...and rightfully so...but time will indeed prove my sincerity. Again, I apologize to those whom I offended here and for being a nuisance on this newsgroup.

Thank you for your time. Radio is a wonderful thing. May it have a long and prosperous life. Goodnight and God bless you.

"WHERE'S THAT BIG 'OL CB RAMBO?"
"HE APOLOGIZED, LEFT THE NEWSGROUP, AND WENT AWAY FOR GOOD!"

Stupid little child.

I'm trying to program my Motorola Systems Saber III but am having a little trouble. I've got all 256 channels entered but in the MODE SUMMARY, there is a field for PHONE RVT CHANNEL which only allows me to define 16 channels. All I am looking to do is active DTMF on each channel with having it revert to a default DTMF channel. Anyone have any experience in this area?

I'm using Systems Saber Lab Software.

Don

3531. HELP!!! Police Motorcycle Radio Wanted

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-11 00:00:00 UTC
From: Mark Masa <mark@kelltech.com>
Message-ID: <3738A103.186E8CDF@kelltech.com>
Source record: 143126

I'm restoring a 1952 Harley Davidson police motorcycle and the only thing that I'm missing is the radio setup. I am interested in ANY pre 1970 police motorcycle radio since I can use it as trading material with the few other people in the country who are into this sort of thing. Specifically, I think what is correct for my bike is a Motorola FM TRU41. It is two boxes about 18" long x 10" wide x 10" high. (these dimensions are approximate) The receiver was in one box and the transmitter was in the other. The power supply was in one of the boxes also, but I'm not sure which one. There are interconnecting cables between the two boxes as well as a cable that went up to the control head mounted on the handlebars. The mic came from one of the boxes and was mounted on the tank. It is a tube radio. This is the one I need for my bike but am interested in ANY ANY ANY ANY pre 1970 motorcycle radio, especially if it has tubes. I hope somebody can help me.
Regards
Mark

3532. *****NEED MODS FOR HT YAESU 51R *****

Newsgroup: rec.radio.amateur.misc

HI ALL,

DOES ANYONE HAVE THE MODS FOR THE 51R DUAL BAND HT?
ARE THERE ANY MODS THAT THIS RADIO BE MODIFIED TO TRANSMIT
AND RECEIVE ABOVE THE HAME BANDS LIKE AROUND 900MHZ?
I SEEN A POSTING THAT THEY CLAIMED THE Y HAD DONE THIS MODE TO THIS RADIO FROM
60MHZ TO 999MHZ ???? IT WAS ON EBAY
IS THAT TRUE? PLEASE HELP..... EMAIL ME

THANK YOU
SPYRO N2XZM

3533. Free Amateur Radio Logging Software

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-11 00:00:00 UTC
From: SRC Software <SRC_Software@hotmail.com>
Message-ID: <37389B0B.1B1EE3E4@hotmail.com>
Source record: 143128

SRC Software's Amateur Radio Utility v1 Release 1.100
==========

Tired with the standard old logging applications... un-user-friendly interfaces etc?

Well, your time of searching may be over!

The long awaited next release of SRC Software's Amateur Radio Utility v1 is now available (1.100). It uses the windows interface, which allows quick and easy logging. Many features are included such as automatic frequency identification, contact information, full locator support with distance mapping, shortcut and custom keys, full QSL label printing support, import/export partial logs, the list goes on!

Major additions to this new version since version 1.001
==========

Added customised QSL label printing support
New database added which stores information about your amateur radio setups
Now allowed to export selected contacts, as well as exporting the whole logbook
Import wizard allows a selection of contacts to import
On click information displayed when users clicks on a log entry
QSL label grabber wizard to help you to collect contacts for QSL labels
More pages added to help file
Extended contact information for more details about stations
UTC time offset feature

This programme uses database files which allow data to be entered in any order and format. It is designed mainly for home day
to day logging and also after contest logging and general sorting out. It supports import/export to and from RSGB LOG format, a commonly used computer logging format, and you can choose the contacts you want to import, rather than doing the whole file. The programme will re-index your log into date/time order, meaning that contacts can be imported how you like. There are hundreds of other features which you will be able to see when you start using this newly developed application.

AND THE BEST PART OF IT IS THAT IT IS COMPLETELY FREE!!!!!!!!!

YES : It is... all you have to do is download it, enter a few details into the page and click on register. As soon as possible I will send you the registration details, no costs or catches apply!!!

If you already have a previous version installed (1.001) you can get the update patch from my website. You will not have to register your new copy again, as you will automatically have the full version.

Background Info

This programme has recently been produced, and is available to anyone. It was programmed, designed, written and debugged by me, Simon Chudley, a student in the UK. I am a qualified amateur, M1BWT, and have been operating for about two years ish. Please distribute this programme as you wish, as long as all the files are exactly as I distributed them, and EVERY USER THAT INSTALLS A COPY REGISTERS - REMEMBER, REGISTRATION IS FREE!

How?

Simply go to the following website and click on Products. Then select Amateur Radio Utility v1. You will be able to see more detailed informaiton on that page, and to download it, scroll down to the bottom of the page. You will then have to select E-Mail, and click on Register AMV1. Enter your details along with the programme details (you can find these out from General Preferences) and click on submit. I will send you the registration code via e-mail asap. View the readme.txt file for installation details after unzipping the zip file.

Any problems please contact SRC_Software@hotmail.com

It was Herman who deviated from the point of the discussion by
addressing the need for having special CW-only sub-band in the two metre
band. I had merely responded that such an observation certainly did not
detract from the irony that the CW-only sub-bands are above 30 MHz where
there is no requirement for testing prior to being authorized to use
those bands. Seemingly, Young doesn't see the irony either. None the
less, I would be pleased if he would direct his comments to Herman on
points of logic.

I guess I can live with Young's judgement that I have a narrow mind with
respect to opinions that I do not hold. But at least I don't jump to
conclusions. For Young's information, I have an interest in QRP
operation also, but is is with using the digital modes of baudot,
pactor, clover and soon, PSK31.

> It's a big hobby. There are bands for local FM repeaters. There are

> education affords them.
>

I agree that it is a big hobby, but I fail to understand how being an
advocate to abolish an unnecessary test for amateur certification could
be deemed to hold a narrow viewpoint. To the contrary, I find that
those who advocate its retention have the narrow viewpoints because they
are based on beliefs unnrelated to whether the individual is properaly
qualified to operate an amateur station. Moreover, Young has no idea
what my educational background is so he is hardly in a position make a
judgement as to whether it is relative to my views on this issue.

>

My limited exposure? I have been an amateur for over 24 years, holding
not only Canada's highest amateur certifcate, the Amateur Advanced Radio

Operator Certificate, but also a Second Class Certificate for operation on board ships in the maritime mobile service. So as far as I have been able to determine, I have the highest country total in Canada for DXCC in RTTY, including RTTY QRP. In addition, I am in the process of establishing a 56 kBit UHF network in the Ottawa area and up-link to via satellite to link with a similarly established network in Vancouver. BC. In addition, I am working with a number of amateurs to establish an HF e-mail network for use by Canadian amateurs, during routine and emergency operations. Moreover, if Young were to obtain the Radio Amateurs of Canada most recent publication, The RAC Operating Manual, he will notice that my callsign is the first in the list of acknowledgements, merely because I wrote well over one half that manual. In addition, while with my previous employer, I was a radio inspector with the Department of Communciations, one of my duties being to administer and mark radio operator examinations, of which the amateur class was but one of them. Moreover, I was also responsible for the genesis and ignauguration of the current amateur examination system that is currently used by Industry Canada. Although I am no longer with Industry Canada, I am pleased that my advice and councel is still sought by the executive of the Radio Amateurs of Canada. If Young has any doubts tp these claims, he can confirm the above by sending an e-mail to Ms. Debbie Norman, the General Manager of RAC, at rachq@rac.ca and she will be able to confirm my extensive experience in amateur radio.

> and digital signals are inferior to CW?
>

I wouldn't, but then again, the comment made by the fellow at the meeting had nothing to do with relative merits of one mode over another. It's a big hobby and it is pointless arguing which mode is superior to another, each is free to do what they wish. I merely related an overheard a discussion and this individual station that oftentimes he had observed that there was still activity in the digital bands when seemingly CW signals have disappearred. He made no judgement on the relative merits of each mode. Nothing more, nothing less.

> > >Connect a decent antenna to your HF receiver, and conduct your own

> >
> > Been there, done that and got the T-shirt to prove it, I am just
> relaying
> > observations made by others. Besides, Herman would envy my antenna
> farm.
>
> What did you hear?

I spend most of my time on the HF bands with digital operation; the exceptions are when I am in my truck operating Single Slush Bucket while HF mobiling. Typing on a keyboard doesn't lend itself to driving a truck, but I am developing an interest in digital voice processing, so there is hope yet!

> Why would your anonymous anecdotes be more compelling
> than your first-hand observations?

My anonymous anecdote is more compelling than my first-hand observation because my observations would be judged as being overly subjective. (Indeed, I haven't the foggiest notion as the relative popularity of Morse code and digital modes, and I don't really care either.) The comment to which I referred to was made by a prominent individual who is well-known as an avid CW operator; while my interests are focused on digital operation. If I were to state that digital operations were more popular than Morse code, I would be accused, and rightly so, of being biased. (Regretably, Herman is utterly oblivious of his bias and hasn't enough sense to recuse himself on making such pronouncements.) I related the incident to show that it is becoming evident that perhaps the popularity of digital operations has overtaken that of Morse code, at least judged by an individual who has no interest in digital operation and who is seeminly more impartial than Herman or I.

> Why would Herman envy your antenna
> farm?

Maybe because I lots of antennas on a one acre plus lot.

You've got my attention. I honestly mistook your reply to Herman to be yet another whine. Cogent thoughts on the relative merits of testing versus not testing Morse proficiency were lost in the slew of unrelated posts. I would appreciate your sharing those views with me, and others late to the party.

Michael.

I have carried mine on several occasions without a problem. It depends
which airport you go through.

Several months ago there was an article in one of the major newspapers or on
the news about the fact that the personnel who do airport security are paid
just above minimum wage - so what do you expect.

Actually I know some people who are airport security staff, they are only
paid about $6.50/hr.....

SHAME ON YOU FOR PICKING ON A NEWBIE! You really cannot make any connection between a No-Code license, and a beginner's question about just what is meant by a term (wire antenna) that we all take for granted. You certainly cannot make a valid correlation between Morse Code proficiency and intelligence or knowlege of radio theory. We all started out ignorant, but some of us have had more opportunity to learn (contact with Elmers, study, etc) than others. Worse yet, some of us, despite our code and theory expertise, still have lessons to learn in civility, tolerance, and the utility of extending a helping hand to new radio amateurs, regardless of their code proficiency -- that is a shame!!

That said, I'd better tell you that I am a 45 year licensed Extra-Class 35 WPM (on a good nite, HI!) CW operator, who wishes that it was not necessary to delete the code requirement, but realizes that the codeless Technician license is a net gain for our hobby. I am not in favor of deleting the code requirement for all classes of licenses, but in view of the reluctance of many people to tackle it, I fell we may need to go that way. For me, and for many of us, CW is one of the most attractive features of our avocational radio hobby; for others it seems a rite of passage, but while it may be a motivation filter, CW IS NOT AN INTELLIGENCE OR WORTH FILTER.

73 in the fraternal spirit of amateur radio, and
cw forever!

>personal opinion, like yours.
>
>William Lee N5WRX

Okay, William, are you willing to back up your opinion with action?
If so, get rid of the things that took you very little effort to obtain.
Tear up your driver's license. It took very little effort to get, so
it must not be worth much to you. Put your kids up for adoption.
They took very little effort on your part (and pleasurable at that)
to procreate. So they can't be very valuable to you. Shoot your
dog. He isn't likely to have cost you much effort to get, so you
can't value him very highly. Etc.

When I look around me, the things I value most are mostly
things that cost me very little effort to get, but would cause
me much anguish to lose.

OTOH some things I worked very hard for at one time are
no longer important to me and are cast aside without a qualm.
They are yesterday's rubbish.

I have no idea what happened to most of the awards and
diplomas I once earned. They probably got tossed out
somewhere along the way. It doesn't matter. They are
part of the dead past, something I once did. It is today
and tomorrow that matter. What I may have once done
isn't as important to me as what I have yet to do.

The moving finger writes, and having written moves on.
We can't alter a line of what once was, we can only shape
that which is yet to be. Or as a famous Italian race car
driver replied when asked why he had no rear view mirrors
on his car, "What'sa behind me doesn't matter." It is
the road ahead that matters. It is no longer important
how I got to be here, it is how I proceed forward that
is important.

Alas, that does seem to be true. There are those who must have
a severe crick in their necks from looking backwards so often.
I don't have time for that. I've got too much yet to do. Those things
which can help me do it are important, wherever or however I
got them once upon a time isn't. That time is spent. I can't get
it back. Whether it was spent wisely or foolishly, with great toil
or great ease, no longer matters. It's a sunk cost, fully depreciated,
I have to move on.

What restriction might you be referring to? CW being permitted every-
where is certainly no restriction.

>> Thus, it only makes sense that
>> one should have the capability to copy code to be on HF. (Not necessary
>> for V/UHF operation, for unlike HF, 50% of the QSOs up there are not
>> conducted via CW.) // Jeff KH6O

>claims the since Morse code is permitted on all the HF bands , it makes
>sense that there is CW testing. Yet, is this not the case for
>permissable usage of Morse code in the VHF and UHF bands?

The grand experiment to flood the V/UHF spectrum with quality tech
folks so as to protect it from commercial interests is the reason we
no longer see no code requirement for access up there. Besides, the ITU
only requires a knowledge of code for frequencies below 30 MHz.

>(The irony is
>that the only pieces of the amateur spectrum in the US that are devoted
>only to CW is in bands above 30 MHz!)

No surprise there; weak-signal work on HF needs no protection -- many of
us work QRPp right along side the big boys. But FM and WS operation are
not compatible. Thus it only makes sense to have a protected VHF segment
for WS work so as to keep the FMers from causing interference.

>Not according to Herman, it
>isn't. According to Herman, Morse code testing is not required for

>those bands because "it isn't popular".

Most of the V/U spectrum is designated for FM usage; pretty difficult
for CW stations to compete with mountain-top rptrs, especially in the
congested metro areas.

>Not unsurprisingly, Herman is
>once again demonstrated his penchant for being inconsistent. Would he
>be kind enough to explain which is the appropriate criteria for
>justifying Morse code testing - is it due to widespread permitted use,
>or its popularity? Since the use of SSB and digital modes far surpass
>the use of Morse code

Together, true, but separately, no. Digital modes do not surpass the
use of code.

>(I don't know where Herman gets his statistics
>from, but he really should get someone else to do his surveys for him in
>order to obtain a truer picture of the usage of the amateur HF
>spectrum),

Connect a decent antenna to your HF receiver, and conduct your own
informal survey.

>it can hardly be argued that popularity is hardly an
>arguement to continue Morse code testing; while Morse code's permitted
>use is hardly supportative either. We can only conclude that Herman
>uses only those statistics that satisfy his and that of his fellow
>Pro-Code Agenda advocates while ignoring those which contradict their
>beliefs.

You don't like the popularity argument? Fine, then we can always say
"It's the law," or that it's still the only common mode amongst the
world's HF-licensed operators.

>73 and live better digitally

Still waiting for your response from my challenge: Let's have a race
to see who can build a station from junkbox components -- yours being
digital, mine being CW.

Remember, Nature works in an analog fashion.

: I'd suggest a short term rental of a newer TV and see what it looks like.
: Most cheap TV's don't do much better than a VHS recording, so you won't
: seen any real improvement until you spend some $$$.

: Mark Zenier mzenier@eskimo.com mzenier@netcom.com Washington State resident

One hint....look at junk shops/flea markets for old Commodore
monitors-many of them have composite inputs(and generally the sellers do
NOT realize this, so they tend to underprice them).
One model to look for is the 1909.
If working well, they give a VERY good NTSC picture indeed, in fact, often
better than the average TV set.

If you find a different model, look for a composite jack(RCA, usually),
and a switch, used for changing modes.
Also, if you get one working, but all you get is green, look for another
slide switch...it was intended to mimic the older green-screen monitors in
one position, and give color in the other one.
Not knowing about this switch can lead to needless troubleshooting!

3547. Re: Denied Aircraft bording with HT - was this legal?

: them, and never have been questioned.

: (I have quite a story about a flare pistol, however).

: K5PF

I've not traveled by plane for a few years, but I almost ALWAYS carried
han radio and/or scanner equipment in my carry-on bag(I prefer to
hand-carry any small, costly items of that nature(camera gear too).
I've gotten a odd look or 2, and I've sometimes had to turn on a radio to
convince them that it was not a bomb, but I've NEVER had a problem taking
the gear aboard(I WAS once told, that I could not use it on board(I had
not asked about this, BTW)).
Either way-there's no reason that a HT/scanner should be treated any
differently than a cell phone-and these are frequently brought on board
aircraft.
In fact, in many cases, the guy at the X-ray machine will probably mistake
a HT/scanner for a cell phone anyway.

> applying
> for a scholarship based on her association with amateur radio.

Samantha has done a lot for ham radio, appearing in "Now Your Talking"
several years ago, appearing at local Radio Shacks on ham radio days,
serving at events as a communicator, numerous articles in local newspapers
and appearing at local club meetings. Thus the scholarship received shows
that ham radio wishes to help her as well.

> I'm proud that the ARRL committee overlooked her fathers' denigrating
> attitude and comments in making their decision.

Samantha has her own opinion. Why would the "sins" of the father be held
against the daughter?
That the ARRL has chosen not to hold those "sins" against her. That shows me
that the ARRL is better than I would have expected.

> Good luck in your studies, Samantha.

She heard about the scholarship while in Germany. She was surprised and
pleased.

What is this "evil agenda" and "evil plans" crap? Let me guess... He's gonna take over the world, then power his rig with a human powered generator. You and others like you will be chained to spokes on the generator shaft and will have to walk in circles until you drop. You will be whipped by an overseer to keep the generator output up. Your oldest male child will be forced to get a CB license.

Evil indeed.

Ahhh yes... the great PCA myth - codeless amatuers were permitted to
operate in these bands as a bulwark against perfidous commercial interests.
To the contrary, from all the postings that I have seen, the FCC modified
their requirements because indeed the ITU Radio Regs allowed for such
certication. However, even though amateurs no longer have to be certified
for such use, they are none the less permitted to use that mode.

>>(The irony is
>>that the only pieces of the amateur spectrum in the US that are devoted

The reasons for those particular allocations is irrelevant to the observation that they exist. Moreover, it only points out that Morse code operation is not as robust as many in the PCA would like us to believe.

>>Not according to Herman, it
>>isn't. According to Herman, Morse code testing is not required for

>congested metro areas.
>

In other words, Morse code testing is justified only in those bands where it can compete. However, with the advancement of digital modes, Morse code can no longer compete with other modes either. In accordance with Herman's logic, there is no need for Morse code testing below 30 MHz either.

>>Not unsurprisingly, Herman is

>use of code.
>

To the contrary, they do. For example, I was at a recent club meeting in Ottawa club meeting and I overheard one amateur state that he will oftentimes find that the CW parts of the bands have shut down and he will go up and hear the digital bands still active. Perhaps if Herman had the capacity to be even-handed on this issue, he would see that reality is far different from his opinions.

>>(I don't know where Herman gets his statistics

>
>You don't like the popularity argument? Fine, then we can always say
>"It's the law," or that it's still the only common mode amongst the
>world's HF-licensed operators.
>

I like the popularity arguement, because it is easy arguement to make. Unfortunately, its application to the justification for Morse code testing doesn't stand up to critical examination. In so far as the law is concerned, that is a man-made construct and can be changed and is being acitively pursued by many like-minded individuals because we realize that such laws are not carved in stone.

Finally, I have no objection for Morse code to continue as the common mode of operation HF-licensed operators, but if that pre-emmeninence is dependent upon world-wide national government welfare programmes, then it deserves to lose that status. In other words, if Morse code is the common mode of choice among amateurs, then it will continue to be so after testing is abolished. If it doesn't continue, then the PCA were only fooling themselves, and not the rest of us.

>>73 and live better digitally
>
>Still waiting for your response from my challenge: Let's have a race
>to see who can build a station from junkbox components -- yours being
>digital, mine being CW.
>

The differences between a digital rig and a CW rig are trivial, so there would be little difference in the time to construct either device. So there is no point in undertaking such a fruitless competition. Oh yes, Herman is determined that I be capable building a computer from scratch. Well, I don't want to; indeed, I don't have to because the ability to communicate digitally is not dependent on whether my ability to build a computer. I can assure him that there a heck of a lot more computers out there than there are radioes so the necessity of building one is inconsequential. On the other hand, Herman continues to fail to acknowledge the expenditure of an inordinate amount of resources in order to train individuals to be competent in the establishment and maintanence of a network of CW stations. I can train individuals to do so in half an hour on a radio digital network (and have done so in Africa); he can't. So if he wishes to pursue his silly

little challenge, he can go right ahead, but I have better things to do.

Cross-posted to:
rec.radio.amateur.misc,alt.tv.tech.plain-tv,rec.radio.amateur.equipment,alt.radio.digital,rec.radio.amateur.homebrew

I am a university math/cs student. Years ago I learned how to program GPIB
devices (using a library) and custom RS-232 to switch a device on and off.

I'd like to get a DAC/ADC card that would be suitable for capturing analog (NTSC and FM/AM) signals for use as a PC card. The idea is as much in software as possible, including interpretation of color bursts, carriers, etc, treating
a digital clipped signal as a bitstream, and control of frequency tuning. Just a plain vanilla DAC/ADC with a plain vanilla driver. This I believe would be a similar
setup to the converter included in NeXTStep PC's. (?)

I'm seeking advice as to what I need "on the other side" of the card to control
gamma correction/gain, and especially basic analog knowledge as pertains to
communications equipment. I know *of* these things, not any specifics. Any
suggestions/directions?

Thank you in advance.

Gary Coffman wrote:
>
it is time to reform licensing so that the requirements
> match the privileges granted in a rational and reasonable way.

There's a statement I can fully agree with. It is senseless
to grant a No-Code Tech the right to put a 2KW transmitter
on any of his authorized frequencies on the strength of what
he "learned" to pass the memorized, word associated "test"
which he took after studying the pool of all the questions
and their exact answers for a few days prior to sitting for
the test.

Has this caused any serious problem?? If not, it's more a
feature of the fact that many of those 2kw licenses people
use low power HT's and other 40-50 watt output VHF rigs
which the Japanese engineered to be clean of spurious
products. And of course, the fact that FCC demands type
acceptance of these and other commercial rigs before they
are marketed.

At least when Cecil rote-memorized his Novice exam as a
braindead teenager in 1951 the power was limited to 75watts
INPUT on very narrow subbands, and the license was only good
for a year. It was mandatory that he learn something about
radio within that year or find another hobby.

> They don't
> now. The division of spectrum between various license classes is completely
> arbitrary, and the requirements for accessing functionally identical spectrum
> using the same modes and power limits differ wildly and arbitrarily. That
> doesn't make sense, and people realize it doesn't make sense.

Of course it makes very much sense, or the FCC wouldn't
have set it up this way in the first place.
The large numbers of American hams make it very desirable
to separate the modes into subbands, for the purpose of
preventing the chaos of interference that inevitably results
from mixing widely differing modes and power levels.
Otherwise, the outcome could only be a horsepower race with
the overwhelming of weaker signal modes by those who intend
to have their way, regardless.
When most hams begin to observe the rule that mandates use
of minimum power necessary to complete the intended
communication, that might change. Such compliance is not

within sight.

Another consideration is that American hams would otherwise overwhelm the many fewer foreign hams using the bands, by their sheer numbers. Many of these foreigners are limited to much narrower bands and lower power levels. It is an international "good neighbor" policy as well as a practical domestic consideration.

It is sometimes noted that "Foreign hams have no mode-specific band segments, and it works very well for them" as reason to change to that format here. It would be a huge mistake to adopt such a one-band-segment system, whatever the licensing system evolves into. The sheer numbers of American hams clearly would cause chaos of proportions never before seen, even in the days of AM predominance.

Only those who were around to listen to 75 meter phone in the late 50's can appreciate the magnitude of that chaos. If you can imagine a 75 meter band that consisted of hundreds of heterodynes from end to end, then you have some idea of what it was about. You'll never hear that again, but if you don't think that a 2KW SSb signal won't wipe out a CW, PACTOR or PSK31 station running a few watts - well, just try it.

The one-band concepts is promoted by those who would have the ARS placed in a position that there would be little choice but to adopt some heretofor unproven digital or spread spectrum modes. Oh, I know - before you attempt yet again to label me as a unknowing Luddite, I'm fully aware that ALL these modes are indeed "proven" - in COMMERCIAL and GOVERNMENT usage, where such congestion is never a factor, where FCC sorts and assigns users spectrum with the intention of obviating interference. No such system exists on ham radio. Interference mitigation is on the "Honor" system, and as we so often see clarified on RRAP, honor can be a fleeting, etherial substance.

Actually, Dick, you're a little mistaken. The FCC does *not* demand type acceptance of VHF/UHF radios. There are requirements for certification and notification, but not type acceptance. Further, the FCC requirements of certification/notification only apply to the *receivers* of these VHF/UHF radios. Amateur service regulations impose strict purity requirements, but there is no type acceptance required for the transmitters. The FCC requires certification or notification of unwanted receiver radiation, and this applies to all VHF/UHF receivers, not just the receivers in amateur radio equipment.

The only type acceptance required for amateur radio equipment is for external HF power amplifiers.

Amateurs are free to build and modify transmitters without being subject to type acceptance.

IIRC, Ramsey used to sell a kit, and if you had a Ramsey
dealer in town, they might still have one on the wall.

I've seen the same kind of think in a lot of other electronic
catalogs -- you might try Jameco, TechAmerica, and some of the
others.

It's good to keep a stack of electronic catalogs around for a few
years -- you never know whan you'll want a gadget.

Hi,

Does anyone recall seeing a circuit I BELIEVE appeared in QST for constructing a Voter circuit. I recall seeing one somewhere and though I didn't analyze it completely as to specs or any faults, I'd like to build one for some experiments to try.

If anyone knows of the article I speak, please let me know via direct e-mail as to where it had appeared.

IF you BUILT the circuit or know someone who did, or have any comments on it if you did review it, I'd be interested to hear from you as well.

Thanks......

Adolfo,
I think the radio you have is a Standard GX-3000V. If so, it is a
64chan, scanning, EPROM programmed, 40W, VHF-FM transceiver. All the
info on freqs (RX+TX), the CTCSS, chan. number, priority chan, etc. are
all burned into a 2716 EPROM. You will have to erase the eprom and
"burn" in the new data. Hope that helps.

This substitutes for logic? Weak signals are often swamped beneath
strong local signals, be they CW or otherwise. Wide-band FM is a poor
choice for DX; CW is a reasonable choice.

Herman err's only in his assumptions of the audience. It's clear that he
means weak signal when he said "CW stations". I find it interesting
that, even to your narrow mind, DX and QRP operation is synonomous with
CW.

It's a big hobby. There are bands for local FM repeaters. There are
other bands that encourage other types of operation. It's not the
no-coders that I find so objectionable, but the narrow perspective their
education affords them.

Your limited exposure reveals itself yet again. The only conclusion a reasonable person can draw from one Ottawa club member's observation is precisely what you say he stated: he heard digital traffic when he did not hear CW traffic. Nothing more, nothing less.

Anecdotally: I heard the PY5ARL (Brazil) 5w CW beacon on 28230 this afternoon. Also heard ZS6PW (S. Africa) on 28186. And LU1FHH (Argentina) at 28199. I copied them 569, 559, and 559 on a multi-band vertical in Chicago. It says one thing to me, and one thing only: that 10m is open to SA and SAfrica. Should I also infer from their absence that wide-FM and digital signals are inferior to CW?

To zero beat a signal means to tune it until you are on the exact carrier freq. Lets take your xtal calibrater as an example, It will work every 25 kc. Now if you tune the signal from either side you will hear a tone. Lets say, you are on 3.800 calibrate signal. If you tune 3.801 , you will hear an appx 1000 cycle tone. If you tune back to 3.800 this tone will drop lower and lower in pitch until gone. When you are tuned exactly the same freq as the 3.800 signal , you hear no tone, and are zero beat. In other words you can zero beat any carrier signal you can receive. If you want to adjust the readout to be accurate, you need a freq counter. You would want to adjust the reference trimmer to have the readout match the counter say on a carrier sent from the rig. The readout on the 830 is a true frequency readout. As long as the reference trimmer is set correctly, the radio will accurately read freq in any mode. But you must be carefull to set the readout to match your reference right when the 9 clicks over to 0. So you want to be real carefull to set the dial correctly. This will let you tune to a freq and be right on the money when you click over from 9 to 0. If this makes any sense...Lets say I tune 3.799.9 and move to 3.800.0. When I click to zero, my rig is right on the money. It was way off when I first got the rig. But is easy to correct.
If you use the vfo-230, get the rig right on the money FIRST, and then match the vfo to the rig. Once you do this and have all perfect, the vfo will give you your first readout, and the readout on the rig is an accurate verification of the first one, being it's a real counter. They should perfectly match. When I click from 9 to 0 on the vfo, the readout on the rig perfectly follows. Hopefully I haven't totally confused you..
:/ MK

>understanding that? I never said I invented the Cloudwarmer and on my sheet,
>it's prefaced by that statement. The idea was given to me by WB2OTK who
>likewise did NOT invent it. Heck, I can take criticism but kindly don't put
>words in my mouth. Thank you.
>Doc radiosigs@aol.com AF2Y

Hey Doc, I didn't write the ">>This goofball..." sentence. Note that
it has two indentation marks. Let's review my comments -- they'll be
the ones below with one single indentation mark looking like: >

Jeffrey Herman <jeffreyh@hawaii.edu> wrote:
>In article <7h2fos$8u7$1@1cust.83.tnt6.memphis.tn.da.uu.net>
><realdeal@my-dejanews.com>, posting from uu.net, wrote:

>>This goofball tells everyone who will listen to him that he invented
>>this antenna.

>He said he "homebrewed" it -- nowhere did he say he "invented" it. I
>homebrew radios from plans others have drawn up.

>>For his information , this antenna is in the book "The Radio Amateur
>>Antenna Handbook". It is on page 152-153. This book was copyrighted
>>1978.

>All my homebrewed radios have come from such publications, too.

>>Yet this lame brain takes credit for the design.

>No where did he say that. The word "design" does not appear in his
>comments.

>>The book was written by W6SAI and W2LX Bill Orr, and Stuart D. Cowan .

>I've built gear from Orr's designs. Those items are called "homebrew"
>as opposed to commercially built.

>>Dr Hate, you did not invent this antenna.

>He did not mention the word "invent."

>>Quit trying to reap rewards that you have not sown. The Antenna has
>>been around for years.

>Doug Demaw's QRP designs have been around for years. Yet if I send
>someone info on how to build one, you'd be hard pressed to accuse me
>of trying to reap the late Mr. Demaw's designs.

>Comparing your comments to Doc's, I'd say you're the one filled with
>hate.

Then I added at the bottom:

>Hey Doc, NVIS is playing a big role in emergency communications, too.
>Utilizing NVIS on HF allows for solid regional comms; good to have in
>case the V/UHF repeaters fail.

>73, Jeff KH6O

Those indentation marks exist for a reason -- they point to who said
what. The flammer's remarks are preceeded with the >> and my remarks
are preceeded with the single >. I was a trying to defend you!

Do you understand how this works now?

73, Jeff

Hello,
I am a recent EE graduate who is interning as a frequency co-ordinator for an AFC group. Suffice it to say nothing in the EE program or in my industry experience and PCIA licensing has covered the process of frequency co-ordination. It would appear that this art/science can only be acquired through years of hands-on tweaking and repeater installation. I am becoming familiar with the RadioSoft RF package and would like to know of any recent (circa 199X) books or trade publications that may be helpful. I have read the ARRL manual but their treatment on the subject was cursory at best.

Source record: 143266

On Tue, 11 May 1999 01:47:58 GMT, Radio-Rambo
<Radio_Rambo@hotmail.com> wrote:

Over the past few days, I have spent a great deal of time in reflection of my past behavior on the radio newsgroups. My conclusion is that I have wasted a great deal of time and effort engaging in pointless arguments and petty bickering with other participants here. This is time and effort that would have been much better spent on other, more meaningful pursuits. I have also come to the realization that I have offended some of you with my comments, as some have inadvertently taken my remarks in a personal manner. This was never my intention...and for this, I am truly sorry.

Contrary to popular belief, I am not a "bad guy". If you were to know me in person, you would probably say that I am kind-hearted, free-spirited, fun to be around, and generally easy to get along with. But, like all of us, I also have my character flaws and shortcomings. Specifically, I tend to be particularily stubborn at times (especially when provoked) and I am also prone to "carrying things too far" upon occasion. I like to play games, tease, and joke around...and sometimes, I don't know when to stop. This has always been a weakness of mine, and I am now working very dilligently to control it.

As I read some of my past newsgroup postings, I must admit that I am rather embarrassed and upset with myself for engaging in some of this nonsense. I have made off-topic comments here which have had the effect of causing chaos and disrupting the flow of information for which this forum was designed. I am certainly not the only one who has done this, but that doesn't justify my behavior. Lack of maturity, insecurity, poor judgement, the "thrill" of being safe behind a keyboard, and an occasional feeling of boredom in my life right now...all of these were contributing factors. Again, that does not justify my behavior, but I can see now how these feelings and character flaws caused me to behave as I did.

I also tend to get a little "touchy" when someone accuses me or implies that I engage in illegal radio operations. This is simply not true. Never has been, never will be. I am a law-abiding citizen who does not have even as much as a traffic ticket on his police record. I don't mention this as an attempt to justify my behavior, but only so that you might understand why I occasionally acted the way that I did.

In an effort to restore order and tranquility to this newsgroup, I will immediately and forever cease from posting here. I will be available via e-mail for the next 24 hours, and would appreciate hearing from those of you who have thoughts on this matter and do not

wish to post them publicly on the newsgroup. When the 24 hours has expired, I will permanently delete the "CB Rambo" screenname from my America Online account and I will not appear online again. I'm sure many of you are skeptical here...and rightfully so...but time will indeed prove my sincerity. Again, I apologize to those whom I offended here and for being a nuisance on this newsgroup.

Thank you for your time. Radio is a wonderful thing. May it have a long and prosperous life. Goodnight and God bless you.

There's a certain mentality among amateurs that even the TH-27a that they paid $250 for is worth the same amount ten years and several hundred hours of use later. I think we're on a different depreciation schedule.

The interstates were designed, back in the 1950s, for 70 MPH with the
cars of the day. The radius of turns, the banking, etc are all designed for
that "natural" speed. If you don't watch the speedometer closely, you'll
find yourself automatically driving at the road's natural speed. Today's
cars handle better than the tanks of the 1950s too, so the "natural"
speed has actually increased somewhat. Without cruise control, it
is very difficult to stay within the posted limits on many roads. And
most people don't. Staying with the flow of traffic is safer than driving
15 MPH slower than everyone else and creating a rolling hazard.

>>Why was a third party study needed? There certainly were studies
>>indicating that 55 mph was safer than 70 mph. Common sense would
>>indicate it even without a study. Safety was a selling point. The real

>real increase in accidents (except immediately after a changeover when
>people were getting used to the speed change). Because statistics can be
>manipulated by anyone to convey whatever their particular point of view
>wants.

If you look at the actual highway accident statistics, fatalities have
declined on interstates which have raised the speed limit back up
closer to the natural speed of the roadway. This is no fluke, the statistics
show it time and again as each state brought its speed limits back up.
The "studies" which purported to show that lowering the speed limits on
the interstates would decrease fatalities were simply *wrong*. They
got the physics right, but they didn't properly account for the human

factor. To put it bluntly, lots of people didn't obey the 55 MPH speed limit, and mixed in with them were those who did. The wildly differing speeds that resulted made driving more hazardous.

There are several reasons for the decline in fatalities with the increase in speed limits. When all vehicles are travelling at roughly the same speed, their relative speeds are very low, so there's much more time to react to traffic, and any vehicle-vehicle collisions have a relatively slow closing rate. NASCAR takes this to extremes, with cars travelling upwards of 200 MPH, but *all* the cars are travelling at about the same speed, so drivers have time to react. If their closing rates were large, even super drivers would have great difficulty driving.

Second, when you drive nearer the natural speed of the highway, there is less of a tendency to get highway hypnosis, in other words you tend to pay more attention to what you're doing when travelling at higher speeds. Lots of single vehicle accidents are due to the driver's attention wandering. Driving much slower than the road's natural speed promotes this.

Third, when laws seem to make sense, people are more likely to obey not only that particular law, but others as well. Loss of respect for law has a bleedover factor which causes people to ignore other laws too. Conversely, when laws seem to make sense, people tend to respect them. So not only is speeding less of a factor, but other moving infractions on the interstates are down too.

This latter brings us back to amateur radio. When a law doesn't seem to make sense, people lose respect for not just that law, but for other laws as well. This is very human, and is a factor that always needs to be taken into account by those making laws. The 55 MPH speed limit had unintended consequences, and so did Incentive Licensing. We've mostly gotten rid of the 55 MPH limit now, it is time to reform licensing so that the requirements match the privileges granted in a rational and reasonable way. They don't now. The division of spectrum between various license classes is completely arbitrary, and the requirements for accessing functionally identical spectrum using the same modes and power limits differ wildly and arbitrarily. That doesn't make sense, and people realize it doesn't make sense.

I have a small bunch of brand KENWOOD accessories, and here is the
list:

TEN (10) TU-4C Tone Boards for a TW-4000A dual bander (new in the
box) $42.00 EACH shipped in the USA

One (1) TU-3A Tone board for a TM-201A/TM-410A/TM-211A/TM-411A $42.00
EACH shipped
in the USA

ONE (1) TU-8 Tone board for a TS-440S/TS-140S/TS-680S encoder $42.00
EACH shipped in
the USA

TWO (2) TU-6 Tone boards for a TH-21,TH-31,TH-41 encoder $42.00 EACH
shipped
in the USA

FOUR (4) BS-5 Pan Adaptors for the SM-220 scope . Used with the
TS-520, S, SE $58.00 EACH shipped in the USA

TWO (2) YK-88A AM filter for TS-430S/TS-660/TS-670S $69.00 EACH
shipped in the USA

ONE (1) YK-88S SSB filter for TS-440S $69.00 EACH shipped in the USA

SIX (6) YK-88SN 1.8 khz SSB filter for
TS-130S/TS-430S/TS-440S/TS-530S/R-5000 $69.00 EACH shipped in the
USA

THESE FILTERS, AND TONE UNITS, AND BS-5 ARE" ALL BRAND NEW", AND
ALL HAVE BOXES EXCEPT 2 FILTERS

AGAIN ALL THE STUFF IS BRAND NEW.......

No fair confusing the liberals with facts. :-)

However, spray and pray weapons aren't always your best bet,
unless you have the ammo resupply contract. We managed quite
well with semiauto M1s in WWII. One good hit is worth a thousand
misses, and puts much less strain on the logistics tail.

Besides, single shot weapons are often the infantryman's best tool
against a defended outhouse. A M79 or a LAW takes care of the
problem without a bunch of fuss and bother. Unless, of course, you
are assaulting the outhouse so you can use it. Then a pipsqueak
caliber select fire weapon might be handy.

SHF Microwave (among others) have them. Check the ads in
VHF Communications as well. You might also try alarm/security
companies, and folks who make door openers.

I've always bought mine at hamfests, and am hoping to pick
up a couple of 24 GHz units over the weekend. Or, for that
matter, extra 10 GHz units to play with/blow up/give away.

The local public transit folks (Toronto) use 24 GHz Doppler
radar for the automatic door openers in subway stations,
but I've never been able to find out where they get them. :-(

Hey fatso, there are other reasons for using lpwa besides the one your chicken ass thinks of first.

Lpwa caches pages sent through it to speed up your connection to the net by not having to refer to the original all the time.

Of course a waste of food resources, radio spectrum and internet bandwidth like you wouldn't give a flying crap about effiency.

Why don't you tell us how how hard it is to be DX and why we should foot the bill for your QSL, while you sit out there in the sun under the US defense aegis, avoiding taxes and filing a FEMA claim everytime it gets windy.

Better yet, go eat until you explode, you fat slob.

Hello All,

I have a web page that has info on the Yaesu FT-50R.
Includes:

Features, Technical Specifications, Options for this HT, plus
soon-to-be Mods & my review of this HT.

Also:

Satellites & Satellite Tracking, as well as Yaesu, FT-847, HF/VHF/UHF,
HF Rig Reviews, Tons of useful Ham Radio Resource Links, plus many
other useful resources.Please check it out:

http://kq6mu.8m.com

Webmasters:

Please add me to your links section. In return, I will add you to my
links section.

Thanks & 73,

Mike Green KQ6MU
DM04 Palmdale, CA

You wont find that problem in #cqdx on the othernet servers. Come on over some time for good chat and real time dx spots.

What is this doing on rec.radio.swap? What does it have to do with the sale or purchase of radio equipment?

3631. Mod needed for Icom 2710H

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-12 00:00:00 UTC

Source record: 143092

I really want to purchase a 2710H to accompany a 2100H 2 meter rig I already own, but due to work and so forth, I need a modifiable radio. I can't locate a mod for the 2710H ANYWHERE!!

Anybody that can help will be worshiped as a deity....ok, maybe not, but I would really appreciate it.

Also, what's with all this anti gun crap on this newsgroup??? I thought it was an amateur radio newsgroup....what the heck was I thinkin'.....

That is an an idea..
but still do we want folks like this ruining our hobby:
What I received in email today:
You must have me mistaken for someone who cares about this whining.

And no, I don't control the hobby, I just control MY IRC channels. Dalnet channels that are
registered ARE considered by Dalnet to be OWNED by their founders who are sovereign in the
government of their channels, so long as there is no violation of the rules of Dalnet, which
plainly decree I may ban anyone from my channels for any reason or without any reason at all and
any Dalnet IRC-op can easily tell you this is 100% true.

End of discussion.

By the way, your solicitation of others to help you harass me may be a violation of the law I cite
at the bottom of my bio in my QRZ listing, which I strongly advise you to heed. Harassing a
political campaign worker is a federal felony. You are now notified to NEVER bother me again and
to not incite others to bother me. Having notified you of that, there will be no way that you
could deny you are harassing me if you EVER bother me or cause others to bother me again. So just
remember all that you stand to lose if you go to prison.

What this all means is this: LEAVE ME ALONE!

A timestamped copy of this one-time notification to you has been saved as evidence for both your
internet provider and for law enforcement authorities.

Jonathan DeFabritis

This Gentleman decides to threaten everyone..
By not providing a copy, I have no idea what he is talking about
laws.. I didnt use QRZ..

Maybe some letters to www.dalnet.com should do.

Whatta guy eh?

>Japanese manufacturers stand between all those
>test/answer-studying word associaters and trash on the ARS
>spectrum.

In some cases, it is true that it is the good design of the
Japanese engineers which accounts for the lack of really
trashy signals on the bands. I'd posit to say that this applies
just as strongly to many of the older higher class amateurs
as it does to the newer ones, however. I offer as witness
a long time Extra, quoted above, who apparently wasn't
even aware of the facts of the matter.

> Let's just instigate a rule requiring them all to buy
>spectrum analyzers.

Oddly enough, in Britain there was a requirement, until
very recently, that amateurs have equipment present in

their stations capable of independently checking the
emissions of their transmitters. The good engineering
practice section of Part 97 implies the same thing for
US amateurs.

A spectrum analyzer is a very convenient tool for performing
these checks, and older laboratory grade ones are inexpensively
available on the surplus market. But a spectrum analyzer isn't
required. A separate tunable general coverage receiver, or a
selective voltmeter (wavemeter, which is what British hams
were required to have), will substitute for the spectrum analyzer,
though it is more tedious to use.

Lord Kelvin stated that if you can't measure a physical quantity,
assign a number to it, then your knowledge of it is of a meager
and unsatisfactory kind. Amateurs, even long time Extras,
should take note of this. If you aren't setup to properly monitor
your own signals, your knowledge of your station's performance
and compliance with good engineering practice is of a meager
and unsatisfactory nature.

>W0EX
>Nature is ANALOG. Live with it.

Unfortunately for that view, quantum mechanics shows us that
Nature is indeed discrete at a fundamental level. The notion that
anything is analog is just an illusion of the statistical properties
of large numbers. This became generally known to the scientific
community around the turn of the last century.

I use a homebrewed Cloudwarmer on 20 meters and actually it's a two
element fixed wire Yagi that beams straight up to saturate the
ionsophere with RF. It has enormous gain over any conventional dipole
or vertical. If anyone's interested, I have an instruction sheet
printed up. You simply can't believe how well this antenna works. For a
copy of the sheet, send NO MONEY but just a self-addressed STAMPED size
ten envelope and I'll send it. SEND NO MONEY! If
you've ever heard about the NVIS antennas on which the military is
experimenting, the Cloudwarmer is an example of it.
radiosigs@aol.com Doc

Now, anyone can see that he never claimed to have invented it. In
fact, he mentions that the military is experimenting with the antenna
as well. So, once again, your attempts to spread disinformation are
exposed before the world. Further, your attempts are so feeble that I
would encourage the Barf/Stumpjumpers to distance themselves from you,
as your ineptitude certainly does more harm than good to their cause.

Have a nice day!

Hey fatso, there are other reasons for using lpwa besides the one your chicken ass thinks of first.

Lpwa caches pages sent through it to speed up your connection to the net by not having to refer to the original all the time.

Of course a waste of food resources, radio spectrum and internet bandwidth like you wouldn't give a flying crap about effiency.

Why don't you tell us how how hard it is to be DX and why we should foot the bill for your QSL, while you sit out there in the sun under the US defense aegis, avoiding taxes and filing a FEMA claim everytime it gets windy.

Better yet, go eat until you explode, you fat slob.
>>Good Lord, there certainly is a lot of dissension on this net, or forum or message board(which ever you prefer). Cool it mf_luden before you get ulcers. And does that "mf" cyberspace appellation of yours stand for what I think it does? AF2Y Doc

Good advice, although in my defense, I was only "sharing what I know" so
his Guamian Rotundity could "learn what he doesn't". It's such a dang
catchy slogan.

For Sale: Kenwood TS-450S/AT in excellent cosmetic, mechanical, and electronic condition. Looks practically new! Includes internal automatic antenna tuner. Has cascaded CW filers in each IF for RAZOR SHARP CW selectivity. If you are looking for a TS-450S/AT, this one would be an excellent choice. Hot receiver! Selling because I plunked down some big bux for a more expensive rig.

Power cable, manuals included.

Selling for $850, and will split cost of shipping and insurance to continental USA.

For sale: RARE Kenwood DSP-100. Works with Kenwood TS450, 850, etc.
Excellent, like-new condition. This unit can tailor your SSB signal to make
it sound like anything from a broadcast station to a sharp, narrow signal
for DX, pileups, contests, etc. by adjusting high and low cutoff
frequencies. Adds unwanted-sideband and carrier suppression!

Also can shape CW waveform.

Also sets high and low cutoff frequencies on receive, but does its best work
on transmit!

Sell for $400, and I'll split shipping cost to continental USA.

If #hamradio was started and ran by someone who insists that you use your callsign then sorry,
you either need to abide by his rules or leave the channel.
It is his channel you know, he can do whatever he wants in HIS channel.
I agree though, I sure the hell don't want people on the internet knowing who I am.
If I posted my callsign here, then someone could easily look me up, find my home # and address.
I don't want a bunch of internet freaks knowing who I am or where I live as the internet has proven
itself extremely dangerous with some of the kooks out there.

Anyone notice that when we get a low point in the solar flux. it lasts for days....if not weeks.

But when we get a peak, it's usually only for a few hours.

A couple of weeks ago, we hung around a flux of 100 for a couple of weeks. When the flux decided to go back up, it went to around 170...but only for a few hours.

Why doesn't the flux remain at a peak for as long as it stays at a low?

They may say they're for "the dignity of every man," Doc,
but their actions say differently.

The ADL, like the NAACP, actually
champions causes for their particular ethnic group only.
And then only for politically liberal/leftist members of that group.
All other cases get lip-service or even less.
If I -a politically right caucasian male of european decent-
asked for their help for myself,
they would most likely lead the parade
to light the bonfire to which I had been staked.
When will we see the ADL defend a white Southern Baptist
republican running for congress who's been defamed by
a bigoted leftist media?
When Hell is frozen solid and Satan takes up ice fishing.

It's currently fashionable to blame all evil on us WASP males,
but Bigotry and Hatred come in every color, Doc.
Every race, creed, color and sex has their fair share of bigots.

Since the dawn of humanity, people have sought a "boogieman"
on whom they can blame their miserable lives and foolish choices.
Jews, blacks, asians, hispanics, caucasions, Hootoos, Tootsies, males-
we all get a turn as the scapegoat of the hour.
The choice of "primary oppressed group" depends on
who's in power at the time and what they gain by
picking one group as the focus of hatred over another.

Until humans understand that the only person in the universe
who can cure their misery looks back at them from the mirror,
hate will fester and grow.
I won't hold my breath waiting for the big change.
Blaming it on "honkey" is so much easier.

In the mean time, I think I'll reserve my personal support
for an organization that actually *does*
respect the dignity of all.
If I ever find one.....

Regards,
Dave Stinson AB5S

Hi Dana, Thanks for that clarification between full type
acceptance and FCC certification of receivers. I wasn't
aware that was the extent of FCC's interest in ham V/UHF
gear. Seems odd that they wouldn't be at least as concerned
with what the transmitter itself outputs, but evidently
their spectral purity requirements cover that. And it is
often presented by vendor/manufacturers in their ads as
though it was full type acceptance-with statements like
"this unit has not been approved for sale by the FCC as of
this time". Requirements for spectral purity are probably
about as strict as if it was, with just the label changed
since this is Amateur radio.

We have had a flood of inquiries about not having a booth at the Dayton Hamvention, because we are not listed on "The final list of 1999 Hamvention Exhibitors" on the Hamvention website. Timewave will definitely be at Dayton at Booth 111. We registered late and it appears the "final list" is the last one they posted, but does not have all the exhibitors who may have registered late. (I notice Kantronics is not on the list either, but I don't know if they will have a booth or not.)

Check our website (www.timewave.com) for any late info on new products (PK-232/DSP Multimode Controller, PK-900/DSP upgrade, DSP-232 Pactor upgrade, PC Pakratt 2.1 software upgrade) that we will introduce at Dayton.

Stop at Booth 111 to see the new goodies and a software demonstration. Peter, KC0CLY and Randy, K0CBH will man the Timewave booth.

Thank you all for your support.

>gear. Seems odd that they wouldn't be at least as concerned
>with what the transmitter itself outputs, but evidently
>their spectral purity requirements cover that. And it is
>often presented by vendor/manufacturers in their ads as
>though it was full type acceptance-with statements like
>"this unit has not been approved for sale by the FCC as of
>this time". Requirements for spectral purity are probably
>about as strict as if it was, with just the label changed
>since this is Amateur radio.
>

>Dick W0EX

The certification falls under Part 15 and deals with spurious
emissions by scanning receivers operated above 30 MHz.
Since virtually all present amateur VHF+ transceivers have
receivers that can scan, they have to be certified. That has
nothing to do with transmitter spectral purity, however. The
FCC doesn't even require that to be tested by the manufacturer.

The individual amateur is solely responsible for that under the
Part 97 regulations. A lot of amateurs seem to be under the
mistaken impression that the FCC certification means that
their radio is clean. It isn't necessarily so. It is solely up to the
amateur to assure that his signals are clean.

The manufacturer is under no obligation to test for this, though since
there is often a lot of commonality between their amateur products
and their commercial products, which *do* require Type Acceptance,
most of the rigs produced are pretty clean when they leave the factory.
But they may not stay clean in use. The manufacturers aren't obligated
to idiot proof their amateur equipment. It can still be operated in such
a fashion that it is dirty.

3667. Please Read.. Ham Radio on IRC Chasing away hams

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-12 00:00:00 UTC
From: mrguard@iname.com
Message-ID: <7hau7hrii1@holly.prod.itd.earthlink.net>
Source record: 143145
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,rec.radio.swap

Hello Everyone.
I think everyone should take note of Don K Muth.
Don has founded on #undernet on Irc the channel #hamradio.
During a visit there using the nickname mrguard (irc doenst
require callsigns or anything), Don numerous times tried to
force me into using my callsign as my nick.
I told Don that my callsign is N8KGU and that i perfer not to use it on irc.
Some of the channels I know I dont want the others being able to reach me
via callsign servers.
Don asked if at Dayton I would use mrguard on the radio, I answered that
I am free to use N8KGU or KC8LAM, both are issued to me.
Don then proceeded to harass me and eventually kick me off of this
saying that it is his channel.
In a discussion under a different nick, Don admitted that he can
do as he feels and that he is free to chase anyone away from his channel.
plus:
<AH6KA> he came with nick and said he wudnt use his call and gave me static
so i moderated then he tried to use
both calls
<othercall> you gave him static
<othercall> he stated what both calls were.
<AH6KA> i shoulld have just kicked his ass

Is this how decent we want ambassadors of our hobby to be to hams and
to those interested in our hobby?
Several attempts were to tell Don that the hobby has enough problems on
40 meters as well as losing folks to irc and the internet.

Does everyone accept the fact that folks like Don can deem the channel private
and alienate everyone from the hobby?
My suggestion to Don was to form his own channel, maybe #ah6ka.

I would suggest that everyone visit Undernet on IRC and join #hamradio
feel free to meet other hams, use any handle you want.

You can Email Don at: Email: ah6ka@gte.net

Please dont let the hobby get ruined again.

Thanks Again
James
N8KGU

In dal.net on IRC (thats the Dalnet network)
I find this:
Topic set for #amateur_radio is: This is a restricted channel. If I didn't ask
you to join it then you are not welcome in it, no
matter who you are. Why is it that way? None of your business,(but you can
thank the lying, theiving mormons on
xmission.com for it happening)! (KE6YZZ)

Ke6YZZ who is now N2GOD. Email him at: n2god@angelfire.com

Do we need folks like this controlling our hobby and lifestyle?
Please lets have jerks like this create their own channel and leave
our hobby alone.

First of all, is operating on your newly accessible frequencies legal? Are you a MARS operator? I have to tell you, operating out of band is not a trivial offense, and while you may well get away with it for a while, should you get caught you are looking at paying a couple grand, losing your rig, and suspension, restriction, or even revocation of your ticket.

I once used an opened-up TS-50S on CB. While I had the box open, I also reduced the low power setting to just under 4 measured watts out. As long as I was transmitting AM full carrier, USB, or LSB fone, my signal was no different than any high quality CB rig. I observed the max power output, 4W AM and 12W SSB, I did not overdrive the audio, used no wierd sound effects like roger beeps, reverb, etc, and operated responsibly. However, technically I was in violation as the rig was NOT type accepted for Citizen's Band. This was illegal. Would I have ever got caught? Highly unlikely in view of my operating practices. Nevertheless, I decided to cease, and for a while I had a cheap realistic, unmodified, into an inverted vee.

Now if I had been making an ass o myself, or running a kilowatt, or broadcasting music or RTTY or whatever, causing TVI and pissing people off in general, I have no doubt I would no longer be able to call myself AB5VH.

Consider carefully what you are doing. That said, there are rare circumstances where opening up general coverage XMIT has legitimate uses. You miht have got a better reception with this somewhat trollish question by stating your need or reason for doing this.

The only diodectomy I have ever performed was done with a small pair of dikes. Cut close to the body of the diode. Leaving the stumps makes it easier to find the location in case you ever want to reinstall the diode. You should return normal function to a rig before selling it.

You need flame retardant clothing in this newsgroup, Joseph, but all you gotta do is killfile the authors of unwarranted flames... though sometimes even the grouches will teach you a thing or two even if they don't mean to.

Find a copy of QST somewhere... the League publishes a lot of books that will help you out in just about any niche within the broader context of ham radio. I suggest starting with the ARRL Handbook for Radio Amateurs, updated yearly. This is kind of an encyclopaedia of Amateur Radio. No real need to get a new one every year... if you get one about every three years you really won't miss much as most articles last about that long.

Yeah, the entry book in the ARRL series really gets into a lot of stuff
besides just the exam content. A lot of material there on
buying/getting/building gear, setting up a station, operating practices,
different modes, etc. It costa sbout twice what the G West book costs
though. BTW most Rat Shacks seem to carry "Now You're Talking!" as well as
the West books.

I think I still got it at my site. URL in the sig. I really like the prog, but it is not a no-brainer to set up on a W95/98 machine. It really runs better, for me, on a 486 than a pentium etc. It will run on my 233 MHz notebook, but it took some tweaking.

Not quite as useful IMHO but far easier to set up on a windows machine is Nu-Morse. I got that at my site too. The shareware version only goes up to 10WPM word, 20WPM character speeds. It is a native Windows program and is a nobrainer to install.

One reason so many users like Supermorse besides the fact that it is an excellent program is that many many of us (me too) used it to get our tickets in bygone days when a big HD was 20 Megs and processor speed in MHz was still in the single digits. Oh how smug I was... I'm NEVER gonna fill up THAT hard drive! Well I had to doublespace it a couple months after I bought it, and currently my RAM use is bigger than that old AT's hard drive. So many of us have a slightly biased opinion of this still very nice prog.

Try both. The two of them are the most popular progs. SM can be used to key your rig, BTW with a very simple interface.

HINT: get one of those microcasette recorders and make your own custom tape every other day or so. Carry the machine around with you and get in a minute or two of drill several times a day. Always listen faster than you can copy... if you aren't straining your brain, you are learning slowly if at all.

The press by and large are liberal types who think it is perfectly alrigght to send me off to work and take a crippling amount of my money away from me to give it to people who don't even say thanks. A large protion of them grew up in homes where they learned nothing about guns other than what they see on TV. The press is indeed largely an anti-gun institution, though I have yet to hear a reasonable plan for disarming the criminals come from that sector. They want to disarm the honest man, and I guess not take the primary tool for earning a living from the poor, oppressed, misunderstood criminal.

The press, whether intentional or not, has acted as an agent provocateur in spreading the latest fad of shooting up schools.

"The people will not understand the importance of the Second Ammendment until it is too late." -Thomas Jefferson-

Actually, IMHO the Mini-14 is more reliable than most AR-15s. A genuine Colt or a really good custom AR-15 are okay, but most of the socalled "kit guns" are pretty shoddy. Earlier examples of this general design had atrocious reputations for feeding failures.

Therefore, while cosmetically the Mini-14 is not a "black gun", and is widely used for hunting, pest control, etc, it would actually be slightly "deadlier" than the AR-15.

Funny thing is, a 223 doesn't sound like a cannon at all, or is it just me?

A trained and armed security guard would have had a fair chance of dropping those two snot-nosed brats before they had offed so many innocent kids. What kind of security is a fat bald guy with a uniform? I know... it is illegal (that can be fixed) to posess a gun in a school, and guns are barbaric, and two wrongs don't make a right, but given a choice between two dead kids who were the attackers and a whole bunch of them who were victims, the arithmetic isn't hard to figure out. Flame away. I can take it.

I'm sure as hell glad we don't equip our troops with these so-called
"assault weapons". You couldn't assault a well defended outhouse with them
if faced with selective-fire equipped defenders.

Hey Cecil, I'm a Texan, and I prefer a compact 1911 variant. I would rather carry one than two of them even if I had one tricked out for lefthand use. Two ratchet guns of meaningful calibre would be especially hard to conceal...

I don't understand... how does a ban on concealed weapons stop criminals from having them? It only stops those with an irrational (it would seem at times) obsession with obeying the law from having them. In other words, the only people who will turn them in are those who obey and support the law, any law, no matter what, because it is the law. The criminal by definition doesn't give a rats ass about the law.

I bought a Sony in Yokohama I was quite pleased with, except for the archaic slide rule tuning. Cost: $29.95 (Navy Exchange... I had priveleges because I was on an MSC ship) One of my favorite sets is the YachtBoy 400. Retail... around $169. The only $1000 sets I have ever bought were ham transcievers, most of which are fine for SWLing. Yeah you can spend $1000 even $5000 for a really classy reciever, but most of us don't care to spend that kind of money and find sub $200 receivers quite good enough.

This just gets curiouser and curiouser. The more that is
revealed, the scarier it gets. Turns out the only the
Japanese manufacturers stand between all those
test/answer-studying word associaters and trash on the ARS
spectrum.
Let's just instigate a rule requiring them all to buy
spectrum analyzers.

W0EX

> and then only through subscription.

Here in Toronto the only ham magazines you can get
at a regular bookstore (e.g. Chapters, World's Biggest)
are QST, CQ VHF and Communications Quarterly. They dropped
73, CQ, etc. some time ago.

Electronics magazines generally are much easier to find.
My fave is Electronics World from England, though Elektor
and Electronique Pratique are always at least worth leafing
through, especially when they publish something other
than yet another audio amplifier (Elektor), or yet another
widget with "des moteurs pas a pas" (stepper motors - EPrat)...

A propos 73: while it hasn't amounted to much for some time,
it hasn't always been this way. Look at some 1970s issues,
for example.

In exactly the same way that laws prohibiting possesion of
drugs prevent people from obtaining them. Exactly. By making
them more expensive thus creating an instant black market.
But the fools who advocate banning *legal* guns have no
clue. Starting at the top.

Contacts within US Customs tell some very strange stories
about happenings on the southern border. Of 'Pre-approved'
loads that they are *required* to allow to pass into the
country unchecked, by NAFTA treaty. Carried in trucks that
intelligence has logged as 'known to have carried
contraband', driven by drivers 'known to have criminal
records'... while officialdom -including their own
supervisors- insists they look the other way......

$$$$$$$$$$

Not all of it comes from China......

And a few MORE laws will even help the 'problem'?? Where is
all that high intelligence when it comes to REAL solutions
to REAL problems???

The technician license does NOT allow you to use ANY of the Ham bands
below 6 meters. Thus you DO have to pass a Morse Code test if you want
to be a HAM without restrictions. A technician license is like a
fishing license that only allows you to fish in a small fraction of
small lakes. Only you don't have to know Morse Code for the fishing
license with no restricions on lakes.

> any good reasons not to....

Well if they would replace the Morse Code with Russian and make you learn Russian with a test to keep your HF priviledges, I'm sure you would be posting some comments on how you don't understand why you need to learn Russian if you only plan to use English. And then the Hams that allready KNOW Russian would tell YOU to shut up and stop complaining and posting as they aren't looking for any good reasons not to have to learn Russian.

There are going to be a lot of posts to newsgroups that don't happen to have subject matter that is of personal interest to you. Lots of YOUR posts will not have any interest to lots of other people too.

Read the threads of the subjects you find interesting and skip over the ones you do not. Seems like a lot of wasted time to reply to threads that don't interest you.

Ham radio has changed. Packet, Satellite, R/C, television, and so much
more had nothing to do with what you said above. Perhaps all wood
workers should be required to be able to use old hand made tools of the
1800s before they are allowed to use modern power tools for the same
reason you gave.

Knowing that one has gone through, and survived, the identical
> trials and tribulations of his or her counterparts, builds a unique bond of
> dedication and purpose.

If I want to wash my clothes, I would find no bond of dedication or
purpose by using a washboard. I would prefer to use a washing machine
and dryer, and would not appreciate being forced to perform a test using
the washboard before I am given the PRIVILEDGE of being allowed to use a
washing machine. Would you? Or are you one of those lazy people that
think they should be allowed to use Washing Machines without ANY sort of
a test? How would we be able to keep CB'rs from using washing machines?

The instant gratification crowd of today has no
> appreciation for that bond.

Better sell your car and walk to work, don't use that Microwave oven either as that is for instant gratification and convienience too. Get out those two sticks, rub them together, and cook your food the hard way.

Using Morse Code was at one time an instant gratification and convienient thing too over writing and sending a letter pony express. Did people despise Morse Code back then because IT was more convienient and gave instant gratification?

All inventions give us convienience and instant gratification. That is a GOOD thing. Civilization finds better more efficient ways of doing things. Wanting to find an easier and better way of doing things is intelligent. Finding ways to make things more difficult is idiotic and stupid.

I usually don't respond to unidentified persons whose lies are as transparent as "Kropotkin"'s. But in this case there are some interesting facts to be gleaned from his frothings, especially the headers.

You'll notice that the "reply-to" address in the previous post from "Kropotkin," webmaster@bcb.yorks.com ("BCB"), is the same email address sometimes used by a person calling himself "Tez Burke G6ROV."

This "Tez Burke" person, after posting to this thread, posted another message ("Renaming," et cetera.) -- this time under his real name, if it really is his real name -- also, coincidentally I'm sure, in support of the same odious person from New Jersey who has been adorning this newsgroup in the last few weeks.

Odd that a person from Britain should suddenly become so concerned about 75 meters in the US, isn't it? He couldn't have been recruited by the almost friendless New Jersey creature, could he?

To show that this "Tez Burke" person does indeed use the same address as "Kropotkin," see:

http://x25.deja.com/[ST_rn=ps]/getdoc.xp?AN=452454412&CONTEXT=926640336.666828829&hitnum=2

Another very enlightening Usenet message of his, which contains the "f" word, and not much else, is at:

http://x25.deja.com/[ST_rn=ps]/getdoc.xp?AN=477471665&CONTEXT=926640336.666828829&hitnum=0

(You may have to use an editor to rejoin the wrapped part of these quite long urls from deja.com. Or just go to http://www.deja.com and do a search on webmaster@bcb.yorks.com and you'll find these messages and a few others, all quite interesting.)

And, in case anyone wants to hear my response to this wants-to-be-anonymous person's absurd charges: There are no links to "nailbomb murderers" (whatever that is) on my web page, there is no link to a "nazi national anthem" (whatever that is), nor are there any indecent pictures of any kind there.

By the way, I wonder why the New Jersey creature, who complains so loudly about "gutless" anonymous posters, hasn't called Mr. "Kropotkin" on the carpet for that?

What is truly interesting about all this is the fact that the thing which squats in the Garden State, and which has recently been chased

here by the cries of "cheese it, the cops!" on 14313, is so careless
of the impression he makes that he openly allies himself with liars,
forgers, and obscenity-spewers like "Kropotkin."

Quite telling, indeed.

With best wishes,

Kevin, WB4AIO.

You appear to be so engrossed in your efforts to convince the rest
of the world that you are incapable of attaining anything in life that
requires effort that you seem to have totally missed the point.

The reason we have thousands of newsgroups is because the world is
filled with millions of people with different interests.

Although your inability to learn Morse code seems to be the current
focus in YOUR life, the rest of us don't necessarily view your lack
of motivation as an earthshaking event.

REC.RADIO.AMATUER.POLICY was created with the sole intent
of giving you a forum in which to air your views. Please feel free to
use it to your hearts content.

Posting your Morse code dribble in multiple newsgroups is not going
to gain you any support. Many unmotivated whiners before you have
proven this point.

Some people have things they want in life because they are willing to
expend the effort required to obtain those things, whatever that effort
may be. It is obvious to us that you are not one of those people.

What apparently is not obvious to you is that the rest of us don't care.

73, Jim KH2D

Yeah so?
I probably have made some real serious mistakes in my life,
but at least they didn't lose me a JOB!

My mistakes are mine to make, and in so long as they don't affect
others,
I could handle them effectively.

However, it seems that you are doing a little digging. Go ahead and dig.

However, if you want to start a flame war on this point, you'd better
be prepared to defend your position (and believe me, I know how to find
things out).

Otherwise, if someone at a federal agency break regulations and does
personal stuff via the "in house" network (clearly in violation of those

"in house regulations"), then they definitely deserve whatever they get.

Rules and regulations are there for a reason. If you don't like it,
tough shit!
Life is never fair dude.

Hawke

I am not going to debate ethics with you.
As an uninvolved party who has observed all the behavior over the last 8 years
in here and on the ham bands (ain't SWL wonderful), I can tell you this:
all the parties concerned are equally guilty. Throwing mud around
and placing blame elsewhere doesn't help the problem.

Actions speak far louder than words and so far, all the actions seem to be
related to attacking one-another via radio and in here..

Why don't you set a good example for those seeking entrance into ham radio?

Airlines have the right to refuse service for nearly any reason.

>
>
> What else should they ban? Laptop computers? Car keys?

Laptops, cd players, radio recievers and other rf producing electronic
devices
not pertanent to the operation of an aircraft are already on the list of
"banned devices"
via the Flight Aviation Rules and general policy of most airlines.

>

Look a little closer at that regulation. Part of the RCPA of 1996 included
provisions related to the use of specified electronic equipment on board
any commercial aircraft flying within or over any territory owned
or controlled by the US Government.

This vary same arguement was held in here and on rec.radio.scanner
some 11 months ago.

Carrying them is ok, using them aboard aircraft is not.

Just look for the middle aged balding man whose nose hairs haven't been trimmed recently, wearing a short sleeve plaid shirt, blue Keds sneakers, with a name/callsign badge and sporting 4 belt mounted HTs (10, 6, 2/440 and 220).

Other identifying traits: Stomach hangs over belt, pant length too short, exposing white socks. May be toting Whopper with large fry. Also, look for the notepad and pens in my shirt pocket and official "YAESU, CHOICE OF THE WORLD'S TOP DXERS" hat.

I will be at the Wouff Hong ceremony, front row (sobriety unlikely).

One free 807 to anyone who can outrun me to the hospitality bar ! Hope to C U there OM !

Don't blame Riley.
He is forced to proclaim and try to implement
the incompetent policies excreted onto him from above.
The fact that the Clinton appointees haven't got
a gram of management ability between them isn't Riley's fault.
Add to that the attempted power-grabs by the ARRL
and all the loonies calling and writing him every day.
He's stuck with the dirty end of the stick so give him a break.

May 99 issue arrived in the mail Wednesday, the 12th. Getting slower and slower here for it. Too bad it is also getting thinner. I never see the mag in either of our three mag. stores here, so I am lucky to get each issue per month. I have 13 more issues to go on my subscription, I hope the mag. at least holds on that long. Been a reader of 73 since the 1st issue, sorry to see it going away. I hope in the end that it continues for a long time, but it is not looking too good right now.

Cheers!

What you missed is that the scanning receiver LO is offset
by the IF of the radio, IE 10.7 MHz, 45 MHz, 70 MHz, etc,
so the emissions fall on the frequencies of radio services
the FCC cares about. When scanners first became common,
they were causing all sorts of problems for other services.
That's why the Part 15 requirement exists.

HI
I am THinking about purchasing a Maha DUal BAnd Docking Booster for my Kenwood TH-G71A.

I am wondering IF anyone who has one or used one could tell me a little more about them.

Also any pros or cons they feel about this unit.
Also if you have any other suggestions of other equipment to buy instead.

Thanks for the Help

Dave,
yes. However, the FCC made in clear that "personal items" were
not to be broadcast via the internal e-mail network
(just in case the unthinkable could happen, which it did).

If whoever started this whole fiasco gets fired, then so be it!
They earned it.

Alex,

Interesting idea, however I doubt a desktop PC has the computing horsepower to keep up with anything above audio frequency. Most of the DAC/ADC cards I have seen only support conversion rates up to the low 10's of Khz, which again limits you to audio frequency work. The fastest cards (conversion rates around 100 to 500 Khz) I have seen use a buffered type of design and are very expensive.

If your needs are only in the audio range then check out Texas Instruments, Motorola, Bur Brown etc. for info on their DSP evaluation boards. These boards are normally complete systems with analog I/O, memory and a fast DSP chip. Some of these boards can be had with a floating point DSP chip for under $200 USD. You would most likely spend just as much for a PC DAC/ADC card alone. In addition these evaluation boards come with manuals, programming software (assembler and linker), and a RS232 port so you can use your PC to develop/write the software on for down load to the board.

The sun takes 28-30 days to make one revolution. If our side of the sun is active and that action rotates out of view it'll be another 27-30 days before it comes back around to our side. That is IF the activity still exists and hasn't disappeared. The sun is a very interesting thing to study because you never know what it'll do next.

You are a crook and furthermore, CHAIN LETTERS ARE ILLEGAL according state and government statutes. And so, consider taking your garbage elsewhere. The folks on this "wreck radio" group are geniuses and see right through you and I am one of those geniuses.
AF2Y Doc>>

I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6.00 right?" Then I invested the measly $6.00. Well GUESS WHAT!?...within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $3,000 and it's still growing. This is now my fourth week and I have made a total of just over $8,000 and it's still coming in rapidly.
It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, WHY it works... Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy! Suggestion:
Read this entire message carefully! (print it out or download it.)
Follow the simple directions and watch the money come in! It's easy.
It's legal. And, your investment is only $6.00 (Plus postage)
IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is 99% no risk - it really works! If all of the lowing instructions are adhered to, you will receive extraordinary dividends.
PLEASE NOTE:

Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success:
STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal. Mail the 6 envelopes to the following addresses:

#1)T. Schmit 2100 Date St. #1206 Honolulu, Hi. 96826
#2)K. Walker 3435 S. 173rd Street Seattle, WA 98188
#3) G. Perry GPO Box 119 Hampton 3188, Vic, Aus
#4)Michael Darmanin, P.O.Box 50733, Dubai, United Arab Emirates
#5) S. Henkes 31470 S. Dryland Rd. Canby, OR 97013
#6) I. DOTSEY, 3 RALEIGH,EUREKA RD, RONDEBOSCH,7700, CAPE TOWN, SOUTH AFRICA

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make! You won't get very much unless you post like crazy. This is perfectly legal! Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their

participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business!

To do this follow the following steps:
Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select "copy" from the edit menu. This will copy the entire letter into the computer's memory.

Step 2) Open a blank "notepad" file and place your cursor at the top of the blank page.From the "edit" menu select "paste". This will paste a copy of the letter into notepad so that you can add your name to the list.

Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.

Step 4) Use Netscape or Internet Explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions and etc.)

Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations... THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! ***REMEMBER THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE! BUT YOU HAVE TO POST A MINIMUM OF 200*** That's it! You will begin receiving money from around the world within days! You may want to rent a P.O. Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.

** JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.**

Now, if each of the five persons who send me $1.00 make a minimum of 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is $25.00 for me, now if those 25 each make 200 minimum posts with my name at #4 and only 5 replies each, I will have an additional $125.00! Now if those 125 persons turn around and post the minimum 200
with my name at #3 and only 5 replies each, I will make an additional $625.00!
OK, now here is the fun part, each of those 625 persons post a minimum 200 letters with my name at #2 and they only get five replies, that just

made me $3,125.00!!! Those 3,125 persons will all deliver this message
to 200 newsgroups with my name at #1 and still only five persons per 200

newsgroups react I will receive $15,625.00!

With an original investment of only $6.00! AMAZING! When your name is
no longer on the list, you just take the latest posting in the
newsgroups and send out another $6.00 to names on the list, putting your
name at number 6 and start posting again. The thing to remember is: do
you realize that thousands of people all over the world are joining the
internet and reading
these articles every day? So can you afford $6.00 and see if it really
works?? I think so.....People have said, "what if the plan is played out
and no one sends you the money?" So what! What are the chances of that
happening when there are tons of new honest users and new honest people
who are joining the internet and newsgroups every day and are willing
to give it a try? Estimates are at 20,000 to 50,000 new users every day,
with thousands of those joining the actual internet. Remember, play
FAIRLY and HONESTLY and this will really work.

ps...from the above names, it can be seen that, this scheme has been around
the world and therefore proves that it doe >>

<< How do I size up this answer? WASP bullcrap? AF2Y>>
From: David Stinson <arc5@ix.netcom.com>
Date: Thu, May 13, 1999 3:29 AM
Message-id: <373A4706.D96B0577@ix.netcom.com>

They may say they're for "the dignity of every man," Doc,
but their actions say differently.

The ADL, like the NAACP, actually
champions causes for their particular ethnic group only.
And then only for politically liberal/leftist members of that group.
All other cases get lip-service or even less.
If I -a politically right caucasian male of european decent-
asked for their help for myself,
they would most likely lead the parade
to light the bonfire to which I had been staked.
When will we see the ADL defend a white Southern Baptist
republican running for congress who's been defamed by
a bigoted leftist media?
When Hell is frozen solid and Satan takes up ice fishing.

It's currently fashionable to blame all evil on us WASP males,
but Bigotry and Hatred come in every color, Doc.
Every race, creed, color and sex has their fair share of bigots.

Since the dawn of humanity, people have sought a "boogieman"
on whom they can blame their miserable lives and foolish choices.
Jews, blacks, asians, hispanics, caucasions, Hootoos, Tootsies, males-
we all get a turn as the scapegoat of the hour.
The choice of "primary oppressed group" depends on
who's in power at the time and what they gain by
picking one group as the focus of hatred over another.

Until humans understand that the only person in the universe
who can cure their misery looks back at them from the mirror,
hate will fester and grow.
I won't hold my breath waiting for the big change.
Blaming it on "honkey" is so much easier.

In the mean time, I think I'll reserve my personal support
for an organization that actually *does*
respect the dignity of all.
If I ever find one.....

Regards,
Dave Stinson AB5S

Here at work we are currently using a 450 MHz pentium running NT for
developement work. This is in a VXI chassis which is designed for such
things, unlike a PC. We also have a 20 bit 20 MHz A/D with internal DSP
(for filtering and I/Q conversion) for collecting the data.

Even with all of this we can't do real time processing, of course we are
doing some pretty hairy stuff!!! (I programmed the DSP routines, by the
way.)

>If your needs are only in the audio range then check out Texas Instruments,

>

We are looking at using a DSP VXI board, but some of us doubt that it would
be any faster than doing it in the main processor with software, and
probably would be slower (clock rates are slower and you still have to
shovel the data back and forth). Of course we are digitizing a 5 MHz
signal, so audio on a DSP may be ok.

Have you looked into using the good ol' soundblaster card?

Jim
N8EE
DSP software engineer

A while back when 73 came up in a thread, maybe a thread similar to this since the magazine seems to have been off schedule for some time, someone brought up life subscriptions. Specifically, he mentioned that he'd bouth onein the early days, I think back when a life subscription to 73 was a ridiculously low price, though perhaps not ridiculously low at the time. I'm sure he's gotten his money's worth. Which is worse? the magazine faliling before you do, or the reverse? 73 has been around for nearly 40 years, and anyone still around who bought a life subscription in the early days probably got more than they expected at the time.

You could, at least theoretically, do sub-Nyquist sampling.

The catch would be like using a strobe light: while you can
flash (sample) at any convenient sub-multiple of the item
you're looking at, nothing significant must happen during
the flash. This translates into a moderate sampling rate
(definitely in the soundcard/DSP eval kit range) but a
very fast sample and hold ADC (which is not).

radiosigs@aol.com

Are you serious? "Even unfair rules" are OK?"

What else should they ban? Laptop computers? Car keys?

BTW - I'm a pilot and I have no knowledge of any Federal Aviation Regulation the prohibits passengers from carrying tranceievers on board aircraft. There are rules about *using* portable electronic devices (FAR 91.21).

I usually have a pretty flexible schedule when I travel. If I was denied passage through security because I was , I would have gone back to the airline and made a stink - even if it meant missing my flight. Unless there was an FAA directive forbiding HTs in carry-on luggage, I wouldn't have made every manager involved very busy.

Yes - this is stupid. I would have made waves.

Then passengers should not be able to take anything with them. We
should all have to fly naked. Not only would this "guarantee", it would
make airline travel fun again!

> Also the pilots frown on radios in the cabin.

No they don't - unless the radios are being used. Most pilots don't
give a rat if you have a technogadget in your baggage that isn't turned
on. You think they up there sweating bullets knowing that every other
pax is probably packing a cell phone or pager?

> It could

That whatever million $$$ jet needs to be paid for. Being anal about things that don't present a hazard and making things inconvenient for no good reason is not a good way to get repeat business.

None. Just bring reciepts for your radio just in case they
think you bought it in Canada when you cross back...

All you have to do as far as ID is concerned is use
n9dki/ve3 if in Ontario, or if you are in another province,
just use their prefix. They are numbered from east to west,
if you don't have a map- just listen to check the ID's of the
stations you hear on VHF/UHF..

I beg to disagree, Sir! To me it *is* curious that FCC
would mandate testing for receiver spurious emissions in the
microwatt range while ignoring the much more likely, and
higher transmitted power, transmitter variety. After all,
the licensee is responsible for both.
If regenerative receivers were still common it might be
another matter-but with hams their emissions would fall
within a ham band, at least!
Evidently some problem happened along that caused them to
instigate this rule. If so I missed it.

I use my amateur hand held radio in my plane and have never seen any interference, but I understand the commercial carrier's point of view - no control; They have no idea what's coming on board. The law gives them discretion, except for analog cell phones. The FCC forbids the use of analog cell phones when any aircraft is "not touching the ground". There is no such proscription for digital modes, however.
When you take the flying bus, look around; How many people don't turn off their computers? What amazes me is how often I see people faking having their seat belts fastened. More than anything else it's the passengers who make me worry in an airliner.
H.
WA5IGW
I prefer flying alone.
Call CQ on 146.52 while at 10,000 feet. Try it, you'll like it.

Tom,

That depends on what you want to do.

For repeater hopping from base, try a J-pole cut for each band. Cost: about $10 total in 300 ohm twin-lead, coax, and connectors. Add a dual-band vertical and magnetic mount to your car for $50. Get a filtered lighter adapter: $25. Get a headset with boom-mike: $60. Get ham plates for your car so you can use your headset: $50 (? depends on state). Get slightly more gain with a larger rubber duckie: $20. A small linear might help, but I doubt you need it around metro areas. $70 for up to 40w or so.

If you want good point-to-point line of sight comms, get the small linear and put up beams for each band. Roof-top tripod: $20. Small rotator: $100. Controller cable: $40. Coax: $50. Small beam for each band: $70 each. Antenna switch: $30. Ground rod: $10. Coax connectors: $20.

Where do you want to go today? What do you want to do?

Michael.

Doc,

There's an old saying here in the great South that goes like this:
"If you are gonna point the finger, you get 3 pointing back at you"

What does the "Boy from Brazil" have to do with anything? Why such a
reference? Anyway, do you really think Kevin Strom loses any sleep over
you? I think not.

Oh and another thing, The Southern Poverty Law Center has done more to destroy
the South since your Yankee buddy Sherman made his "march to the Sea" by
Burning Atlanta and destroying everything in his path, all the way to Savannah.

Doc, just keep your Yankee ass up in New Jerksey!!!

People underestimate the power here. The pilot in command can pretty much do any damn thing he wants to. He can be held accountable later, but he is pretty much totally in control. I've had pilots tell me I couldn't
use my HT. I've had other pilots ask me to just tell the flight attendant to
let him know when I'm useing it. And in a two cases, I've even had a pilot let me transmit, as long as he knew when it was going to be done, and in both cases it was only while in level flight. In all cases pilots
wanted the HT totally off during approach.

Back about 1975 I was denied boarding a Delta flight. It was a 'weapon' issue. But the pilot for the flight happened to be there (this was a 2am
flight out of Atlanta and at the time security was at each individual skyway)
and he stopped to see the commotion. He said 'let him board' and I did.

> Yep, take away the individual air molecules and you have nothing.

So take away the circular ANALOG motion of the air molecules and you still have nothing-but static air molecules...doing NOTHING, existing however they exist. But nature is NOT static. The wind blows, even the solar wind, for it's own different reason.

Next you geniuses are gonna claim that the rotation of the planets around the sun is digital. Or the orbiting of electrons around an atom's nucleus. Or the expansion of the universe. Ad nauseum.

I sure am glad that I'm not so darn intelligent I have to swallow all that stuff. Gee, what some people will do to promote the digital 'agenda'. Next you'll be saying that sex is not analog because there's a "digit" involved...

Remember: You can "prove" 'mathematically' that you are as old as your grandfather. That opens up vast possibilities. 'Math' is valid when you can prove the proof that proved the proof that proved the calculation. Otherwise - well, maybe you ARE as old as your grandfather...

We know that nature is always seeking of equilibrium, to equalize charges, so your point is not obscure. Lightning, the most obvious equalization in nature, is essentially digital in nature. Just where Quantum Mechanics takes us from there would be another matter.

W0EX
Nature is ANALOG. Unless you're in love with 1's and 0's.

3786. New Version of Flexi-Tuner for the RX-320

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-14 00:00:00 UTC
From: mktg@ix.netcom.com
Message-ID: <377534fa.5386231@nntp.ix.netcom.com>
Source record: 142935

May 14, 1999

Hello All,

The beta versions of Flexi-Tuner for the RX-320 are finally done and over with! Many thanks to the testers for their feedback and suggestions. All comments were very helpful.

Version 2.0 of Flexi-Tuner for the Ten-Tec RX-320 is now available for ordering.

Priced at $20.00, version 2.0 is an inexpensive way to take advantage of the features on the RX-320 that Ten-Tec did not implement and, at the same time, to have a control program for both DOS and Windows.

The major features of Version 2.0 of Flexi-Tuner for the Ten-Tec RX-320 are as follows:

1. Operates the RX-320 from virtually any desktop or laptop computer, including older 386 machines. An excellent use for that old 386 machine in the closet or one of the many $100 older laptops available at pawn shops and used computer stores.
2. Works in either DOS or Windows (this is a DOS program with a DOS interface).
3. Implements 34 selectivity filters from 8Khz to 300Hz.
4. All modes: AM, USB, LSB, CW.
5. AGC implemented: Fast, Medium, Slow.
6. Tuning steps down go 1 Hz or up to 1 Mhz, including 9Khz and 3Khz.
7. Adjustable squelch.
8. Bandpass tuning for CW and SSB (offset from center freq.)
9. Scanning using scan files. Adjustable parameters.
New! You can now have up to 200 scan files with as many 100 entries in each.
10. Built-in scan file editor.
New! You can now tune to any entry while in the scan file editor.
11. Built-in logging function with log editor. Easily track, edit, sort, monitor, and export log entries. Items logged include station name (or notation), frequency, mode, filter, date, time, and S-meter reading. Time and date can be adjusted if you want to log in UTC or other time zone.
New! Sort by time added to the log editor.
12. More sensitive S-meter.

13. Pause S-meter function on front panel. This eliminates
the "chuffing" heard on some RX-320 systems.
New! 14. Instantly mute audio with a single key.
15. Almost all parameters adjustable (great for knob twiddlers
like me).
16. Tighter code for faster operation.
17. No mouse required (or supported).
New! 18. Supports color, B&W, and inverted B&W monitors (CGA or
better, including B&W VGA monitors).

The program is supplied along with several scan files in a single zip
file. It can be sent to you either by e-mail or regular mail on floppy
disk. Installation and removal are simple, as the program does not
affect any system settings. Operation is also straightforward -- just
press various keys as shown on the screen.

Installation, removal, and operating instructions are included.

I would be pleased to send you Version 2.0 of Flexi-Tuner for the
RX-320.

Regards and 73,

David
W7HTJ

P.S. A demo version is available at no charge. It has all the features
of Version 2.0 except that the number of scan files is limited 25, each
scan file can hold 25 records, and the log file is limited to 250 en-
tries. An RX-320 is needed in order for the demo to function.

RX-320 Flexi-Tuner V. 2.0

How To Order

The full program, Flexi-Tuner Version 2.0, is available for purchase.
Shipment can be made by e-mail or on diskette by regular mail.

Price: $20.00 US for shipment by e-mail.
$25.00 US on diskette shipped by regular mail.

Send payment (check or money order) in favor of David C. Andresen.

Address: 8103 104th St., S.W.
Tacoma, WA 98498

Tel. (253) 588-4149
Fax: (253) 588-4366
E-mail: mktg@ix.netcom.com

All shipments made within 24 hours of receipt of payment.

Morse code testing requirements are not static either. :-)

As you probably know, the apparent analog motion of an air
molecule can be analyzed using calculus and making the *discrete
straight line increments* of the path as small as needed. The
answer is perfectly accurate. The delta-length and delta-time
of calculus are discrete values. Consider this, Dick. Man once
considered the entire universe to be analog. Now, the farther
away man gets from analog-type thinking and the closer he gets
to quantum-type thinking (discrete/digital) the better man
understands the universe.

Yep. And a circle is nothing more than an infinite number
of straight lines, end to end. But I'll leave it up to you
to separate and count 'em while I work some CW.....and that
thing sure looks round to me.

The
> answer is perfectly accurate. The delta-length and delta-time

As I said - You seemingly can "prove" about anything you
set out to prove. I'm glad I'm not saddled with all that
"knowledge". Sure would get in the way of my ham radio
fun.....as it does yours.

W0EX
Nature is ANALOG. Unless you're in love with 1's and 0's
and see the universe only through digital glasses.
Then you just have to Live With It.

Oh no, It looks like George figured out my true identity! Whatever
will I do now? Better be careful what you post, make sure it's
accurate. You seem to have a problem distinguishing fantasy from
reality, so it may be prudent to have any accusations you make checked
for accuracy by an impartial third party before you make them public.
Lawyers love this kind of stuff, ya know!

Have a nice day!
Smurf

Where? When? Certainly not in this forum. He said he "homebrewed"
the antenna, not invented it. Anything we build at home from someone
else's designed is called "homebrew," as opposed to purchasing a
commercially-made version.

Peruse our newsgroup rec.radio.amateur.homebrew -- you'll read of lots
of folks homebrewing gear, very little of which they've designed them-
selves.

>>>AF2Y replies. The Stars and Bars represents the Confederate States of America which was destoyed by Union Forces in 1865. The defeat of the South in the Civil War should have meant that we would become united under ONE FLAG, OLD GLORY. Furthermore that same STARS AND BARS represents a throwback to slavery which was negated by the Emancipation Proclamation and then outlawed as a result of the South's defeat. The Stars and Bars therefore SEPARATES, not unites us and UNITED WE STAND. I refute the idea that the STARS AND BARS represents the South of today. She has made more progress in integration than has the North. Great universities and important industry has sprung up throughout the South. The entire climate of south of the Mason-Dixon has changed for the better and more progressive. Southerners can be proud of their success and culture WITHOUT having to depend upon the Confederate Flag as an emblem. If anything, that flag sets the South back and gives the North the wrong impression. Regarding the Southern Poverty Law Center, what's wrong with keeping a close watch on the KKK and Nazis and just plain insurrectionist militia nuts? Any Southerner who's a loyal American should be proud of such a great Atlanta based organization. You think Morris Dees did wrong by hauling that Nazi bastard Tom Metzger into court and bankrupting him for his part in the orchestrated murder of that Ethiopian student in Oregon? Lloyd, do you like the idea of killing a black student, a hard working student trying to hold down a couple of jobs to pay for his education. Is that your idea of destroying Christian Heritage and Cultural values? If so, you're one sick dude who is in dire need of a psychiatrist. AF2Y Doc>>>>>>>>
>Let's be honest about this. The ADL is an anti-White
>and anti-Christian HATE GROUP.
>
>Doc screams about "bigotry", but totally ignores his
>own Jewish racism. What a hypocrite!
>

That what he's good at, What about the Southern Poverty Law Center? That group has done more to destroy the Christain Heritage and Cultrual values that are common down here in the Great South (ie banning of Confederate Flag etc)

I will stand up against such garbage...

There is a group that is fighting these cultrual bigots

Calm yourself, Spike. You need not become so emotional about another's hobby. Then again, you might constructively use YOUR time to learn how to write and spell and construct proper sentences. The plural of radio is not "radio's"; and what, pray tell, does your word "follious" mean? In a way, I will agree with your position. If you cannot even use simple English, how COULD you learn code?

Michael K.

I'm sure it is, but really don't care. What can he do to harm me? I know his gang enjoys digging up what they consider dirt on people, credit histories, arrest records, etcetera. But so what? If he thinks he has something, let's see it. If it's factual, so be it. If it's fabricated or embellished, it'll come back to haunt him. Liars always live with the fear that they'll be exposed for what they are. Since they know no different, they expect that everyone else lives with the same fear: that someone is going to expose the lies that they live. The truth is that most of us don't live with such anxiety, since we have nothing to hide and therefore nothing to fear.

Since I had the facts on my side in this little thread, he realized that he could not argue his case successfully against me. This is why he is making his thinly veiled threats and accusations. His only hope of saving face is to discredit me in some way. But, if he truly has any mud to sling, why did he not do so? That question brings us back to the fear factor which I mentioned previously. Since he is dishonest, he has to hide from and obscure the truth. In his mind, everyone else carries similar baggage. So, he expects that the implication that he "has something on me" is going to scare me, keep me from pointing out his lies, keep me from summing up his character. Apparently, it isn't working!

The Run Around that I experienced with Yaesu

[Follow Ups] [Post Followup] [The FT-847 Bulletin Board] [FAQ] [FT-847 Home Page]

Posted by George Nelson on May 13, 1999 at 16:42:56:

I sent this e-mail to Yaesu "Chip Margelli" May 5,1999 and have not received any response as yet. I thought you new FT-847 owners and perspective buyers, would be interested.
The following is a series of e-mail exchanges between Yaesu and I, concerning the problems encountered by me, after purchasing one of the first FT-847's over a year ago. As you can see, the problems have NEVER been resolved.
****
TO: YAESU U.S.A.
C. H. "Chip" Margelli, K7JA
Manager, Engineering/R&D Department

What Happened Chip and John??

The last time I heard from you folks at Yaesu, was a phone call on July 28, 1998 at 1604 PDST. John Lynn said that he was shipping back my radio, after two months in the shop without fixing the problems. He also said that I would be contacted when a fix was found.

The following e-mail responses from you, were very positive about fixing the CTCSS DECODE problem with my FT-847. All right, you lost my name, ham call, phone number, home and e-mail address. The excuse is accepted!!

Now that we are connected again, what did the Japanese Engineering team come up with to fix the ctcss decode, volume control and loud rear fan problem???

Please respond by phone or e-mail. Thank You, George Nelson K7GEN
****
THINGS THAT I DON'T LIKE ABOUT THE YEASU FT-847

1. VERY NOISY FANS, ALWAYS ON, (SOUNDS LIKE A PERSONAL COMPUTER)
2. CAN'T MEMORY SCAN BY MODE
3. ONLY 78 GENERAL MEMORIES FOR WHOLE RADIO NOT LIKE ADVERTISED (78 PER BAND)
4. NOT ABLE TO PROGRAM DIFFERENT CTCSS TONE ON XMIT AND RECEIVE
5. THE 12 SATELLITE MEMORIES NOT USABLE FOR SAME BAND REPT.
6. ONLY ONE WAY CROSSWIND REPEAT CAPABLE, IN SAT MODE ONLY

7. CTCSS DECODE CKT. OPENS ON SIGNALS WITHOUT PROPER TONE
8. REPEATER OFFSETS ADJUSTABLE, BUT IF USING DIFFERENT OFFSETS IN
THE SAME BAND, THE MEMORIES DO NOT STORE THEM SEPARATELY MORE TO

WB7VWK.GEORGE@worldnet.att.net
CC:
n2jtx@weca.org

Dear OM George:

We're a bit confused. . .
1. Perhaps your fan(s) have some mechanical problem; they are really
quiet normally.
2. OK.
3. Where did we advertise 78 memories per band (can't locate such a
statement myself)?
4. May I assume that the separate CTCSS tones are for a non-amateur
repeater?
5. Amateur satellites do not uplink and downlink on the same band.
6. True. . .but we did not want the compromises (additional Local
Oscillators with their attendant birdies, etc.) of dual receive on a
high-performance weak signal DX/satellite product.
7. Can't duplicate this one. . .what tone does this happen on? Our units
here work perfectly, but we're willing to listen in case we need
to know somthing.
8. The "Offset" is a fixed item. But you can store split memories to
your heart's content. This takes less time than messing around
with the re-setting of a "default" offset, to boot. Take another
look at the manual, and I'm sure you'll agree.
9. It's "YAESU," not "YEASU" (!).
We hope you'll enjoy the 847 on the upcoming E season, this weekend's
DUBUS EME Contest, as well as Phase 3D OSCAR.
73,
YAESU U.S.A.
C. H. Margelli
****
Thank you for your e-mail response.
Here is my response to your answers.

1. Fan's: Everyone who has seen my radio , comments on the fan noise.
2. MODE SCAN: We agree on.
3. 78 memories per band: In your 6 side, 3 page flier B9200227 under
POPULAR MEMORY AND SCANNING FEATURES it states "The ft-847 includes

78 regular memories (comma)" plus other types of memories (comma) and
ends with "and a HOME channel on each band (period) When people read
this sentence, they tend to believe that this radio has all of these
memory types, "on each band", because the period does not appear
until after the statement "on each band." VERY MISLEADING!!
4. Different CTCSS tones on repeaters XMIT and RCV: This is done on many
amateur 6 meter repeaters to eliminate problems while linking. The
Icom 706 Mark II will do this!
5. Satellite Memories: OK!
6. Cross band Repeat: You could have designed the radio to jump back and
forth between the main band frequency and the sub band frequency,
like the early duel band, single freq. mobile transceivers did.
(Icon 3210)
7. Radio speakers passes audio (for an instant) while in full
CTCSS decode:
Not just an occasional pop when voice frequency matches the tone, but
while scanning the memory channels, some being in decode. Plus the
speaker clicks occasionally while listening to a single
decoded memory channel.
8. Offset: I understand, But some modern radios memories (Icom
575H) will remember shift frequency, and not have to refer to the
current shift setting.
9. YEASU YEASU YEASU: Sorry about the spelling error.
10.And one more concern: The AF or Vol pot, on the low end. Does not
activate the audio at a low enough level for my taste.

Question: Are these typical problems that all FT-847's have,
or should I send this one in to have you look at it??
****

From:
"Yaesu U.S.A."
To:
WB7VWK.GEORGE@worldnet.att.net

Dear OM George:

Thanks for your follow up.
1. Dunno. . .but will try to get some relative perspective on the fans.
3. Thank you. I feel better, although I do understand your point about
the sentence structure. That sentence could use a re-write, but
I hope you can see that there was no intent to mislead. I must
ask, though, how you would have the time to load even 78 memories,
much less 156?
4. Hmmm. Thanks for the information. Yes, the 706 will do this. No, the
706 isn't worth much as a satellite radio.
6. Ditto on the IC-3210 as a satellite radio. Your point is noted,
though.

7. Thanks for the further information. We'll look into it.
9. Thanks, Goerge Goerge Goerge.
10. Ah. . .the "big step" at the bottom! We'll look into that, too.
Please QRX for further information. Thanks again for the helpful
input.

Dear OM George:

Your "baby" is here, and is getting better. I have a question, though:

Do you need this unit for the contest this weekend?

The CTCSS decoder is largely working, but there still is a little bleed-through on occasion. We don't know if we can get a solution by tomorrow or not, and if you need the 847 for the contest we need to ship it by then. I am confident of getting this resolved, but the exact day of a complete resolution is uncertain.

Please let me know, OM.

GEORGE NELSON wrote:
Hello again Chip,
Please keep my FT-847 as long as it takes, to correct all of the problems, even ones that you discover. Especially the CTCSS DECODE. As I said before, I did my best for about 5 minutes, to break through the CTCSS DECODE, on your display radio at Seaside. It worked perfectly. I understand that on occasion, with the proper voice frequency, a radio in PL or CG, CTCSS DECODE will pass a syllable or two through, to the speaker, but this should not happen very often. And it should never

happen, on just an unmodulated carrier.
I've also noticed, on the newsgroups and FT-847 web page, about questions people have about the PHONE JACK LEVEL. I have not plugged a headphone into my radio, but I would expect it to work properly, as all the radio's, I've owned sense 1963.
George WB7VWK
****
RRR. . .we're working on it.

As to the headphone level, I think we must have it right. Some guys gripe that the level is too low. Others have even posted mods to LOWER the headphone audio level. I think Goldilocks is at work here. I have both Yaesu and Heil headphones, and I blast my ears out at more than 50% advancement of the AF GAIN control. I think some Heils have low output (or a funny impedance), and that is behind the "low output" situation.

73 for now. . .

George:

I asked John Lynn to call you back, as I am involved in a project for Tokyo from which I am not presently coming up for air. I'm not on the same floor as the Service Department, and it takes a bit of time to research things.

Please drop me an e-mail if John can't answer your questions. . .I can check the e-mail occasionally.

Hope all is well, propagation notwithstanding.

Hello Chip,
I received my FT-847 this afternoon, unpacked it, and immediately checked it out.
The first thing I checked, was the CTCSS DECODE. Nope, Not Fixed, it still does the same things it did before. Speaker clicks, when the radio is squelched in decode and white noise is occasionally emitted, when it is unsquelched in decode.
The AF control seems to be much better, but they didn't do anything with the rear fan, but that's OK.
The invoice says they replaced 17 assorted parts, I wonder what all the parts replacement fixes??
John Lynn called me, and asked questions about the decode problem. He suggested that I return the radio, and send him a copy of the UPS bill for refund. First one was $33.04.
Well, that's about it, I'm very discussed. The radio from hell, will be mailed back to you, tomorrow.(WED)

George:

Please don't send it, if you haven't already.

Tokyo's investigating your complaint, and we'll let you know when a better time would be. We just don't want you to be without your radio at the peak of the six-meter season (how can you even THINK of using this rig on FM at this time of year??!!?? hi).

Hello Chip,
I just got back from Mail Boxes Etc. and the radio is on it's way!!
Don't worry, I have plenty of Rig's. I have two Icom 575H's, TS-50&60 and am not rig or antenna poor. Been working Ca.&Az. 6 meter repts quite

regularly this spring. Say Hi to Dan N6BKL and Will AA6DD on 6 Fr me.
Keep the radio until the ctcss decode is fixed, It's no good to me, in
the condition it's in. 73's George

>Damned right it is legal.

Yes, this is true. It is at the pilots/airlines discretion.

>Your radio can easily gum with their electronics.
And your laptop is even worse ;-)

>You get on a plane and show your scanner to me and I'll
>hold you down and rip the batteries out.

Now, THAT'S mature.... Hope you keep your attorney's number handy. Here's to hoping we meet and you do just that - I could always use some extra spending money, and so could my attorney.

>Your not gonna cause me to die with your stupid hobby.
Agreed. About the only way I could kill someone with my scanner would be to beat them over the head with it. Probably would do more damage to the scanner than to them, anyhow.

Jeez..... what will we hear next? Wait, I've got it, some guy will cause a nuclear missile to launch because he went on a tour with his scanner. Yeah, that's it.....

Doc, your posting on the War for Southern Independence,
the meaning of the St. Andrews Cross flag and etc.
is one of the more thorough recitations of the "party line"
on these subjects I've seen lately.

It's always been easier to take this complex issue
and pervert it into a simple, hateful idea.
The post is, of course, riddled with misinformation, misunderstanding,
half-n-quarter truths and utter falsehoods.

It's not your fault and I don't condemn you personally for it.
You're simply repeating what's been forced into
your mind and heart by Hollywood, academe and the feds.
The issue isn't and never was as simple and simple-minded
as most Americans believe.
A century and a half of lies and propaganda forced
on american children has set this bigotry more deeply and
more perniciously then that against any other ethnic group.

You may find it difficult to believe, but no single group
silently suffers more hate speech and hate propaganda then
the People of the South. The hatred towards us
is even sanctioned and propagated by academia and
brutally enforced by agencies of the federal government.
I'll bet you don't see many college professors damning Jews.
They might even go to jail for it.
Damning Southerners is practically a requirement for graduation.

The fact that sheet-wearing inbreds and skin-headed
morons abuse and defame the St. Andrews Cross flag
does not make that flag a symbol of hate.
Hippies wore the US flag in the 1960s.
Does that mean the US flag stood for drug abuse?
Native Americans have used the swastika for centuries.
Are Native Americans nazis?
The Rellians use the Star of David as one of their symbols.
Does this mean the Star of David stands for UFO belief?

No. Of course not.
Most people agree those ideas are silly--
nutty upside-down thinking.
Until you talk about the St. Andrews Cross.
Suddenly, logic goes completely out the window
and brainwashing takes over.

It's easier for lazy people to point to a
Southern symbol then to deal with the real problems;
to go find a "boogieman" rather then frigging *THINK.*
They want someone to whom they might feel superior
and distract them from their own mean and degraded spirits.

What better way to justify themselves
then to regurgitate their training?
It's so much more satisfying to damn the people and symbols that
academe and the federal government have sanctioned for that purpose.
Southerners are ready-made scapegoats-- Step right up!
Ease your guilty conscience by pointing fingers
and speaking hate about that which you don't understand;

It's truly The American Way!

Sincerely,
David L. Stinson AB5S

You need to get on the APRS reflector at www.tapr.org to watch for the announcement.

As fas as the terminal inside CE, it works fine with my PK88 and KAM controllers.

Newbie Needs Antenna Advice

Hi

I have recently received my amateur license. I have a handheld Kenwood dual band radio. I'm looking to improve my radio with a new antenna or possibly even a small amplifier,

Unfortunately I 'm looking to spend only around 200 to 250 tops,

What are my best ways to increase my signal in distance and clarity , within my budget?

>and all the loonies calling and writing him every day.
>He's stuck with the dirty end of the stick so give him a break.
>

Give ME a break! For the past 6 years or so, the Liberty Net
and 3950 in general has endured what has probably been the most intensive
illegal jamming in the history of amateur
radio. Evan AFTER Hollingsworth witnessed WA9KJI
and W9ART's jamming with his own ears, he has done
ABSOLUTELY NOTHING. W9ART even DARED
Hollingsworth to take away his license ... and Hollingsworth
just sits on his hands.

"Enforcement" my butt!! This Hollingsworth guy seems to
be all talk. This whole "enforcement" effort is a big joke.

What the hell will it take for Hollingsworth to enforce the
law? ..... Maybe if K5BLB plays "anchors aweigh" using
a 50kw transmitter right inside Hollingsworth's shack?

My colt is a Defender, and if it is visible, then that means I am NOT glad to see somebody. It conceals fairly well, as does my P-10.

I have a sentimental attachment to revolvers, but prefer a compact semiauto for serious social encounters. If I could carry openly as is the case in New Mexico or Arizona, I might opt for the ratchet gun. Then it would be a model 29, or a Super Redhawk if I was shopping on a budget. Big gun beats little gun.

Dear HAM's:

www.lu4aa.org

75th ANNIVERSARY r-CB8 & z-2AC QSO

Next May 21st. will be the 75th Anniversary of the historic QSO between
Carlos Braggio, r-CB8,
Buenos Aires, Argentina and Ivan O’Meara, z2AC, Gisborne, New
Zealand; establishing on 1924 the
World Record of Distance.

The Radio Club Argentino wishes to celebrate this, and invites the Ham
community all over the
world to join us participating in the commemorating activities of the
event.

The following program, sponsored by R.C.A. will take place the week from
May 16th to May 23th,
1999.

1.) R.C.A. official station will be on the air with the Special Call Sign
L75CB. All contacts
made with the official station will be confirmed with a special
commemorative QSL card.
2.) On May 21st. the anniversary date of the World record, L75CB will be
on the air 24 hours
continuosly on CW, transmission mode used by Braggio and O’Meara to
make the contact. An
special commemorative award will be issued to all stations that work
L75CB on that day.

L75CB QSL s via LU4AA. Bureau or P.O.Box 97-1000 Buenos Aires, Argentina.

3.) During the week of the event, all argentinian stations will be
authorized to operate with
special prefixes:

LU stations: L2

LW stations: L3

&#65533;
AZ stations: L4
&#65533;
4.) We encourage the amateur radio community all over the world to join
us celebrating this
event, and we hope to see you on the air.
&#65533;
Comments to LU4BR - Project Coordinator.

&#65533;

SPECIAL AWARDS PROGRAM SPONSORED BY THE&#65533; RADIO CLUB ARGENTINO

"75&#65533; ANNIVERSARY OF THE WORLD RECORD OF DISTANCE BETWEEN CARLOS BRAGGIO, r-CB8, BUENOS AIRES, ARGENTINA, AND IVAN 0’MEARA, z-2AC, GISBORNE, NEW ZEALAND"

GENERAL RULES

1) This awards will be issued to amateurs and SWL&#65533;s all over the world.

2) All bands and modes may be used.

3) May be contacted stations with the Special International Prefixes L2, L3 and L4, from 0000 UTC May 16th to 2400 UTC May 23rd 1999.

4) Fee is u$s 8.= or 10 IRC’s each Award. (Free for Radio Club Argentino members).

5) GCR List (no QSL needed) to:

AWARD MANAGER
Radio Club Argentino
P. O. Box 97
1000-BUENOS AIRES
Argentina

"CARLOS BRAGGIO, r-CB8, AWARD"

Contact station using different Special International Prefixes L2-1 to L2-9, L3-1 to L3-9 and L4-1 to L4-9. There are 4 classes.

Platinum = 20 Special International Prefixes.
Gold&#65533;&#65533;&#65533;&#65533;&#65533;&#65533;&#65533; = 15 " " "
Silver&#65533;&#65533;&#65533;&#65533;&#65533;&#65533;&#65533; = 10 " " "
Bronze = 5 " " "

The official station of the Radio Club Argentino L7-5CB may replace any Special International Prefixe you need.

&#65533;

"IVAN O’MEARA, z-2AC, AWARD"

Awarded for making contact with stations using Special International
Prefixes in 4 classes.

Class I = 300 different stations.
Class II = 200 " "
Class III = 100 " "
Class IV = 50 " "

The official station of the Radio Club Argentino L7-5CB count as 5
stations.

"75 ANNIVERSARY OF BRAGGIO-O’MEARA QSO AWARD"

Contact stations using the Special International Prefixes L2, L3 and L4.
The points credit is as follow:

L2-4AA = Allow 24 Points.
L3-5DZ = Allow 35 Points.
L4-1ZZ = Allow 41 Points.

There are 4 classes:

Superior = 2500 Points.
Special = 1500 Points.
Notable = 1000 Points.
Extra = 500 Points.

The official station of the Radio Club Argentino L7-5CB allow 75 Points.

So, dear friends, I hope to listen you on the ham bands. About me, I
will be active with the special call L38EZU on 10 and 80 meters, and
maybe from the local club station LU7DCE (L27DCE), Radio Club Junin also
on 10 and 80 meters. Greetings and I hope to hear you on the bands!!!

> What about it? Code test required.

Yup! I'm a + and will soon be a General<g>. CW is really addictive and it's amazing what you notice once you learrn it. Just the other day I was watching a AAMCO Transmission commercial on TV the other day. Their motto is "Double A, beep beep, M, C, O", it subconciously dawned on me that the "beep beep" is Morse for the M <g>. It's also nice to finally be able to know what the repeaters say when they ID.... it's not always just the callsign :) Anyways, CW may not be for eveybody, I guess that's why we have different license classes. There is a place for all of us in ths hobby!

Bullshit, Gary you're just grabbing another opportunity to
point some imaginary accusatorhy finger at an Extra, yet one
more time. Your favorite passtgime. You can spend your time
poring over the mass of papaer issuing from FCC to glean
each and every single factor if that is your interest. Some
of us have lives beyond all this.

> emissions of their transmitters.

We once had a similar ruls, requiring hams to have a means
of measring frequency independent of the transmitter itself.
Most used a tunable wavemeter.I had a homemade unit as a
Novice and still have a couple more sophisticated models. Of
course handheld ss digital counters haved pretty well
replaced them. (I also have one of those).

> Lord Kelvin stated that if you can't measure a physical quantity,
> assign a number to it, then your knowledge of it is of a meager
> and unsatisfactory kind.

Yeah, that's what he said....clearly he never put a
homemade 2stage transmitter and and old converted bomber
receiver on the air as a Novice.

Amateurs, even long time Extras,
> should take note of this. If you aren't setup to properly monitor
> your own signals, your knowledge of your station's performance
> and compliance with good engineering practice is of a meager
> and unsatisfactory nature.

hehehehehe.....tell it to all the No-Code techs who studied
the test.

I may have missed the inception of the rule to correct it,
but I sure didn't miss the scanner problems. Some of them
were real cheapies, and not to be confused with real
communications gear. So I didn't.

W0EX
Nature is **still** ANALOG. Unless you just love 1's and
0's.

As others have pointed out, there's no paperwork, though that wasn't always the case.

This question has come up before, and one time someone pointed to a page on the very topic, but I sure don't remember the URL.

You might want to check the Radio Amateurs of Canada website at
http://www.rac.ca
because that's bound to be a place where there's information on the topic, and about amateur radio in general in Canada. There's also a listing of upcoming hamfests and a listing of affiliated clubs, in case you hope to meet some Canadian hams.

One thing to watch for is where you can operate. I don't even remember whether it matters at this point, but depending on your class of license in the US there might be restrictions on your privileges in Canada. Ever since the rstructuring it may no longer be a consideration, but it is something to check.

3844. Re: Denied Aircraft bording with HT - was this legal?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-14 00:00:00 UTC
From: robinson <rmcrusoe@gte.net>
Message-ID: <fvQ_2.194$Ts5.17803@paloalto-snr1.gtei.net>
Source record: 143015
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner

They should be able to prevent anybody they like from boarding for any reason they like. It is their plane, and their business. They can runn off ALL their customers if they like, and fold up, or they can let anybody at all board with anything allowed by the law, and behaving in any manner at all that is not specifically illegal. Or they can strike a middle road somewhwere in there. Thhat's called free enterprise... market economy... supply/demand... and giving the customer what he wants, or losing his business.

I used to always carry my TS-50S in my briefcase. The one time they refused to allow it to pass, (The by-the-numbers instructions they got were to have me turn it on, and naturally I could not, without a source of 13.8VDC) they busted both the lamps for the LCD panel, and I also had to do a full reset. The next time, I was given the option of opening it up and I happened to have my swiss army knife in my pocket, so I did, and showed them there was not room inside for even a single stick of dynamite. After that, I never had a problem.

I have never flown with an HT, and do not even own one. But I bet working your way up the chain of command, you would have eventually found someone who can count past ten without removing his shoes, showed him your license, informed him that you know your responsibilities and obligations under the CFR (quoting chapter and verse sounds impressive to some people) you would have been allowed to board with your HT. This would have helped the next poor ham who had to deal with those mental midgets.

If you try everything and get no satisfaction, when given the choice, don't fly that airline, and inform them of it. Fill out one of the complaint cards that most airlines have, and some distribute, usually in the airline's in-flight rag. I have always got a response when I have sent one in.

When you have a prob with a particular airline, and they simply won't be reasonable no matter what, other hams should be informed. A letter to QST and posts here would together inform probably half of all licensed hams, and would represent a substantial amount of lost revenue to the ucooperative airline.

Well,
At least I keep my responses short and to the point.
How many other can do this in 2 paragraphs or less?

As for the fvv thing, I am not abouit to change my
opinion. I have known to many nitwits that get into
a government job only to be lazy after they get in.

If anyone is going to work for the government,
I want to make sutre I get my money's worth
in tax collections!

If some of these nitwits get fired as a result of their
own actions, they have no one to blame but themselves
(and you know they will try to lay the blame elsewhere).

they do have that right, most certainly, within reason 9the law does provide
for
a certain amount of protection based on "special circumstances")

>
>

Am I understanding this? they actually damaged your equipment?
At this point, shouldn't some financial responsibility have been made
on their part?

>

Funny thing is, the more incompitent someone is, the higher in the chain of
command

he appears to be. I, too have discovered this in my travels.

>
>

Out of curiosity I just investigated one of two Strom webs and I must say that a bigger shill for the Nazis and other dangerous subversives in the USA was never born. I urge the ADL and other anti-hate groups to monitor this wild animal even more carefully because he may be crazy enough to actually put some action behind those horrific words and a hail of bullets ripping this "thing" to shreds would be enticing to see or read about.

3865. Illegal Amateur Operations in the Tampa Bay Area

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-15 00:00:00 UTC
From: rfenforcer@aol.com
Message-ID: <19990515124837.08634.00001764@ngol08.aol.com>
Source record: 142737

I just finished listening to several sound clips of illegal 2-meter amateur transmissions in the Tampa, Florida area. These clips are located at the following website: http://www.geocities.com/~ke4jcd/crummy.html, and would seem to provide extensive evidence of illegal operations by local amateurs. Profanity, obscenities, threats of bodily harm and violence, etc., are all clearly heard here. The perpetrators freely dispense with their callsigns. Perhaps this should be added to the future "to do" list of Riley Hollingsworth and the FCC as they continue their successful campaign to rid amateur radio of illegal operators.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

"Spike",
Ham radio is a hobby and a service. We do it for fun and because we enjoy it. It IS entertainment for us. We enjoy talking to other people around the world, making new friends around the planet. What do YOU do for a hobby? People do many things for entertainment, one of mine is ham radio. Another is astronomy, another is gardening. Ham radio is fun for me and MILLIONS of other people around the world. We have lives thank you. Apparently you need one though, seeing as though your wasting your time making idiotic postings.

Tom

Jim:
I just did a search using the term Amateur Radio and got thousands of hits
on the net for the term. For a hobby that the internet is destroying or

making obsolete we as Amateur Radio operators sure are occupying a lot of its bandwidth.

Below is your chance to participate in the BIGGEST FOX HUNT in Human history!

SETI@home is a scientific experiment that will harness the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.
Download at this site. http://setiathome.ssl.berkeley.edu/

It's your chance to help find ET "FOR REAL"!.
The program works as a "Really Neet "Screen saver when you are not using the Computer.
Check it out, it's the Biggest Fox Hunt in the Galaxy.
==========
http://www.mindspring.com/~helmsman
SETI@Home is up and running Win 95/98.

While I was trying to decipher your point, I got to thinking: Suppose
you sued realdeal for everything he has and won. You cold sell off the
1000MP and the Alpha, which might cover the legal fees. But then
you're stuck with the 25-year-old mobile home (complete with a leaky
roof), the torn and duct taped recliner and a urine-stained mattress.
The rusty 1969 Plymouth may be worth something at the local Pic-A-Part,
but all in all, a civil suit might not be such a good idea after all.

And everyone wonders why the service is going right down the toilet!
Selective inforcement and the world famous PORKBUTT is still on the air.
Selective enforcement? Why hasn't old PORKBUTT paid his $10,500 NAL and
why does PORKBUTT still get away with not properly IDing his station?
Why does PORKBUTT still get away with his wide signal and over powered
station? Why does PORKBUTT still get away with using fowl language over
the radio? These are the same questions that many of us in the amateur
radio community ask daily. Selective inforcement??
I also wonder where the author of this worthless peice of commentary
came up with Hollingsworth appoved words. Where did that come from. Some
of the words leated in that list are known obsene words. Where did that
come from. Of corse you probly will liedown with the likes of James V.
Obrian III and PORKBUTT two of the fowlest people on amateur radio.
A.K.A. THEALLMIGHTY1 and DoNkBoY99. So if there is selective enforcement
going on these guys should be on the top of the list. Let me remind you
that selective enforcement should mean that the only ones that should be
hasseled by the F.C.C. are the the one ones who make a mockery of the
who service. Mainly PORKBUTT and James V. Obrian III A.K.A PORKBUTT and
NoBrAiN. So If I where you part of the amateur radio community I would

let go with a massive letter writing campaign to get these two lousey operators off the air.

PORKBUTT at work again! Has everyone heard about white trash. All the
time getting on the radio and wining about white niggers well all I can
say is PORKBUTT you and James V. Obrian III are the best example of
white toxic waste I have ever seen. James you are white trash but
PORKBUTT you are just plain white toxic waste.
BTW James did you have to sell you computer to sue all these people in
here. Is that why your on a webtv account? Did you get enough money
from that lame MLA 2500 to pay for your leagal bills from that last
appearance in court? I heard all about it. Hey loser I'm truly laughing
at you You are truly a loser! Now you really have no signal! How are

you supposed to get a signal out of that slinky now? We all think your
are a loser and a lier too Just like PORKBUTT. So why don't you and old
PORKBUTT just kiss and tell your both the same LOSERS!

3885. QRM on 17 meters

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-15 00:00:00 UTC
From: Rick Miller <spamfree.rdmiller@bit-net.com>
Message-ID: <373DF9C2.3546@bit-net.com>
Source record: 142757
Cross-posted to: rec.radio.amateur.misc,alt.ham-radio,rec.ham-radio,rec.radio.amateur

For the past several days there has been a musical noise
on 17 meters. I receive it at 18.116 with the main signal
at 18.091. Sometime there is a similar signal offset to
the low side.

I thought at first it was originating locally, but I confirmed
that it was not in my shack.

Has anyone else observed this? Or can anyoen shed some light
on what mode it may be originiating from.

Thanks

Hey Rick
I have tryed to listen hear in GA and I have not heard it. This may be
that I'm in the skip zone of this signal. I hope you can find it. I'm in
the Northeast corner of GA. You also might be picking up a image signal
from a local radio station or a image from the inside of your rig. For
example I used to have a SB102 and on certian spots on 10 I could pick
up a CW beacon OFC was the Beacon. I also didn't live very far from the
local AM station in Aberdeen and I could pick up harmonics and images
from them. Anyway I hope I helped you

I would sujest that you post the CB radio stuff in the CB radio room. I
will say that for CB radio its a very fine page but it has nothing to do
with ham radio and these guys have closed minds when it comes to CB
radio. I would also invite you to check out my band plan for the
advancement of CB radio as well as ham radio too.

I just did a search using the term Amateur Radio and got thousands of
hits on the net for the term. For a hobby that the internet is
destroying or making obsolete we as Amateur Radio operators sure are
occupying a lot of its bandwidth.

And it appears we're communicating more in this medium. <GRIN>

Yeah Yeah Yeah, and if we wanted to hear you whine we'd call your wife.
Besides most of you Hams have a CB radio too, but of course you'll never
admit it on thig NG, nope, you'll just change your name and post in the
CB NG. And besides it's Amateur.misc not ham.misc and were all amateurs
when it comes to radio regaurdless of wether it's CB or Ham.

I have purchased from HRO via 800 number and over-the-counter. Never had a problem. I deal with the store in Woodbridge, VA.

Has the thought occurred to you that there are things you could do to alleviate the situation, other than posting on the internet -- such as:

1. Call HRO and work it out with them.
2. Call your credit card company and tell them that you were mis-charged. They will not honor the charge until things are straightened out.

Maybe when it is all straight you will post the rest of the story.

When did you conduct a survey regarding amateur radio operators and CB equipment that led you to state: " ...most of you Hams have a CB radio too,... "

I have been an amateur radio operator since 1958. Do not own, have never owned, have never wanted to own anything associated with CB. Fellow gave me a box of CB radios one day when I stopped at a yard sale. I thanked him, put it in the back of my truck, and deposited the whole mess in the first dumpster I saw.

To all of you who took the time to discuss Burt Fisher a few days ago, may I point out that none of you caught the fact that Mr. Fisher does not have a good grasp of spelling. Please look at his key word commencing with the letter "c".

This is an email of exasperation...why do you take the time to even discuss this? Would you really talk about him, no matter who he is, and no matter how intelligent or stupid he really is, when and if you were face to face? I do not think so.

Hi all and thanks for reading this.

The May newsletter for the Southside Amateur Radio Society Inc is now available for download at http://www.qsl.net/vk4wss

Articles in this issue include: -

Feature Article - Your First H.F. Transceiver
Golden Antenna Award
Trivia - Why Radio Amateurs Are Called "Hams"
The Double Windom
Funnies
CB to Six - Part 3 of a 4 Part Series
Travel Host Scheme
Club News
Odds and Sods
Schematics - A simple Power Supply

Back issues are available.

Other items include on line AOCP and NAOCP exams, a linear amplifier project, CW tips, Callbooks, Software and more. Why not drop by and have a look?

Message-id: <373CA0FE.719F6401@ix.netcom.com>
<<This is AF2Y replying. Stinson,you ought to be known as Mr.Charmin because of
all the crap you write.>>
Doc, your posting on the War for Southern Independence,
the meaning of the St. Andrews Cross flag and etc.
is one of the more thorough recitations of the "party line"
on these subjects I've seen lately.

It's always been easier to take this complex issue
and pervert it into a simple, hateful idea.
The post is, of course, riddled with misinformation, misunderstanding,
half-n-quarter truths and utter falsehoods.

It's not your fault and I don't condemn you personally for it.
You're simply repeating what's been forced into
your mind and heart by Hollywood, academe and the feds.
The issue isn't and never was as simple and simple-minded
as most Americans believe.
A century and a half of lies and propaganda forced
on american children has set this bigotry more deeply and
more perniciously then that against any other ethnic group.

You may find it difficult to believe, but no single group
silently suffers more hate speech and hate propaganda then
the People of the South. The hatred towards us
is even sanctioned and propagated by academia and
brutally enforced by agencies of the federal government.
I'll bet you don't see many college professors damning Jews.
They might even go to jail for it.
Damning Southerners is practically a requirement for graduation.

The fact that sheet-wearing inbreds and skin-headed
morons abuse and defame the St. Andrews Cross flag
does not make that flag a symbol of hate.
Hippies wore the US flag in the 1960s.
Does that mean the US flag stood for drug abuse?
Native Americans have used the swastika for centuries.
Are Native Americans nazis?
The Rellians use the Star of David as one of their symbols.
Does this mean the Star of David stands for UFO belief?

No. Of course not.
Most people agree those ideas are silly--

nutty upside-down thinking.
Until you talk about the St. Andrews Cross.
Suddenly, logic goes completely out the window
and brainwashing takes over.

It's easier for lazy people to point to a
Southern symbol then to deal with the real problems;
to go find a "boogieman" rather then frigging *THINK.*
They want someone to whom they might feel superior
and distract them from their own mean and degraded spirits.

What better way to justify themselves
then to regurgitate their training?
It's so much more satisfying to damn the people and symbols that
academe and the federal government have sanctioned for that purpose.
Southerners are ready-made scapegoats-- Step right up!
Ease your guilty conscience by pointing fingers
and speaking hate about that which you don't understand;

It's truly The American Way!

Sincerely,
David L. Stinson AB5S

<>
Doc, your posting on the War for Southern Independence,
the meaning of the St. Andrews Cross flag and etc.
is one of the more thorough recitations of the "party line"
on these subjects I've seen lately.
<>
It's always been easier to take this complex issue
and pervert it into a simple, hateful idea.
The post is, of course, riddled with misinformation, misunderstanding,
half-n-quarter truths and utter falsehoods.
<>
It's not your fault and I don't condemn you personally for it.<>>
You're simply repeating what's been forced into
your mind and heart by Hollywood, academe and the feds.<>
The issue isn't and never was as simple and simple-minded
as most Americans believe.
A century and a half of lies and propaganda forced
on american children has set this bigotry more deeply and
more perniciously then that against any other ethnic group. <>

You may find it difficult to believe, but no single group
silently suffers more hate speech and hate propaganda then
the People of the South.<> The
hatred towards us
is even sanctioned and propagated by academia and
brutally enforced by agencies of the federal government.<>
I'll bet you don't see many college professors damning Jews.<>
They might even go to jail for it.
Damning Southerners is practically a requirement for graduation.<>

The fact that sheet-wearing inbreds and skin-headed
morons abuse and defame the St. Andrews Cross flag
does not make that flag a symbol of hate. <>

Hippies wore the US flag in the 1960s.
Does that mean the US flag stood for drug abuse?<>
Native Americans have used the swastika for centuries.
Are Native Americans nazis?<>
The Rellians use the Star of David as one of their symbols.
Does this mean the Star of David stands for UFO belief?<>>

No. Of course not.
Most people agree those ideas are silly--
nutty upside-down thinking.
Until you talk about the St. Andrews Cross.
Suddenly, logic goes completely out the window
and brainwashing takes over.

It's easier for lazy people to point to a
Southern symbol then to deal with the real problems; <>
to go find a "boogieman" rather then frigging *THINK.*
They want someone to whom they might feel superior
and distract them from their own mean and degraded spirits.

What better way to justify themselves
then to regurgitate their training?<>
It's so much more satisfying to damn the people and symbols that
academe and the federal government have sanctioned for that purpose.
Southerners are ready-made scapegoats-- Step right up!
Ease your guilty conscience by pointing fingers
and speaking hate about that which you don't understand; <>

It's truly The American Way! <> Doc AF2Y

Damn straight, while they turn those pieces of crap, we work the DX. All
you need is wire and an amp, but don't let them hear what you're using,
Doc.

If you do they'll tell you beams make them superior operators and
"skilled contesters".

If they were skilled they would be using WIRES.

But if you throw enough money at a DX station you're sure to work it
eventually.

Now if they would only LANDSCAPE, dammit....

AF2Y calls N0VFP a Nazi and the reverse. Whiten does the same.

I take it then, there are good ham Nazis and bad ham Nazis ? This was the principle we see in Schindler's List. Oscar Schindler, a war profiteeer responsible for the deaths of thousands of fighting men, then proceeds to lose his balls after awhile. Geezus, too late for the poor bastards who met the Unterstormfuhrer before this grand conversion.

A Nazi is a Nazi. Now who here will rise and declare himself a good party member ?

Don't all you Great Men stand up at once.

Ho-hum. Same old rhetoric, George. Veiled threats and innuendo mean
nothing to me. If you have something, prove it. But, make sure you can
back up your claims with some supporting evidence. The stuff you spew
forth here doesn't stand on it's own; everyone knows you suffer from a
lack of credibility.

By the way, are you really certain that I am "Bus Station Bobby?"
"Sammy" might be somewhat displeased if you were to smear his name
about the internet without provocation.

Have a nice day!

3929. Free Amateur Radio Logging Software

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-15 00:00:00 UTC
From: SRC Software <SRC_Software@hotmail.com>
Message-ID: <373D3FC0.A6C4C3A0@hotmail.com>
Source record: 142908

SRC Software's Amateur Radio Utility v1 Release 1.100
=====================================

Tired with the standard old logging applications... un-user-friendly interfaces etc?

Well, your time of searching may be over!

The long awaited next release of SRC Software's Amateur Radio Utility v1 is now available (1.100). It uses the windows interface, which allows quick and easy logging. Many features are included such as automatic frequency identification, contact information, full locator support with distance mapping, shortcut and custom keys, full QSL label printing support, import/export partial logs, the list goes on!

Major additions to this new version since version 1.001
===================================

Added customised QSL label printing support
New database added which stores information about your amateur radio setups
Now allowed to export selected contacts, as well as exporting the whole logbook
Import wizard allows a selection of contacts to import
On click information displayed when users clicks on a log entry
QSL label grabber wizard to help you to collect contacts for QSL labels
More pages added to help file
Extended contact information for more details about stations
UTC time offset feature

This programme uses database files which allow data to be entered in any order and format. It is designed mainly for home day to day logging and also after contest logging and general sorting out. It supports import/export to and from RSGB LOG format, a commonly used computer logging format, and you can choose the contacts you want to import, rather than doing the whole file. The programme will re-index your log into date/time order, meaning that contacts can be imported how you like. There are hundreds of other features which you will be able to see when you start using this newly developed application.

AND THE BEST PART OF IT IS THAT IT IS COMPLETELY FREE!!!!!!!!!

YES : It is... all you have to do is download it, enter a few details into the page and click on register. As soon as possible I will send you the registration details, no costs or catches apply!!!

If you already have a previous version installed (1.001) you can get the update patch from my website. You will not have to register your new copy again, as you will automatically have the full version.

Background Info

This programme has recently been produced, and is available to anyone. It was programmed, designed, written and debugged by me, Simon Chudley, a student in the UK. I am a qualified amateur, M1BWT, and have been operating for about two years ish. Please distribute this programme as you wish, as long as all the files are exactly as I distributed them, and EVERY USER THAT INSTALLS A COPY REGISTERS - REMEMBER, REGISTRATION IS FREE!

How?

Simply go to the following website and click on Products. Then select Amateur Radio Utility v1. You will be able to see more detailed informaiton on that page, and to download it, scroll down to the bottom of the page. You will then have to select E-Mail, and click on Register AMV1. Enter your details along with the programme details (you can find these out from General Preferences) and click on submit. I will send you the registration code via e-mail asap. View the readme.txt file for installation details after unzipping the zip file.

Any problems please contact SRC_Software@hotmail.com

David,
You assume too much on too little data.
No, Actually, I am in my mid thirties, if thats really anything to you.

Besides, thats not the point of this thread.

The point is: if someone violates the rules of the workplace,
then he is subject to those rules in so far as punishment is
concerned..

I know way too many people that work in government, and a lot of them
are serious about this (yes, your tax dollars at work).

Oh well, it doesn't matter to you, considering that you probably
don't work for the government.

Well, Well, Well, here is another fine reply to my message! RUDENESS RAINS around here! This is my point, You like most HAM's need to get a life! Like your hobby! For like your hobby it's dieing thanks to people like you!

But no need to cry, when your HF bands are turned into wireless phone bands by the other countrys that see HAMS as a band of X-CBers that bring there CB IQ with them. You will have no place to go! Now me on the other hand will have a place to ture to, The Internet is alive! Un-like Ham Radio.

Just keep up the good work my friend and it will soon be GONE!

You're invited to visit the "K4ADL Kartoon Korner" for original ham radio cartoons. The site is new, so there are only two 'toons available at the moment; new ones will be added often. No ads, banners, commercials, or sponsors...just a little cartoon fun with the most carefully-crafted drawings you have ever seen.

>Agreed. About the only way I could kill someone with my scanner would be to
>beat them over the head with it. Probably would do more damage to the
>scanner than to them, anyhow.

Are you so sure about that? Have you checked to see if the local oscillators radiate rubbish through the unshielded palstic case when you are tuning about? Do you know what frequencies the LO is on when you are tuning to your favourite station? Do you know if your seat assignment and therefore your scanner antenna is near a window closest to the aircraft VHF Com antennas?

Chances are very very slim that you will interfere with nav receivers, sure, but how would you know? (don't get smart. I'm an Avionics Tech and my scanner gets used as test equipment every day) I am also surprised that more of these devices don't interfere with the miniscule GPS signals.

I was asked to turn my scanner off last time I was flying from Orlando to San Francisco, which was a pity, I was having a ball listening to Alabama Police, broadcast AM and FM and hams whilst flying back. They do have that right, it is backed up by the FAR's (Federal Aviation Regulations) and they can have the biggest, burliest cop waiting for you at the gate if you refuse.

Of course, you just be a whole lot more subtle about it. throw the radio along with your keys and small change into the little wooden tray at the xray and let them scan it (pun eh?). They will think it is a mobile phone and cause you no more grief. I know this works, it works for me, in the USA and here in Australia.

When you are wandering the airport listening, don't draw attention to yourself, play it smart and leave the radio in a pocket or on your hip, listen with a pair of walkman headphones, no-one will know the difference. On my last trip I was carrying both scanner and 2m HT. Just have a jacket with big pockets.

So...instead of FIRST contacting your dealer to explain the problem...

You decided to post your story here.

I believe most reasonable folks would simply call their dealer up the
first available opportunity and deal with the matter at hand.

NO - HRO has no long "history" of mistreating their cleints.

I certainly hope that (a) you have been totally truthful with your story
here, and (b) as soon as HRO clears this matter up with you, that you'll
post the entire solution arrived at.

You might have a difficult time doing that to something belonging to me. Or to a few other hams I can think of. Not only would you fail in your childish and dangerous endeavor, but you would be wrong, you would have committed an assault aboard an airborne aircraft, and you would go to jail, after getting your bumps and bruises tended to.

Now, should you see someone actually TRANSMITTING or RADIATING ANY STRAY RF such as is commonly present when scanners are in use, without proper permission, you would have reason to be pissed, but there are other, safer, legal ways to stop it. Don't even THINK about grabbing something from the hands of someone you don't know. That is, above all else, very bad manners. Psychopathic idiots are sometimes humored, but never taken seriously. Do have the decency to act in a rational manner and take more practical approaches to the problem before assaulting anybody.

Well, the best way to insure that a company like this doesn't
mess with you is to order everything by credit card. When they
overcharge / fail to ship / ship wrong product, etc, you just
call up the credit card company and tell them that you were not
charged fairly, and to cancel payment of the charge to the card.

I've only had to do this once, and the problem I had with the
company was cleared up in about 12 hours, and they overnighted
me the correct product, along with a container to mail the incorrect
product back to them, postage paid. This was alot better than
trying to convince the operator at the end of the "hold for 20
minutes" line that I actually had been shipped the wrong product..

> other flute players called you lazy for not wanting to waste time
> learning an instrument you had no intention of ever playing?
>
> They have no desire to use morse code. How silly it would be to waste
> the time to learn morse code, only to forget it once one has the license
> to go ahead and use voice.
>
> Only people who intend to USE morse code should learn it.

90% of the automobile drivers out there don't intend to use anything
they *learned* to get their drivers license, why not drop that
requirement too? Just let 'em all drive, drop the roadtest
requirement!

>That's ok we can argue all we want about keeping the code test, but something
>needs to be done to bring people into amateur radio not keep them out.

Ever stop to think that maybe the government intended to keep some
people out? Why not drop the code requirment for commercial broadcast
while we're at it?

>I suspect the same small fraction of 13 year olds are still learning code. Like many
>things that require a little work up front, CW is worth it.
>73

And worth some pride too... ever heard of the rite of passage. Why
not do *something* you can take pride in instead of changing the rules
so you don't have to apply hardly any effort?

> If you're not wired for it, there are many other modes to use. That is one of the
> beauties of ham radio.

Absolutly!!! The whole spectrum above 50 mhz is wide open for those
who have no interest in CW. You knew it before you got into radio...
So what's the problem? (but be forwarned... you'll hear alot of CW
there too. Moonbounce, contesting, etc.)

>The key to keeping code from dying is those of you who are proficient MUST take
>those of us willing to learn under your wing and pass it on to us....

Seems all the *old Timers* around here left me to my own devices...
Wonder *how* I did it..... hmmmmm

>If you efforts to find someone in Ft. Worth fail, Why dont you and your
>buddies get on the 2 meter radio and teach each other?

5 wpm is NO CODE. It's like an open book test. If you *try* to learn
the code with *any* effort at all, you *will* pass the 5 WPM test.
From there you'll meet hundreds of others in the same boat on 40 & 80
mtrs.
Plenty of practice to hone your skills. I had a problem getting over

10 wpm myself once licensed as a P, but got on the air with a friend
of mine for an hour a nite over the period of a week, pushing
ourselves to the limit, and passed General that weekend. *USE IT* once
you get it.

> I have the skill to pass the practical test (and have with the training software) through
> Advanced, yet I hold only a Tech ticket because of the code. I am still trying but I
> haven't found my method for learning code yet. I memorized the tapes, and have tried a
> couple of different computer tutor programs, but so far I have not been able to master
CW.
> I will get it eventually, but it is not coming easy.

Sounds about normal to me...
if you study... it will come......

>If your son doesn't have to learn or like radio to enjoy Morse Code,
>then people who want to use or like radio do not have to learn Morse
>Code.

Did you're mama ever say "who ever said life was fair?" Just 'cause
you want to learn gun handling doesn't mean you have to kill someone.
I don't have a son, but I have to pay school tax.... WHAAAAA!

Hope I hit a few sore neves here. Amateur radio isn't the only thing
in life that will require you to learn something proficiently to do
(unlike my spelling to post to the group).

Take a look back at all the things that got lax on the rules in the
past and see what happened to them. Do you really want amateur radio
to go that route?

The hardest part about learning the code is to just put away all
the excuses you have as to why you < can't / don't have time for /
shouldn't have to / are just to darn lazy to > learn the code *and do
it.*

Next thing you know, after they start packaging up an extra class
radio amateur operators license in all the HF radios (sound familiar?)
They'll be whining that the FCC should abolish CW off the airwaves
'cause they can't handle not being able to understand what is going on
on the bottom half of the band.

I might could stomach letting a small portion of the prime DX bands go for the slow coders (P's),and leave the rest of the licese structure alone. But I hope at least that they leave the extra class alone so that *some* of us can keep a little pride in something that we *worked for* instead of crying about it 'till we got it for next to nothing.

If anyone out there is interested in *learning* CW and going to EXTRA in 6 months, e-mail me. All it requires is about 4 hours a week of *dedication*... You have to *want to do it* to do it.

The others.... FLAME AWAY, got my asbestos boxers on.

Breaker Breaker x.19x.xxx.xxx, catch me on the bottom 150 khz of the band good buddy, c'mon back!

3952. New B.A.R.F. Mail and News server!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-16 00:00:00 UTC
From: dspman@aol.com
Message-ID: <19990516191624.01634.00000152@ng-cg1.aol.com>
Source record: 142776

The Better Amateur Radio Federation is proud to announce the launch of its new and exciting B.A.R.F. e-mail service. Members, supporters and friends are urged to visit the B.A.R.F. home page and sign up for B.A.R.F. mail. It takes less than five minutes to open your B.A.R.F. e-mail account. This account is totally free and you can access it anytime (24 hours a day - 7 days a week) from any terminal - at home or away. This fantastic service is made available by the B.A.R.F. membership around the globe and our friends at ZZN. Visit the B.A.R.F. page at:

http://www.angelfire.com/in/w9xn

You can also visit the B.A.R.F. mail domain server at:

http://barf.zzn.com

But wait... that's not all the B.A.R.F. has to offer! If you like discussion groups then you are cordially invited to participate in the B.A.R.F. Forum. The B.A.R.F. Forum is dedicated to the free, open and robust discussion of amateur radio's hottest topics. The forum is open to the public. We invite everyone, friend or foe, to join in the lively discussions that are certain to develop. The B.A.R.F. Forum is a service of the Better Amateur Radio Federation and our friends at Delphi. Visit the B.A.R.F. Forum at:

http://www.delphi.com/w9xn/start/

Start your summer season off in style by participating in the services offered by the B.A.R.F. You'll be glad that you did!

3953. Re: rogue cancels logged by usenet admins

Newsgroup: rec.radio.amateur.misc

<< bject: rogue cancels logged by usenet admins
From: postmaster@warez.phantom.com (Dave)
Date: Sun, May 16, 1999 10:24 PM
Message-id: <slrn7juhcd.ip.postmaster@galileo.cris.com>
<<<<<<<It's EASY to inform Bell South of what's going on. Send a hyperlink of
this posting! Their address is abuse@bellsouth.net
If you don't know how to link, it goes like this.DRAG THIS POST TO THE FAR
RIGHT OF YOUR DESKTOP BUT MAKE SURE THE HEART IS SHOWING. Then click on your
standard compose screen for E-mail. Drag the E-mail window to the left to make
sure the heart is still visible and make sure the E-mail screen is IN FRONT of
this particular post. In the message box put something in like:"I'm annoyed at
how one or more of your clients are besmirching your service. Then put your
cursor right on the heart and hold DOWN,DO NOT CLICK. As you're holding down
your mouse clicker, DRAG THE HEART RIGHT INTO THE MESSAGE WINDOW and let go.
The hyperlink will be there and you can then send me a thank you E for teaching
you a trick. I'm new to cyberspace but am becoming as much of a genius on it as
I am on ham radio and I'm modest too. AF2Y, Doc>>>>>>>>>
Usenet monitors have now noticed the rogue cancels from BellSouth.net.
From the most recent cancel report on news.admin.net-abuse.usenet, it
is clear that they have been logged. The next step will be for others
to notify BellSouth of the problem and subsequently to cut off its
newsfeeds if it doesn't correct the problem. The Atlanta canceler's
days are numbered, and (s)he may even wind up in court if BellSouth
follows its past practices.

<< AF2Y? He has claimed on twenty
meters that he has friends in the Teamsters Union in N. J. who will
take care of people. Maybe that is what he means. This should be
brought to the attention of the Deja News group.<<<<<Jesus A,Christ,Davies..you
need your redneck head examined. Yes indeed, I was affiliated with the
Teamsters for 20 years and apparently you are one of those illiterates who
think that the word Teamster denotes thugs and crime. Well let me straighten
you out, you misinformed misanthrope. That union has and is providing truckers
e.g. with jobs and security and wonderful benefits. In all my years of
association, I never heard any of the union members bitch and gripe about their
participation. When I dealt with either a Teamster member or official, I was
treated very well. They put a lot of bread on my table for which I'll always be
thankful. The problem is that you redneck recta believe everything you see in
the movies and TV and in newspapers. You live insulated and isolated lives with
your KIN, rather unaware of reality and truth. And so I'm telling you to keep
your stupid remarks about the Teamsters and my association with them to
yourself because you don't know what you're talking about. Instead of believing
the "Youngblood line," KT4TR, the Zero from Vero,come to me for the right
information aboout the union and I'll set you straight. I never met a nicer
bunch of folks than Teamster members and officiuals and you can take that to
the bank. I DID! AF2Y, Doc>>>>>>>>>>> Maybe they will deal
with someone who talks about a "hit list" and brags about tough
Teamster officials who will act out his threats. There is no place for
threats on this newsgroup.

DoNkBoY99@yahoo.com Is a loser! I know nothing about the so called DoNkBoY98. Oh so the truth comes out you truly know nothing about computers your girl friend does it for you. Wow she must be a real loser if you are her boy friend she has losey taste in trash. Maybe she feels sorry for you or if she has a loser then she dosen't have to compete with the rest of the world. What is she a janitor for Lucent. I can't imagin a loser like yourself even having a girlfriend. So loser you can keep saying this and saying that but we all know you are a peice of trash. I think that you are so trashy that we can't even assign a race to your sorry ass. My sujestion to you is stick a gun in your mouth and pull the trigger. Do us all a favor loser.
I hope you die soon
Oris

SB DX @ WW $OPDX.409
Ohio/Penn DX Bulletin No. 409

The Ohio/Penn DX PacketCluster
DX Bulletin No. 409
BID: $OPDX.409
May 17, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, AJ3M, W3UR & The Daily DX, N4VA, N5VT, N6RT, K8YSE, W9DC, A35RK, DJ5AV & DX News Letter, DL5KAT, DL9GDB, G4BUE & DX News Sheet, GM3WOJ, GM4YXI, IK1QBT, JA1ELY, JA1IST, LA0CX, LU9AY, ON6TT, OZ8AE, PA3GIO, SM7PKK, VA3JFF, VK8AV, 4L5O and 9A4KK for the following DX information.

4L, GEORGIA. Omari, 4L5O, informs OPDX that Georgia has two autonomy republics, Apkhazia and Adjara. According to Omari, only the following prefixes and suffix are good (anything else is a pirate):
1) Apkhazia (ex-UF6V) can use the prefixes/suffix: 4L1-4L0 and the first letter in the suffix "V" it means APKHAZIA.
2) Adjara (ex-UF6Q) can use the prefixes/suffix: 4L1-4L0 and the first letter in the suffix "Q" it means ADJARA.
For more details/questions contact Omari via E-mail at: 4L5O@caucasus.net

4U1UN, UNITED NATIONS. It has been reported that Mats, SM7PKK/5X1Z, and Peter, ON6TT/5X1T, will be active from 4U1UN on May 16-18th, right after Dayton. However, reports indicate that there are no antennas in place at 4U1UN for DXing. The only antenna available is a beacon antenna which is owned by the beacon group and not available for normal amateur use. LATE BREAKING NEWS.... Your editor talked to Peter at the Dayton HamVention this past weekend, and he told me that Mats and he will "definitely" operate from 4U1UN. He also said that there are antennas in place to use. Also, Peter and Mats will be traveling to Kosovo in about a week.

5P, DENMARK. The CEPT Amateur Radio Club will sign 5P1ER from the European Radiocommunication Office in Copenhagen during the CQ WPX Contest. The operator will be OZ8AE. All QSOs will be QSLed via the bureau.

6O, REPUBLIC OF SOMALILAND (Possible new one? WFWL!). You still have a few days to work Baldur/DJ6SI and Franz/DJ9ZB as 6O0X and 6O1Z, respectively. Operation is to terminate May 18th. DJ6SI will operate CW while DJ9ZB will operate SSB. They are operating from Hargeiza, the capital city. QSL

via their home callsigns. Somaliland declared independence from Somalia on May 18, 1991, although the independence of Somaliland has not been recognized by other countries. Somaliland has its own elected government and parliament. This is not enough to be added as a new "ENTITY" for DXCC. Somaliland must meet one of the three criteria (under DXCC Rules Section II Part 1): 1 - UN Member State; 2 - Assigned a callsign prefix bloc by the ITU; and 3 - A separate IARU Member Society. If anything, this operation "MAY" count for T5 or nothing for DXCC. As always, WFWL! More information about Somaliland can be found on the Web site at: http://www.anaserve.com/~mbali/home.htm

9H3, MALTA. Dieter, DL9GDB, will be active as 9H3UT from May 22nd through June 3rd, from Comino Island. QSL via DL9GDB via bureau or direct to: Dieter Brachmann, Kolumbusring 56, 18106 Rostock, Germany. QSL requests are possible via E-mail to: dl9gdb@t-online.de

A35RK SPECIAL REQUEST. Paul, A35RK, has recently been plagued with equipment and antenna failures and is in need some help getting new rigs, antennas, and parts to Tonga. If anyone is planning a trip to Tonga, and would be willing to hand-carry some "stuff" for him, PLEASE contact his QSL Manager, Bob Preston (W7TSQ) at: w7tsq@aol.com Or meet Paul and Bob on 14155 kHz at 0330z. Paul states that he will gladly pay all "over-weight baggage" charges and any other additional travel expenses incurred. Also, he will gladly "put you up" for free at his family guesthouse on Lifuka Island, Ha'apai, while you're there.

ATTENTION CANADIAN ISLAND AWARD CHASERS! Jeff, VA3JFF, will be activating 2 islands on June 5th. Starting at about 1700z, Jeff will operate from ON-149 (Bobcaygeon), and then at about 1800z he will relocate to ON-NEW (Buckeye Centre) and operate from there for a few hours. He will use his callsign VA3JFF on both islands.

CQ WW SSB CONTEST "October 2000". Chris, GM3WOJ, reports that the North of Scotland Contest Group (GM7V) is mounting a major expedition to the Shetland Islands for the CQ Worldwide SSB Contest in October 2000. They hope to sign a special callsign ??7V - a possible new prefix to identify Shetland from mainland Scotland - more details later.

CY9, ST PAUL ISLAND. The "DX News Sheet" reports that Robbie, VY2SS, and possibly 7 or 8 other VE and W operators will be active from here June 5-14th as CY9SS. Activity will be on CW/SSB, RTTY, SAT and possibly EME. Operations will be on 160-70cm (including WARC). QSL via VY2SS.

DX CONVENTIONS.....
The 8th Annual New Orleans International DX Convention will be held on Friday and Saturday, August 27 & 28, 1999, at the Royal Sonesta Hotel on Bourbon Street in the scenic and historic French Quarter of New Orleans, Louisiana, USA. The agenda is currently being assembled and details will appear in the future. The convention will include DXpedition presentations, technical presentations, reports on ARRL DX Desk and DX Advisory Committee news, and QSL checking by an ARRL DX Desk representative from headquarters. The activities culminate with

a gala banquet on Saturday evening at which the Convention Board of Directors' selection of International DXer of the Year is honored and the featured DXpedition presentation is given. A hospitality suite with a strolling balcony view of Bourbon Street is provided on Friday night and on Saturday night following the banquet.

The International DX Convention (in the year 2000) will be held at the Holiday Inn in Visalia, April 14-16th. To make early reservations call 209-651-5000. They have about 250 rooms and about 100 have been already taken.

DX1, PHILIPPINES. "The Daily DX" reports that Martti, OH2BH, will be active during the CQ WPX CW Contest with the "ultimate callsign" DX1S. Yes, "DX IS" Martti.

EAST TIMOR (Closer to becoming a new one?). The residents of East Timor, Indonesia (YB) will vote on August 8th in a referendum for autonomy under control of Indonesia. If they reject it, Indonesia has pledged to give East Timor full independence.

EA8, CANARY ISLANDS. Kreso, 9A4KK, will be active during CQ WPX CW Conetst as EA8/9A4KK on 10 meters only. Also, he states that he will possibly be active before and after the contest on SSB. He will be on EA8 from May 23rd through June 6th. QSL via home call (bureau or callbook). Also, look for Fernando, EA3KU, to be active from Tenerife Island in the next CQ WPX CW Contest as ED8PP and also as EA8/EA3KU before and after the contest. QSL via his home callsign: Fernando Martinez Lizama, P.0. BOX 69, L'Ametlla de Mar 43860, Tarragona, SPAIN

GM ISLAND DXPEDITIONS. Don, W9DC, informs OPDX that he hopes to make a number of contacts with NA stations and try to introduce them to the World Lighthouse Award and the Scottish Islands Award. He will be active from the following Scottish Islands:
MM/W9DC plans to operate with GM3VLB from Fidra Island on Monday, May 31st on 7, 14, and 21 MHz, using the IOTA frequencies +/- 5 kHz on SSB with possible CW operation if necessary. Fidra is an island in the Firth of Forth and counts for IOTA-EU-123, World Lighthouse LH-0313 and Islands of Scotland Award FF-04.

MM/W9DC/m plans to operate from the Island of Mull, IOTA-EU-008 and IOSA NH-15 on June 5th and 6th.

On June 6th and possibly June 7th, MM/W9DC will try to activate several Scottish Islands with special attention to Seil, FL-03, Luing FL-04, and Kerrara FL-02. On June 7th, he will try to activate Davaar Island which does not count for an IOTA but does count for World Lighthouse Award LH-0724 and IOSA CL-09. Most activity will be on or near 14260 with special attention to stations outside Europe.

Since access to the islands is dependent on weather conditions, alternate Scottish island operations may be chosen at the last moment.. Any requests or additional information may be obtained from Don via E-mail at: W9DC@innova.net

II1, ITALY. Tony, IK1QBT, informs that the Italian Western Riviera DX team callsign "II1R" will be active during the 1999 CQ WPX CW Contest as Multi/Operator category. QSL route is via I1NVU new's QSL Manager starting April 1st, 1999, address: Claudio Di Pietro, Via G.Galilei 424/10 zip 18038 Sanremo - Italy, via direct or bureau.

IOTA NEWS.....
AS-024. Three members of the Yamato Amateur Radio Club (JA1ZEK) are going to IOTA DXpedition from Ishigakijima, Yaeyama Island, from June 4th (0600z) to June 6th (2300z). Operators will be Jun/JJ1EQW, Kaoru/JA3MCA and Aru/JA0KNM, and they will sign homecall/JR6. Activity will be on 40-10 meters, SSB/CW. QSL via home call, direct or JARL bureau.
JJ1EQW - Junichi Sato, 6-1-9-2 Turumaki, Tama, 206-0034 JAPAN
JA3MCA - Kaoru Tachibana, 1-7-5-403 Tukimino, Yamato, 242-0002 JAPAN
JA0KNM - Seiich Aruga, 546-7 Shimoturuma, Yamato, 242-0001 JAPAN

AS-097. This was received a little late, but if you were lucky to works Keith, GM4YXI, as 9M2/GM4YXI, he was on Besar Island, West Malaysia. QSL to his home callsign: Bureau or PREFER DIRECT.

EU-105. The Radio-Club "F5KAC" will be active May 22-24th from Stagadon Island (DIFM-MA-094). QSLs will be sent automatically via bureau. QSL direct is OK at: F5KAC / Stagadon Island, BP 5, 45270 LADON, France. QSLs for SWL can be requested via E-mail at: F11556@aol.com

JT, MONGOLIA. "The 59(9) DXReport" states that Laurence, GM4DMA, is expected to be active from here in July. There were no other details given. QSL via homecall.

KH0, NORTHERN MARIANA ISLANDS. Ban/KF4VSV, Michy/JH2CYU, Akio/JH2QFY, Kou/JR2BUM, Goto/JR2XKV, Yasu/JJ2CYO and Yasu/JS2ITP will be active on 160-6 meters SSB/CW and possibly RTTY from Saipan. Activity will be from June 12-15th. They will focus on the WARC bands and 6 meters (50.090 CW and 50.115 SSB). QSL via home callsigns, except KF4VSV (QSL via JF2WXS).

KP2, VIRGIN ISLANDS. Jeff, N5TJ, will be active signing KP2/N5TJ from St. Croix on May 25-31st. This will include an entry in the CQ WPX CW Contest. During the contest, Jeff will sign WP2Z. QSL WP2Z via KU9C. Outside of the contest Jeff will sign N5TJ/KP2. QSL N5TJ/KP2 to his home callsign.

OJ0, MARKET REEF. Uli, LA0CX, informs OPDX that the announced OJ0 DXpedition has been moved from the last weekend in June to the first weekend of July. Look for operators OH0RJ, LA3IKA and LA0CX to be active July 2-5th on all bands from 160-6 with a stress on 12 meters. QSL via their homecalls.

PACIFIC DXPEDITION. Mats, 5X1Z/SM7PKK, announced this past week that a DXpedition is being planned for T31 Kanton Island and ZK3 Tokelau. The

initial itinerary is as follows:
T31 - September 23rd through October 3rd (1999)
ZK3 - October 7th through October 12th (1999)
They intend to have three stations with 1KW which will be manned by 6 operators. There will be beams for all the higher bands including the WARC bands and verticals for the low bands. The operation will feature one SSB site, one CW site and one WARC/Lowband/RTTY site. More info will come out after the Dayton Hamvention. OPDX InterNet Subscribers will receive an additional bulletin containing Mats complete press release.

QSL INFO AND NEWS.....
FO0PAP AND FO0MAC QSLS. John, K8YSE, informs OPDX that the cards have been received from the printer and processing will begin this week.

OOOPPPSS on my OOOPPPSS!! (Must be old age setting in!) The dates for the FO0XUU operations in last week's bulletin (and the week before) were listed wrong. Please change the date for the Marquesas operation to January, 1998, and the Australs to Februbary, 1998.

Mats, LU9AY, reports tha NU4N is now QSL Manager for LU9AY, L29AY, WL7KY and CP6/LU9AY.

Alan, VK8AV, informs OPDX and the DX community that due to the near defunct state of the VK8 QSL bureau, to please QSL VK8AV direct, as per the CBA, which has been current for the past several years. Alan has just returned home after travelling for nearly 14 months. He states that the beam is not up yet, and the amplifier is 'sick'. So it will probably be the beginning of June before he is fully operational. QSL to: Alan Viegas, P. O. Box 3718, Alice Springs NT., Australia 0871.

The BI5D log is now online at: http://dx.qsl.net/logs
The BI5D Web page is at: http://www.qsl.net/bi5d

S21R QSL Manager. Larry, N4VA, reports that he has the logs for June 28, 1996, until October 9, 1998, and can answer requests for S21R QSLs. QSL via: Larry Vogt, N4VA, PO Box 12, Springfield, VA 22150 USA

SV9, CRETE. Look for OH2M, OH3LQK and OH9MM to be active May 24-31st. Their activity will be on 160-10 meters CW/SSB. It will probably be an entry in the CQ WPX CW Contest.

TK, CORSICA. Bert, PA3GIO, will be on Lavezzi Island (EU-164, TK011), transport permitting, between June 3-7th. He will also be on Grande Sanguinaire (EU-104, TK002) June 9-12th. He will be signing as TK/PA3GIO/p on both islands. Also, there will be some activity as TK/PA3GIO/m or /p on Corsica (EU-014). Check out his 1998 QSL and operation pictures on: http://www.xs4all.nl/~pa3gio/1998-05-2/index.html

W1AW/8 (Late breaking news!). It was announced at the Dayton HamVention that in the year 2000, HamVention attendees will be able to operate as W1AW/8 from the convention. EXPECT long lines if you want a chance to operate.

ZK1, SOUTH COOK ISLAND. Jim, ZK1JD, from Rarotonga, has been quite active recently on 10 meters SSB. Check 28445 kHz after 0100z. Also, check 17 meters on 18130 kHz around 0830z and 20 meters on 14174 kHz around 0330z. QSL direct to Box 491.

>some of the IF diodes for pin diodes reducing receive noise floor
>considerably ...
>

Mark: I don't know about Bill, but I had my Yaesu 890 converted to the pin_diode mode by KK7TV. He is a factory authorized fixer of Icoms also, so you might want to check him out. He has a web site, but due to a MAJOR cockpit error, I don't have a URL handy. While the actual reduction in noise floor can be measured, I'm quite satisfied with the warm_and _fuzzy feeling that I get from having the mode done! When I save up the coins, I'll send him my 990 to have the diodes replaced in it.

Hi gang,

I had purchased a Butternut HF-2V vertical from HRO in
Salem, NH. The Butternut was not complete with some parts
missing. HRO sent me a replacement the same day I phone them
and also a UPS call tag to return the original.

I think that is great service. Guess where I continue to
shop?

3966. Re: CB Website

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-16 00:00:00 UTC
From: Joe Schlatter <w4hh@3wave.com>
Message-ID: <XtK%2.1052$nc1.117460@typ12.nn.bcandid.com>
Source record: 142790

Jim:

Every point that you make is valid. Why the animosity? My lack of respect for CB'ers stems from several factors.

-- The vast majority of those whom I have encountered know less about properly installing and operating radio equipment than my two housecats. They do not understand -- and do not want to understand -- what you get into when you start modifying equipment, cranking up the power, cranking up the audio, splattering all over several frequencies, and the like. The result is that I get called by irate neighbors for interfering with their TV/stereo/garage door opener when I am not even on the air. The source of the problem is some idiot who is trying to be the Channel King by blasting everyone else off the air with his "leenyer." If you want to push several amps of RF up your ass in the privacy of your own home, that's your business but RF tends to travel all over the place and, when it does, you (I) am bound to act responsibly. I have met few CB'ers who understand this concept.

-- There is a steady migration from 11 meters up into the 10 meter amateur band. I lived in Northern Virginia for several years and the CW portion of 10 meters was, at times, nearly unusable because of the "freebanders." I am now in NE Tennessee and there are a few of them here. My KW amp is in the closet so I am not able to carry on 10 meter CW contacts on top of them.

-- I guess it's sort of like the disdain that I have heard NASCAR drivers express for wannabes who race on city streets.

Anyone who sees the light, studies for his/her amateur license, and behaves him/herself on the amateur bands is welcome.

I am a 14 yr old. I got ham radio before I got the Net. My parents convince me that idea about the Internet. But, I still use ham radio. HAM RADIO IS A TOTALLY DIFFERENT EXPERIENCE THAN THE INTERNET! I'm even thinking of using digital modes.

I Have A Cobra 148 GTL As It Was New, Used Only Once.
Has No Mods Other That A Power Peak Out.
The Radio Was Purchased New In 1992 And Has Never Been Mobile
I Do Not Have A Mounting Bracket
And Does Include The Power Cord And The Microphone.
This Radio Is In As New Shape And Transmits And Receives Right On Frequency.
This Is The Older More Sought After Rig.
I Can E-Mail Pics If Interested.
The Price Is 125.00 US Which Includes Shipping In The Lower 48
States Or Trade For Misc Ham Gear. Preferrably CW

3979. 440 in Los Angeles

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-16 00:00:00 UTC
From: corbin@ampere.physics.ucla.edu
Message-ID: <7hnbb9dae1@carroll.library.ucla.edu>
Source record: 142803
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

As some of you may know, the coordinating body for 440 MHz in
Southern California (SCRRBA) adopted a new plan for the band
that moves us to 20 kHz spacing and adds 50 new repeater pairs.

For reasons the rest of us can only speculate on, SCRRBA has
decided *not* to use these new pairs to remedy the gross disparity
in the ratio of slots available for open repeaters to those available
for closed and private systems: Prior to the reorganization 8 out of
200 pairs were available for open systems, under the new plan - 12 out
of 250 will be available -- while one may reasonably argue that private
and closed systems have their place, *95%* of the repeater subband
remains off-limits for the general amateur radio community - how does
this serve the spirit and mission of the amateur radio service?

If you're as concerned about this as I am, I encourage you to contact
SCRRBA (20kHz@scrrba.org) and make your feelings known. I've included
my open letter below...

Thanks... //Brent

==========

To: 20kHz@scrrba.org

Sirs -

I was rather excited to learn that SCRBBA had adopted a 20kHz
bandplan for the repeater subband at 440 MHz. I had hopes that
this was motivated, at least in part, by a desire to remediate the
long-festering resentment that has built up in the amateur community
over the fact that some 96% of the repeater pairs in the band were
allocated for private/closed systems. I am certain you are not
unaware of the controversy - it has been debated over packet, in
tirades on the internet, and it has created enough consternation
and frustration to drive otherwise rational individuals to attempt
to organize rival coordination bodies to directly challenge SCRRBA.
Most of this was not very constructive -

Needless to say, I was shocked and **very** disappointed to discover
that of the additional fifty repeater pairs that we pick up, only four
are to be allocated to open repeaters - bringing the total allotment
available to the general amateur community up to 12 out of 250 pairs.

I enjoy using 440 MHz. Its propagation characteristics, band size,
and equipment requirements (think HT-sized antennas) make it rather
unique among readily accessible VHF/UHF bands. The wide array of

equipment available for the band, both amateur and modified commercial make it very accessible. The fact that most commercial (and emergency) communications in the greater Los Angeles area depend on UHF equipment makes it the ideal band to train those who would go out and contribute in the real world - particularly those who might be needed to piece together commercial and emergency services after a major disaster.

Dedicating such a large fraction of the repeater space to private enclaves is counter-productive, and counter to the spirit of amateur radio. I urge you to reconsider the current bandplan, and increase the number of allocations available for open repeaters.

3980. 3950 Jammers hit new 'low'

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-16 00:00:00 UTC
From: John Cermack <jcer456@emachine.com>
Message-ID: <373EDD03.630EFC8E@emachine.com>
Source record: 142804
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.policy,rec.radio.amateur.misc

Opponents of free speech on the Liberty Net
(3950 Jammers) hit a new low last Saturday
night.

Harrison, a regular net participant, was
telling others of his wife's demise a few days
earlier. He was clearly suffering, and in
shock. But the other net participants
are his social friends, and he was describing
how his wife used to bring him popcorn while he
was on the air.

Then W9ART (Arthur Visor) began his jamming
right on top of the net and Harrison's
transmission. W9ART was playing tapes, and
noise makers, while Harrison was describing the
bible that his wife left behind for him
to read, and whether it would be buried with
her or not.

W9ART, and his mentor KK7HO (Tim Volz) have
defiled and disgraced the amateur radio
service, As well as normal behavior. Anyone
who could - or would, belittle someone while he
is eulogizing his (recently deceased) spouse,
has forfeited his place in a civilized society.

The only thing we can do about this latest
ourrage is to contact the lead enforcement officer
at the FCC. He is available via E-Mail at:

rholling@fcc.gov

He is William R. Hollingsworth (K4ZDH) aka, Rilley
Hollingsworth, and it's his job to remove this
cancer that is growing on our Amateur Radio
Service.

Thanks for taking a minute or two to email Rilley.

rholling@fcc.gov

3990. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7hlstp$1md@news.Hawaii.Edu>
Source record: 142833
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to

dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to:
majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your

article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Hi,
im after a design for a dual band 2m/70cm co-linear
antenna (i have a 5m fibreglass randome to house it in)
...something like an x500 or x700 would be nice!! Any
ideas would be greatly appreciated.

Thanks Mark mcarney@bigpond.com.au

<< showing the same evil traits here on
the web that ran you off the hambands courtesy of Mr Riley<<<<Riley
Hollingsworth ran ME off the ham bands? That's odd since I was just on 20. In
fact,I've spoken to the man twice and E-mailed him once and have never received
any type of a warning. Of course I'm no different from anyone else insofar as
heeding the rules and regs which I do.In fact, I'm an exemplary ham radio
operator and had received a diploma for excellence by the Royal Order of the
Wolf Hung. I apply my old Boy Scout principles to ham radio even though I was
kicked out of the Scouts for not knowing how to tie friggin' stupid knots but I
managed to tie up the scoutmaster in knots. I am very hurt at and dismayed by
the allegations of having been admonished by Mr.Hollingsworth. They are
unfounded and pernicious and I warn whomever is circulating them, to cease and
desist as KV4FZ will soon be getting. Thank you for you for your kind attention
to my statements on "wreck radio." Doc,AF2Y>>>>>>>>>>>>>

Paul Cooper wrote:
> may I point out that none of you caught the fact that Mr. Fisher
> does not have a good grasp of spelling....
While engaged in the fine art of flaming,
denouncing someone's spelling -called "spell laming"-
is considered a lowbrow cheap shot-
an attack on the form, rather then the substance of a post.
So most people don't do it.

>...why do you take the time to even discuss this?
Because it is the nature of intelligent people to enjoy
humor in the form of sharpening their wit
(regardless of the actual amount of wit they may possess)
against a person capable of providing challenging opposition.
Usually, the meanness in the repartee' is inversely proportional
to the quality of wit possessed by the combatants.
And Burt makes himself such an inviting target for derision!
As the song says, he's "simply irresistible."

> Would you really talk about him, ...
> no matter how intelligent or stupid he really is,
> when and if you were face to face? I do not think so.
Discounting the teenage and teen-like posters,
most people don't say he's "stupid."
I've said (in so many words) that he's obnoxious,
opinionated and stubborn. That's obviously true
to any observer and I dare say Burt would agree.
I'd certainly say that to his face and he'd
probably have a few choice nuggets for me, as well.

What does "hit list" mean coming from AF2Y? He has claimed on twenty meters that he has friends in the Teamsters Union in N. J. who will take care of people. Maybe that is what he means. This should be brought to the attention of the Deja News group. Maybe they will deal with someone who talks about a "hit list" and brags about tough Teamster officials who will act out his threats. There is no place for threats on this newsgroup.

HI Thomas,
My name is Pete Aymond,KA5KON.What do you want to do exactly?If you want to use your HT as a base a samll amp will help if you live in a fringe area of the repeater.If the repeater is local for you then all you really need is a Good antenna like a J-Pole and the bnc connector to PL259 connector and the coax!One point to keep in mind is that a HT at full power WILL get hot!A small amp will let you run the HT at low power levels and prevent this problem.This will also make up for the losses of the signal in the coax.
There are several good inexpensive J_poles on the market in the 30 to 50 dollar range. Amps very greatly in price but a 35 wattamp should do the trick for you at around 75 dollars! If you can get to a hamfest you can usually get one for about $30.00 in good condition. All together you should be able to get what you want for well under your budget price!
Well let me know if my advice helped. Also if you haveany other questions I'LL try to give you some answers if I can.

Well the trash is on this news group. This DoNkBoY99 is a loser doc! We all just have to face the fact that this guy is TRASH. It doesn't matter if he is Jew trash black trash or white trash I don't thing race or creed has anyuthing to do with it. I think that he is just plain trash. He hides brhind a proxy server out of NJ. Its a Bell labs Proxy supposed to protect one from Spam email but whos says that it is supposed to protect the rest of us from spam. This guy DoNkBoY99 is a chickenshit.He hasn't got the guts to tell who he is maybe some of us should conduct a massive letter campain to Lucent Technology about the filth that is being genrated from their Proxy server in NJ.

NNTP-Posting-Host: 204.178.22.5
X-Article-Creation-Date: Sat May 15 18:23:01 1999 GMT
X-Http-User-Agent: Mozilla/4.5 [en]
X-Http-Proxy: 1.0 lpwa.com:8000 (Apache/1.3.1), 1.0 x22.deja.com:80 (Squid/1.1.22) for client 204.178.22.5
From this info I can gather this much information about our loser friend DoNkBoY99
He is using deja.com as a posting host because one he does know how to use a direct news post or his server doesn't provide one. The Proxy Server does provide a News Server So this clown has to use Deja.com (

web based news server.
the NNTP-Posting Host line is the proxy server it self. 204.178.22.5
that belongs to Lucent Technology ie Bell Labs in NJ.
We can also tell that this fool is Using Netscape Communicator 4.5 and
the Lucent tech server is using Unix (Apache/1.3.1). By the style of
writing I would suspect that this person has Done Jamming on 3.8945Mhz.
The style of writing appears top be a white man imatating a black man
stereo type. I have hear Porkbut do this quite a few times on 3.8945.
I'm not saying that this DoNkBoY99 is Porkbut but there are some real
close clues that this person is Porkbut. One Porkbut does like to hide
and doesn't have the guts. He boasted how he was going to beat people up
at Dayton last year and didn't even go. He went to the Heartwell Hamfest
instead. Why? Cause nobody was there. everyone was in Dayton looking for
Porkbut. Porkbut runs Netscape 4.5 Communicator. Thats what
X-Http-User-Agent: Mozilla/4.5 [en] means. When ever you see Mozilla in
the User agent line it means that the user is using Netscape. Mozilla
used to be the name for Netscape till the internet got popular. I want
to remind all of you that I didnot say that this trash DoNkBoY99 was
porkbut I did say that his style of writing reminds me of Porkbut
jamming 3.8945. We all know that who ever this garbafe is we all know
that he is a chicken afraid to face the world.
Of course thats just my opinion I could be wrong.

Why would you think a 5x9 report from VK at 1110UTC on 20M running 800
watts is a big deal? Some would consider it proof thet you need more
antenna.
If you turn you output power down to 50 watts you would only be a 5x7
on the other end but that is usually more than sufficient.Turn down you
power,it's the law. Tracy

A while back, I had heard of ham living in New Mexico (USA), by the first name
of Bill, that did mods for some ICOM transceivers. (Bill) apparently replaced
some of the IF diodes for pin diodes reducing receive noise floor considerably ...
possibly along the lines Dr. Ulrich Rodhe's designs.

If anyone knows of Bill in Mew Mexico and/or how to get a hold of him ...
I would very much appreciate it.

thanks in advance,
-- mark.

>
>73 de KF6KNB

Why all the animosity towards the CB'rs? CB's have probably spurred
many people on to becoming HAM's (as I am currently studying to get my
no code tech license). I'll grant you that there are many crude,
obnoxious operators running illegal equipment and such but from what I
hear, this is not something that is isolated on 11 meters.

I hope it's not a "better than thou" attitude. With the shear numbers
of people who have become HAM's, that is proof that almost anyone with
an interest who can study a book and take a test, can get a license.
Much like a driver's license although I'll grant you, "different".

I drive a truck for a living. A CB is an essential tool for me on the
road. I am not happy with what I hear on the radio sometimes, and I
make this known to the offending operators. But as I see it, the at
times "utter chaos" that's experienced on the CB was for the most part
caused by the FCC's lack of enforcement or licensing procedures.
Truck driving attracts many social non-conforms. Give them a mike to
hide behind and they'll say almost anything to anybody. Base
operators are in many respects, the same. But there are many who
respect the privilege of operating a radio, albeit a CB, and conduct
themselves accordingly.

Having learned something of radio frequencies as the result of my studying to become a HAM, it now seems dumb to me to even have the CB's on the 11 meter band. There is far too much interference during the daytime hours and the band could probably be more efficiently used by HAM's for DXing.

But having said all of this, things are as they are. CB's are radios just the same as any HAM radio. They transmit and they receive. If it weren't for the few friendly and patient HAM operators I've talked to in the recent months, I wouldn't be studying to take that test now. It's a hobby. Hobbies are supposed to be enjoyable. I've always been willing to share my knowledge of any of my hobbies to anyone interested. And I certainly never spurned somebody who was interested in a different hobby than mine.

Just my two cents.

Jim

>

That's true, and exactly the point. A ham has demonstrated that they put forth the time and effort to learn about the radio hobby, and have earned the privilege to operate. When a cb'er posts to the effect that they are the same as a ham operator, it is bound to annoy those who actually educated themselves in order to earn a license.

Combine this with the fact that a lot of hams get blamed for the interference caused by all of the over modulated, off frequency, wide banded, roger beep, echo mike, not-so-linear amplified, illegally obtained and/or modified "cb" radios, and it is understandable why a ham might respond with some negativity to cb related posts in an obviously ham related newsgroup.

I'm sure that if these cb related posts were kept in the proper newsgroups, it would go a long way towards eliminating the friction. Like I said in my earlier post, if I wanted to read the cb related junk, I would go to rec.radio.cb.

>I drive a truck for a living. A CB is an essential tool for me on the
>road. I am not happy with what I hear on the radio sometimes, and I
>make this known to the offending operators. But as I see it, the at
>times "utter chaos" that's experienced on the CB was for the most part
>caused by the FCC's lack of enforcement or licensing procedures.
>Truck driving attracts many social non-conforms. Give them a mike to
>hide behind and they'll say almost anything to anybody. Base
>operators are in many respects, the same. But there are many who
>respect the privilege of operating a radio, albeit a CB, and conduct
>themselves accordingly.
>
>Having learned something of radio frequencies as the result of my
>studying to become a HAM, it now seems dumb to me to even have the

>CB's on the 11 meter band. There is far too much interference during
>the daytime hours and the band could probably be more efficiently used
>by HAM's for DXing.
>

I'll agree here. As originally designed, cb communications were to be limited to a maximum distance of 150 miles. There was also a limit on antenna height and power. If the cb frequencies had been chosen in a part of the spectrum where there was little or no possibility of DX propagation, cb would not be the mess it is today. Big antennas and amplifiers would be of little benefit, so those who had a true desire to work greater distances would be motivated to put forth the effort to obtain properly licensed privileges.

>But having said all of this, things are as they are. CB's are radios
>just the same as any HAM radio.

I have to disagree here. CB radios are designed as cheaply as possible, while including as many chrome knobs as possible. The performance of most of these rigs is marginal at best, receive specs are crap, and transmit is far from pure.

>They transmit and they receive.

Yes, but how well and how clean is another story.

>If it weren't for the few friendly and patient HAM operators I've talked
>to in the recent months, I wouldn't be studying to take that test now.
>It's a hobby. Hobbies are supposed to be enjoyable. I've always been
>willing to share my knowledge of any of my hobbies to anyone
>interested. And I certainly never spurned somebody who was interested
>in a different hobby than mine.
>

>Just my two cents.
>
>Jim

I too am willing to provide whatever assistance I can to someone who expresses the desire to advance themselves in the radio hobby. Additionally, I do not go out of my way to "spurn" anybody. To each his own, if a person has no desire to ever improve beyond that of a cb operator, more power to them. All I would ask is that they do not transmit in the ham bands, and likewise, that they post their messages in the appropriate newsgroup(s).

What a bunch of geek LOSER perverts KA9FOX and his fellow hen-pecked ham husbands were at this joint. What macho men you guys were. You can now return home and show your wives what studs you are (and they will say to themselves if you ever touch another woman I'll break your flabby ass).

These girls were laughing (all the way to the bank, they thought until they got their CHEAP ham TIPS) at these dorks.

I figure most of these jerks go to church on Sunday with their wives and then probably cut drivers off and bird them !

Greetings

I can wholeheartedly support this pro CW idea, where would we all be without carrier waves?

Now if this twat were to condone the continued use of Morse, then I would have to come out in opposition.

Carrier waves, the more the merrier!!

If your account of the "demonstration" is accurate, I agree
that it was moronic ... not only did it not do anything to
promote/explain amateur radio to "the masses," it actually
would likely promote more unreasonable fear of exposure to
RF, causing more pressure for antenna and operating
restrictions (which is one of the last things we need).

Imagine "Joe Average-Citizen" seeing meat cooked like that.
(assuming of course that a hot dog actually qualifies as
"meat" :-)

What's his likely reaction? Seeing himself as that hot dog
and thinking "I dont' want some ham living next to ME, cooking
my (fill in your own choice of body part) with his signal!!!"

I find it hard to imagine that Gordon could be so stupid.
I thought he had more common sense that pulling a ridiculous
stunt like that. (not that I know him well)

4035. rogue cancels logged by usenet admins

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: postmaster@warez.phantom.com
Message-ID: <slrn7jvutv.rh.postmaster@viking.cris.com>
Source record: 142629

Usenet monitors have now noticed the rogue cancels from BellSouth.net.
From the most recent cancel report on news.admin.net-abuse.usenet, it
is clear that they have been logged. The next step will be for others
to notify BellSouth of the problem and subsequently to cut off its
newsfeeds if it doesn't correct the problem. The Atlanta canceler's
days are numbered, and (s)he may even wind up in court if BellSouth
follows its past practices.

Hi Dan, We have the newsgroup rec.radio.amateur.boatanchors, and at least two BA email lists, one of which is a pay-to-read, and another which is free: boatanchors@listserv.tempe.gov. To sub to the free one, send an email to listserv@listserv.tempe.gov and only write:
subscribe boatanchors
and you'll be hooked up.

There is also a list devoted to homebrewing with tube; to subscribe, send an email to majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs
and you'll be hooked up.

Don't forget our Ham Radio History email list, too; to sub, send an email to hamradiohistory-subscribe@egroups.com; you can leave the body of the mail blank.

73, Jeff KH6O

4038. Re: Gordo West at Dayton

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: "Julian M. Frost" <jfrost@odaiko.ss.uci.edu>
Message-ID: <Pine.LNX.3.96.990517140016.18237A-100000@odaiko.ss.uci.edu>
Source record: 142632

As someone who was there, both at the booth when the demonstration occurred, and before, when Gordo was asked to "do something" for the TV crew, allow me to explain what happened:

Gordon and I were walking around the booths before the opening of the Hamvention on Friday. We were approached by a Hamvention committee member. The committee member explained to us that the TV crew had been interviewing people at the show, but were upset because none of the footage they had recorded was in the least bit interesting which was a problem, considering that the Hamvention is the biggest thing to hit Dayton each year.

Gordon agreed to do the interview, which was conducted just after 6pm on Friday evening at the Gordon West booth. The interview lasted approximately 15 minutes, during which time Gordon talked at length about the ARRL, the Hamvention, Amateur Television, Digital communications, satellite communications, worldwide voice communications, hand held radios, repeaters, the emergency communication done by thousands of hams hams each year, and of course, CW.

During the discussion of CW, he stated that in the old days, hams would send Morse code using a spark-gap transmitter that would send a signal across the airwaves by jumping a spark across two electrical contacts. He then used his "Blazing Pickle" apparatus to demonstrate the spark-gap method of sending CW. Unfortunately, we did not have access to any pickles, so a hot dog weiner was used instead. The interviewer, Channel 2's Jeanie Hogan, then sent the number 2 (as in "Channel 2") in CW... dididahdahdah. It was explained that spark-gap transmitters were no longer used. The entire CW portion of the interview lasted about 5 of the fifteen minutes of footage recorded.

What was shown on the TV news at 11pm Friday evening (and again on Saturday morning, apparently) was a 3 minute segment that contained *only* the "Blazing Pickle". Later newscasts on Saturday included more from the Hamvention interview. Most importantly, what was shown on the clip on television were a group of people *enjoying* the Hamvention and *enjoying* ham radio.

Tim Hynde asked what a non-ham would think of this demonstration, and called it "moronic". As Gordon writes ham radio instructional manuals, we got to meet *plenty* of non-hams as well as seasoned hams at the booth, many of whom had seen the Blazing Pickle (hot dog) demo. The reaction was amazing. Both hams and non-hams alike thought it was great. We did, however, have *one* negative response, from someone claiming to be the Public Relations personnel for a large amateur radio group. When asked if he had seen the whole interview, he said "no". When asked if he had been

there when the committee member asked Gordon to do an interview, he said "no". When asked if he had done an interview for the camera crew on behalf of his organization, his answer was again, "no".

When speaking from a position of ignorance, as this person was, and when claiming to be a Public Relations official of one of the largest amateur radio groups in this country, one would think that a little caution would be justified. Instead, this person launched into an attack on Gordon while he was at a distributor's booth. He did not wear a name badge, neither did he introduce himself by name, or by callsign (though we have since found out who this person is)... he simply waded in. What great PR for all those watching and listening in!

When this "PR" person later saw further footage of the interview containing many of the things he (and Tim) accused Gordon of not talking about, he (apparently) returned to the booth where he had verbally attacked Gordon, and apologized to the owner of the store who's booth it was. He also (supposedly) went to the CQ Magazine booth and apologized there. It seems that he had taken his tirade there too because they print some of Gordon's articles. In fact, it seems that the only person he didn't apologize to was Gordon himself.

Ham radio needs new blood. Good PR is what is needed, and if the response of the people at the Hamvention are anything to go by, this is what they got. We have no control over what the media shows on their nightly "news" broadcasts, but what we can do, when asked, is show them something interesting, something positive, something fun, and something memorable. Surely this is better than the first response from one group of hams when asked about their thoughts about the Hamvention, "Well, attendance was down". Be positive or you'll never get new hams.

Julian

Incident 2:

>> Harrison, a regular net participant, was
>> telling others of his wife's demise a few days
>> earlier. He was clearly suffering, and in
>> shock. But the other net participants
>> are his social friends, and he was describing
>> how his wife used to bring him popcorn while he
>> was on the air.

Both incidents noted above were equally disgusting.

Anyone who would stoop so low as take a swipe at a person who has
just lost a loved one needs to be taken out someplace and have several
.357 rounds >pumped into< their disgusting and depraved brain at close
range, stuffed into a 55 gallon drum with lead bars, then dumped into the
Offshore Atlantic Dump Site. (to preserve the collective human gene-pool
and any respectful place for the deceased from the bile of such a perpetrator)

I'm a SWL and heard this last Sat nite. I don't agree with all of what the 3950
regulars say on the L. Net, but this act was sick and beyond any justification!

A VERY disgusted SWL

I am trying to get my Kenwood programer working for doing the kenwood TK 930 and TK 940 mobiles. So far it doesn't seem to communicate with the radios. I have searched the web and found two schematics for a programer but the wiring to the mike connectors do not match each other. Can anybody clue me into the correct pin out for the mike connector. My programmer uses a 5 volt regulator and obtains its power from the mike connector. Please respond by email Thanks Don KB6GQA.

I agree and it's unfortunate that many times the media can edit a piece in such a way that it makes it look really bad, I just didn't think showing a hot dog being cooked by high voltage with sparks flying up and down the wire was the best idea when asked to show them something "interesting".

Why does anyone find that surprising ? It is a sad commentary on Ham Radio as well as the city of Dayton.

4046. Morse Code Timing

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: David Hitchner <hitchner@worldnet.att.net>
Message-ID: <7hqi12$ec4$1@bgtnsc02.worldnet.att.net>
Source record: 142640

I am trying to generate morse code using a computer.

What I know:

Dash Length = 3 Dot Lengths
Space between Dots/Dashes = 1 Dot Length
Character Spacing = 3 Dot Lengths
Word Spacing = 7 Dot Lengths

What I have not been able to determine is the Dot Length for a
given Words Per Minute. For example: What is the Dot Length
in milliseconds for a code rate of 5 WPM.

I can generate code with no problem but I not sure about the
actual timing. Any help would be appreciated.

> they *learned* to get their drivers license,

Give me an example, I can't think of one thing you learn to get a
driver's license that you wouldn't need to know when you drive.

why not drop that
> requirement too? Just let 'em all drive, drop the roadtest
> requirement!

That would be like dropping the rules and technical requirements on the
ham test. Both are needed and used by everyone in Ham radio. We are
talking about Morse Code which does NOT have to be used in order to
operate Ham radio. If it was required to learn how to ride a horse to
get that driver's license, then you could argue about that, but they
don't test for stuff EVERY driver won't need to know in order to drive.

> Ever stop to think that maybe the government intended to keep some
> people out?

No, they droped the code on the tech to get people in, not out. They
would drop the code for other classes too if they could, but it is an
international requirement, so it will take a bit longer to do.

Why not drop the code requirment for commercial broadcast
> while we're at it?

There never was or is a code requirement for commercial broadcast.

The standard timing is "PARIS " sent five times in one minute for 5 wpm.
I think you have enough to work it out from there.

Michael.

Lest people get the wrong impression from some of the posts here, it is worthwhile to note that Harrison Perl, K4GAR, who is probably the most consistent and long-standing participant in the weekly patriotic, perfectly legal, and above-board Liberty Net on 3950, is himself Jewish.

Like other Jewish truth-tellers Alfred Lilienthal, Benjamin Freedman, and Israel Shahak, Harrison is not afraid to criticize the Jewish establishment when it does wrong.

It was Harrison who lost his wife recently.

And it was W9ART, one of the inveterate jammers on that frequency, who spat gross obscenities in his face as Harrison expressed his grief. Two weeks earlier, W9ART vomited obscenities in the face of Riley Hollingsworth when he checked in on 3950. W9ART (Arthur Visser, note spelling) has been doing this sort of thing regularly for over two years.

Strangely, as far as I can tell, W9ART still possesses an amateur license.

With all good wishes,

Kevin, WB4AIO.

Hi, I have an Astatic D-104 Night Eagle microphone for sale for $50.00. It is 3 months old and is in like new condition in all respects. It is wired for a Ranger 2950. I had to sell all me gear to pay a debt and the Night Eagle mic is the only thing I have left. I was hoping to be able to keep it because it is such a nice mic but I have to sell it too. I will ship C.O.D or pre-paid. Please email me at: Doug-W@webtv.net if you are interested. Thanks All....Doug Wells

The Better Amateur Radio Federation is proud to announce the launch of its new and exciting B.A.R.F. e-mail service. Members, supporters and friends are urged to visit the B.A.R.F. home page and sign up for B.A.R.F. mail. It takes less than five minutes to open your B.A.R.F. e-mail account. This account is totally free and you can access it anytime (24 hours a day - 7 days a week) from any terminal - at home or away. This fantastic service is made available by the B.A.R.F. membership around the globe and our friends at ZZN. Visit the B.A.R.F. page at:

http://www.angelfire.com/in/w9xn

You can also visit the B.A.R.F. mail domain server at:

http://barf.zzn.com

But wait... that's not all the B.A.R.F. has to offer! If you like discussion groups then you are cordially invited to participate in the B.A.R.F. Forum. The B.A.R.F. Forum is dedicated to the free, open and robust discussion of amateur radio's hottest topics. The forum is open to the public. We invite everyone, friend or foe, to join in the lively discussions that are certain to develop. The B.A.R.F. Forum is a service of the Better Amateur Radio Federation and our friends at Delphi. Visit the B.A.R.F. Forum at:

http://www.delphi.com/w9xn/start/

Start your summer season off in style by participating in the services offered by the B.A.R.F. You'll be glad that you did!

I am in need of an rlc-2A for my UHF repeater if you have one that you want to move to upgrade to something else please E-mail. I need at least the controler and rack mount cabinent. if you have the auto-patch option I would be interested but its not a must. dont need DVR stuff. I have the firmware update for the unit. just send E-mail as to what you have and we can go from there.

In article <D5v%2.4605$mj.123333@dfiatx1-snr1.gtei.net>, kf6knb@qsl.net
spewed the following.....
> I can call myself an amateur radio operator because that's what it states on
> my LICENSE, which grants me that authority. What justification and /or
> authority do you have that allows you to claim that status, or did you just
> make it up - like your cb "handle" or "numbers" ? :>)
>
> 73 de KF6KNB

I guess my justification would have to be having a ham callsign as well.
Although I hate to admit it I do happen to carry the callsign of kb0udf.
I quit talking on ham radio a few years ago, and not because of a lack of
knowledge or a lack of interest, but for a lack of interesting people to
talk to. I have been a CB'er for years, since I was 12, I'm now almost
27, and I knew about ham radio for many years. Well a few of my friends
decided to get there tickets and I never really wanted to until a few
years later. I saw the No-Code route as a quick and dirty methode to get
on the air with a callsign. I was really hyped, i figured I would get
that ticket and then study my ass off to learn the code and upgrade.
Well just for that purpose I bought a used shortwave receiver so I could
listen to the HF etiquitte and try to copy the W1AW code bulletins. Well
after listening for a few months I found much to my surprise there was
less arguing and bad apples on the CB band in my area. So i reverted
back to chatting on 2 meters. Well all I found was a bunch of guys with
no lives and there shirt collars to tight. I mean everywhere I went
there they were, passing rumors, always wanted to take the credit, and
turning everything into a contest. Well I like the more laid back type
of people, the ones who have other interest and hobbies outside of the
radio and I just didn't find them on ham radio. Now mabey it's my fault
and I am expecting to much, but for everyday chit chat and just having a
good time, for me, CB is it. I have seen one to many CB'ers get there
tickets, upgrade, and then just dissapear from CB. I mean they just
turned there backs on what got them started in radio to begin with.
Now I don't know about you guys but I wouldn't want to teach somebody how
to build a boat and then they never take me out on it.

Where did I get my facts about my first statement? I payed attention. I
see alot of the same people posting to the CB groups and the Ham groups
and sometimes even cross posting to both.

I don't have a "handle", why should I, I'm not a suitcase. And I don't
use numbers either, to impersonal. I just use my name, short easy and I
have nothing to hide from.

So when a guy want's to post a CB wesite in a ham group why give him a hard time? You saw the header, why did you read the message then? Mabey he's a ham and know's that alot of hams are also CB'ers too. And hey he's just trying to let them know about his site.

Hey I don't over modulate my signal or run excessive power and I don't talk on the freeband, so I would have to say I sleep pretty good at night.

If anyone would like to continue this conversation lets take it to email and give the rest of the group a break. Just remember to remove NOSPAM from my address. Have a good week.

Todd

Great news for that guy that was killed in NY last year when the beat cop tossed the radio at him.
He died when he was strick in the head.
Stick with Motorola...BTW...Nice list and update.

I have no "nuggets" for you.

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. See Hillary do something naked.
3. A blond naked chic being held by a female ham!.
4. Take the Burt Poll, about Clinton ham spouses, girlfriends
5. Attacks against Burt K1OIK's opinion of ham radio in a national publication
for broadcasters
6. Burt's opinion on the First Affair in the White House with a picture of the
new first couple.
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. A test for your SVGA monitor
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics

Unbelievable story, Rick. You had a problem with a purchase, called up
the dealer, and had it all straightened out immediately...

Why didn't you post defamatory public letters in newsgroups when you
first noticed the missing parts, Rick? You know, bitch and moan BEFORE
you called the dealer to straighten things out?

Hey Dave;
How was bellsouth supposed to cancel this? I'm not on bellsouth! BTW
DICKBOY99 is the one I think you talking about A.K.A. porkbutt! We all
know that porkbutt isn't smart enough to set up a proxy server. He said
he had his Girlfriend set it up for him. More likly his soninlaw set it
up for him. I was talking to Oris and he told me that dickboy99 thinks
that I'm Oris HA HA HA porkbutt I'm closer to you than you would ever
```

believe. Well dick head I'm not Oris. In fact you puss growing
boil behind the ears fool you know me, quite well and I know about all
your part97 violations. I know all about your Jamming on 3.8945 and now
you use the same style here in the newsgroups. So your going to start
your crap in the news groups since the F.C.C. guy has taken your vanity
call away. Well Dickboy99 what do you have to say for yourself now. I
think that your a little boy and the F.C.C. is going to take your toys
away and now your crying. I geuss you can go back to building Texas Star
amps for the trailer trash on 11 meters. dickboy99 oops DoNkBoY99
dickboy99 isn't trailer trash he is trailer toxic waste.

Any spelling mistakes Chip ?

Several of the ... at Dayton were looking at the FT100....I thought this might be of interest:

I got my 1000MP back today from Yaesu, they replaced the Control Unit. Chip told me he knew of no known problems with this part...yet, I found several others at the various hospitality suites who had to return their 1000MPs for various problems relating to the control units.

Why can't Yaesu be honest with us? I keep hearing from my JA buddies that Yaesu Japan is losing money and in financial difficulties....this could be why, their home market knows what's up.

Good luck finding one. I don't go to computer shows unless there's
something there I may need at better prices than I can get locally -
which basically means you won't see me at a computer show.

But, just to show I still think the same about you; Burpie Boy, you
are an asshole.

4081. rogue cancels logged by usenet admins

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: root@warez.phantom.com
Message-ID: <slrn7k01pa.6k.root@wild.net>
Source record: 142701

Usenet monitors have now noticed the rogue cancels from BellSouth.net. From the most recent cancel report on news.admin.net-abuse.usenet, it is clear that they have been logged. The next step will be for others to notify BellSouth of the problem and subsequently to cut off its newsfeeds if it doesn't correct the problem. The Atlanta canceler's days are numbered, and (s)he may even wind up in court if BellSouth follows its past practices.

With Fieldday and the June VHF contests just around the corner, why not save the old "voice box" and use a software digital voice keyer. "VoiceKeyExpress" works great on your lap top or full sized PC. Version 1.3.5 is available for downloading at the URL below. Runs as a standalone application, or is fully integrated with the FT-Manager radio control software. Don't wait till the last minute to register, as I'll be on vacation during both of the contests.

Dear folks;
I've realized what the problem with CW is. One has to
learn it. On the other hand, it's the only form of digital communication
which humans can hear and translate. Of course learning cw would be a lot
more fun if it were installed in a special brain implant. This would
stimulate the pleasure centre whenever the person got a character right.
I can imagine the following conversation between a married couple:

Wife: "Let's go to bed darling."
Husband: Not yet my love, I need to practice more cw."
Wife: "But you've been at it all day."
Husband; "Aw just five more minutes alright?"

If that was possible to do, cw would become more popular than sex and it
wouldn't have the annoying side effect of children either. Hmmm, I just
the spirit of W. C. Fields applauding and cheering. But seriously folks,
cw could be more fun if it were taught correctly. I unfortunately learned
it the wrong way so it took me so long to get it right.
By the way, have you listened to the 40M cw portion of the band
with a wide filter? It sounds like an avant-garde music piece. Perhaps
that could be a new musical form. I think I might just create my own cw
piece using oscilators to generate tones which could be listened to with
the filters in a graphic equalizer.
Oh, one more thing, why doesn't some sci. fiction writer develope
a race of beings who communicate in cw? I've never once, in all my avid
reading, come across that.
Yours,

Bruce Atchison, a starving electronic music composer. Please enquire about
receiving a list of my 14 inexpensive cassette albums.

It is a myth that humans can hear RF without help from electronics. If electronics are needed anyway, what's wrong with a little more electronics on that single chip?

> But seriously folks, cw could be more fun if it were taught correctly.

That's like saying that chocolate ice cream could be fun if taught correctly. Not true. I simply do not like chocolate ice cream. People vary in their ideas of "fun". What's wrong with live and let live?

> Oh, one more thing, why doesn't some sci. fiction writer develope

Actually during evolution, several species tried Morse code for communications but predators with higher throughputs caused their immediate extinctions. :-)

From: ronm@hevanet.com
Message-ID: <7hpgcmdm1@glisan.hevanet.com>
Source record: 142715

Hello all,

Here in the Pacific Northwest we are hearing a fairly strong signal of "white noise" on 3.940 most of the day. It started about 3 weeks ago (again) and it seems to be dependent on band conditions as to how loud it is. About a year ago we had this also. Does anyone have any ideas? Or what can be done. People from Seattle to Boise, to the southern Oregon coast have reported it both morning and evening.

Please reply via email to: ronm@hevanet.com

Thanks in advance for your help/suggestions.

4098. Wanted:Police Motorcycle Radios

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: Mark Masa <mark@kelltech.com>
Message-ID: <3740674B.75590F9@kelltech.com>
Source record: 142718

I'm restoring a 1952 Harley Davidson police motorcycle and the only thing that I'm missing is the radio setup. I am interested in ANY pre 1970 police motorcycle radio since I can use it as trading material with the few other people in the country who are into this sort of thing. Specifically, I think what is correct for my bike is a Motorola FM TRU41. It is two boxes about 18" long x 10" wide x 10" high. (these dimensions are approximate) The receiver was in one box and the transmitter was in the other. The power supply was in one of the boxes also, but I'm not sure which one. There are interconnecting cables between the two boxes as well as a cable that went up to the control head mounted on the handlebars. The mic came from one of the boxes and was mounted on the tank. It is a tube radio. This is the one I need for my bike but am interested in ANY ANY ANY ANY pre 1970 motorcycle radio, especially if it has tubes. I hope somebody can help me.
Regards
Mark

Tim,
The fact remains that not one of those subject areas you
identify here are separate pass/fail test elements. You can
ignore several subject areas and still pass the test. Not so
for CW testing which is given, graded and must be
passed as a totally separate test element. I have said
before that if CW was to be integrated into the overall
test score rather than as a separate pass/fail element
as it is now, that I'd have no problem with that.
Indeed, when the CW test goes away, I expect that
there will be some CW related questions added into
the theory test just as there are questions already
there on other modes.

Cheers,
Bill K2UNK

Ya know I like the guy just fine, he seems to be sincere in promoting amateur radio but Channel 7 in Dayton while reporting the fest showed Gordon West demonstrating to the reporter how to cook a hot dog using a spark gap transmitter. That was the whole piece, no mention of communications or anything else I can't imagine what a ham OR non-ham would get from such a report.

What a moronic way to demonstrate ham radio.

Tim

Any one have any information on a Hallicrafters SX-28 that has a silverish gray front panel with red lettering. This looks original and has been in storage for some time.
thank you,

Would operating a voice or digital mode help prevent starving and
suffering? (You sound like an NCI member! =:o)

>Get out once in a while and realize there is much more than your stupid =
>code and HAM radio's.

Hey "Spike," over 1700 children die each hour of the day from malnutrition
and disease (a UN statistic); why are *you* worrying about the code and
hams instead of doing something to help prevent all those deaths? Why
are *you* hanging out on a scanner, shortwave, or ham NG and posting to
same, instead of ending the world's suffering?

Here's something else for you to ponder: Which came first, the anti-code
post or the pro-code post?

4118. A serious question that deserves a serious answer.

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-17 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990516221407.04875.00001413@ng19.aol.com>
Source record: 142818

Just Inï¿½ A serious question that deserves a serious answer.

Question: Even if all of the things the B.A.R.F is telling me about this conflict are true, it is just old history and needs to be put aside. Why can't the B.A.R.F. just forget about the past and go on with its Ham Radio life? Doesn't the B.A.R.F. think that this whole affair has gone way too far?

Answer: I wonderï¿½ would you feel the same way if it was your license that had been put in jeopardy by a hate group that refuses to discuss the possibility of a negotiated settlement? I wonderï¿½ would you sit back and calmly watch while a cabal of money chiselers concocts a false indictment that eventually costs you your honest livelihood? I wonder if you would put up with having your radio lifeï¿½ and your private lifeï¿½ destroyed by hired goons who get their orders directly from Net Headquarters in Clearwater? Maybe you would.

I don't know you at allï¿½ and I have no way of knowing how you might react to injustice and foul play. If the "Nets" had perpetrated this conspiracy on you (simply because they could not deal with the truth), would you have run into hiding like a scared rabbit? After reading some of your other commentsï¿½ I have a hunch that you just might be in there battling for what you think is fair and trueï¿½ right up to the final hour.

The B.A.R.F. stands by its membership no matter what the odds. When we are wrongï¿½ we admit it, apologize, and move on. We all make mistakes in judgmentï¿½ and sometimes even mistakes in our actions. That is a part of being mortal human beings. However, when we are rightï¿½ and we know we are rightï¿½ and there is no other available alternative but to fight onï¿½ then fight on, we shallï¿½ regardless of the cost.

The B.A.R.F understands that the life of one solitary, innocent, soulï¿½ far away in the American Virgin Islandsï¿½ means but very little to the vast majority of Hams. Everyone has their own troubles to worry aboutï¿½ paying the mortgageï¿½ putting the children through collegeï¿½ and, most importantly, maintaining good and wholesome relationships in the family. Perhaps the B.A.R.F. is not for everyone. We accept that possibility as an exercise of personal choice and good conscience. But, please do not ask us to abandon the principles that we hold most dear based upon the conjecture that a few of our frequencies might become slightly less chaotic.

>CB'ers who understand this concept.

In the trucking business, which is where most of the CB's are sold and
operated, I would have to say that the types you are describing are
still a minority. Why it is true that not many have a desire to learn
more about their radio other than where to turn it on or off, the
majority do not run linear amplifiers. The echo/reverb thing seems to
be slowly fading away as it becomes more evident that you can't
understand anything anybody says with the echo crancked up. Roger
beeps are attacked by most everybody on air because they sound too
much like the beep that the qualcomm unit makes when you've received a
message.

You are right about the guys running the amps. They do not care what
kind of interference they cause or that nobody in a 3 mile radius can
talk when they key up. I'd love to see this equipment and behavior
squashed like a bug. It's useless. But again these guys
are the minority.

My biggest beef with CB's are the guys who think they can say anything
to anybody, anytime. I cringe when I think about somebody turning on
a CB for the first time and hearing what is said sometimes. But what
do they have to fear? The FCC hasn't done a thing to stop it. When
they abanded the licensing (registration) program they had, they
pretty much just washed their hands of the whole thing.

However, I do ocaisionally talk to someone on the road who dose try to
have their radio and antenna properly installed, if not by themselves,
then by a shop.

>-- There is a steady migration from 11 meters up into the 10 meter amateur
>band. I lived in Northern Virginia for several years and the CW portion of
>10 meters was, at times, nearly unusable because of the "freebanders." I
>am now in NE Tennessee and there are a few of them here. My KW amp is in
>the closet so I am not able to carry on 10 meter CW contacts on top of them.

I might point out here that several shops that I have frequented, have techs working in them that are HAM's. These are the guys who are turning up the pots, putting in the connex boards and roger beeps and selling, repairing and installing linear amplifiers. While most will advise them to stay off the frequencies that aren't in the 11 meter band, they have no problem selling and servicing radios that will undoubtedly be used for this purpose.

The radio manufacturers who market 10 meter radios capable of putting out much more power than necessary that are much too easily modified by anybody adventureous enough to unscrew the case, are responsible for some of the blame too.

But the bottom line is that for a trucker, having a radio to communicate with other drivers is almost essential for safe operation. Whether it's through CB's or another type of radio doesn't matter. The need is there. I would personally like to see the whole CB thing just killed and a better system created to take it's place. A testing and licensing program would be nice too.

>Anyone who sees the light, studies for his/her amateur license, and behaves
>him/herself on the amateur bands is welcome.

Thank you

Jim

The Bergen Amateur Radio Assn (BARA) is holding
its annual Spring Hamfest on Saturday June 5, 1999
at the Fairleigh Dickinson University in Teaneck NJ.
Located about 5 minutes west of the George Washington
bridge, this is one of the largest hamfests in the
tri-state area.
Located off Route 4 at River Rd (Fairleigh
Dickinson University) exit, in FDU's parking lot.

Hamfest opens at 8am for buyers. Sellers start arriving
at 6am.

VE Exams will be offered from 8am to 10am only, all classes.

Buyers donation is $5 each, XYL and Harmonics are free.

Sellers: $10 per space.
Limited electrical is available for $20 per space and requires advance
reservations.

Visit the BARA website for more details at
http://www.bara.org.
Or contact Jim Joyce, K2ZO at 201-664-6725 or
email Jim at jjjoyce@cybernex.net.

Refreshments and Facilities available.
Hope to see you all there.

Scanner and HT's can interefere with flight instruments and data systems.

As a ham and a scanner user you should know that.

I found a couple of CB sets (they were together) on the sidewalk once
waiting for the garbage truck. Of course I grabbed them. One of them
might be cnvertable, the other isn't worth it. I also bought a CB set at
a garage sale for five dollars, which might be converted. The point is
that I took these out of circulation as CB sets, because I sure won't use
them for CB. If they don't get converted to ten meters, the parts from
them will find their way into something else.

Of course, I'd love to find an SSB CB set in the garbage.

John,

Yes, of course. There's the odd chance that your hobby device can
interfere with a crucial instrument at a critical moment. That's why
they ask you to turn off camcorders, and other portable electronic
devices during take off and landing. I comply with those requests
willingly.

I've never been denied boarding with them, however, and that is the
issue here. The argument that HT transceivers might be presented in
fight as detonation devices holds no water for me. I can just as easily
wave my car alarm control, and claim that it controls the fates of all
on board.

The original point was that these measures seem arbitrary and pointless.
I agree wholeheartedly.

Michael.

I do my shopping on the Internet. I get the news and announcements a week later than the attendees. I can live with that. I can do without impulse purchases, and better budgeting on major items. Hamventions and flea markets are the bane to both. I never did like crowds, especially not crowds destined to be low in its female complement. (Don't take this too much to heart. It includes motorcycle rallies and software conventions.) Lastly, the need for eyeball QSO's is declining because of the casual, instantaneous access we have to each other via the Internet.

While I don't agree that ham radio is on its death-bed, much has changed in recent years to cause its social role to be redefined. I shouldn't wonder that attendance is down.

Michael.

went on a business flight to
a city in USA recently.

took my MR8100 with wires and
speaker and also my antennae
with extended wire to hook into
it with high antennae about two
feet high.

put it into luggage and locked
it up and upon coming to the
check-in counter at the flight
center...told the supervisor
what I had and what it looks
like inside. you know,all those
wires. and bulky 8100 and etc.

she said, "thank you for your
candidness" and marked a few
comments and said, "enjoy your
flight"

same on way back: woman told me
"thanks for telling us and
enjoy your flight"...

bill conduit
etc.

What differnece does it make. The bottom
line is that none of these are mandatory and separate
pass/fail elements. YOU get to decide and
see if you can pass with or without any
of them...NOT so for CW.

>>Not so
>>for CW testing which is given, graded and must be

Judging from the average age of the hams you find populating the clubs and attending the hamfests I would tend to agree that Amateur Radio, as we knew it, is on its death bed. Where are all the young hams?
And I dont buy all that crap about code requirments killing off Amateur Radio.

Things change, Times change, people change. In todays world of instant satalite comminications, 100 TV channels, the internet, and computers, Amateur Radio just does not have the same "magic" as it did for us older hams. No longer are our young people listening with excitement to radio broadcasts or marveling over some mysterious voice comming from thousands of miles away. All that is now commonplace.

As B.B. King sang "The Thrill Is Gone".

I am not saying that is bad..... its just change.

I am sorry to hear that you have stoped your Amateur Radio activity.
It still has so much to offer and is still a worth while endever.
It's just getting harder to find others who share your interests.
You may stop haming but you will always be a ham.
Hope you someday reconsider and take these changing times as a challange.
An opertunity to explore new modes and new equipment.

Amateur Radio, as we knew it, is dying and it needs all the help it can get to hold on to what is left.

I am really sorry that the news media could not find any "good" stories at Dayton.
Could it be that they did not have a clue as to what the hamfest was all about?

It is really sad that the "MEDIA" feels the need to "create" the news instead of just reporting it.
Too bad there was no shootings there .... that would have made a great story for them.

Perhaps this is more of a reflection of US... the people who watch the news .... and find everyday life just too tame and boring to keep our attention for long.

Just another example of people preforming for the cameras.

4148. Suggestions for correcting high mobile SWR?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-18 00:00:00 UTC
From: W1PEV <paulvanasse@tp.net>
Message-ID: <vLd03.281$ku3.9772@news15.ispnews.com>
Source record: 142499

Heres the setup:

Alinco 605TQ with 12' of RG-8U running into a duplexer thats feeding (1) 2 meter amp and (1) 440 amp on the RADIO side of each amp. On the ANTENNA side of each amp, both amps feed another duplexer which then feeds into a single Diamond Magnet mount with a NR770HNMO antenna.

The 440 amp transmits about 75 watts and the 2 meter amp puts out about 90 watts. The SWR is identical with or without both the amps or the duplexers inline.

Ive managed to get the SWR on the VHF side down to 1.5:1 however Ive been unsuccessful getting the UHF side below 2:1.

I realize that Magnet mount antennas do not provide the best chassis ground so Im going to install a 2' x 3' x 1/4" plate of aluminum on the floor of the trunk and then run grounding straps from each amp to the aluminum plate and then a grounding strap from the plate to the chassis.

Does anyone have any additional suggestions?

Thanks and 73's

Ive just recently acquired an RCA Radiofone 150. Its 6 volt positive ground with a P-103 Dynamotor built into the radio. This thing is built like a tank with a 3/32" thick plate steel cabinet and chassis. Im guessing that it is circa 1965ish?

Is anyone familiar with this unit?

Thanks and 73's

I just had to enter this thread:
To equate this goofy 10 minute SCUBA test with a permanently disability
is ludicruous. Try a better example like doing your everyday routines
blindfolded or in a wheel chair, or with your dominant hand immobile for
24 hours. Then write back and tell the group how easy it was & don't
pick a nice sunny day; try it when the weather is inclement.

And what does this short, ten minute, CONTROLLED introduction to
survival have to do with Morse Code? Does one's life depend on CW? Get
real!!!!

Well I hope they can make the right changes in the coming year. It is an awsome undertaking to put a show of this size together, and DARA should be proud of the job they do, but I really think they should talk to more of the Hams who come each year, and see what suggestions they have.

Changing the date last year really hurt HV overall, I do agree with the change though because the weather here in April is so unsettled.

I have not seen the numbers for this year, but by the size of the crowd on Saturday, I agree with you that it was at lease down from last year by 20 to 30%.

I still had a blast, spent too much money, and I'll be there again next year. (I only live about ten miles south of Hara anyway :-))

Hello, I went to the Dayton Hamvention this year and was more than a little disappointed.

I am small flea market vendor. I sell used Motorola radios as a sideline and do maybe 10-15 shows a year. I have been doing this for 8 years. I have some idea of how a hamfest should be run and how to treat the attendees and vendors. I feel as time has gone on the Dayton Hamfest has failed more and more at this. Maybe being the biggest in the world comes with the attitude that you may do what you wish and people will deal with it. Some of the issues I feel need addressing:

1. $20 to attend a hamfest! I feel this is way too much for the everyday ham. I know of no other South Eastern USA Hamfest that charges this high an admittance fee. It is difficult to attract new hams to an event that cost this much, and certainly cuts down on foot traffic.

2. Poor attitudes on the parts of SOME staff! I watched as vehicles lined up at the gate at 9:AM Sunday morning. These were late check-ins. They were waiting on " A security person to escort them to their spaces." After waiting 30 minutes I questioned the gate staff. They told me that they had no idea why we were waiting, but I needed to talk to "The Fire Marshall " who was in a green tent", somewhere.

I went inside on foot and tried to speak to a large female staff member in the office trailer. She angrily told me that her gate people knew exactly what to do. She said that all vendors had been mailed "Legal documents" telling us we could only drive in and out at certain times. She again tried to blame all this on the "Fire Marshall."

I asked her why if they were all so well trained did they have a line of cars, that had been sent there by all the other gates, waiting on security escorts?' It was obvious that she simply wanted to yell at her volunteer staff on the radio, not help the late vendors. We never got to set up Sunday.

4. The Fire Marshall was the universal evil of the Dayton Hamfest this year. He was blamed for almost everything. If these accusations are true, well he works for someone too. The proper authorities should be addressed and I am sure that something can be worked out that will work for everyone.

3. All of our Vendors are happy! BS! I spoke to many vendors, and they feel these, and other issues are destroying Dayton. If issues like no electricity, multi-space fee penalties, and Mendelson's blasting all of us with their PA system are worthy of discussion, well let me know. I am thinking of starting a mailing list for Dayton attendees. E-Mail me at

wt2@prism.gatech.edu if you are interested. If I get enough response I will set it up. Thanks, Bill

The thing about Morse Code is that it seems that the OLD TIMERS are
saying that we did it and you should too. That is baloney. What some
cheese with that wine?

4172. FT-50R sticky buttons???

Newsgroup: rec.radio.amateur.misc

Hey all,

I have a Yaesu FT-50R dualband handheld, and recently some of the buttons have stopped working. At first, I thought it was a problem with the batteries but it isn't. The M(R) button was the first to go, but now I have problems even with the power button! Any ideas by email on how to remedy this would be greatly appreciated! Thanks for the time and consideration.

I must agree that due to intl. treaty users on the hf bands are required to and should know cw. however I dispute the use of a speed test in that particular language for upgrade or access to spectrum. 5wpm satisfies the intl. treaty, we should be testing on tech. knowledge or added knowledge of the rules and regs, for upgrade purpose. It used to be that you needed to know hand signals for your drivers test. I believe they dropped that requirement in my state, but even if it was still in place, should we test how fast one can give them to upgrade our drivers license, or how fast we can recognize various shapes and colors of road signs. No of course not and speed should not be an issue in amatuer radio cw. Only a working knowledge of the code is needed and that is what should be mandated. If an individual wants to use cw to a large extent and increases their speed, so be it, but for others that use fm ssb etc. basic working knowledge is all that is necessary and all that should be required.

Hello ,
My name is Lufroi"Pete" Aymond,KA5KON.I need Help to organize a club!
What I need MOST is a copy of a club charter to use as a Guideline and
suggestions on how to organize it.There are several hams in the area
who are interested and willing to help but none of us know how to get
started.ANY help would be greatly appreciated!!!

S/Lufroi"Pete" Aymond

No, they don't need to talk so much to "more of the Hams who come each year", but rather they need to talk to more of the hams who DON'T come each year.

If you want to find out why an event is on the wane, it won't be much help to talk to the ones who are addicted and come each year out of habit. What you'll need to do is suck it up and go have a talk with the disaffected who have bailed out. You might not be happy with what they have to say, but their input is crucial.
